

World of Warcraft

Death Knight Helm

by Barbarian

TIPS:

Build the helm's back first (page 3).
Glue the upper beard's outside piece to it (page 6).
Glue the upper beard's inside piece to the back of outside piece.

Build the lower beard piece, glueing the inside piece to the back of the outside piece as you did with the upper one, leaving the flaps open to glue it to the upper beard. Now cut the white spaces out.

Build the helm's front piece and glue it. Build the horns, starting by their points. Apply glue to their flaps and stick the horn from the helm's bottom opening into the holes.

You can leave the helm's face open, not glueing the "face shadowing layer".
