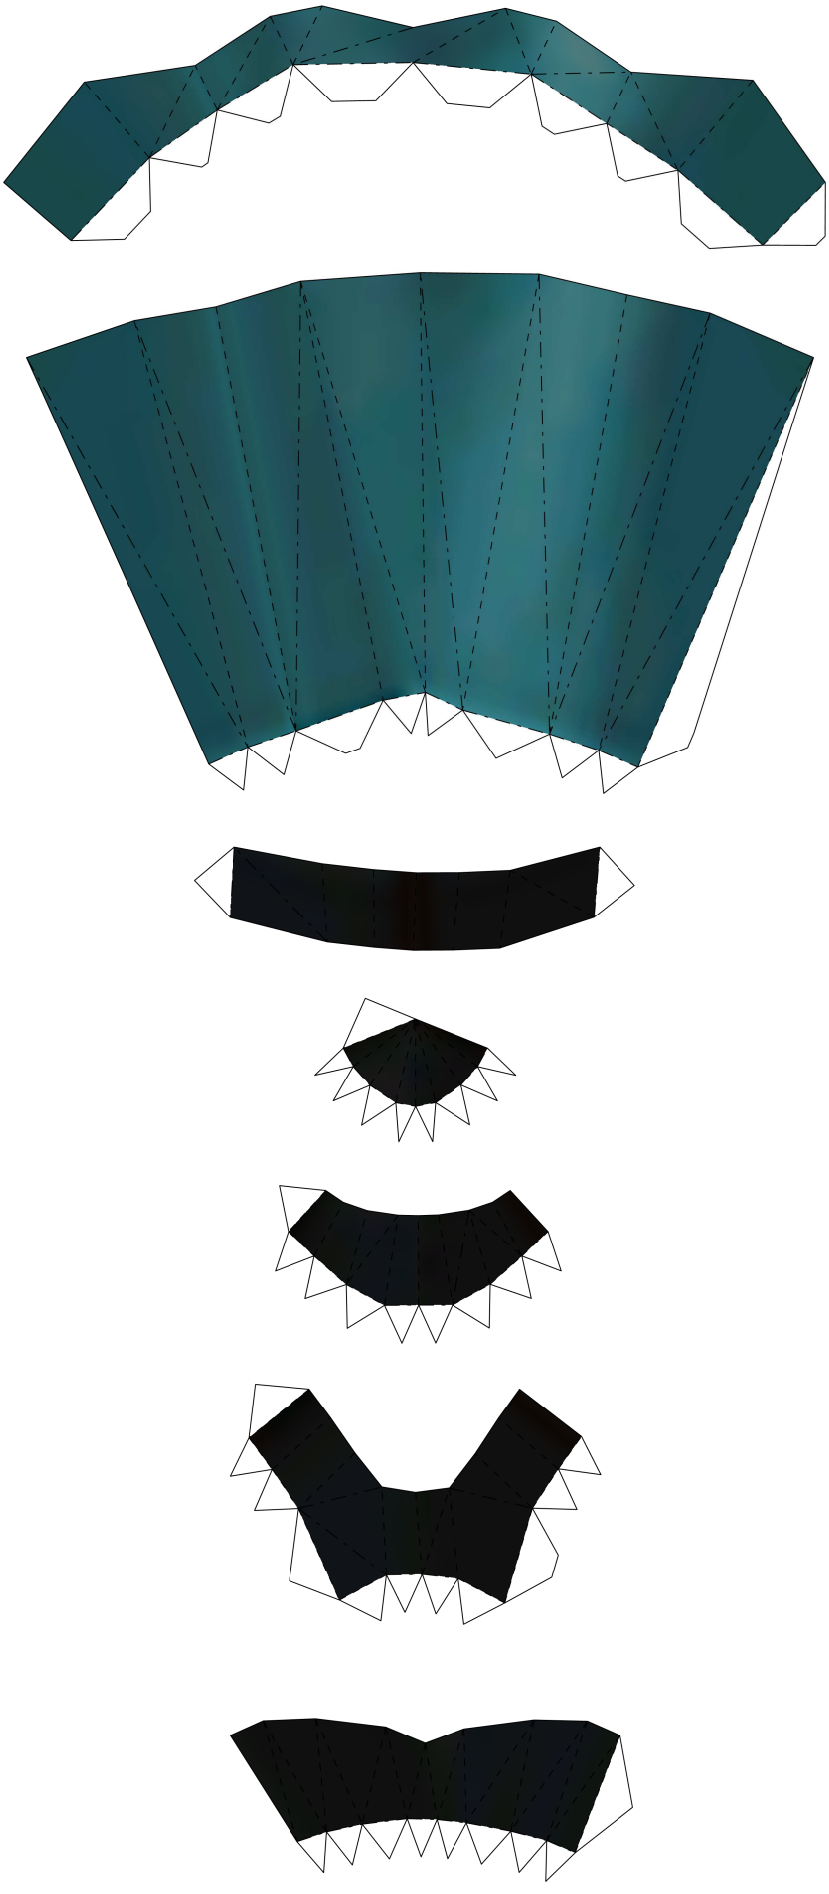
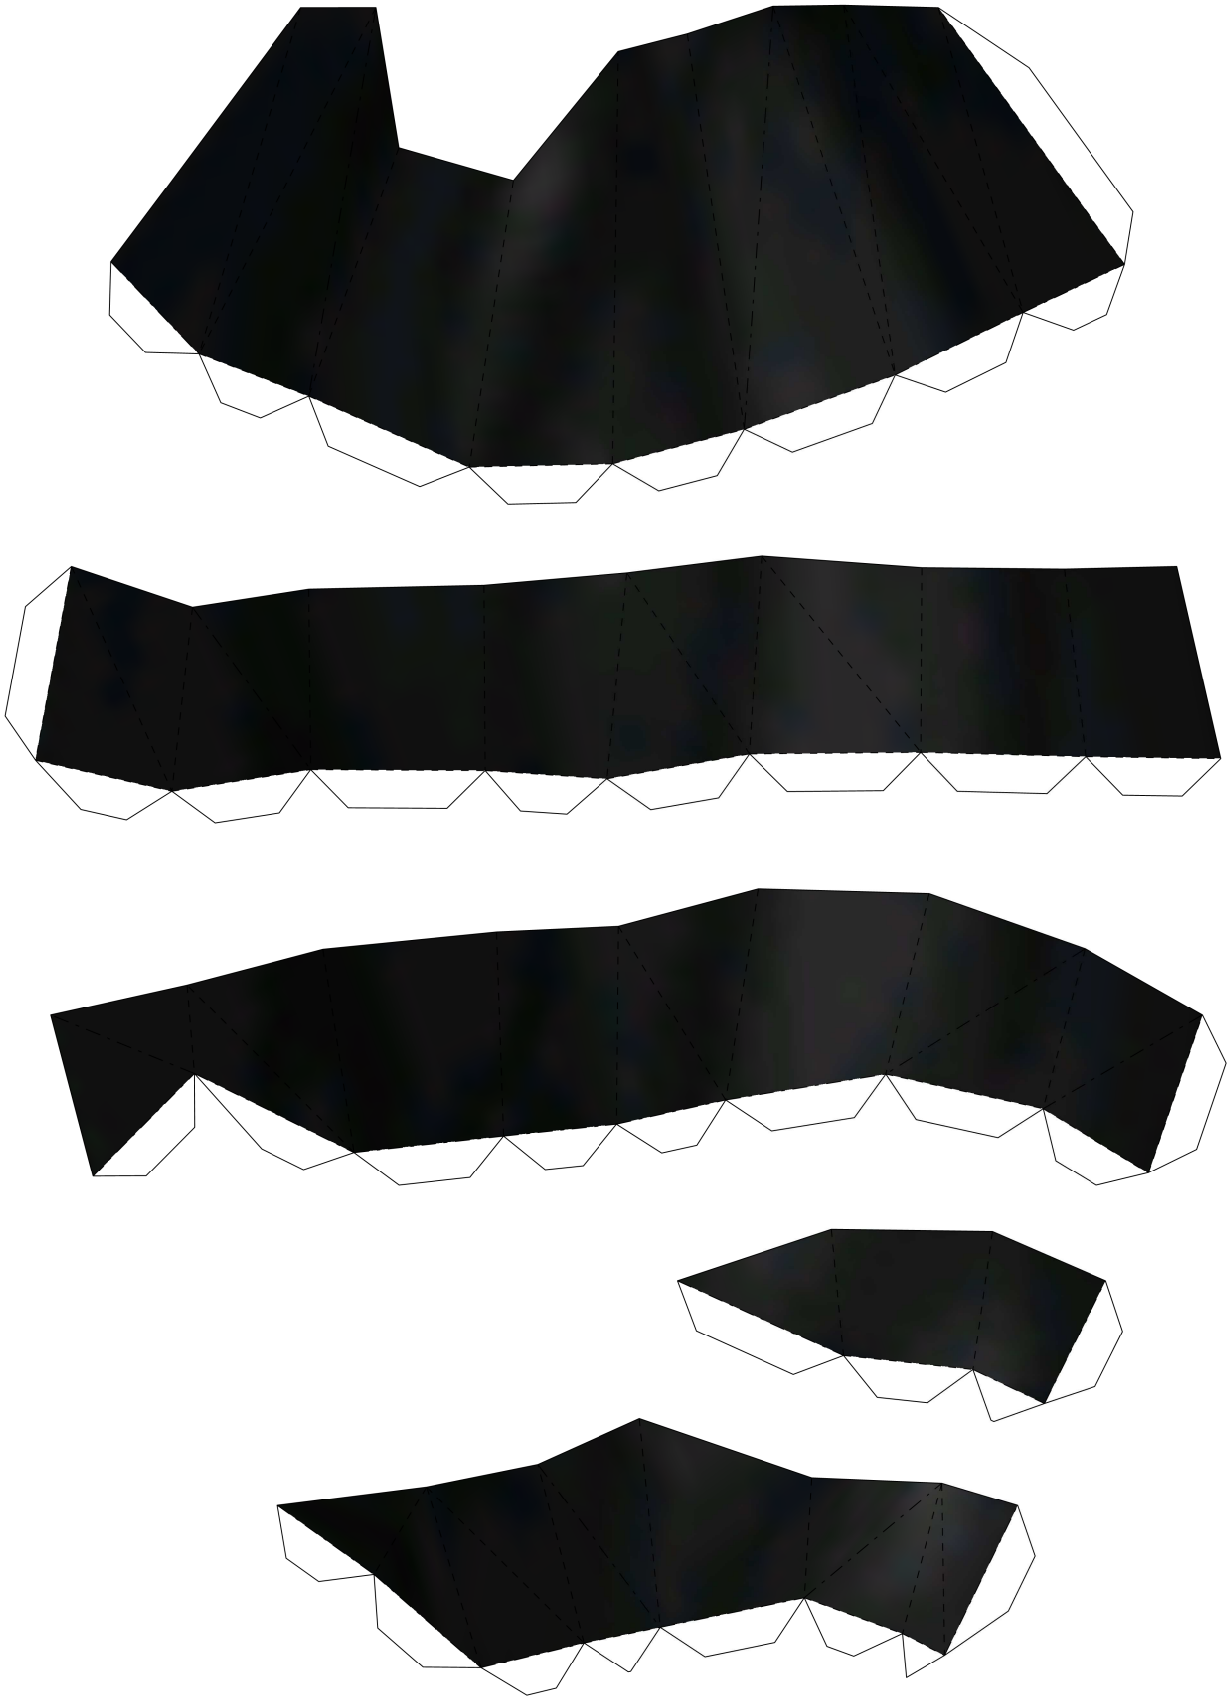
