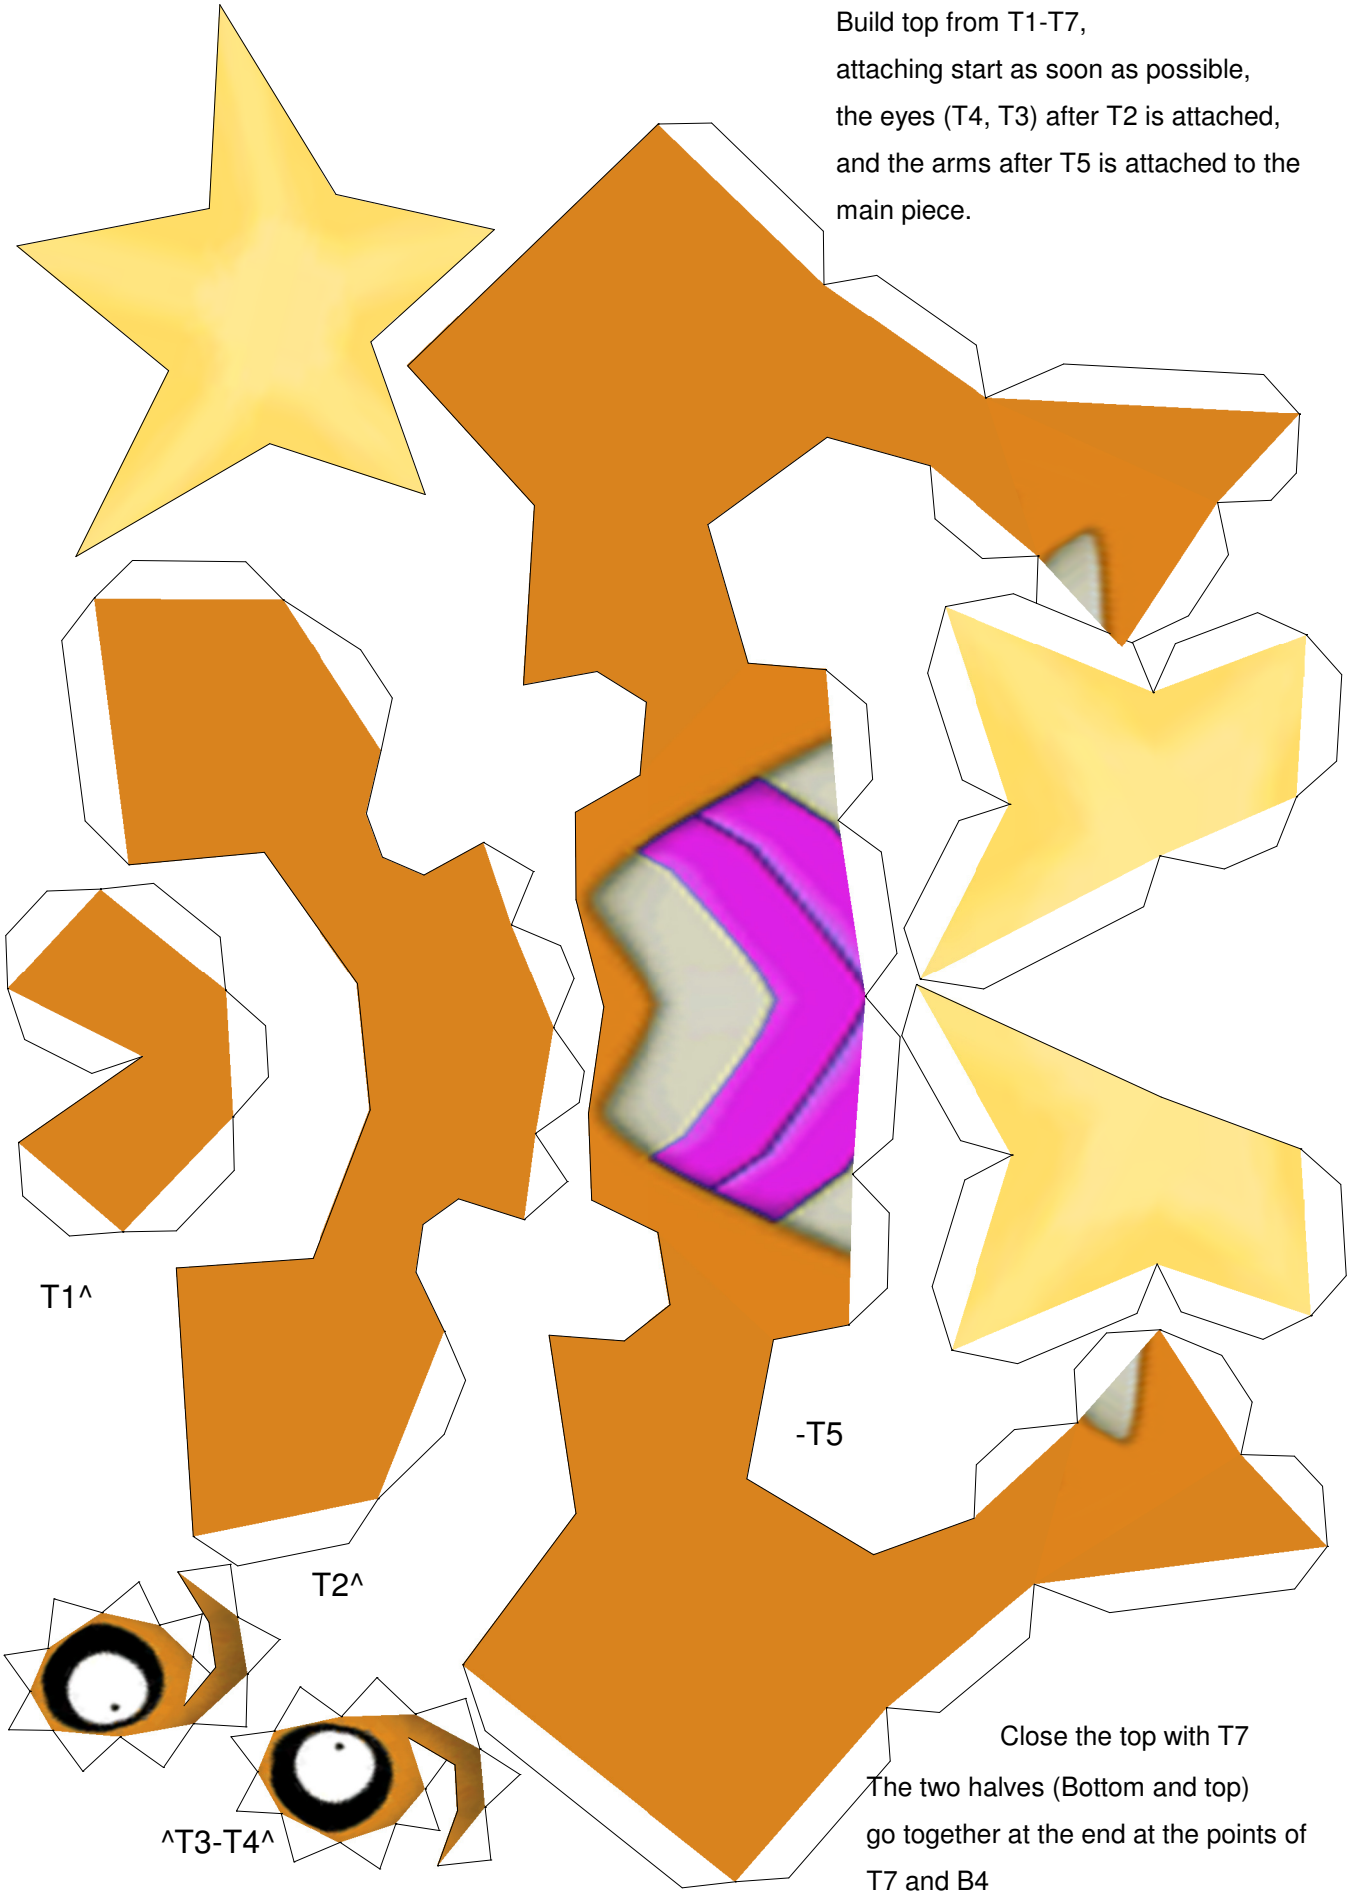
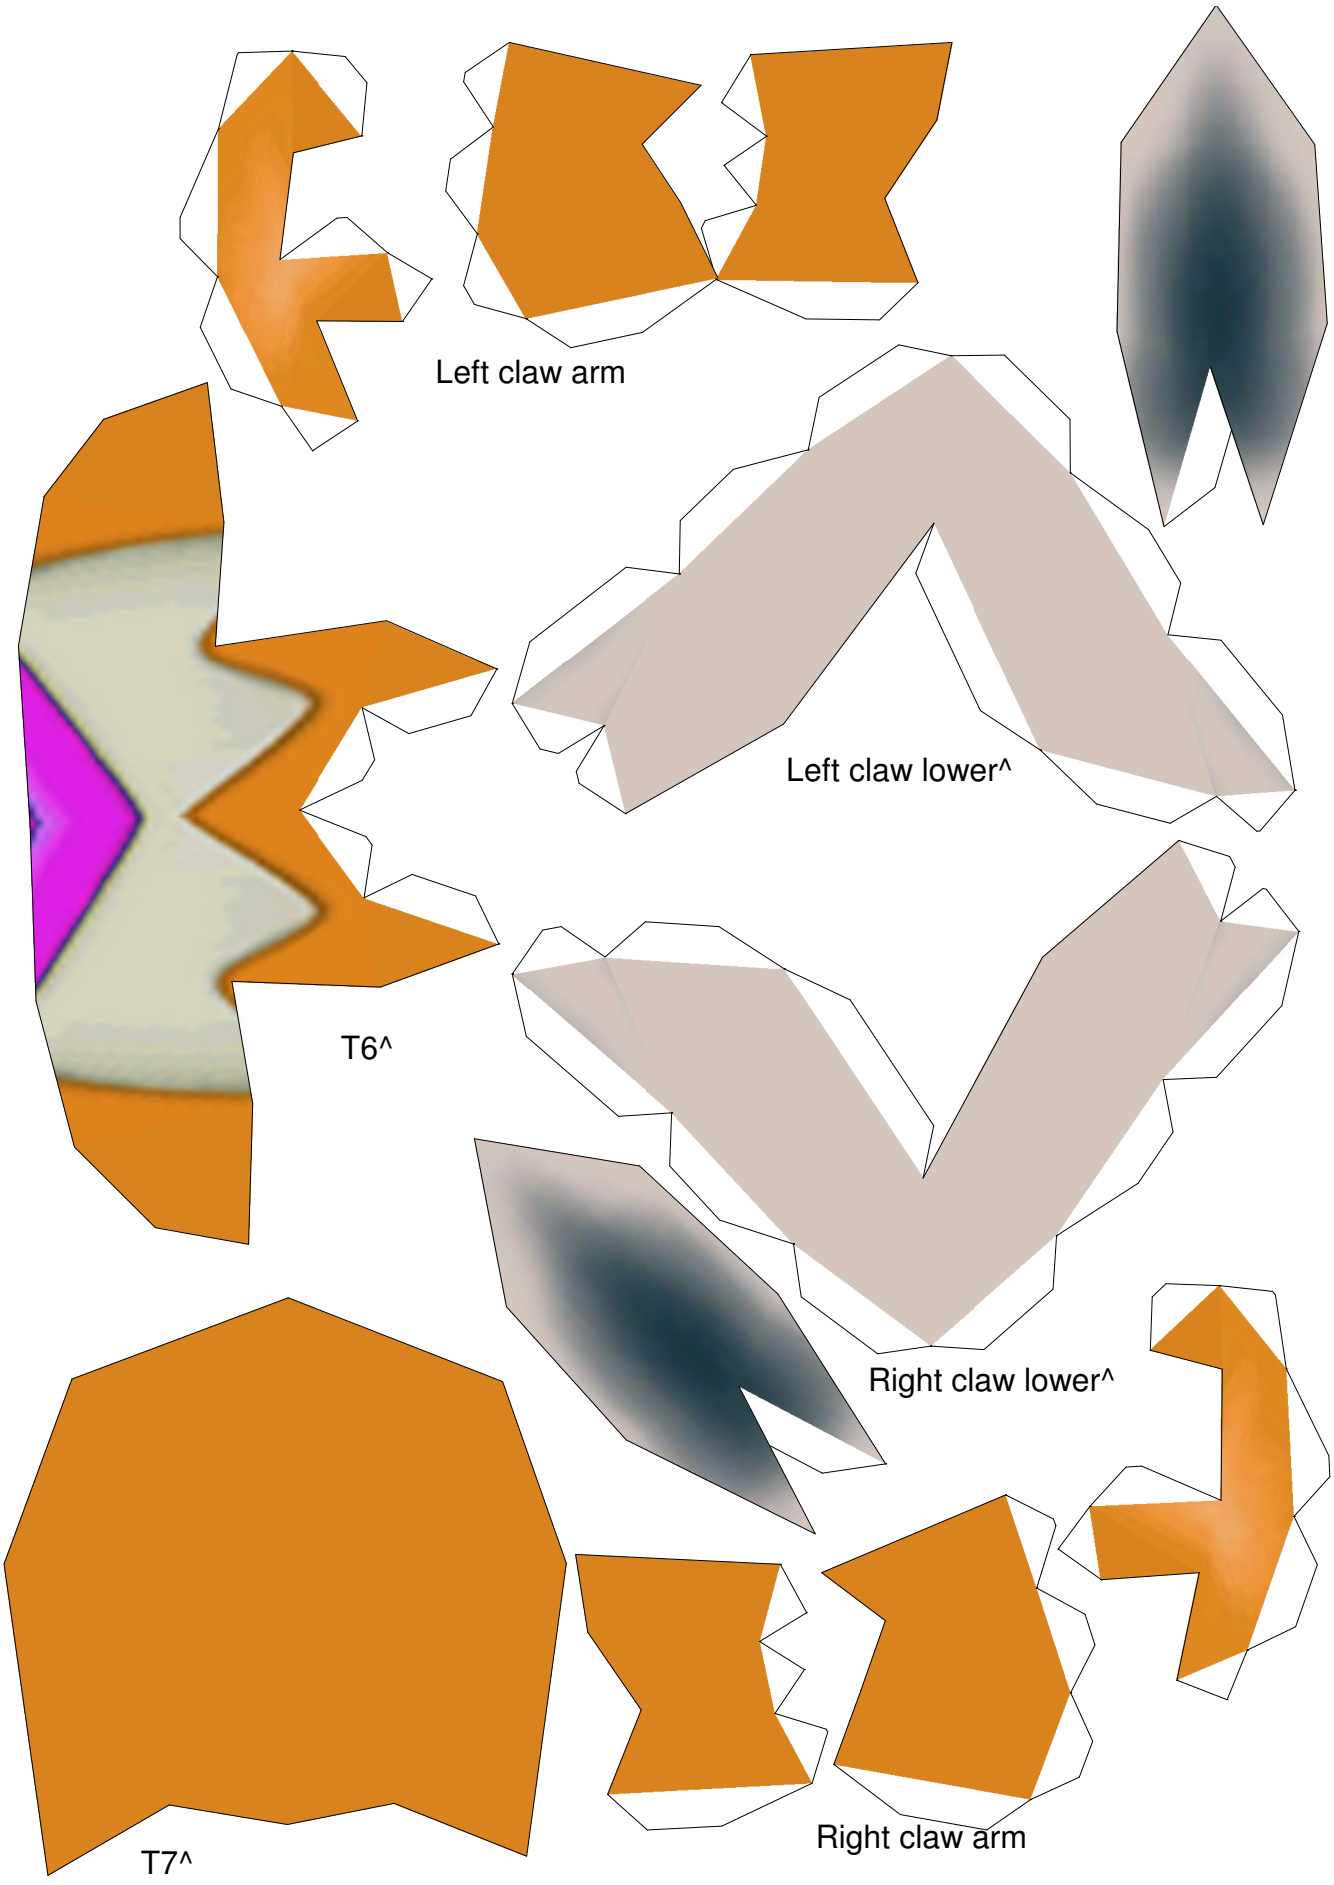
Build top from T1-T7,
attaching start as soon as possible,
the eyes (T4, T3) after T2 is attached,
and the arms after T5 is attached to the
main piece.



