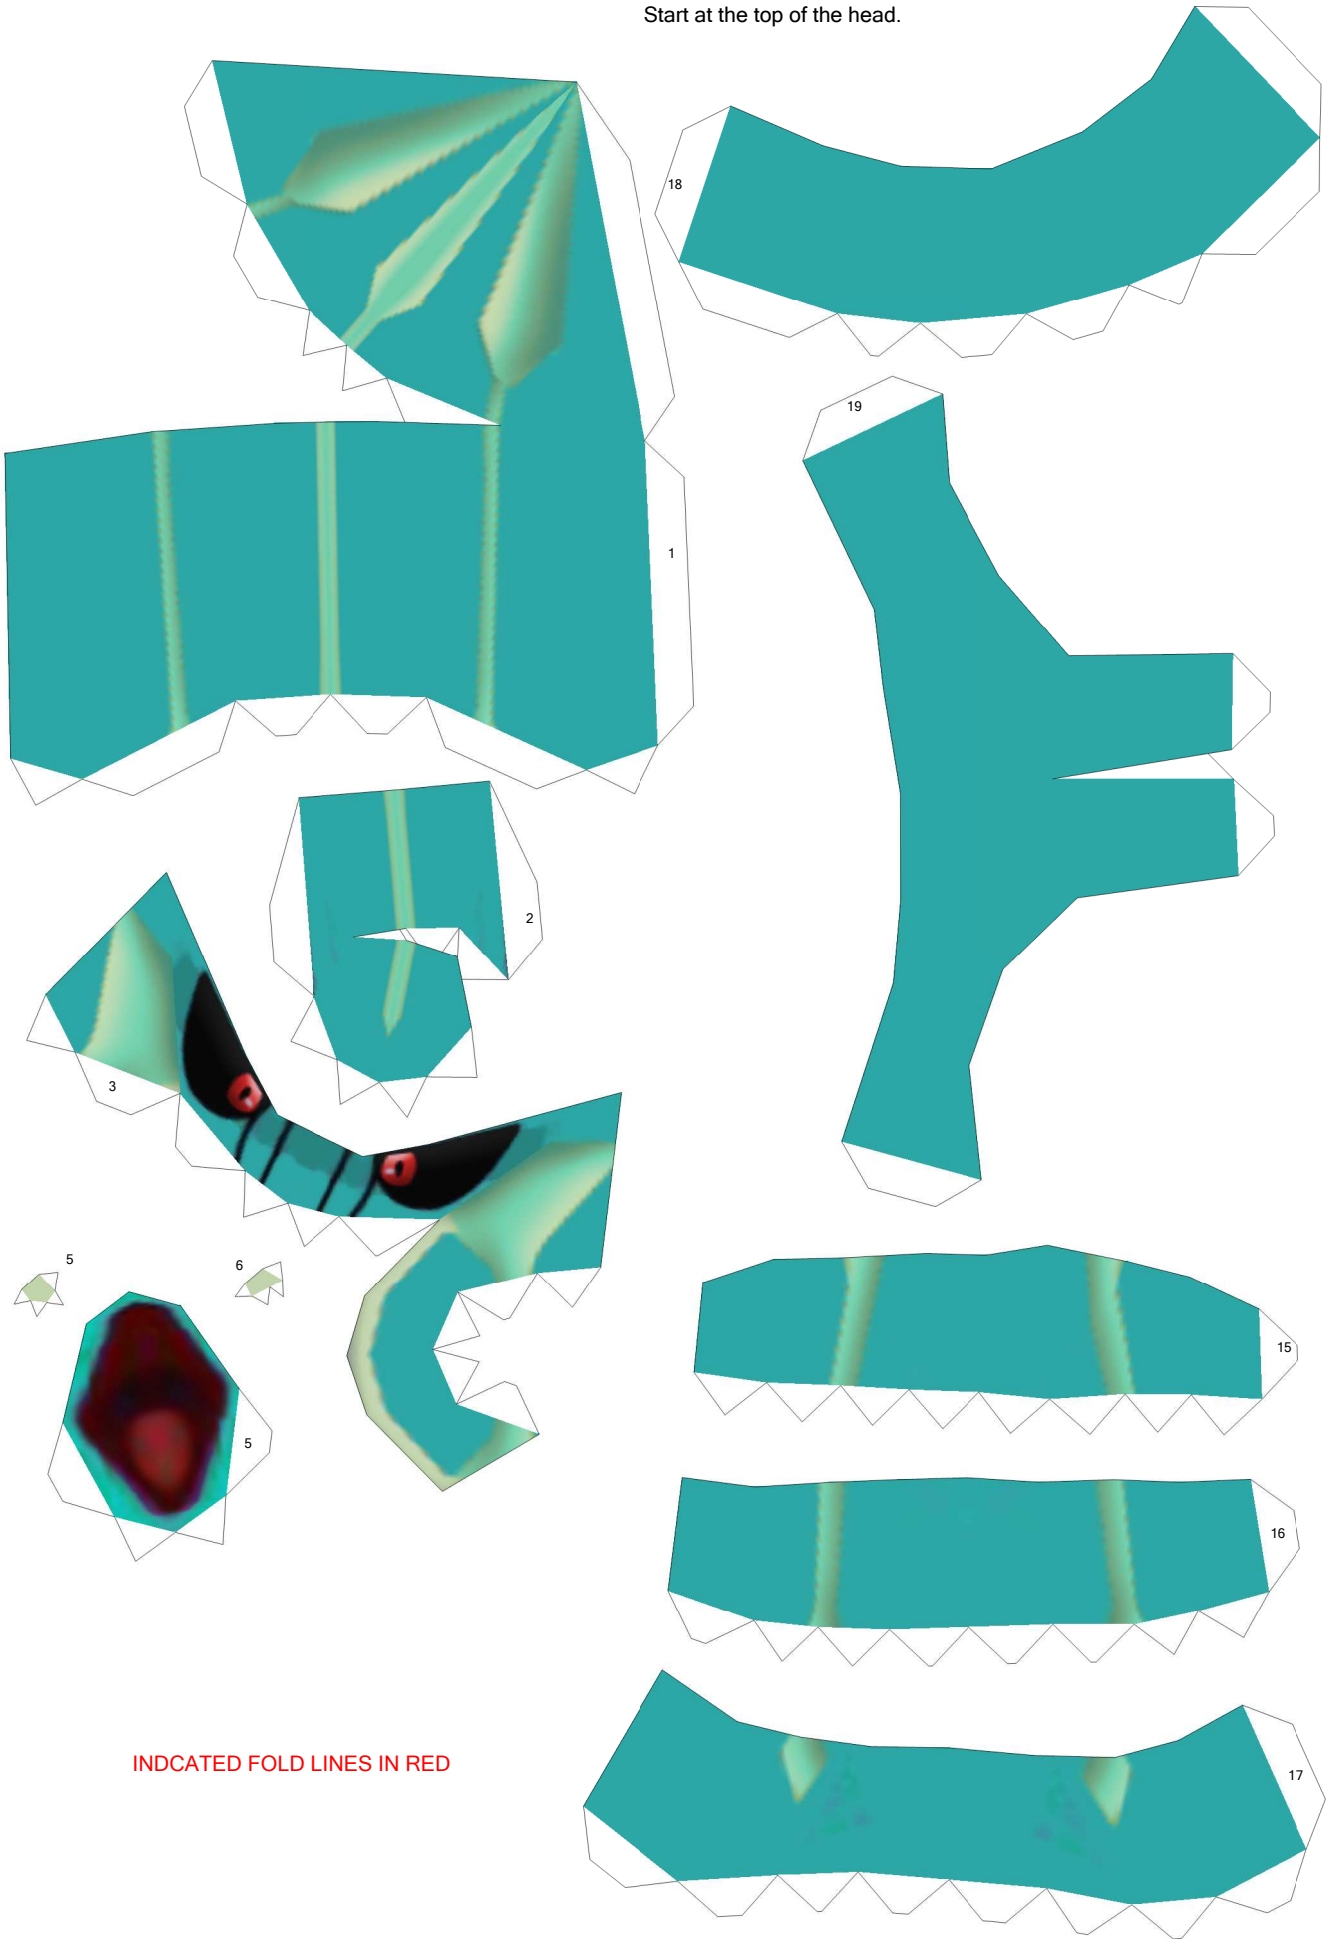
FOLLOW THE COLOR REFERENCES

Start gluing the pieces by the colored tabs.

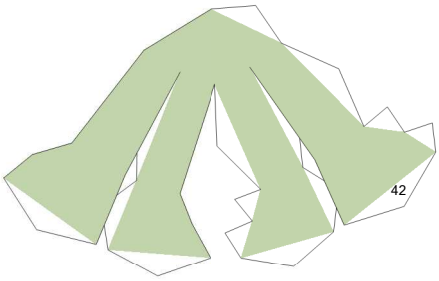
Close these details at the tabless parts. Start by gluing the 3 pieces together on the side that already has a stripe joined to it and close with the other side. There's a # on the places you'll close.

