Dino MiniWorld

Score, cut, and fold each mini figure.
Then glue the side and the bottom. But don't glue the top part yet.
Before you glue the top, insert a small coin or small weight inside the model, gluing it to the bottom. This will add weight and stability to the model.
small coin
fold and glue
hat
Then cut around the arms. You don't have to cut right on the black line.
The 2 small lines by the thumb and fingers show the inside of the hand. Don't cut these.