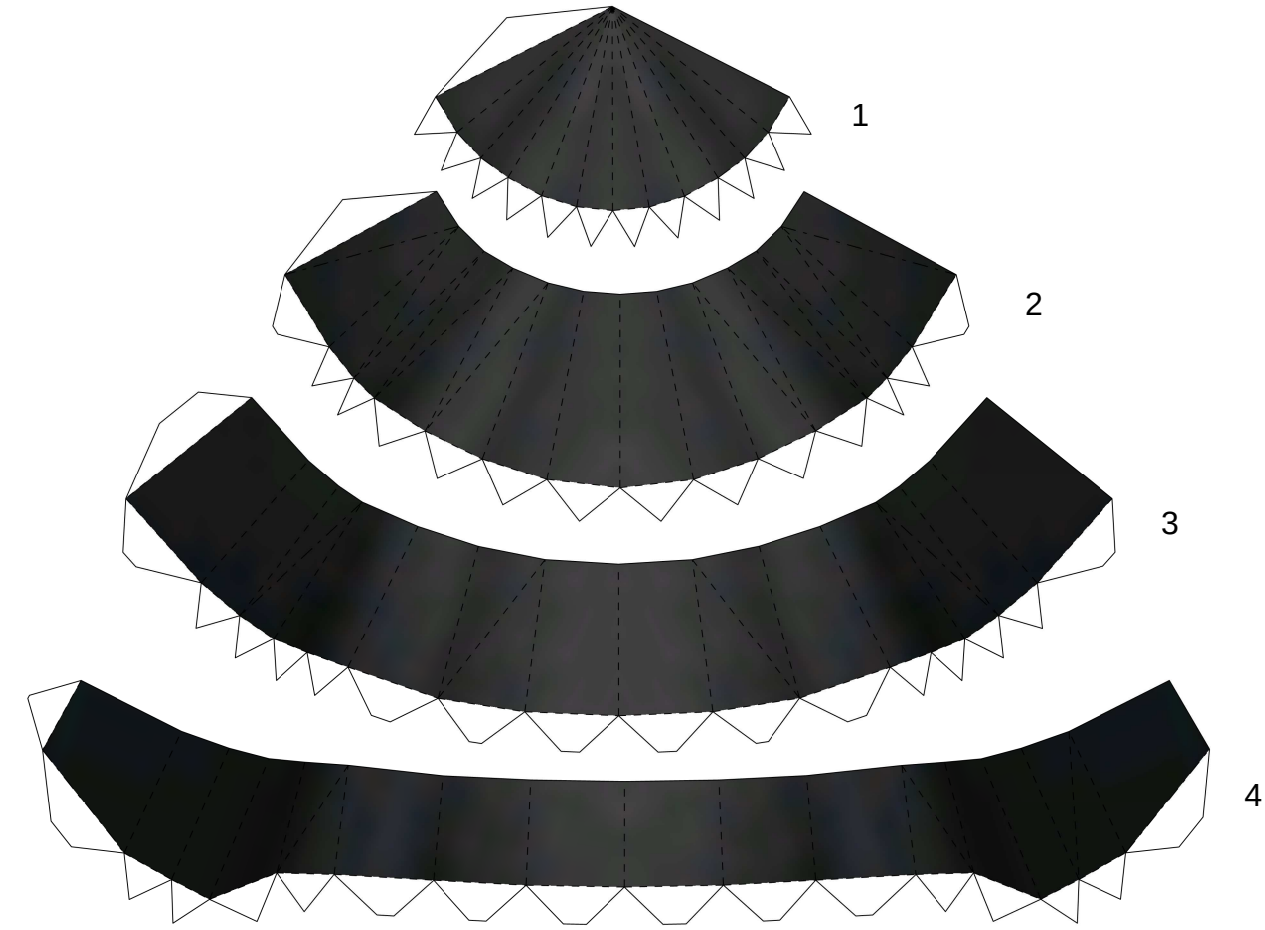
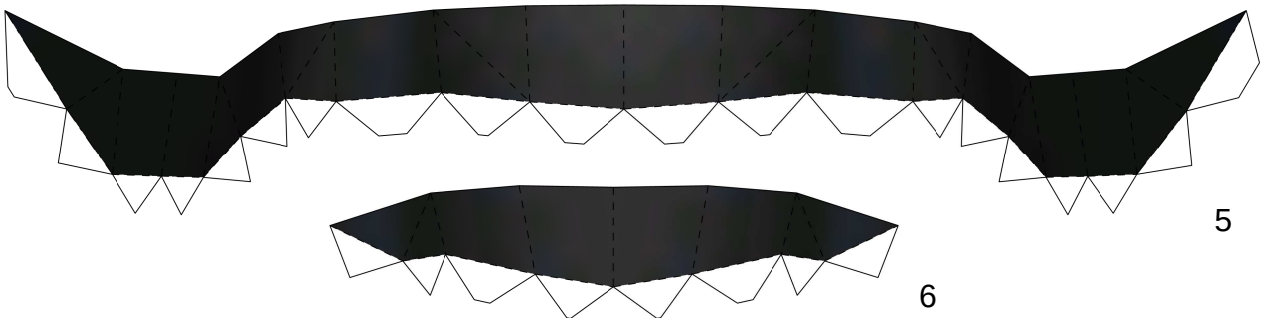
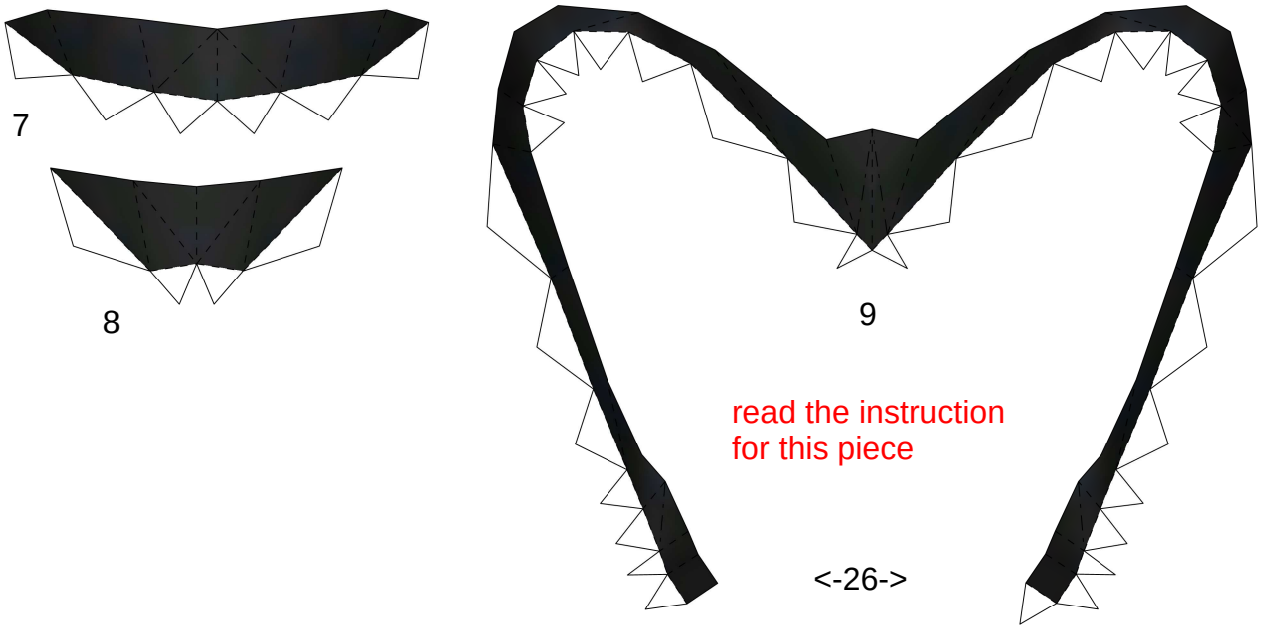