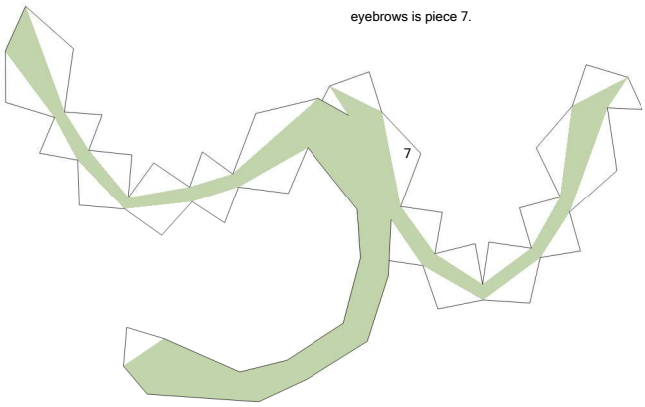
Start at the top of the head.

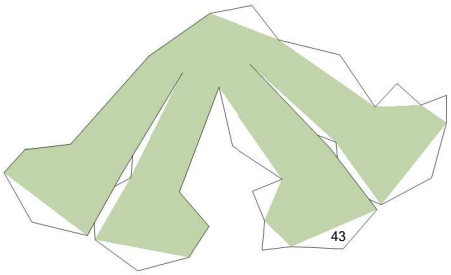


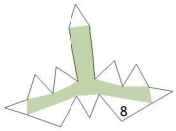
INDCATED FOLD LINES IN RED

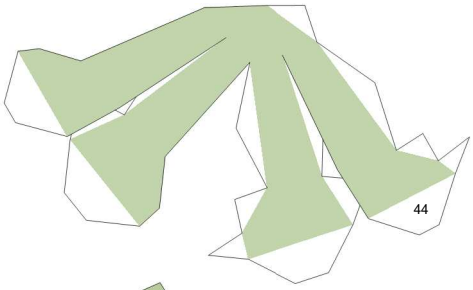
Glue pieces 7 and 8 directly to
the face when the numbers get
to them and BEFORE the eyebrows.
In fact, the place I used to glue the
eyebrows is piece 7.



