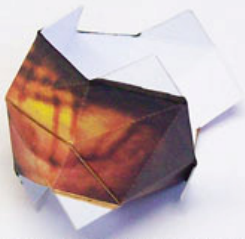
Goblin Harvest Golem instructions

step 1

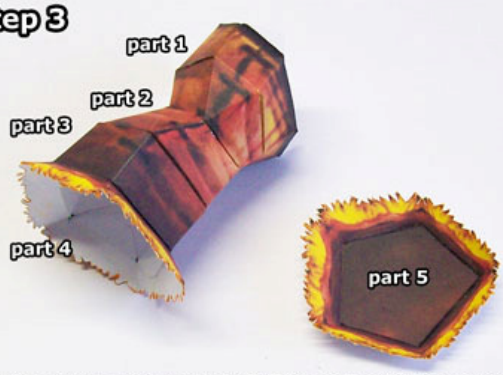
Print the parts on thicker paper (I always use 200 gsm paper) and get out your papercrafting tools.
I also used markers to colour the edges of the paper to get rid of the white lines of the paper: * www.youtube.com/watch?v=hhBuuEVSUcw

step 2



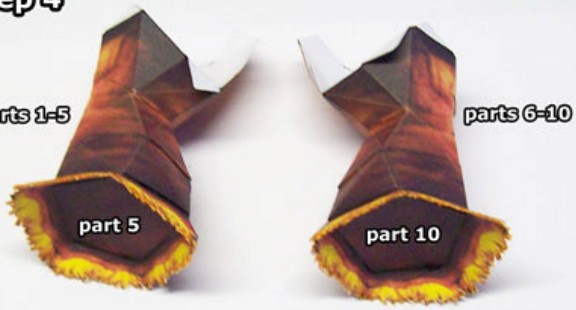
Cut out and assemble part 1, by glueing together the two ends labeled "A". Also make a mental note of the edges marked "C" and "D".

step 3



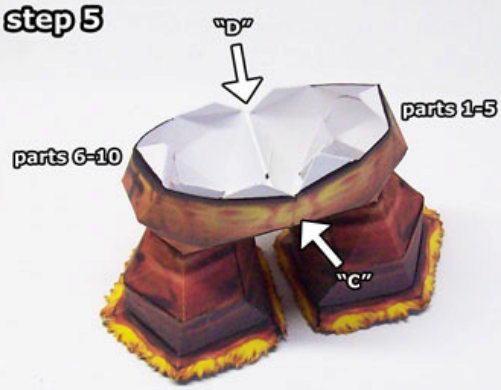
Continue assembling parts 2-5 (part 5 with the coloured side in!) and glue them together as shown here.

step 4



Take care glueing part 5 underneath part 4 as its mirror part as shown here.
Then do the same for parts 6-10, again making a mental note of the edges marked "C" and "D".

step 5



Use the edges marked "C" and "D" to glue the two legs together (shown from the back here).

step 6

Glue on parts 11-13 as shown here.

step 7

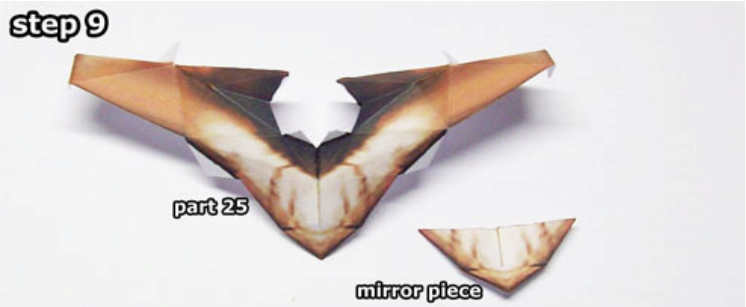
Before glueing on part 14 as shown here, cut out the 7 slits on either side as indicated.

step 8

Use the 5 outer slits on each side to glue on parts 15-19 and parts 20-24 as shown here.

Each of these parts has a mirror part, which you can use to cover up the white backside.

step 9



Pre-shape part 25 as shown here (if you're having trouble seeing the fold lines on the printed version, use the PDF version to compare).

