
You need to cut flap on part NO.162(152 on pic)
of the size of the flap on part NO.75 or NO.76.
You should get something like fig.1

fig.1

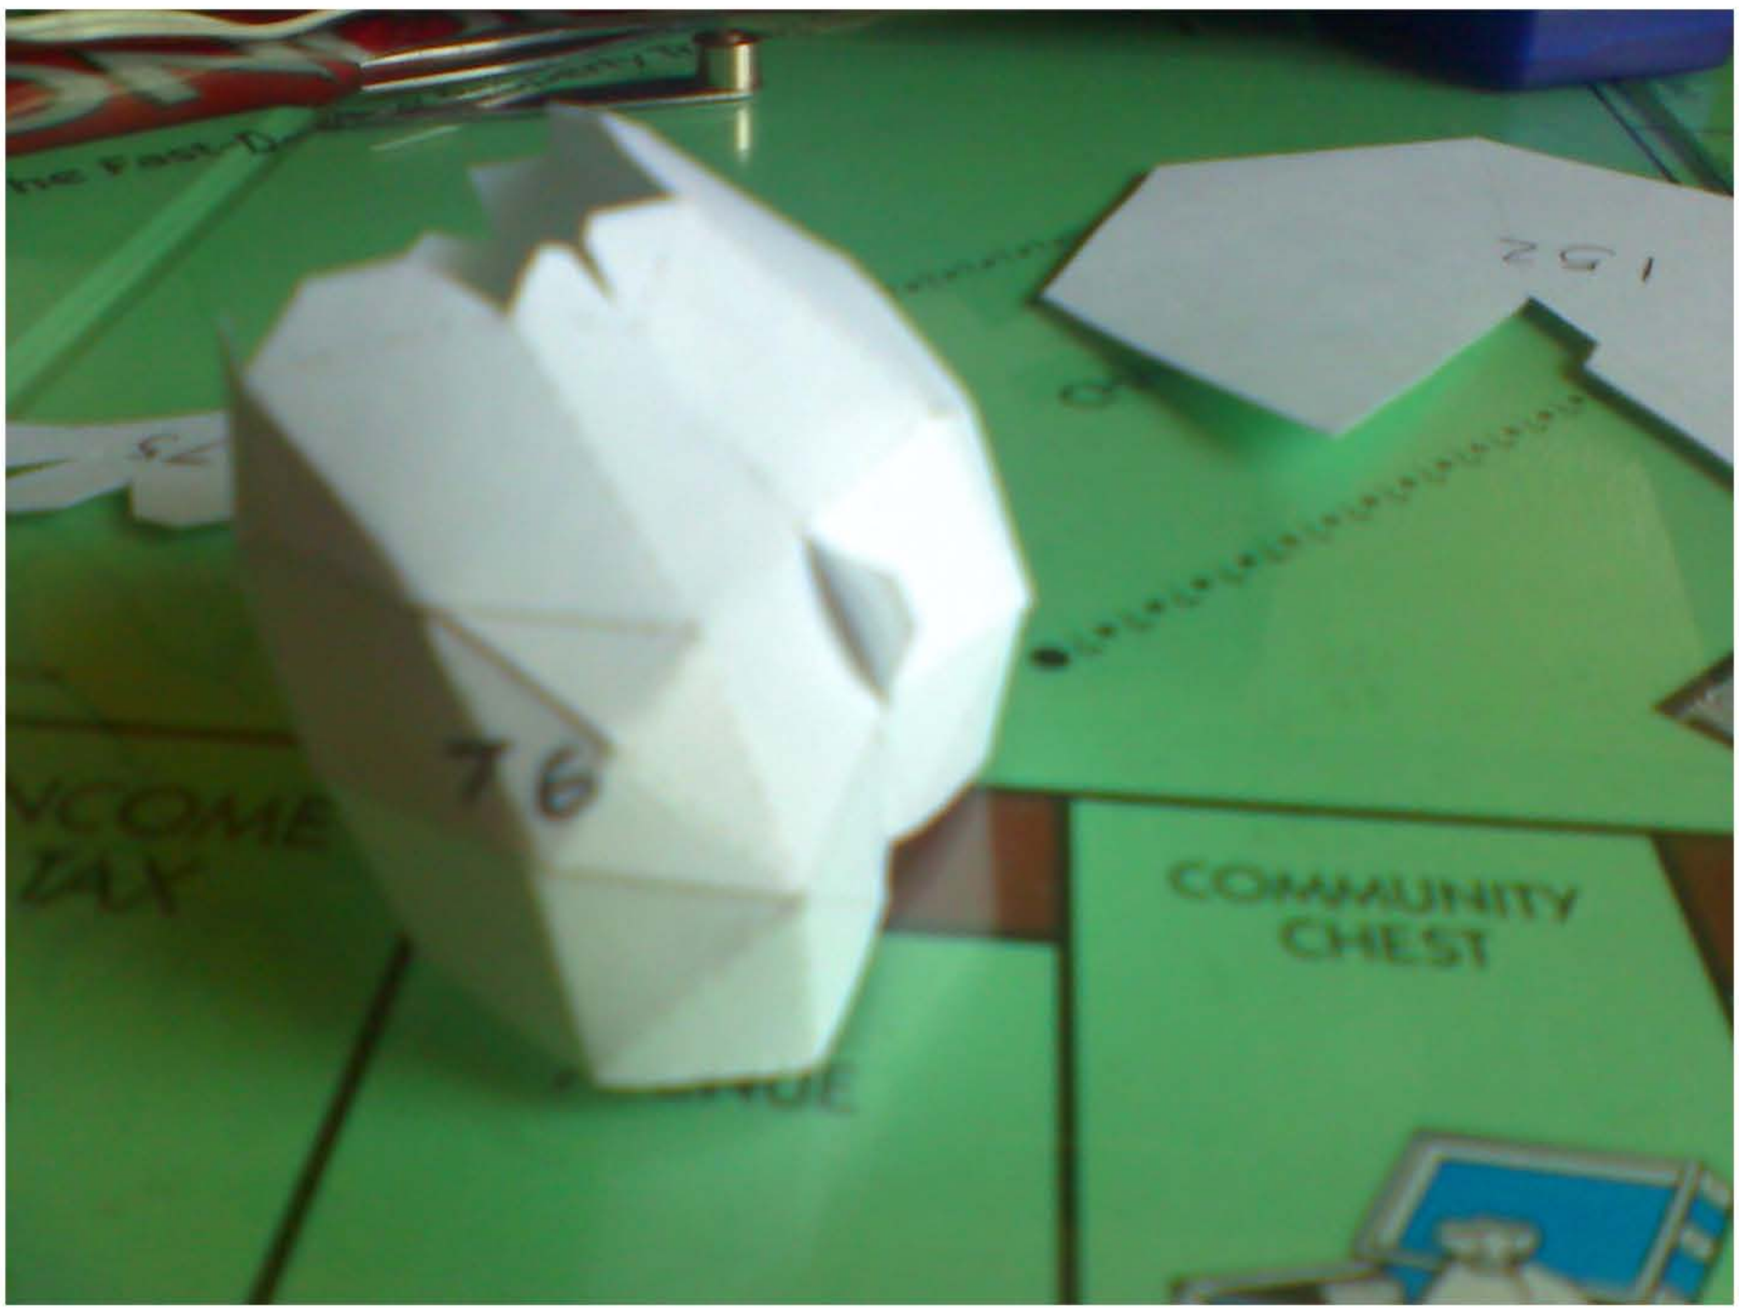

fig.2

When building the lower part of the body DO NOT glue any of the flaps on parts No.75 and NO.76 make valley fold on both,yoy should get