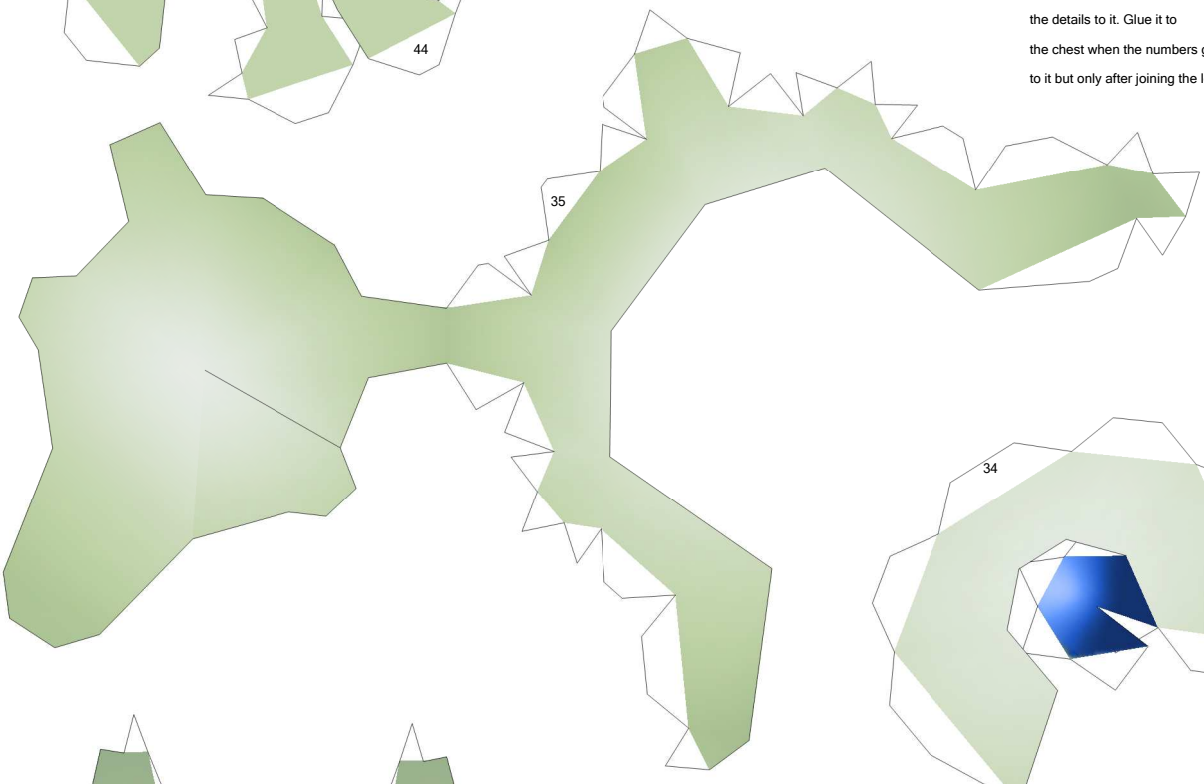


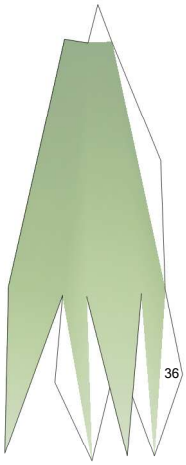


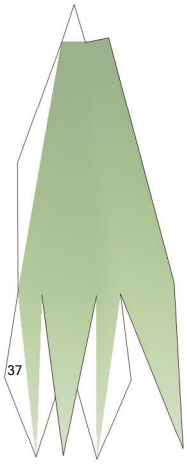


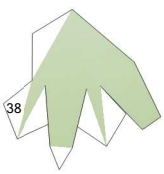


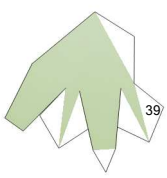
Bluid the front of the chest piece
and close it. Only after glue
the details to it. Glue it to
the chest when the numbers get
to it but only after joining the legs.

