
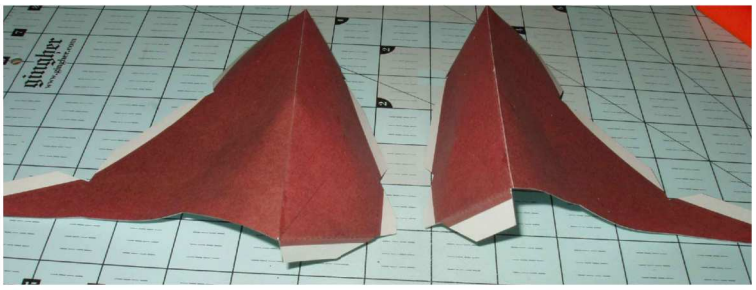
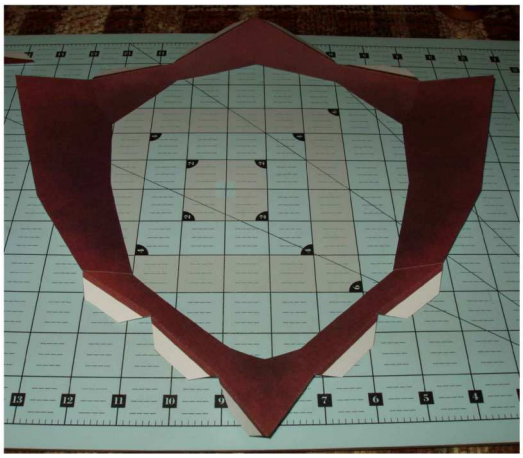
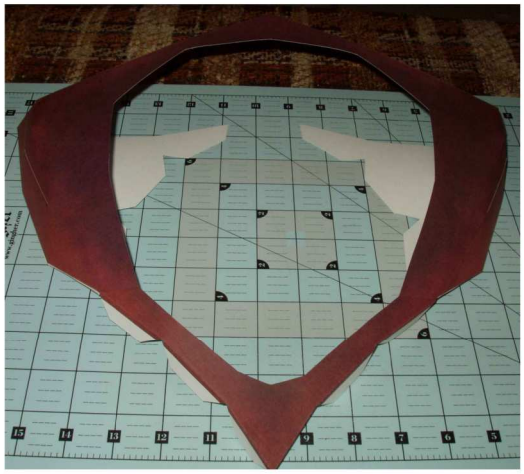
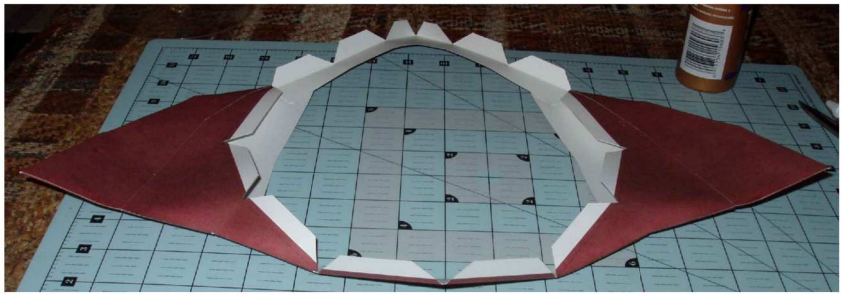
Construct parts 1-2, 3-4, 5-6, and 7-8, then combine, but leave the back tabs open for now, as pictured.

