STARFLYER

AIRBUS A320-214

Starflyer Airlines Airbus A320

231

Star Flyer Inc. (株式会社スターフライヤー, Kabushiki-gaisha Sutāfuraiyā), styled as StarFlyer, is a Japanese airline headquartered on the grounds of Kitakyushu Airport in Kokuraminami-ku, Kitakyūshū, Fukuoka Prefecture. It describes itself as a "hybrid airline" providing a higher level of service than low-cost carriers while having operating costs lower than full-service legacy carriers. Although the airline's IATA code is 7G, domestically it has also used the code MQ (which is designated outside Japan by the IATA to Envoy Air) for its flights.

Most of the StarFlyer A320 fleet is leased from GECAS and AWAS, but the airline purchased three A320s to replace older leased aircraft; JA01MC was retired on April 30, 2014 to bring its fleet to a total of ten aircraft, of which five aircraft were to be leased in the future.

The Airbus A320 family is a series of narrow-body airliners developed and produced by Airbus. The A320 was launched in March 1984, first flew on 22 February 1987, and was introduced in April 1988 by Air France. The first member of the family was followed by the stretched A321 (first delivered in January 1994), the shorter A319 (April 1996), and the even shorter A318 (July 2003).

The A320 series has two variants, the A320-100 and A320-200. Only 21 A320-100s were produced. These aircraft, the first to be manufactured, were delivered to Air Inter – later acquired by Air France – and British Airways as a result of an order from British Caledonian made prior to its acquisition. The primary differences from the -100 were the -200's wingtip fences and increased fuel capacity, providing increased range.

Scale: 1:100
Length: (375mm)
Width: (358mm)
Parts: 316 (12 pages)

This model has been designed in 2 styles.
On the ground (with wheels)
In Flight style (without wheels)
Is nesessary assemble the stand for the "in flight style*

*This model is Designed for Papercraft and is different in several ways from the Real Life Plane.
*Build the model by carefully watching the Assembly Instructions Video.
*Make sure you have the correct printer settings before printing.
It is recommended to use Adobe Acrobat Reader to print models at 100% scale option.
