

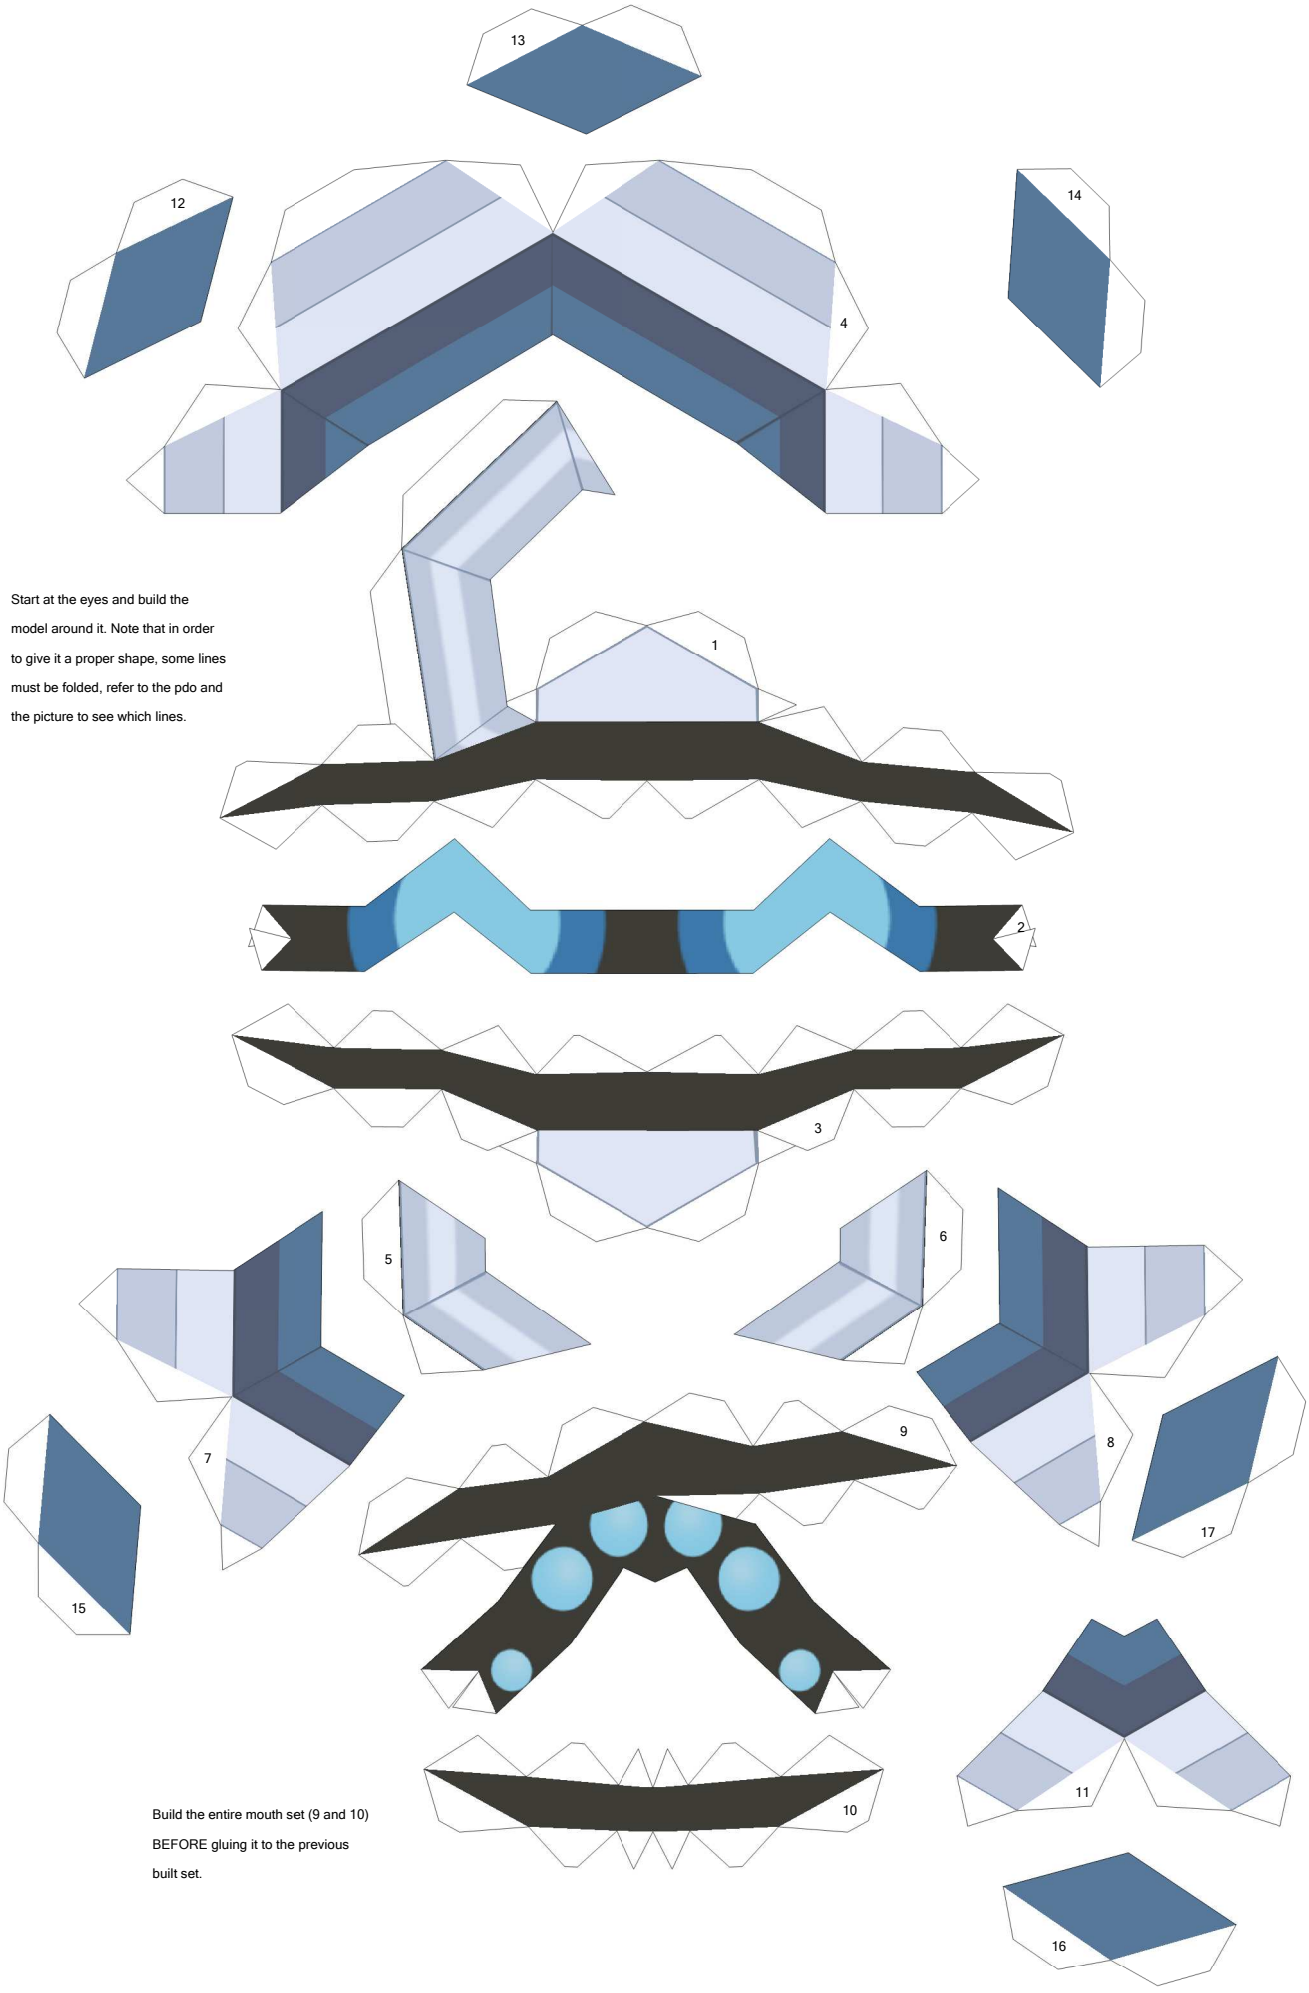
Cryogonal

by PODragon

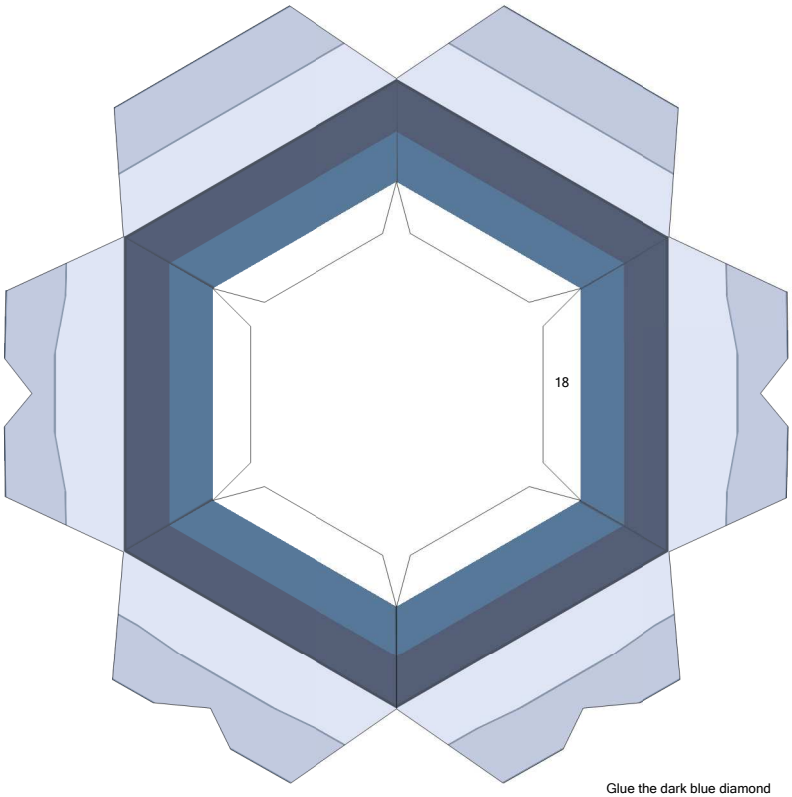
Build by LuIS

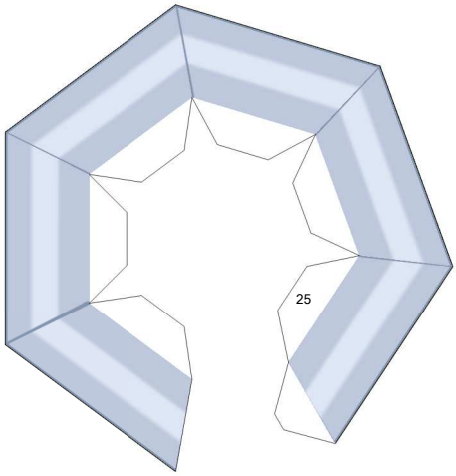
PaPerPokés
www.pokemonpapercraft.net



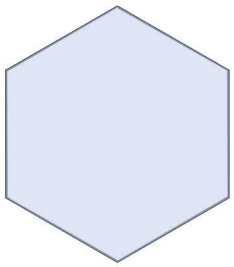