As before, you can use the mirror piece to cover up the white backside if you want to.

step 10

Take your time glueing part 25 to the shoulders, overlapping the chest as shown here.

step 11

Glueing on part 26 to close the back can be tricky, so take your time and use the hole at the top to reach inside and maneuver it correctly in place.

step 12

Cut out and assemble part 27 as shown here.

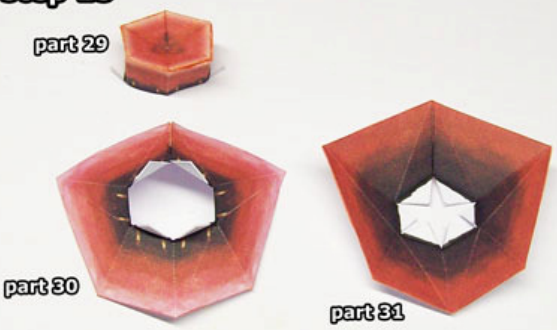
step 13

Glue the Harvest Golem's head to its body, over the hole at the top as shown here.

step 14

Cut out part 28 (glueing the mirror part to its back if you want to) and then glue it to the Harvest Golem's chest, as a sort of tie.

step 15



Assemble and pre-shape parts 29-31 before glueing them together into the Harvest Golems hat.

step 16

Glue part 29 to part 30, and then part 31 underneath. Then glue the hat on top of the head.

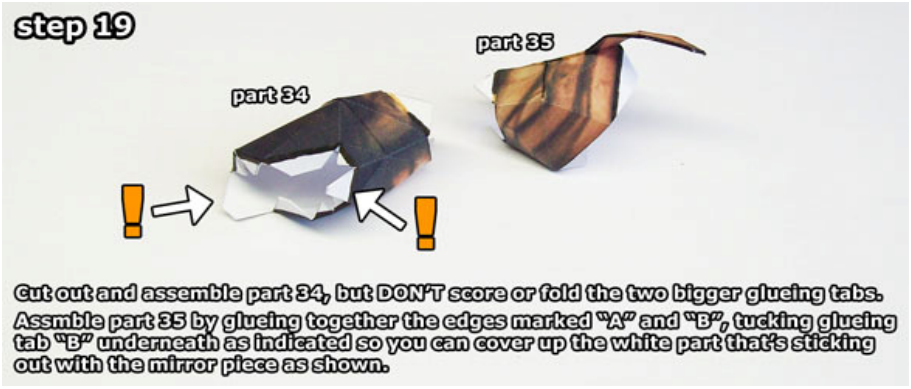
step 17

Assemble parts 32 and 33 as shown here.

step 18

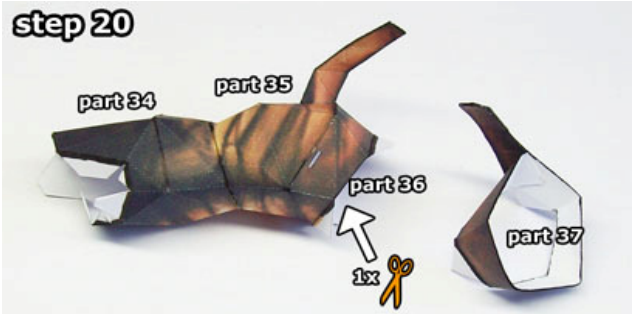
Glue the feet underneath the legs as shown here. Make sure the Harvest Golem can stand straight.

step 19



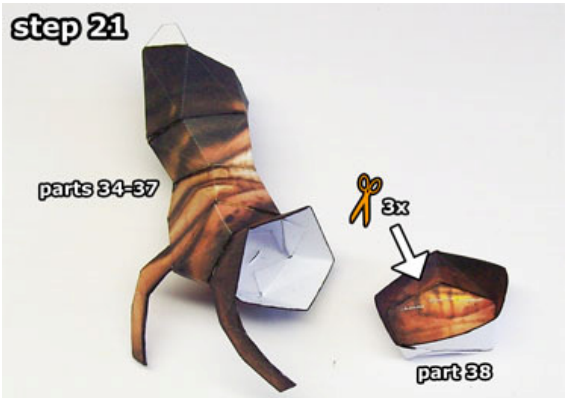
Cut out and assemble part 34, but DON'T score or fold the two bigger glueing tabs.
Assmble part 35 by glueing together the edges marked "A" and "B", tucking glueing tab "B" underneath as indicated so you can cover up the white part that's sticking out with the mirror piece as shown.