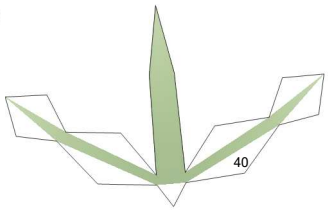


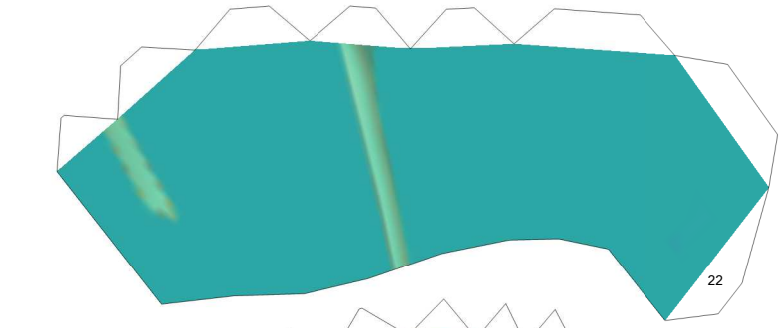


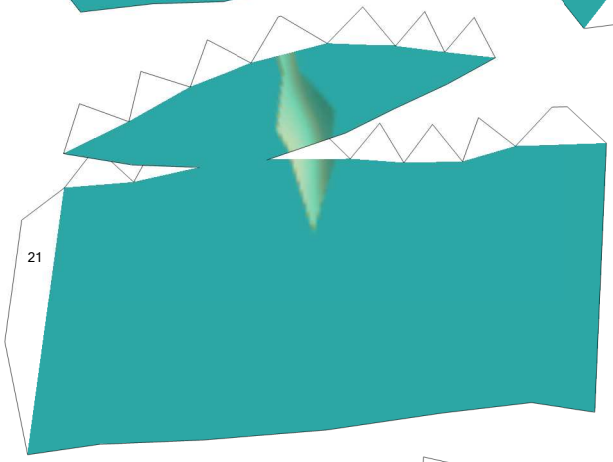


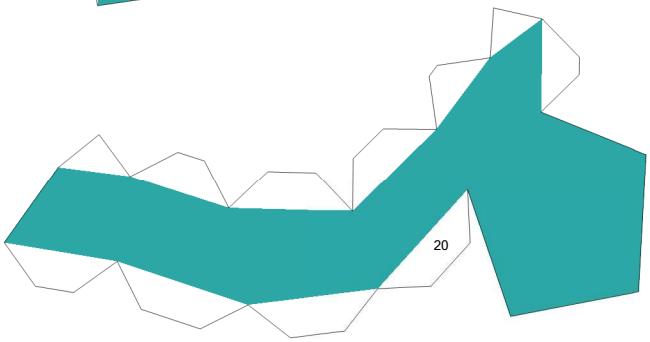


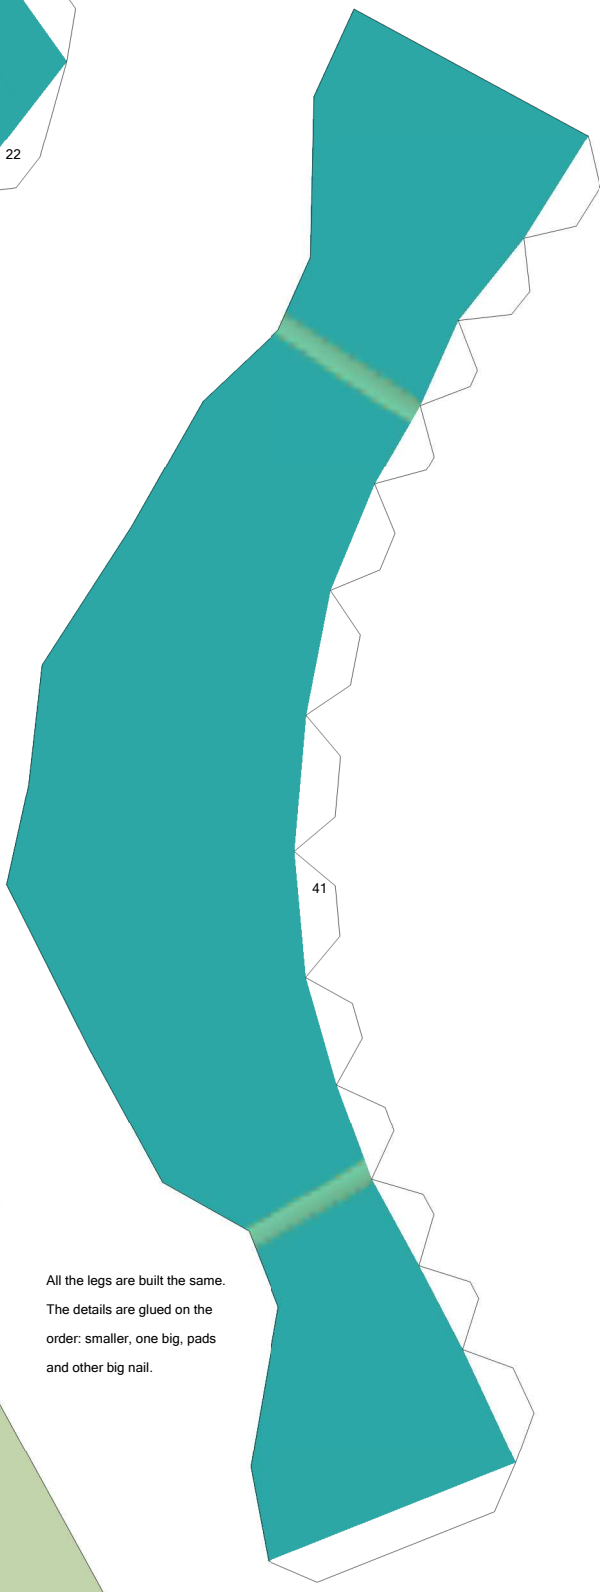


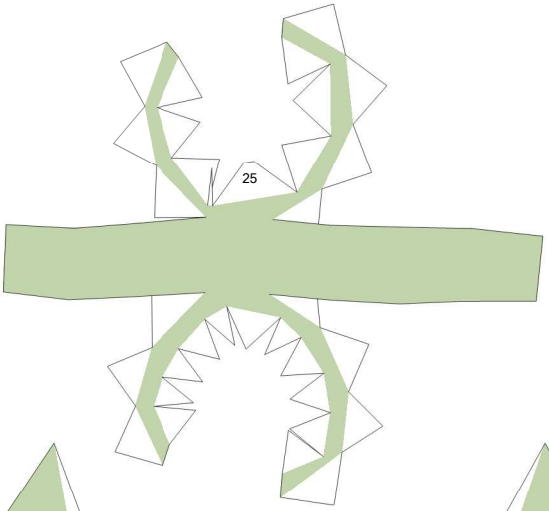




