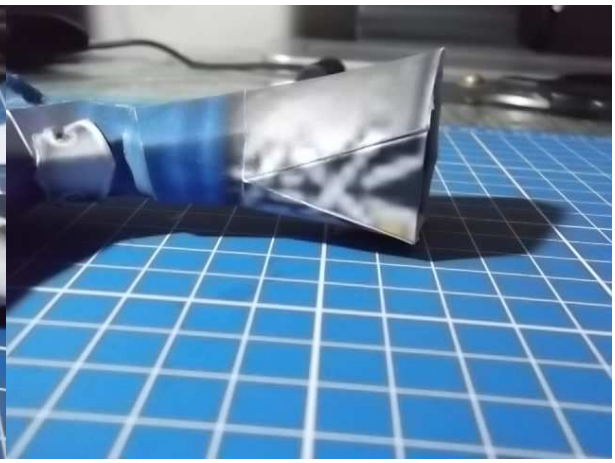
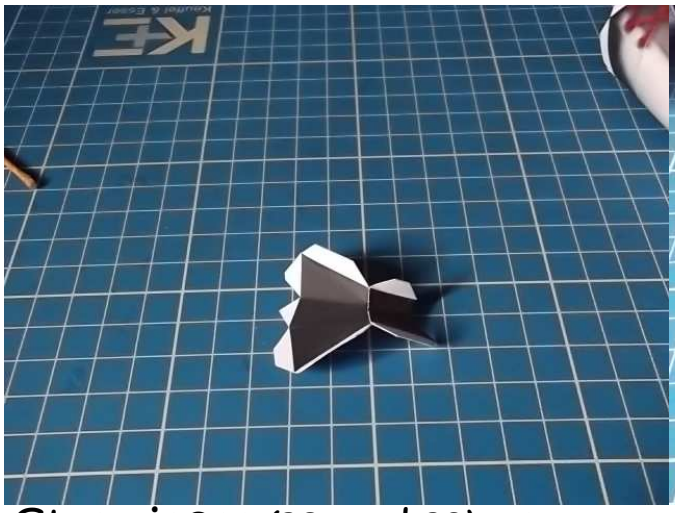
Lets start with this new model, first the right boot (1-9), then place piece (10)



Now glue piece (11), press the boot to make this piece fit, and glue piece (12), press the boot from both sides of the piece to make it fit. Do the same for the left boot (14-25) and glue pieces (13) and (26) don´t forget to trim the excess.

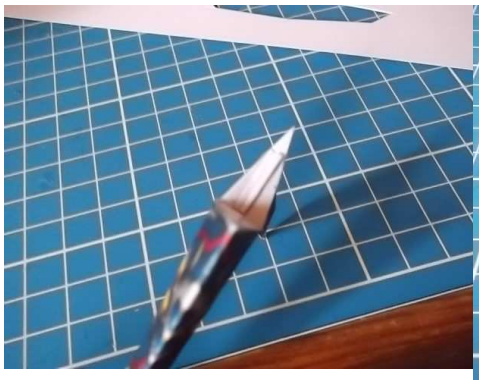
Now build the legs, first the right (27-31) then the left (32-37).

