Air France (Flight 296) Airbus A320

154

Air France Flight 296 was a chartered flight of a new Airbus A320-111 operated by Air Charter International for Air France. On 26 June 1988, the plane crashed while making a low pass over Mulhouse–Habsheim Airfield (ICAO airport code LFGB) as part of the Habsheim Air Show. Most of the crash sequence, which occurred in front of several thousand spectators, was caught on video.

This was the A320's first passenger flight and most of those on board were journalists and raffle competition winners who had won tickets in a promotional event by local businesses. The low-speed flyover, with landing gear down, was supposed to take place at an altitude of 100 feet (30 m); instead, the plane performed the flyover at 30 ft (9 m), skimmed the treetops of the forest at the end of the runway (which had not been shown on the airport map given to the pilots) and crashed.

The Airbus A320 family is a series of narrow-body airliners developed and produced by Airbus. The A320 was launched in March 1984, first flew on 22 February 1987, and was introduced in April 1988 by Air France. The first member of the family was followed by the stretched A321 (first delivered in January 1994), the shorter A319 (April 1996), and the even shorter A318 (July 2003).

The A320 series has two variants, the A320-100 and A320-200. Only 21 A320-100s were produced. These aircraft, the first to be manufactured, were delivered to Air Inter – later acquired by Air France – and British Airways as a result of an order from British Caledonian made prior to its acquisition. The primary differences from the -100 were the -200's wingtip fences and increased fuel capacity, providing increased range.

Scale: 1:100
Length: (375mm)
Width: (358mm)
Parts: 316 (12 pages)

This model has been designed in 2 styles.
On the ground (with wheels)
In Flight style (without wheels)
Is nesessary assemble the stand for the "in flight style*

*This model is Designed for Papercraft and is different in several ways from the Real Life Plane.
*Build the model by carefully watching the Assembly Instructions Video.
*Make sure you have the correct printer settings before printing.
It is recommended to use Adobe Acrobat Reader to print models at 100% scale option.
