AIR NEW ZEALAND

ATR 72-600

ATR 72-600

N/A

Air New Zealand began as Tasman Empire Airways Limited, founded in 1939 by an international agreement between New Zealand, Australia, and the United Kingdom. Its initial shareholders were the New Zealand Government, Union Airways of New Zealand, Qantas and the British Overseas Airways Corporation. It was formed to fly trans-Tasman routes and carry passengers, cargo and mail between Australia and New Zealand. Incorporated on 26 April 1940, it started operations four days later, on 30 April. Its first flight, flown with a Short S30 flying boat, connected Auckland and Sydney. Following World War II, TEAL operated weekly flights from Auckland to Sydney, and added Wellington and Fiji to its routings. The New Zealand and Australian governments purchased 50% stakes in TEAL in 1953, and the airline ended flying boat operations in favour of land-based turboprop airliners by 1960. On 1 April 1965, TEAL became Air New Zealand—the New Zealand government having purchased Australia's 50% stake in the carrier.

The ATR 72 is a twin-engine turboprop, short-haul regional airliner developed and produced in France and Italy by aircraft manufacturer ATR (French: Avions de transport régional or Italian: Aerei da Trasporto Regionale), a joint venture formed by French aerospace company Aérospatiale (now Airbus) and Italian aviation conglomerate Aeritalia (now Leonardo S.p.A.). The number "72" in its name is derived from the aircraft's typical standard seating capacity of 72 passengers.

During the 1980s, French aerospace company Aérospatiale and Italian aviation conglomerate Aeritalia merged their work on a new generation of regional aircraft

Scale: 1:120
Length: (226mm)
Width: (225mm)
Parts: N/A (5 pages)

Attach the parts in order.
A1 - D6
You can choose to make either a grouded style (With Wheels) or an in-flight style (without wheels) aircraft.

AIR NEW ZEALAND

*This model is designed for papercraft and is different in several ways from the real plane
*Build the model by carefully reading the Assembly Instructions.
*The final size of the model may vary slightly depending on the configuration of your printer