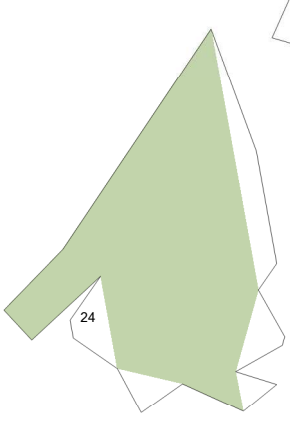


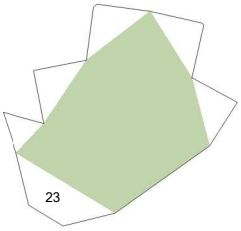


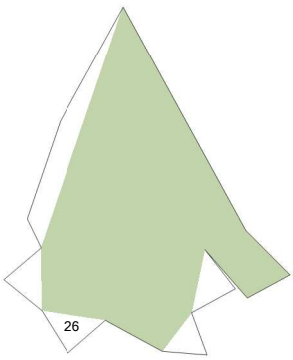


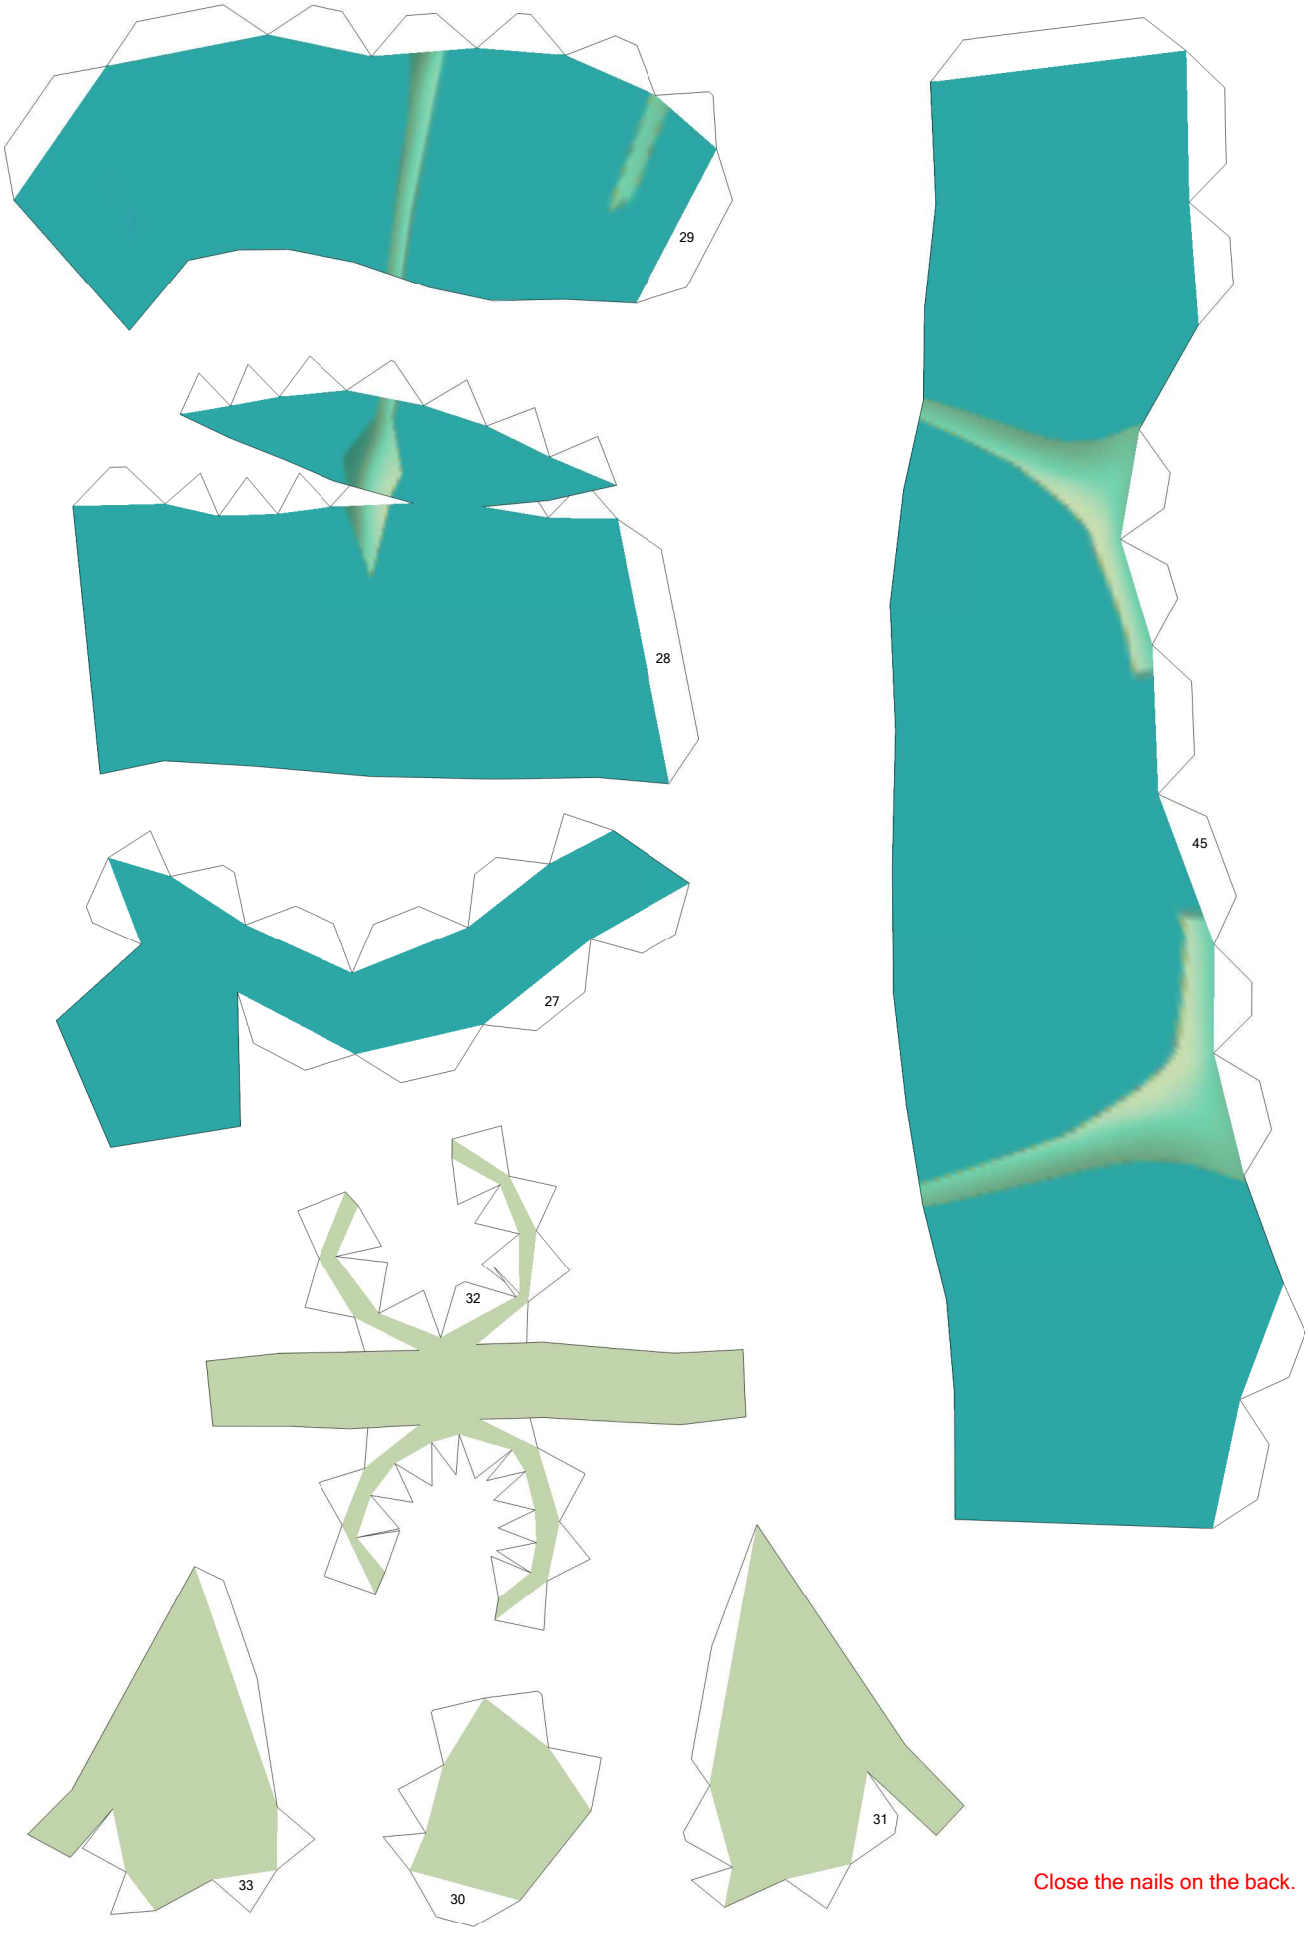


All the legs are built the same. The details are glued on the order: smaller, one big, pads and other big nail.