Close the top with T7
The two halves (Bottom and top)
go together at the end at the points of
T7 and B4



Left claw arm

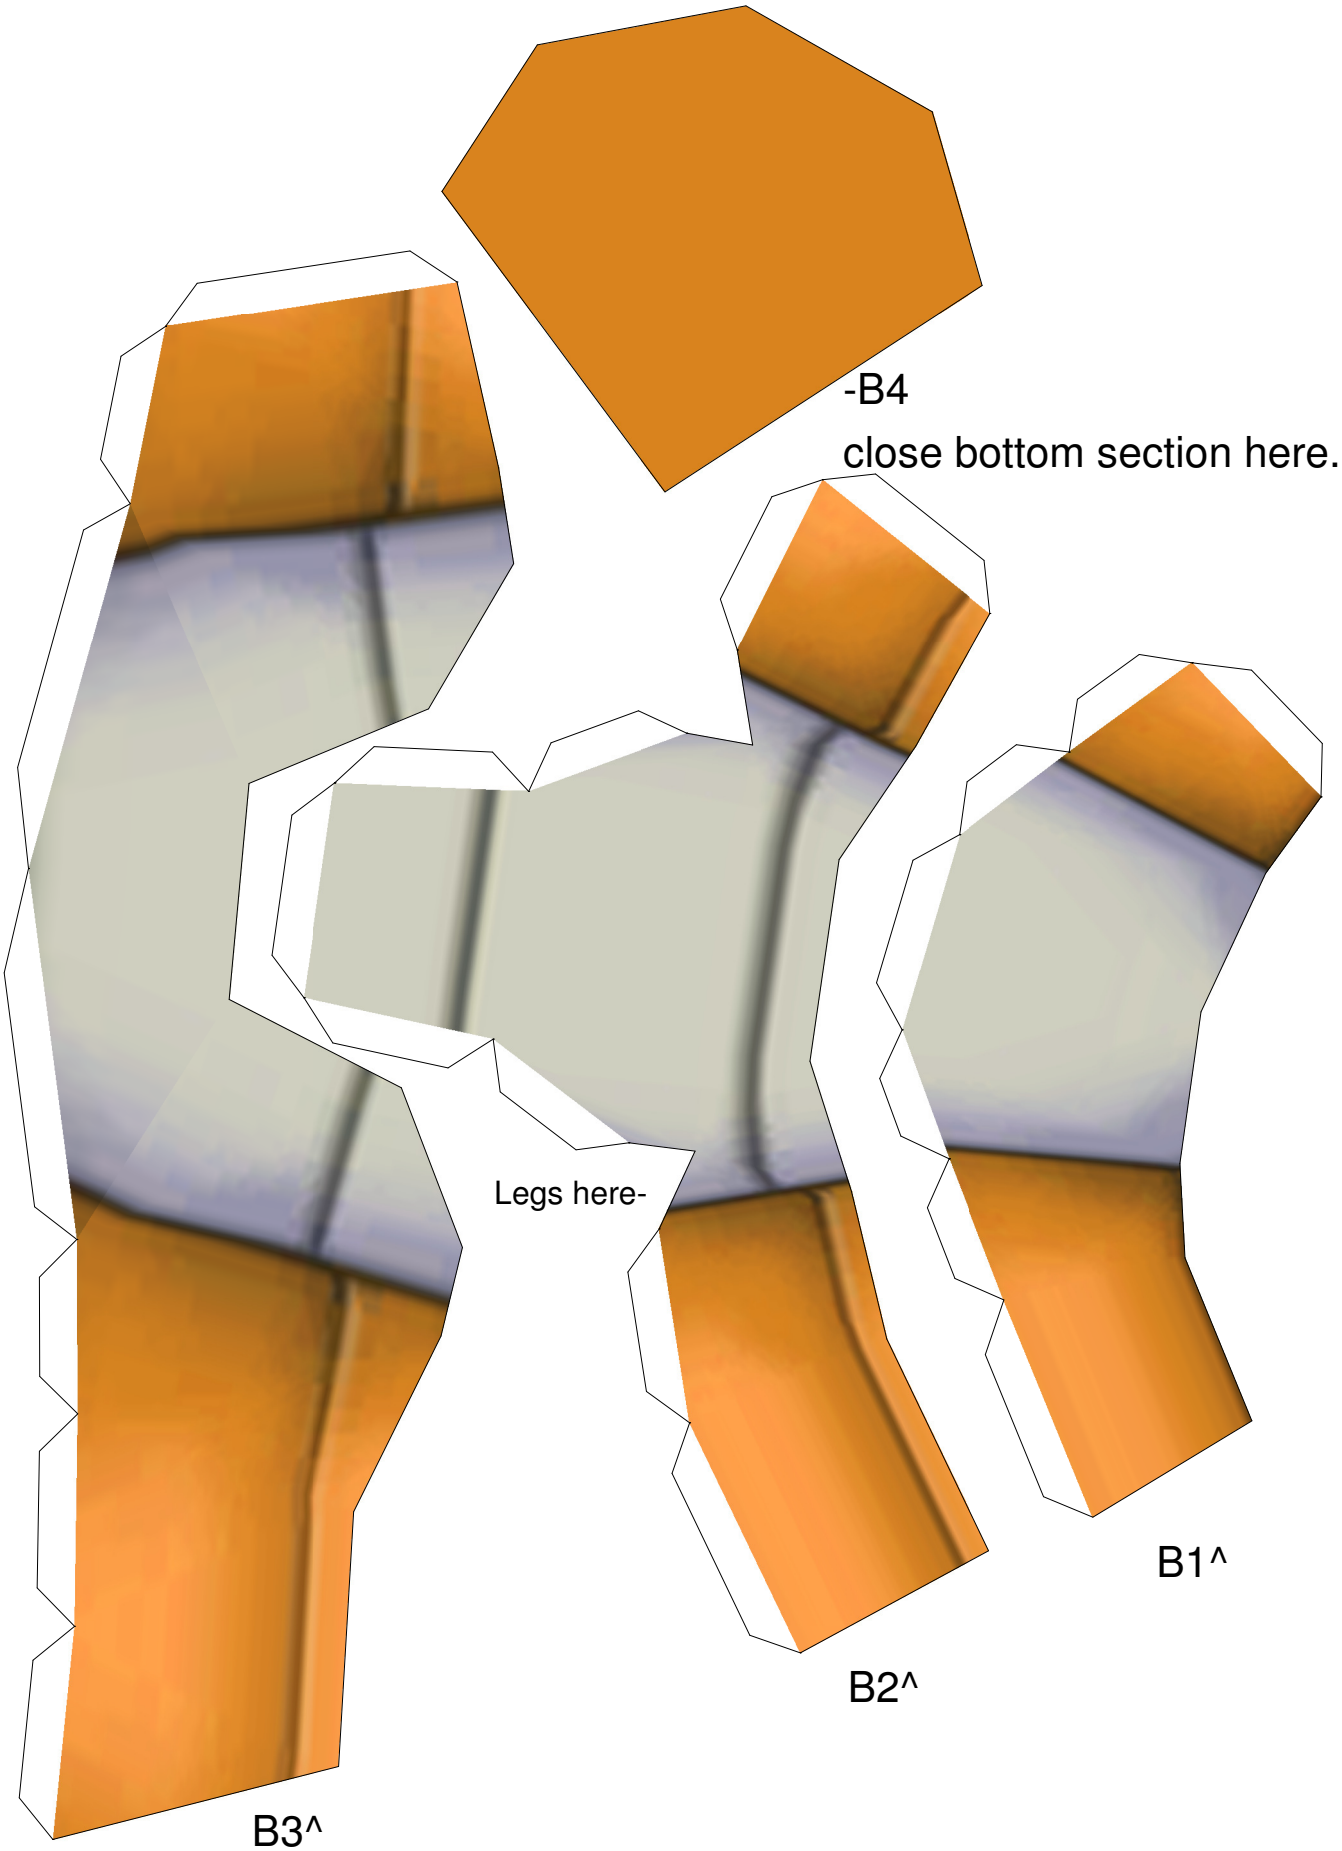
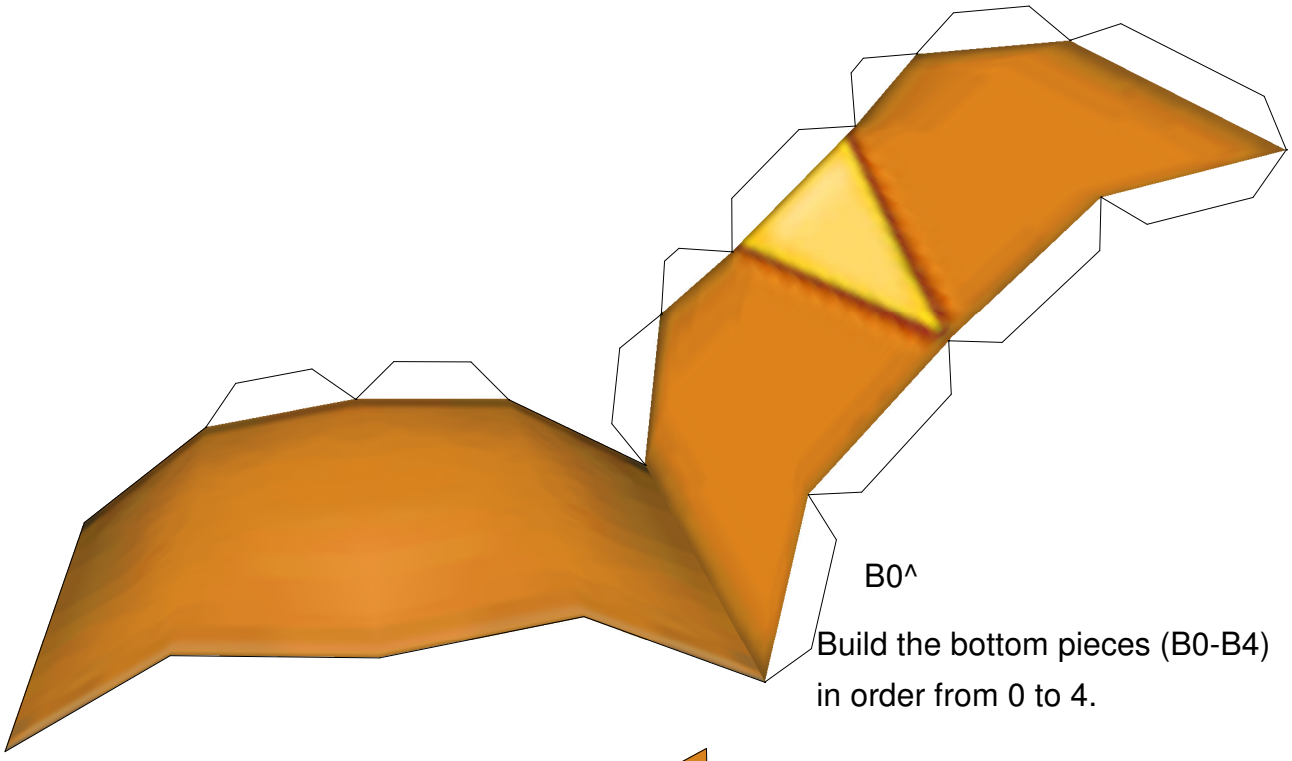
Claws