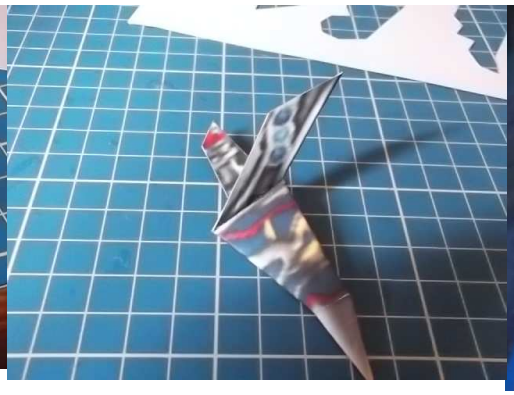


Glue pieces (38 and 39) now attach both legs

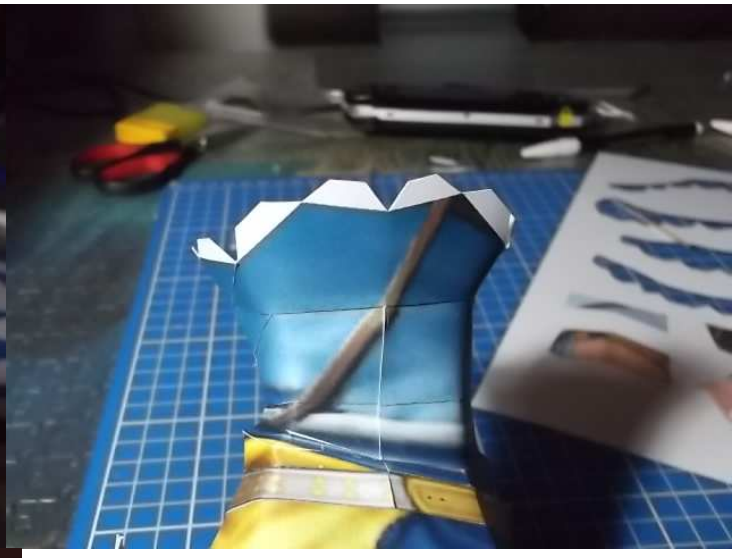
Add pieces (40-41) and now attach all to the boots.

Now glue pieces (42 and 43), continue with the skirt (44-51)

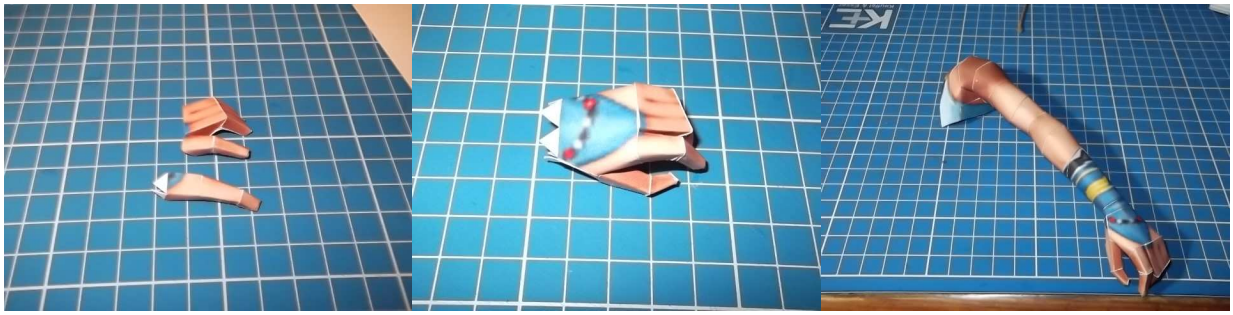




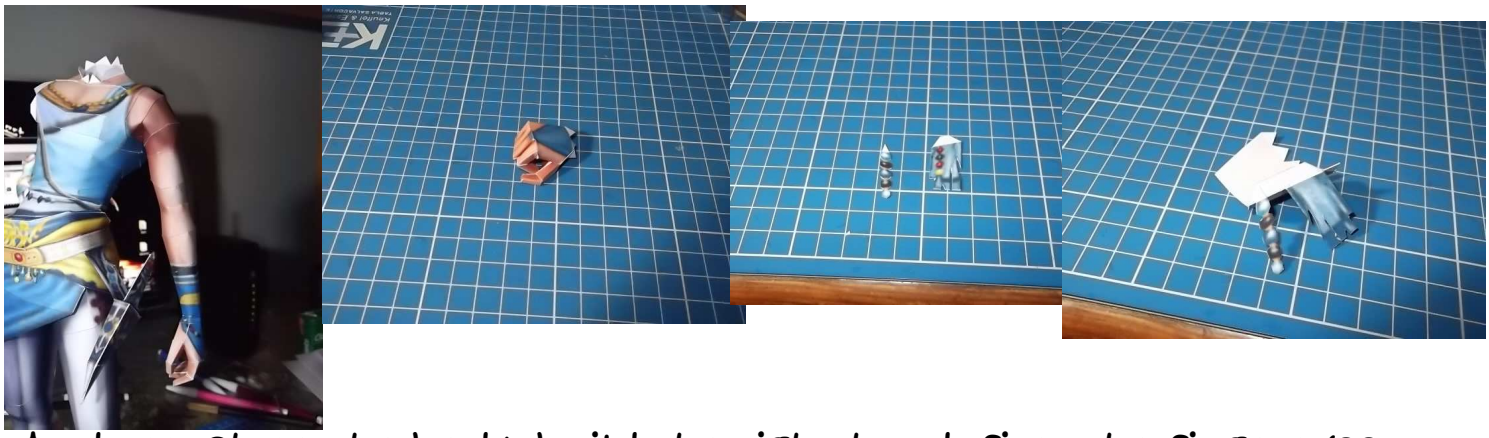
Now build pieces (52-53) cut the white line in piece (52) to place piece (54) and glue piece (55), glue piece (56) don´t forget to trim the excess. Then glue the knife.