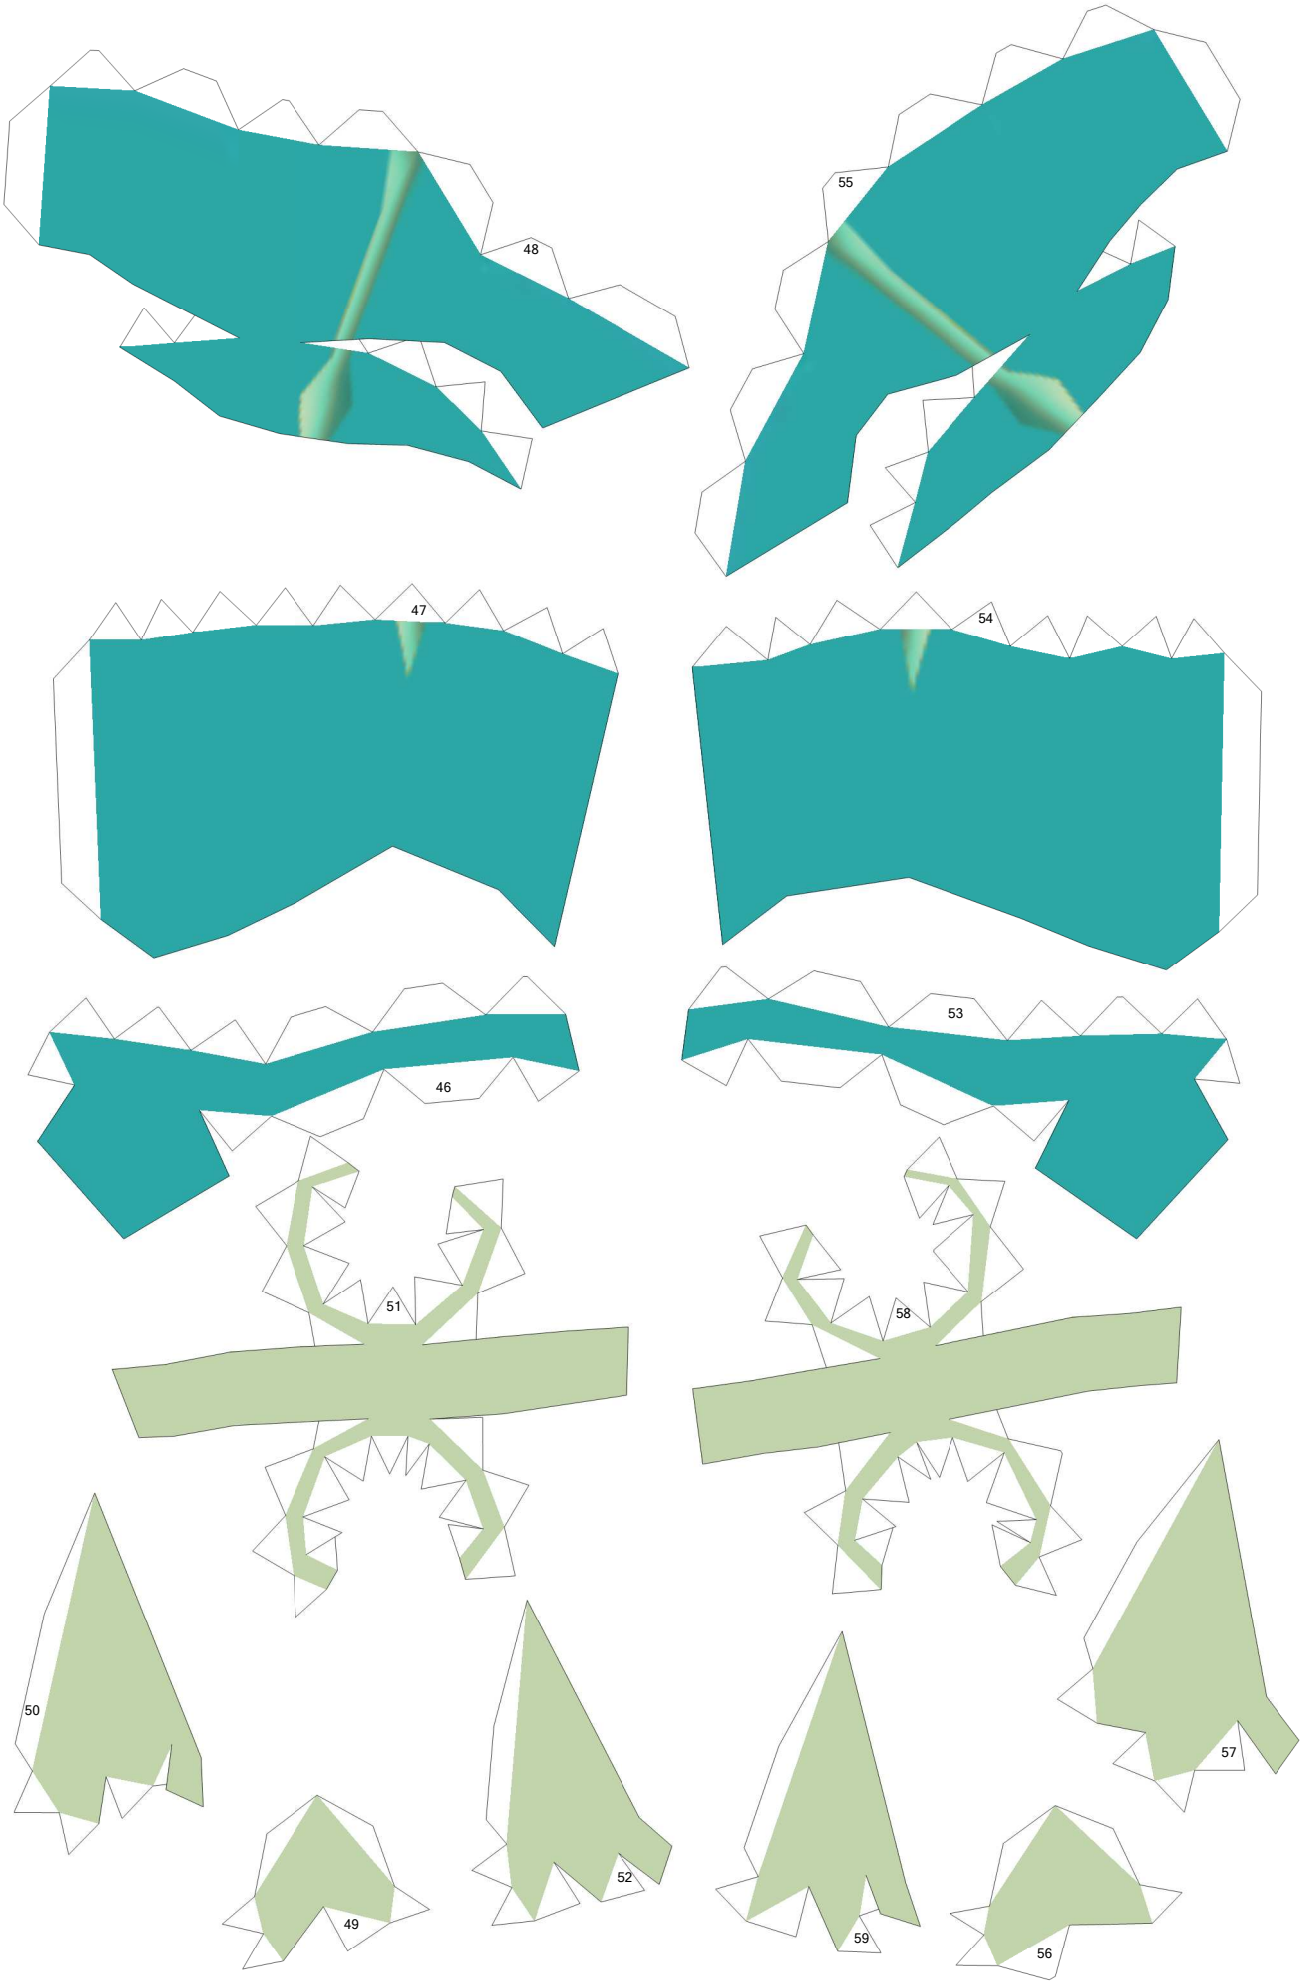






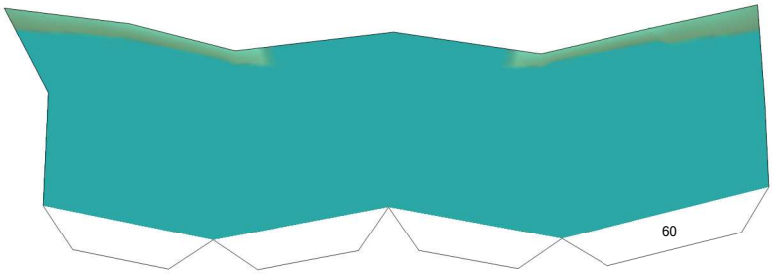


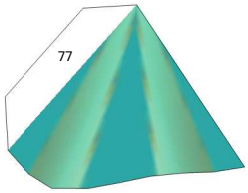
Close the nails on the back.

