Model: Rosemon

Height: 40 cm

Difficulty: Hard

Designer: @eve.viana10

Notes: Some parts are very small, like the fingers, the rose/head, the whips and some others. But don’t give up, it’s hard but not impossible! You can build at any order you want, but I suggest you to follow the numbers in the pieces

SUGGESTION OF BUILDING:

1 - Start building from piece 01 to piece 91. That is the body.

2 - Then, build the whip around the body, from piece 92 to 111.

3 - Then, build the cape and Tiferet, pieces 112 to 134, but attach them to the body later.

4 - After, build the rose/head, hair and roses hairclip, pieces 155 to 171, these are the last parts you attach to the body.

5 - Be careful with the bigger whips around the arms, build from piece 172 to 207 and attach to the model, then, build from piece 208 to 211 and join both parts, use some hot glue in order to keep it fixed, finishing the whip.

6 - Do the same to the other whip, build from piece 212 to 247 and add to the body, then, build from piece 248 to 282 and join both parts, use some hot glue in order to keep it fixed, finishing the second whip.

7 - Now you can add the cape and the Tiferet, use some hot glue to keep them fixed in place, and finally attach the head.