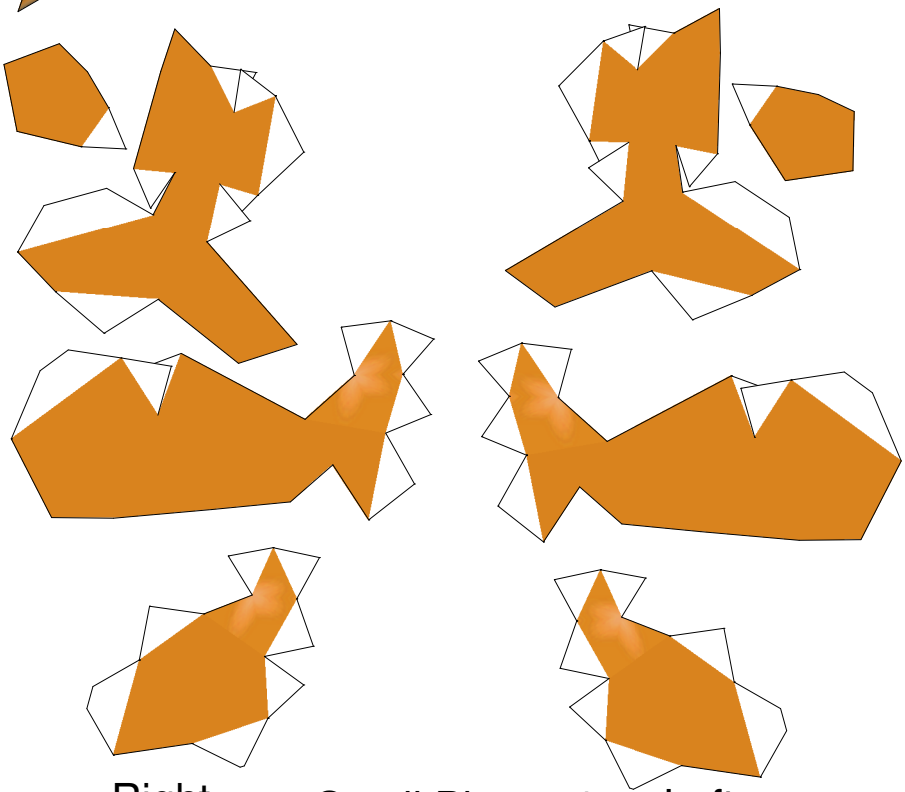


-B4
close bottom section here.
Legs here-
B1^
B2^
B3^



B0^

Build the bottom pieces (B0-B4) in order from 0 to 4.