step 20



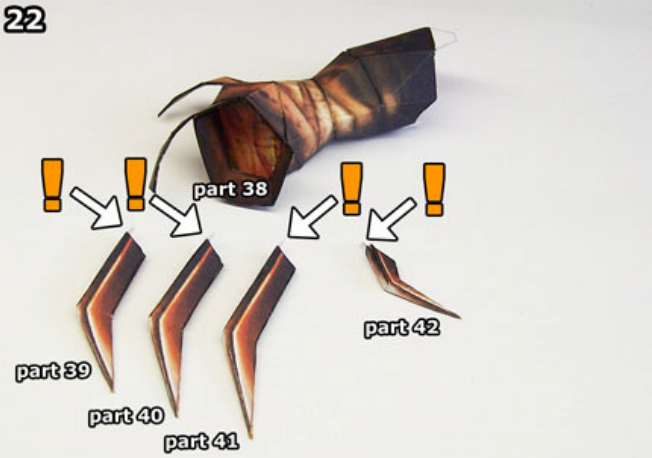
Glue these parts together, as well as part 36 (don't forget to cut the small slit!) and part 37 (tucking the glueing tab marked "C" underneath as indicated).

step 21



After glueing together parts 34-37, cut the three small slits on part 38 and then assemble it as shown here (with the coloured side in!)

step 22

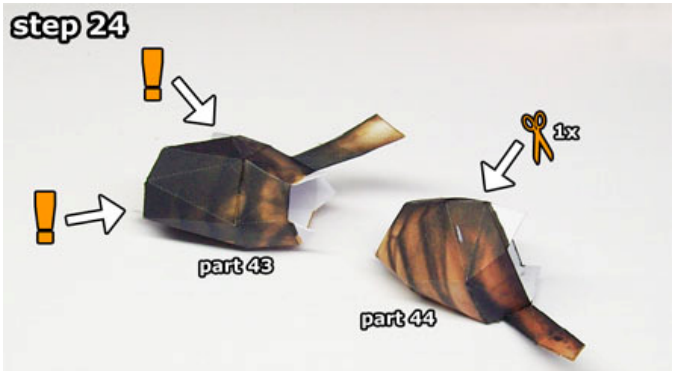


Glue part 38 to the bottom of the arm as shown here. Then thorougly score all the fold lines on parts 39-42 to make them easier to fold and assemble, but DON'T score or fold the bigger glueing tabs!

step 23

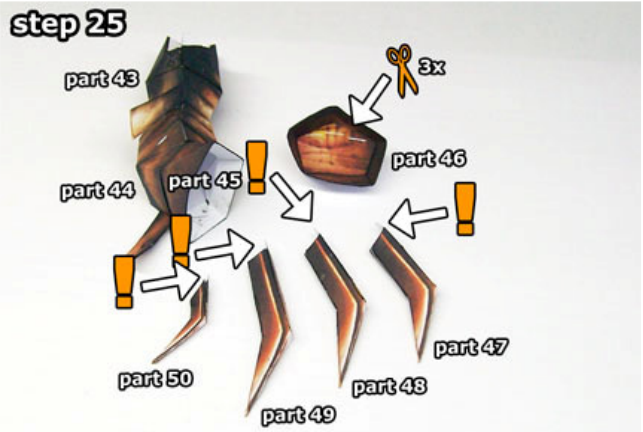
Use the two larger glueing tabs on part 34 and the last two slits on the Golem's right shoulder to attach the arm to the body, and glue the three claws to part 38.

step 24



Cut out and assemble part 43 (DON'T score or fold the 2 bigger glueing tabs!) and part 44 (don't forget to cut the small slit) as shown here.

step 25



Glue together parts 43-45, and then assemble part 46 (with the coloured side in, and don't forget to cut the 3 small slits!) and parts 47-50 as before.

step 26

Glue the claws to part 46, and then glue the left arm to the Harvest Golem's body like the right arm before.

step 27

Glue together parts 51-58, not forgetting to cut the small slits on the planks to push through the ropes of course!

step 28

Divide and glue the planks over the Harvest Golem's back, as shown here.

step 29

And that's it: your papercraft Harvest Golem is done!

Happy Halloween 2012, and thank you for building a Ninjatoes' papercraft model!