the same resultt as fig.2

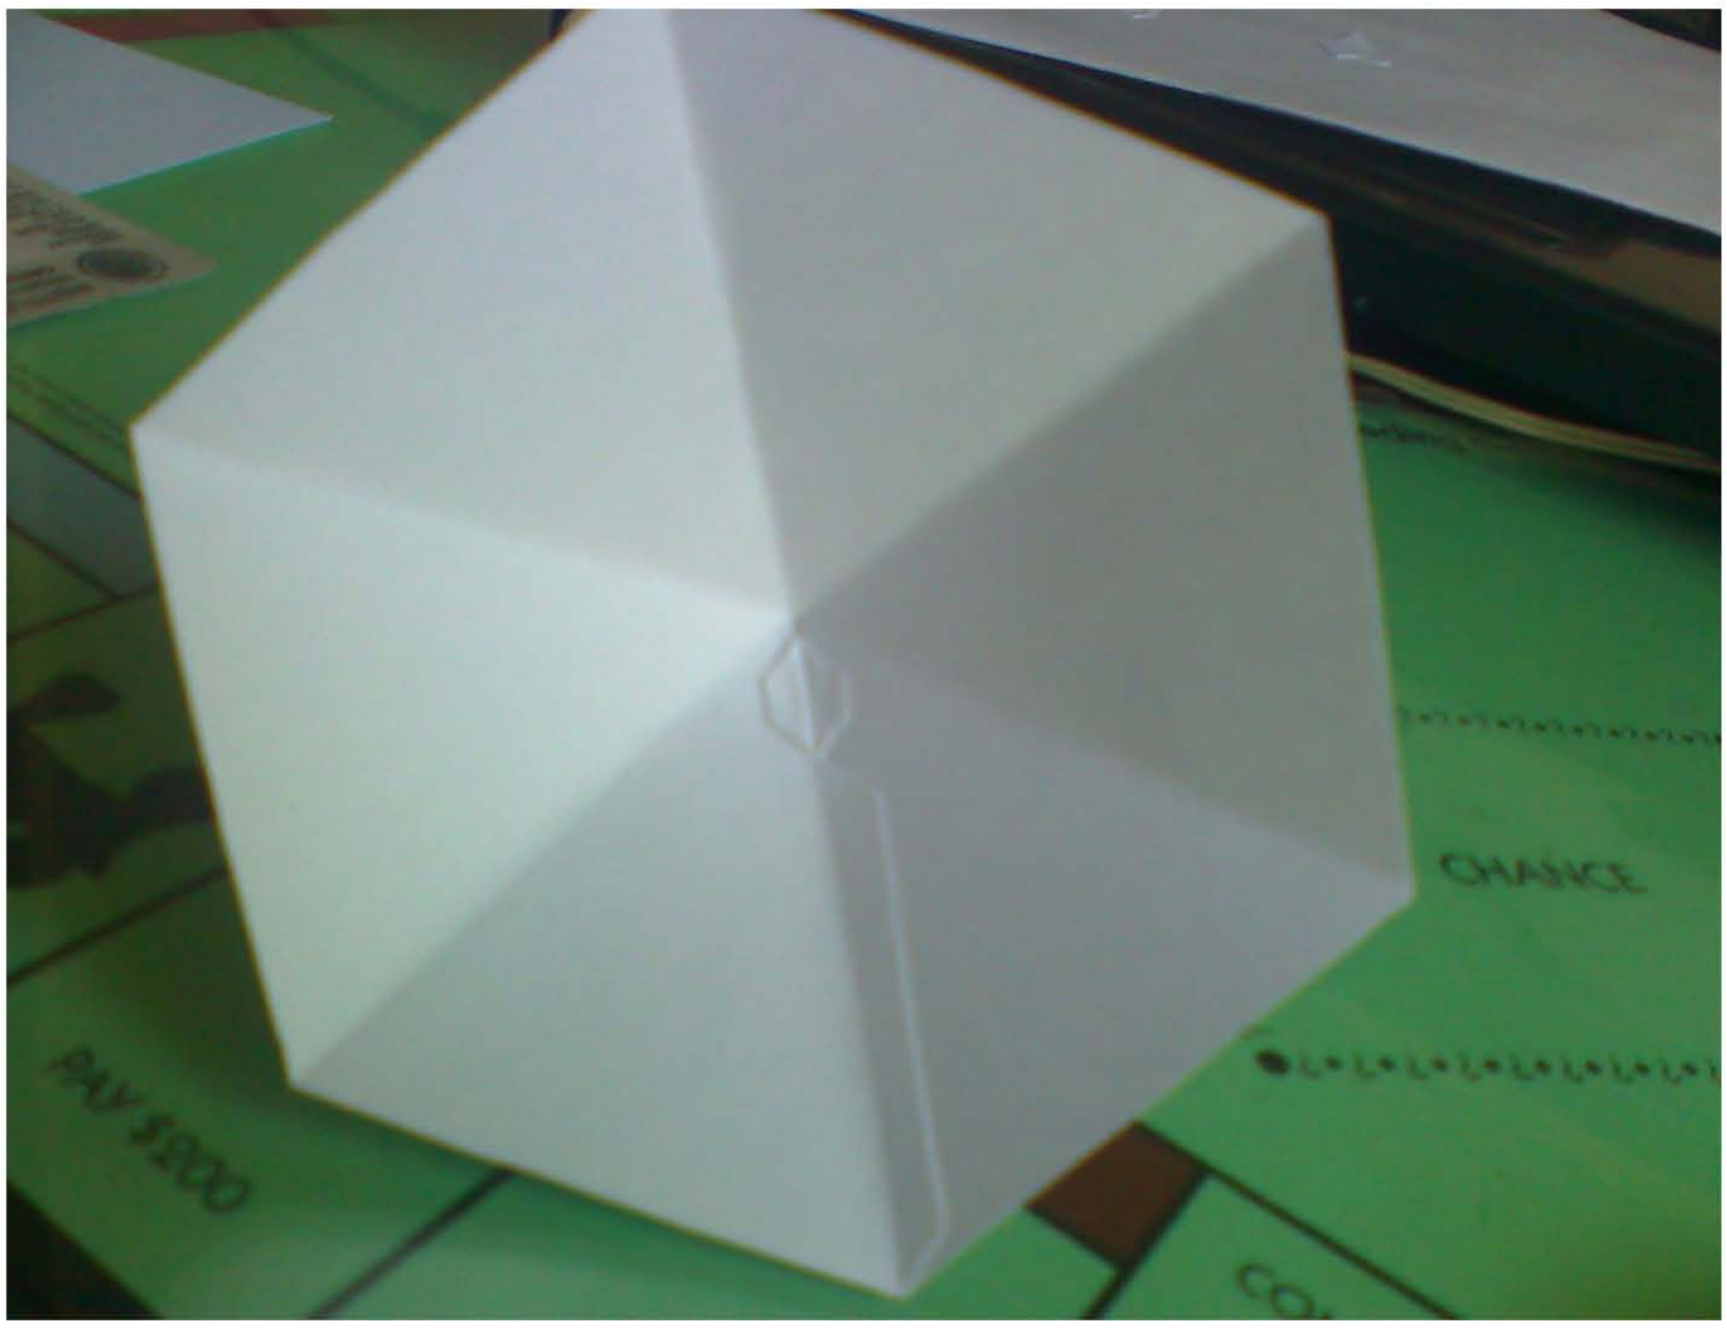

fig.3

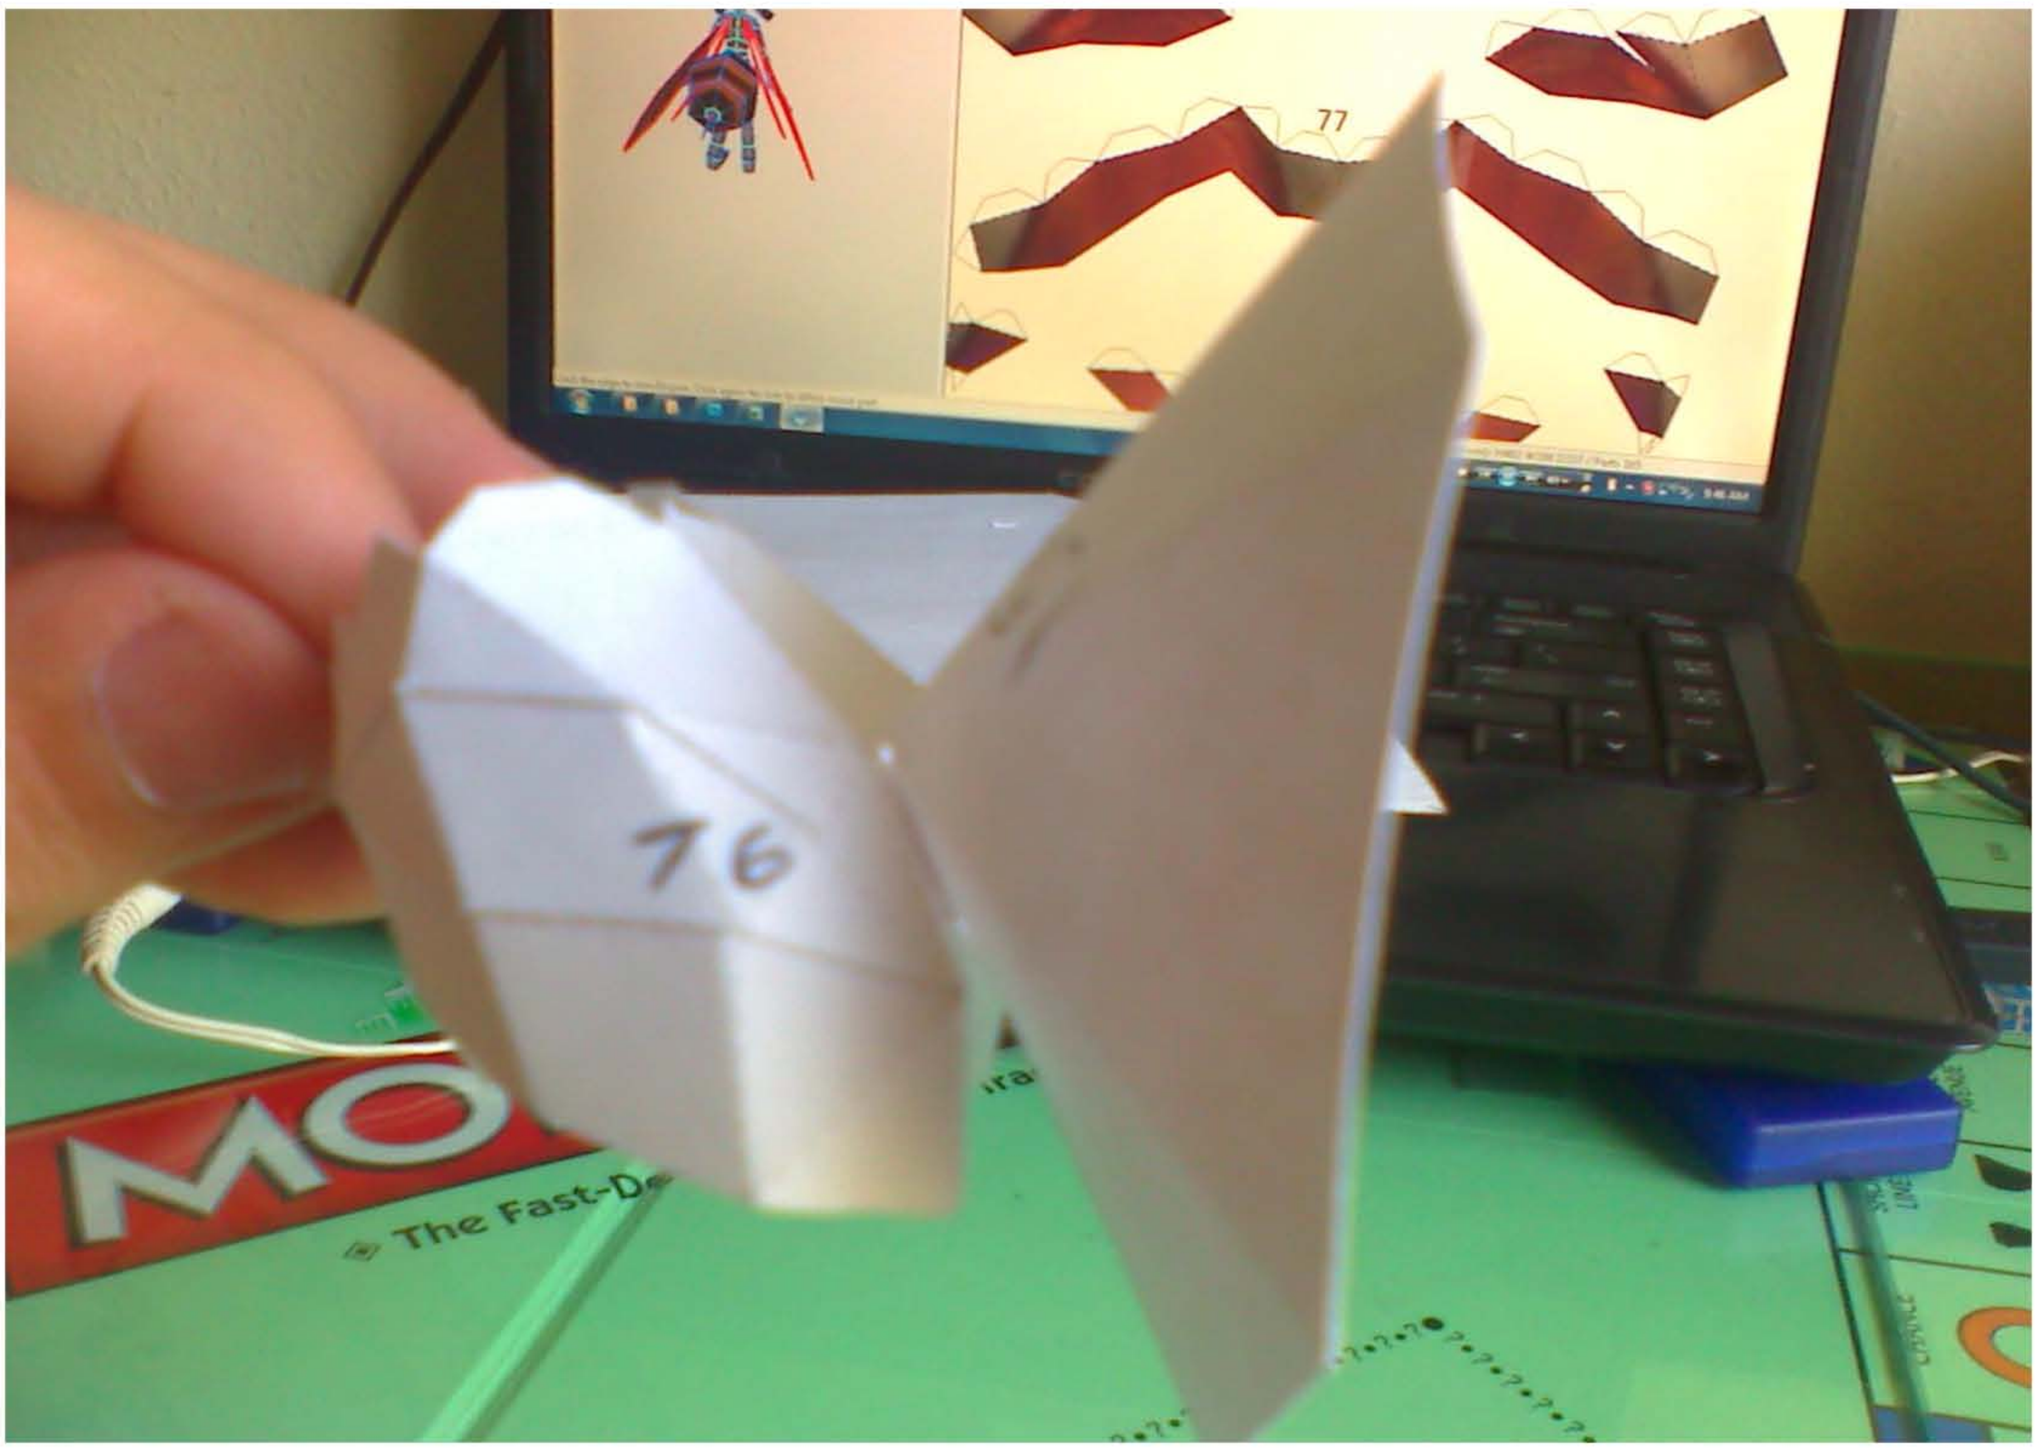
Once you paste the flap on part No.162(152)you are going to see that there's a little gap,you have to insert the flaps from parts No.75 and 76 on that gap and paste them on the side lik fig.3



This is how it should see

NOTE!!!
1.-BUILD THE HOLE BODY BEFORE YOU PASTE PART NO.162(152)
2.-THIS PART I MADE I SPECIAL TO SHOW YOU HOW TO ASSEMBLE THE BACK STING TO THE BODY I RECOMMEND THAT BEFORE YOU PASTE THE FAPS ON PARTS NO.75,76 TO PART NO.162(152)
TRY TO BUILD MORE OF HE STING NOT JUST PART NO.162(152) AT LEAST HALF OF IT.
