

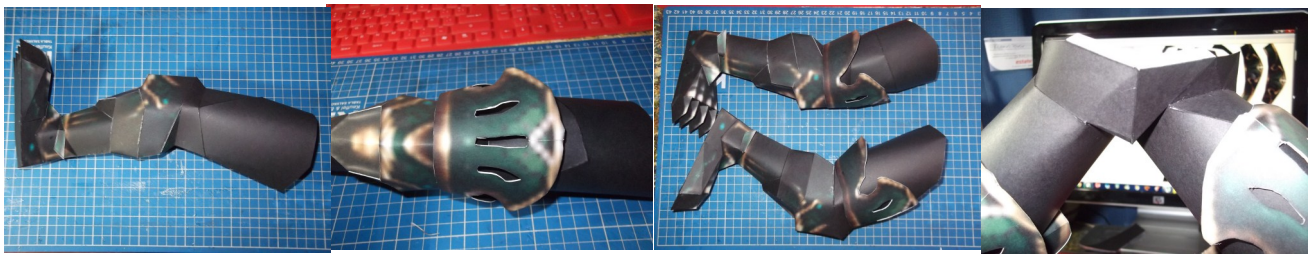
GILGAMESH

GREAT GENBU ARMOR

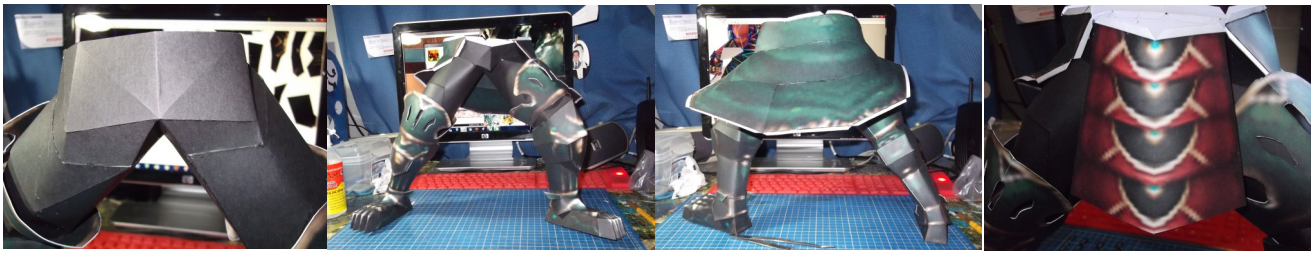
INSTRUCTIONS

WWW.THELASTINLINEAGAIN.BLOGSPOT.COM

Lets start with this new model, first build pieces (1-3), then fold piece (4) and attach, continue with pieces (5-7), glue (8,9).

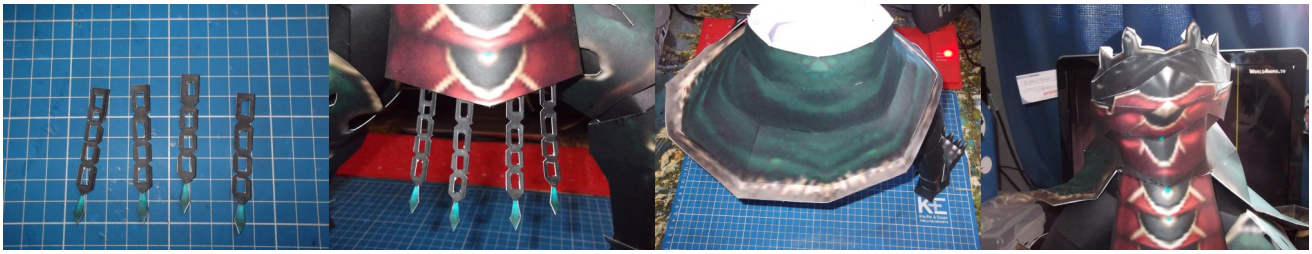


Finish the leg (10-18), now take (19,20) and glue them together then trim the excess; yo have to do the same for the left leg (21-40), then attach both legs together with pieces (41-43).



