BOEING 737-800(BCF)

Amazon Prime Air Boeing 737-800(BCF)

141

Amazon Air (often branded as Prime Air) is a virtual cargo airline operating exclusively to transport Amazon packages. In 2017, it changed its name from Amazon Prime Air to Amazon Air to differentiate themselves from their Amazon Prime Air autonomous drone delivery service. However, the Prime Air logo remains on the aircraft. Until January 2021, the airline had relied on wet-leasing its aircraft from other operators, but going forward it is looking to directly own some aircraft. On the planes the airline owns, the airline will still rely on others for CMI (crew, maintenance, and insurance) leases.

Fleet; Amazon Air uses Boeing 737, Boeing 767 and Airbus A330 aircraft, all of which are operated by contracted partners. As of February 2024, the Amazon Air fleet consists of the following aircraft.

The Boeing 737 Next Generation, commonly abbreviated as 737NG, or 737 Next Gen, is a narrow-body aircraft powered by two jet engines and produced by Boeing Commercial Airplanes. Launched in 1993 as the third generation derivative of the Boeing 737, it has been produced since 1997 and is an upgrade of the 737 Classic (−300/-400/-500) series.

It has CFM International CFM56-7 series engines, a glass cockpit, and upgraded and redesigned interior configurations. The series includes four variants, the −600/-700/-800/-900, seating between 108 and 215 passengers. The 737NG's primary competition is the Airbus A320 family.

Scale: 1:100
Length: (395mm)
Width: (358mm)
Parts: 313 (12 pages)

Attach the parts in order.
A1 - I6
You can choose to make either a grouded style (With Wheels) or an in-flight style (without wheels) aircraft.

*This model is designed for papercraft and is different in several ways from the real plane
*Build the model by carefully reading the Assembly Instructions.
*The final size of the model may vary slightly depending on the configuration of your printer