Start at the eyes and build the model around it. Note that in order to give it a proper shape, some lines must be folded, refer to the pdo and the picture to see which lines.

Build the entire mouth set (9 and 10) BEFORE gluing it to the previous built set.

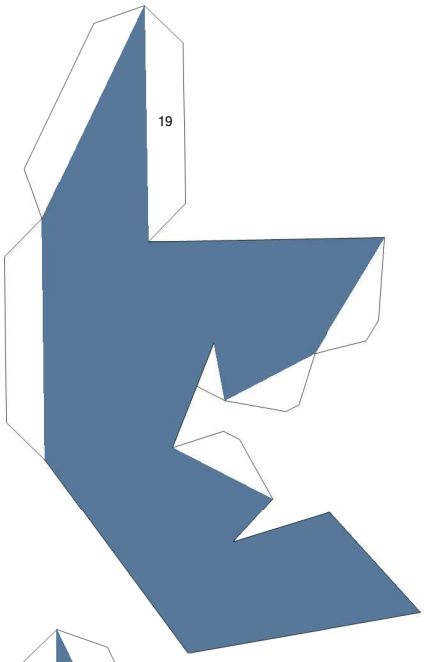




Close at the back



Glue the dark blue diamond after placing piece 18 but BEFORE closing. Build them from the bigger part, closing at the side.



The diagram in this page is to relate the numbers and the positions, use as reference.
