# RX-0 Unicorn Gundam

DESTROY MODE - Part 5 - Leg

## 5X BIGGER

The RX-0 Unicorn Gundam is first operated by the Visit Foundation as part of the "UC Project" at the Industrial 7 colony.

The RX-0 Unicorn Gundam was first seen by Anaheim Electronics student Banagher Links while it was on a test run. The Unicorn flew by the colony at an extremely fast rate, but Banagher was able to make it out as a mobile suit. The Unicorn Gundam is piloted by a Vist Foundation Pilot, Gael and the head of the House of Vist. Cardeas Vist put a lot of stress on the pilot when they entered a debris field during a test excercise near the Colony Industrial 7. When the test ended Gael notified Cardeas that some people might have seen the MS, but Cardeas said that the people would probably think it was a shooting star.

When the Neo Zeon remnants known as "The Sleeved", attacked the Industrial 7 Colony, the Londo Bell taskforce led by the Nahel Argama defended the colony with its mobile suit squadron along with the ECOAS special forces. The battle was half way over and Banagher was looking for Audrey Burne(the girl he rescued earlier) but instead found the Mobile Suit that he saw on the test run. He found Cardeaa Vist in the Cockpit of the MS. Banagher and Cardeas talked and before he died Banagher realized that Cardeas is his father. Banagher took the Unicorn Gundam and headed out.