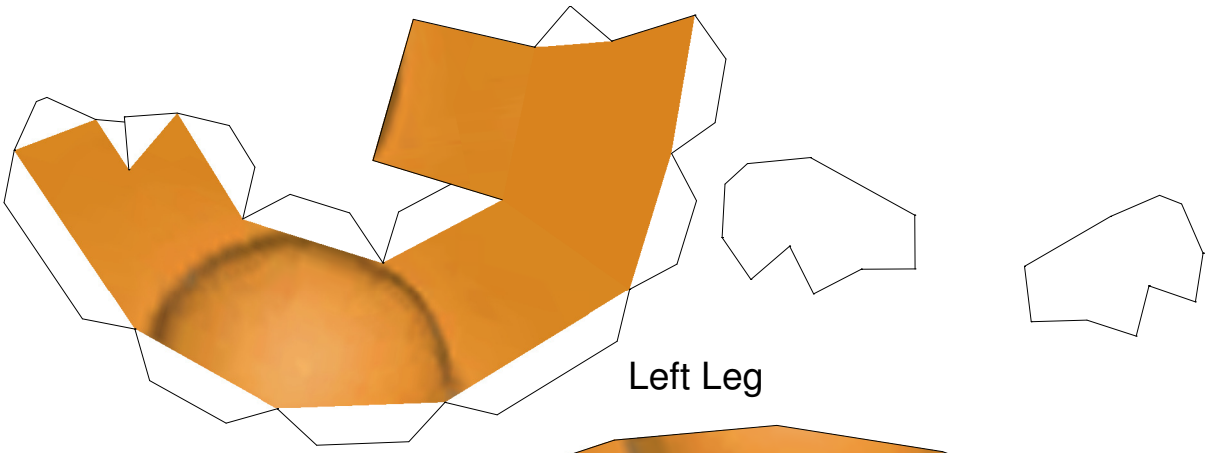


Right

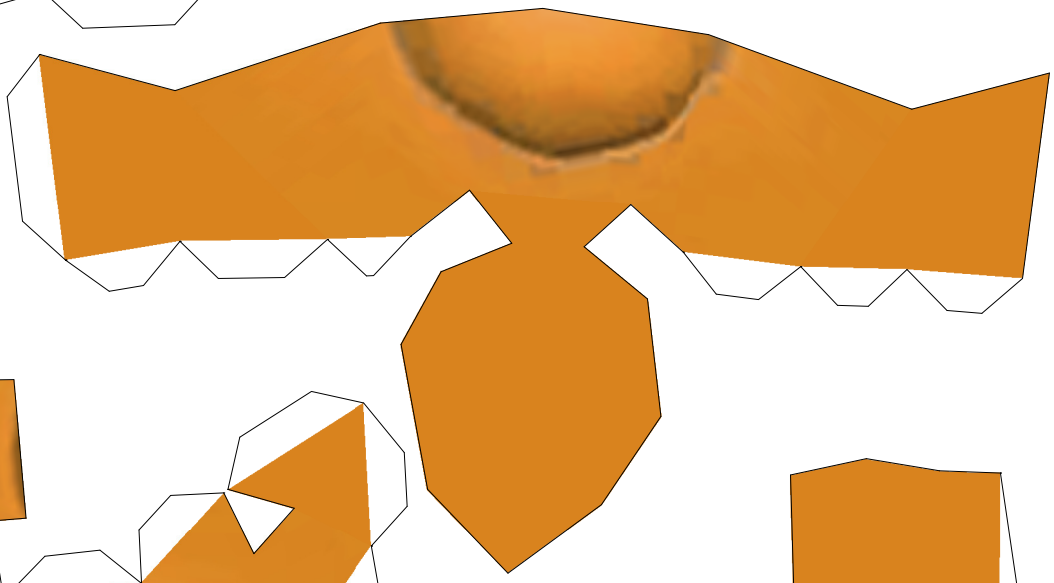
Small Pincers^

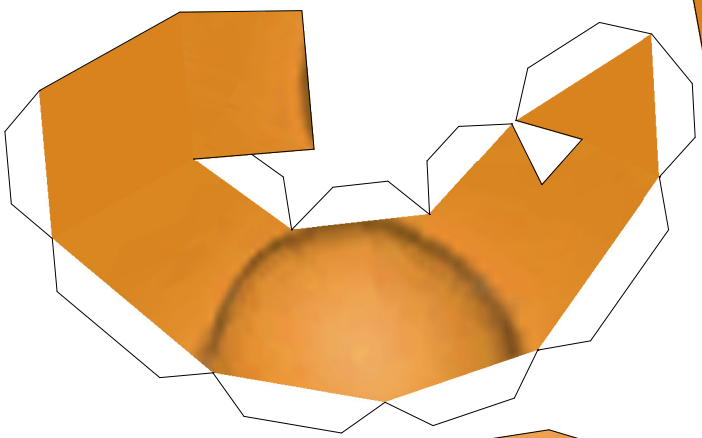
Left

These are really optional, and the most difficult part of the model.
Build for a challenge, and a slight chance that they could stabilize the model.

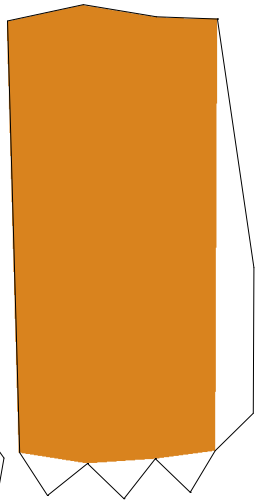