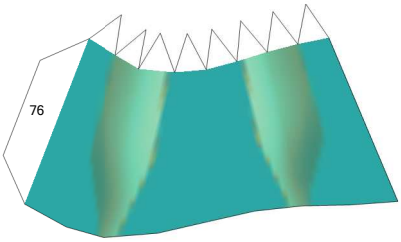


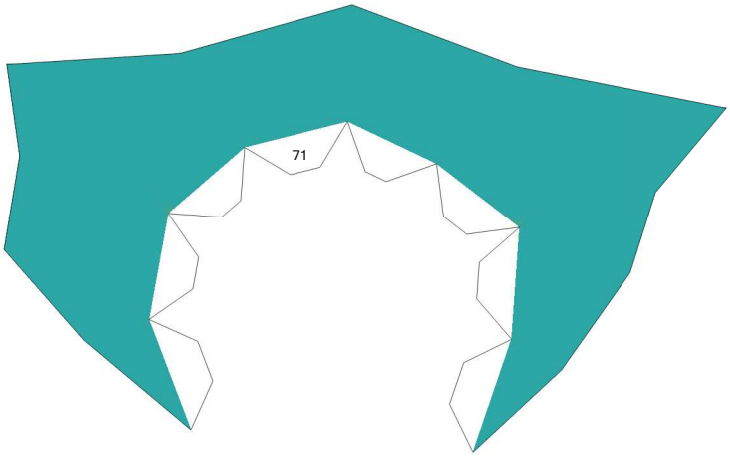
7/11 (row2 col3)

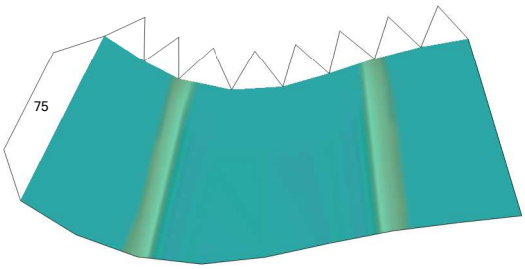
Close at the tip
of the tail.