don't care about this piece
just use it as hint
the tabs are equal











<-26->

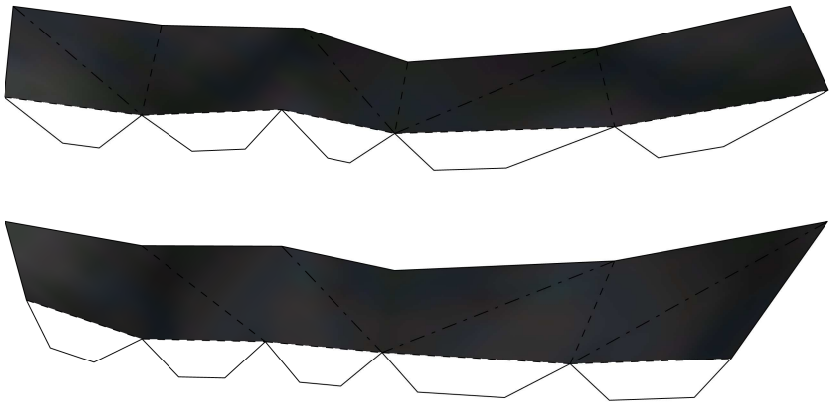
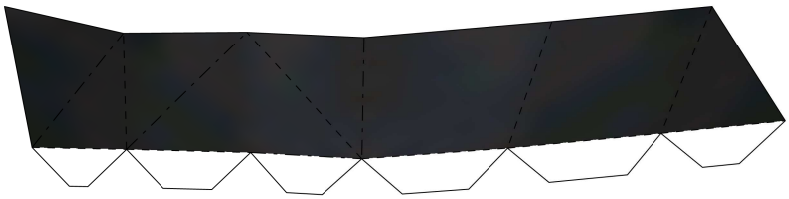
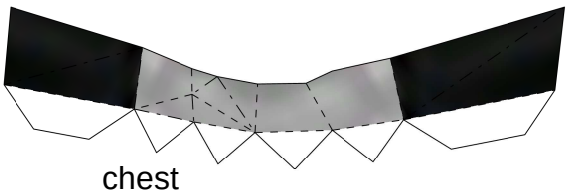