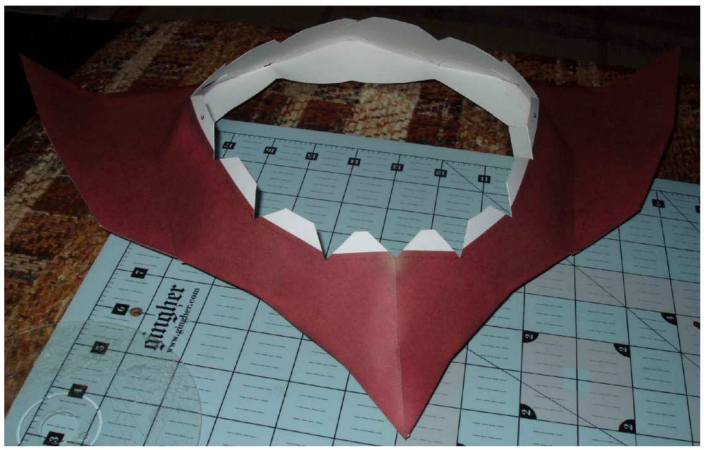




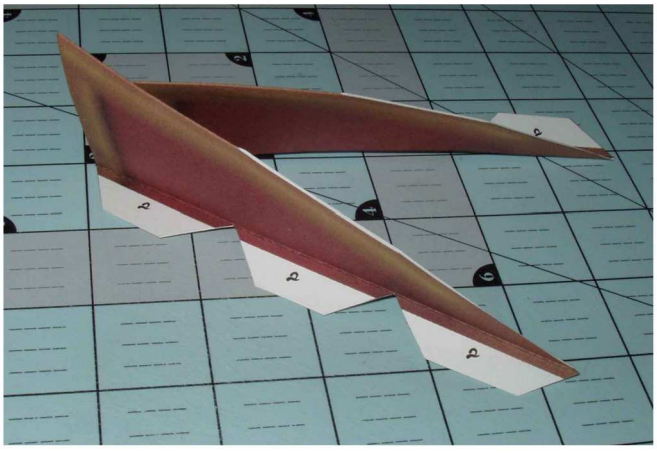
Construct parts 9-12, then attach parts 1-8. Now close the back tabs that were previously left open.



