U·S AIRWAYS

AIRBUS A320-214

US Airways (Flight 1549) Airbus A320

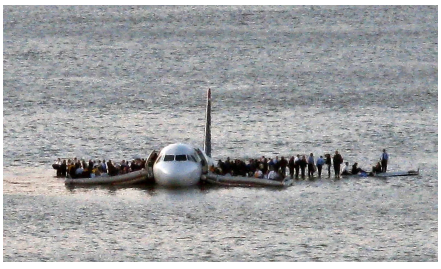
168

US Airways was a major airline in the United States. It was originally founded in Pittsburgh as a mail delivery airline called All American Aviation, which soon became a commercial passenger airline. In 1953, it was renamed Allegheny Airlines and operated under that name for a quarter-century.

US Airways Flight 1549 was a regularly scheduled US Airways flight from New York City's LaGuardia Airport to Charlotte and Seattle, in the United States. On January 15, 2009, the Airbus A320 serving the flight struck a flock of birds shortly after takeoff from LaGuardia, losing all engine power. Given their position in relation to the available airports and their low altitude, pilots Chesley "Sully" Sullenberger and Jeffrey Skiles decided to glide the plane to ditching on the Hudson River near Midtown Manhattan

The Airbus A320 family is a series of narrow-body airliners developed and produced by Airbus. The A320 was launched in March 1984, first flew on 22 February 1987, and was introduced in April 1988 by Air France. The first member of the family was followed by the stretched A321 (first delivered in January 1994), the shorter A319 (April 1996), and the even shorter A318 (July 2003).

The A320 series has two variants, the A320-100 and A320-200. Only 21 A320-100s were produced. These aircraft, the first to be manufactured, were delivered to Air Inter – later acquired by Air France – and British Airways as a result of an order from British Caledonian made prior to its acquisition. The primary differences from the -100 were the -200's wingtip fences and increased fuel capacity, providing increased range.



Scale: 1:100
Length: (375mm)
Width: (340mm)
Parts: 316 (12 pages)

This model has been designed in 2 styles.
On the ground (with wheels)
In Flight style (without wheels)
Is nesessary assemble the stand for the "in flight style*