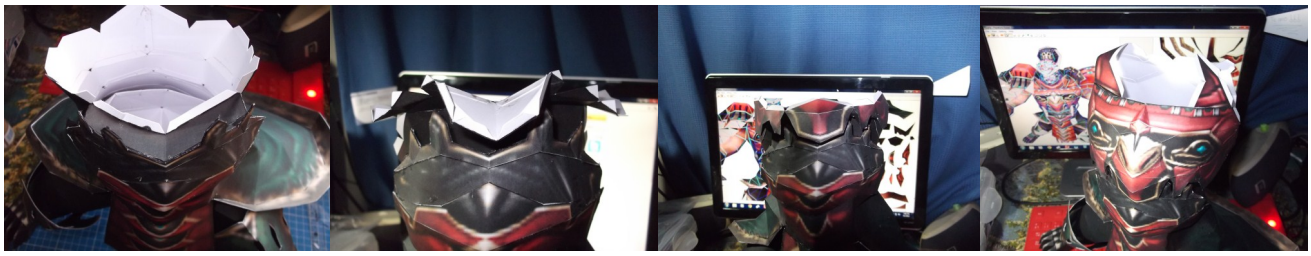
Glue piece (44), now build the skirt (45-52), and attach to the legs, notice that the flaps has red dots, glue them together, take pieces (53-58) and attach them on the red dots.

Fold (59,60) and attach to the waist.



Build pieces (61-68), and trimm the excess to make them looks like a chain.

Now continue with the body, build pieces (69-78).

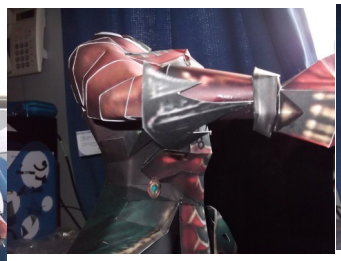


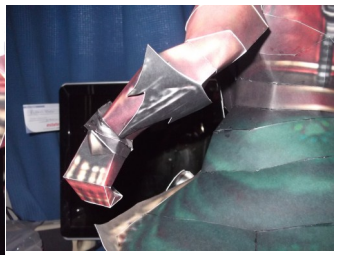
From this part begins the most difficult process, first attach pieces (79-83), then pieces (84-91), fold them according to the PDO file. And glue pieces (92-95) and (96-106)

Build the lef shoulder pad (107-109) and attach to the body.

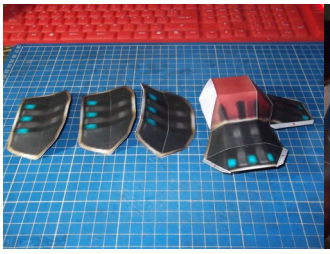
Now the chest is done, then place pieces (110-117).

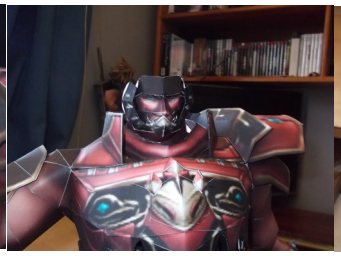
Now build the hand (118-126) and the arm (127-136); first attach the arm then the hand, this way you can align it.

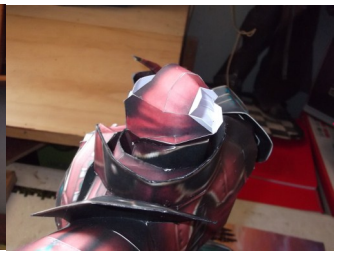




Do the same for the right arm (137-154), fold (155,156) and trim the excess, place them on the wrists.







Build the right shouder pads (157-179), but don´t attach them yet.

Glue the neck (180-187), the face (188-200) and the helmet (201-210) .

Glue pieces (211-221) and build (222-233) then attach all to the head. Trimm the excess on pieces (224, 225)