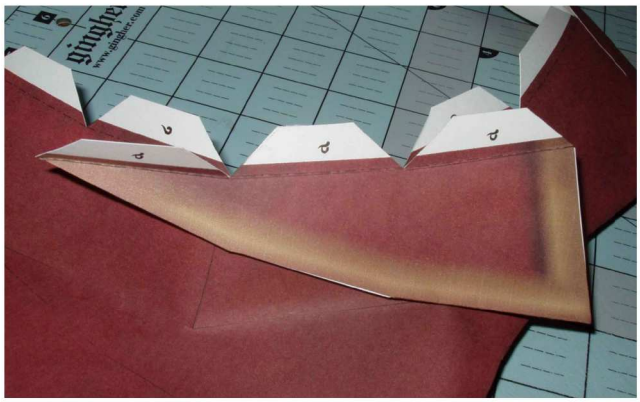


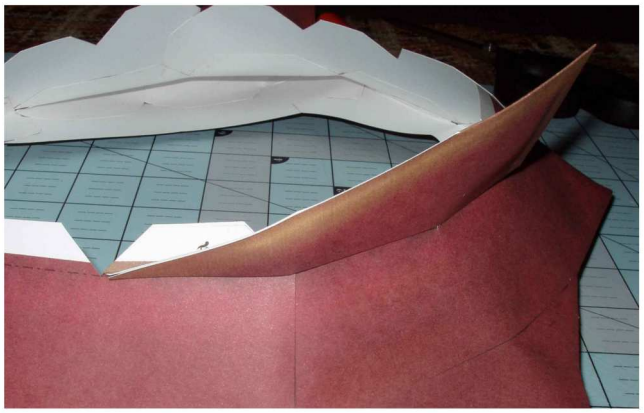


Attach parts 12-15

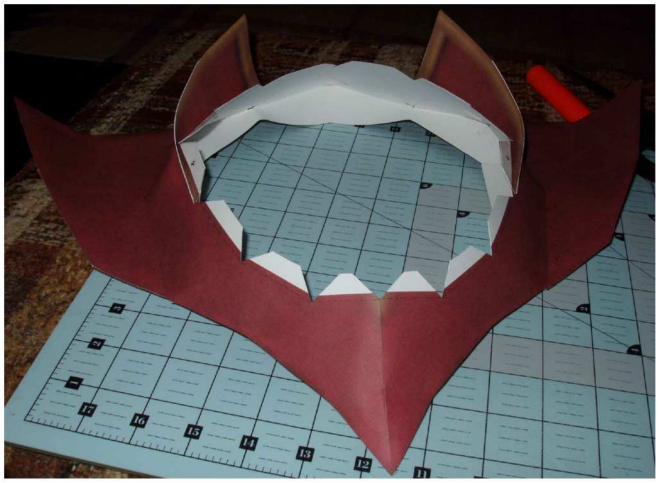


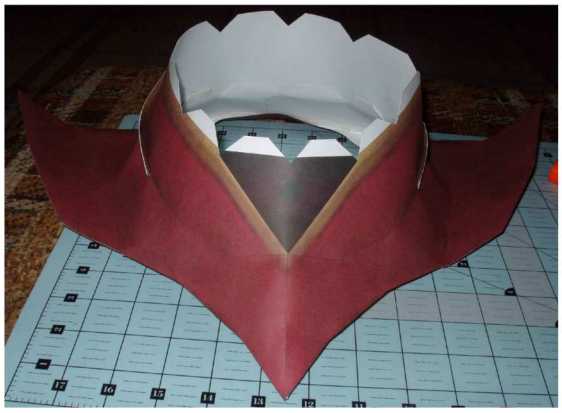
Fold parts 16 and 17 in half, then glue the halves together to create two double-sided wings. Be sure to valley-fold the "a" labeled tabs.



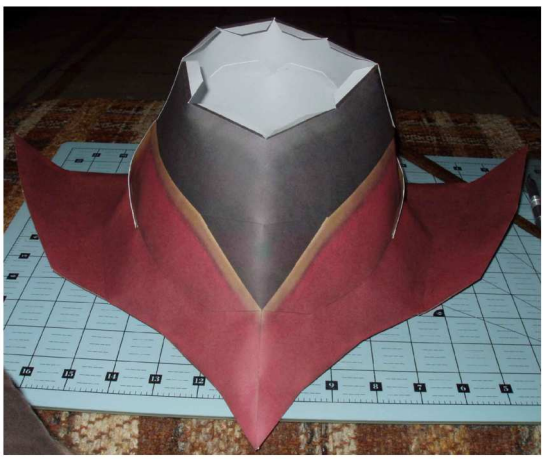


Glue the "a" labeled tabs of parts 16 and 17 over the "b" labeled tabs of parts 12-15.

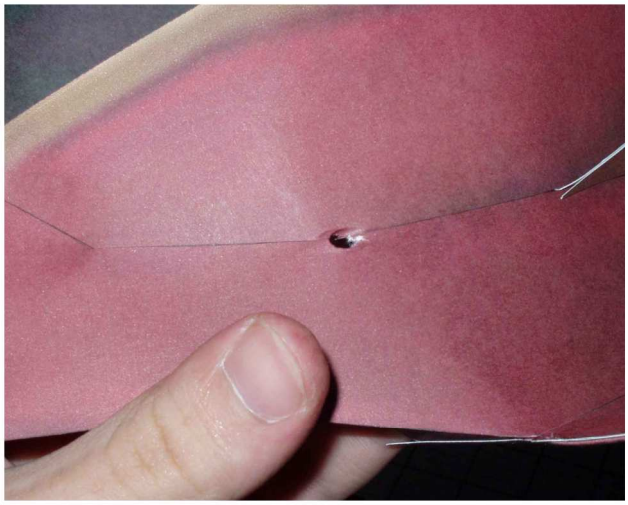




Attach parts 18-22

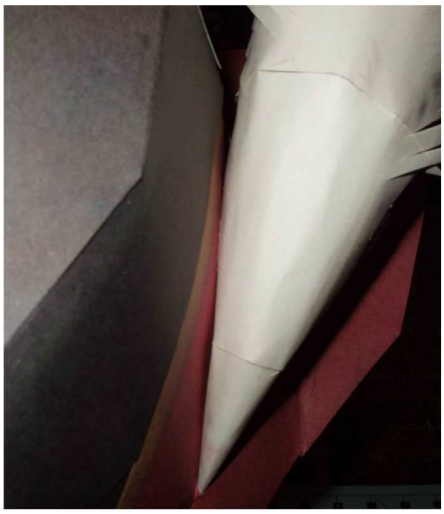


Construct parts 23-26, and cut fringe into the feather if you like. Be sure to keep the fringe out of part 23, for structural integrity.



Punch a hole in the appropriate spot between parts 12 and 19

Insert the feather



To stabilize the feather, snip the edges of part 23 near the tip to unroll it and glue to the inside of the hole. You can also glue the feather directly to the side of the hat if it leans too far out.

Now get out and enjoy your enhanced Fast Cast.