Build the rest of the body (57-67) take care with pieces (66 and 67) they are tricky.



It´s time for the arms, first build the fingers (68-75) and attach to the hand (76), assemble all the arm (77-87).



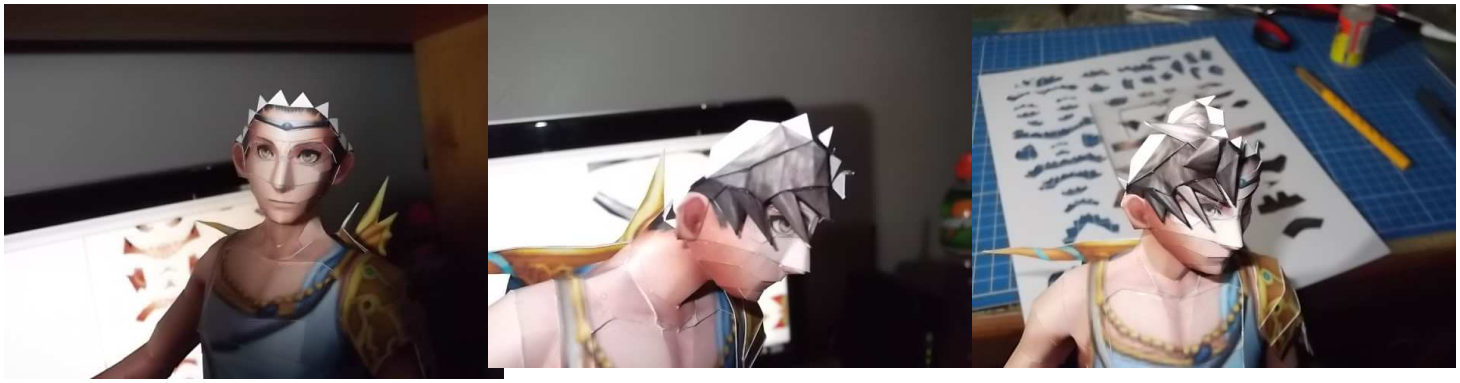
And attach to the body, build the right hand, first the fingers (88-94) then the hand (95-96), trim the excess on pieces (98-99) and glue them on the red point in piece (97)

Close the piece and glue to the hand, finish with the arm (100-108) and attach to the body.

Asseble the shoulder (109-116) then trim the excess, now build the front side of the cape (117-120, 125-126).

Attach to the shoulder, now build the back side of the cape (121-124,127-128) and glue it to the shoulder.

Place the cape on the body and glue pieces (129,130), trimm the excess before attach.



Here comes the most difficult part, first build the face (131-149) and place the "TIARA", attach pieces (152-158) then (159-167).

Now the other side spikes (168-173) then pieces (174-176) and finish the head with pieces (177-199)

First build the blade (200-204), glue piece (201) on the black point. Now build the hand protector (205-209) place the pieces on the black points.

Build the grip (210-211) and glue to the blade, place the sword on the right hand then glue pieces (212,213). Now glue the earrings.