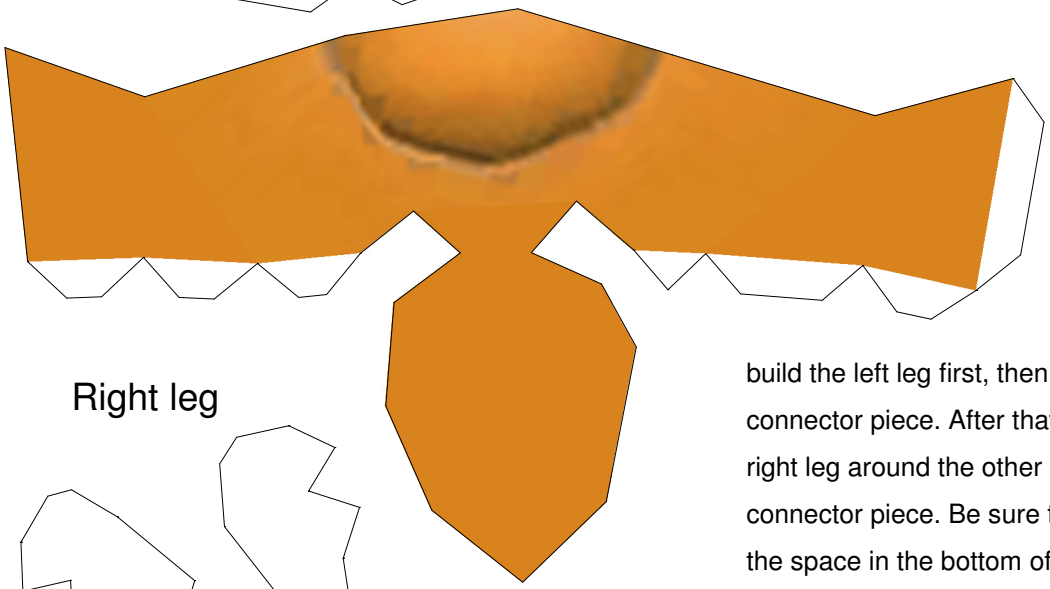
Left Leg





Connector Piece-





Right leg

build the left leg first, then attach the connector piece. After that, build the right leg around the other end of the connector piece. Be sure to put legs into the space in the bottom of the body before adding on piece B3.