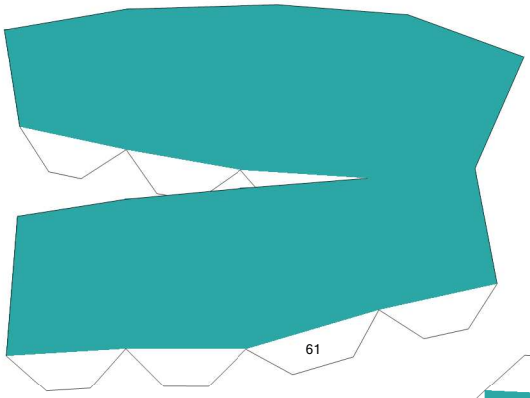


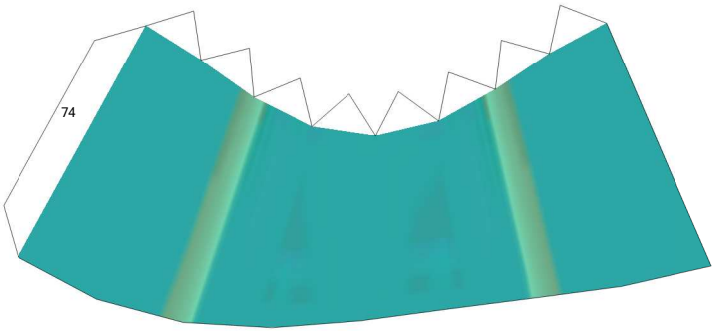


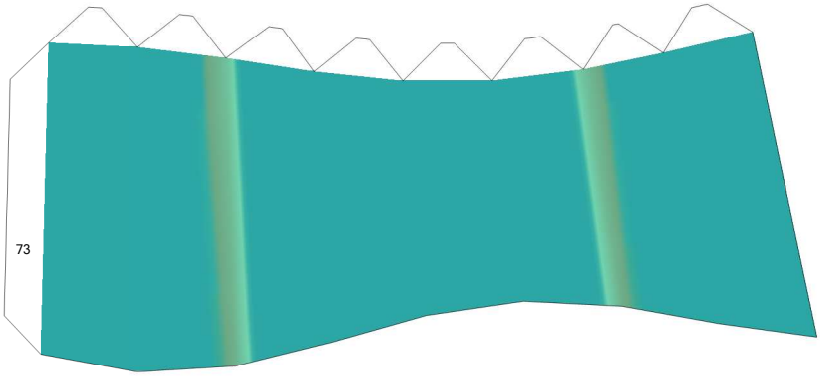


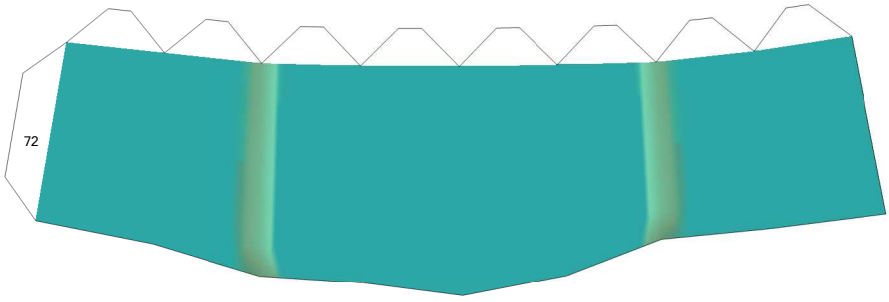


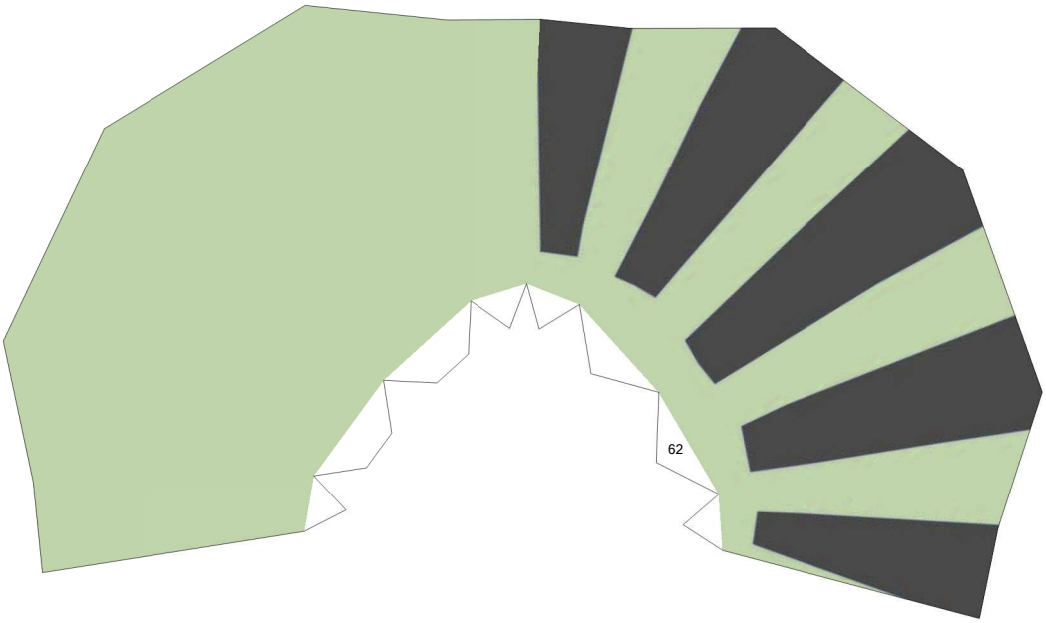


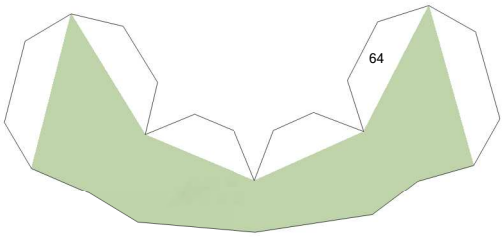


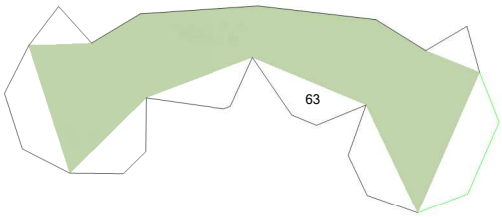


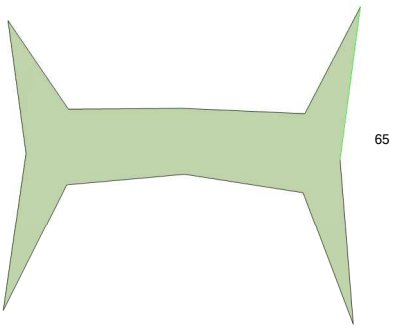












The fan is simpler than it looks.
First build the big part, following
by the base, closing at the bottom.
Glue the diamond shape parts to it
later. Glue it to the body when indicated,
since you'll need to apply presure from the
inside.

The back of these plates (tabless part) is glued on the back of the "fan". Follow the color reference and glue the back on the black part. The bigger is the middle one, the smaller ones stay on the edges and the medium ones on the middle.

Optional 2D eyebrows.
They glue on the same
place as the regular ones.
