This template was made for the public as a gift and to proff my passion for building a Gundam, build it, request any change, give thanks, or hate me.

DON'T SELL, DON'T EBAY, DON'T MAKE ANY PROFIT WITH IT, unless of course you give me some donation.

this is the first and not the last one, big plan for my next model, i'll be making model with movable parts.

About Gundam Heavyarms:

this is the first model i made using Blender and Pepakura Designer, when i began, i tryied to make everything look cool btu encounter a lot of troubles exporting to pepakura, so to fix everything i remove textures and some others thing i was planing to put, i won't be releasing another version of this model, and if a do it will be a complete different one, i made too many mistakes in the model, but it help to see what not to do in future ones.

thanks for the people who were interested in this model, this one is for you all,

any complaing or greetings send them to n0tm3_wow@yahoo.com