last part of the right arm
was too big to sort it right ^^'

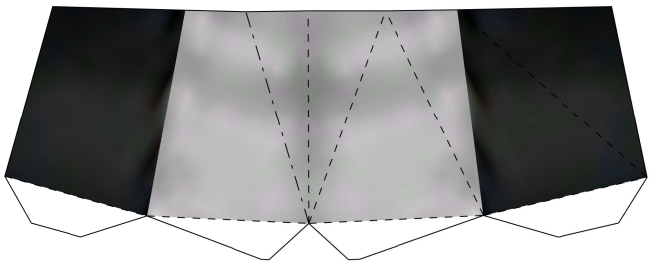


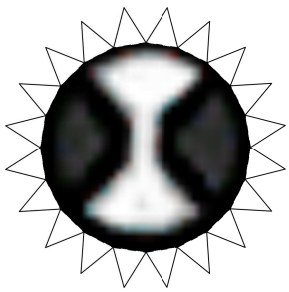
backside

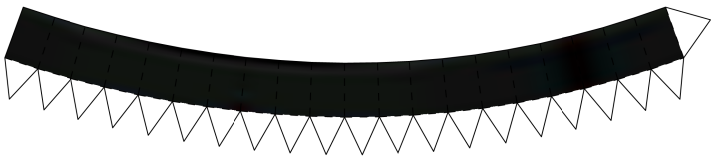


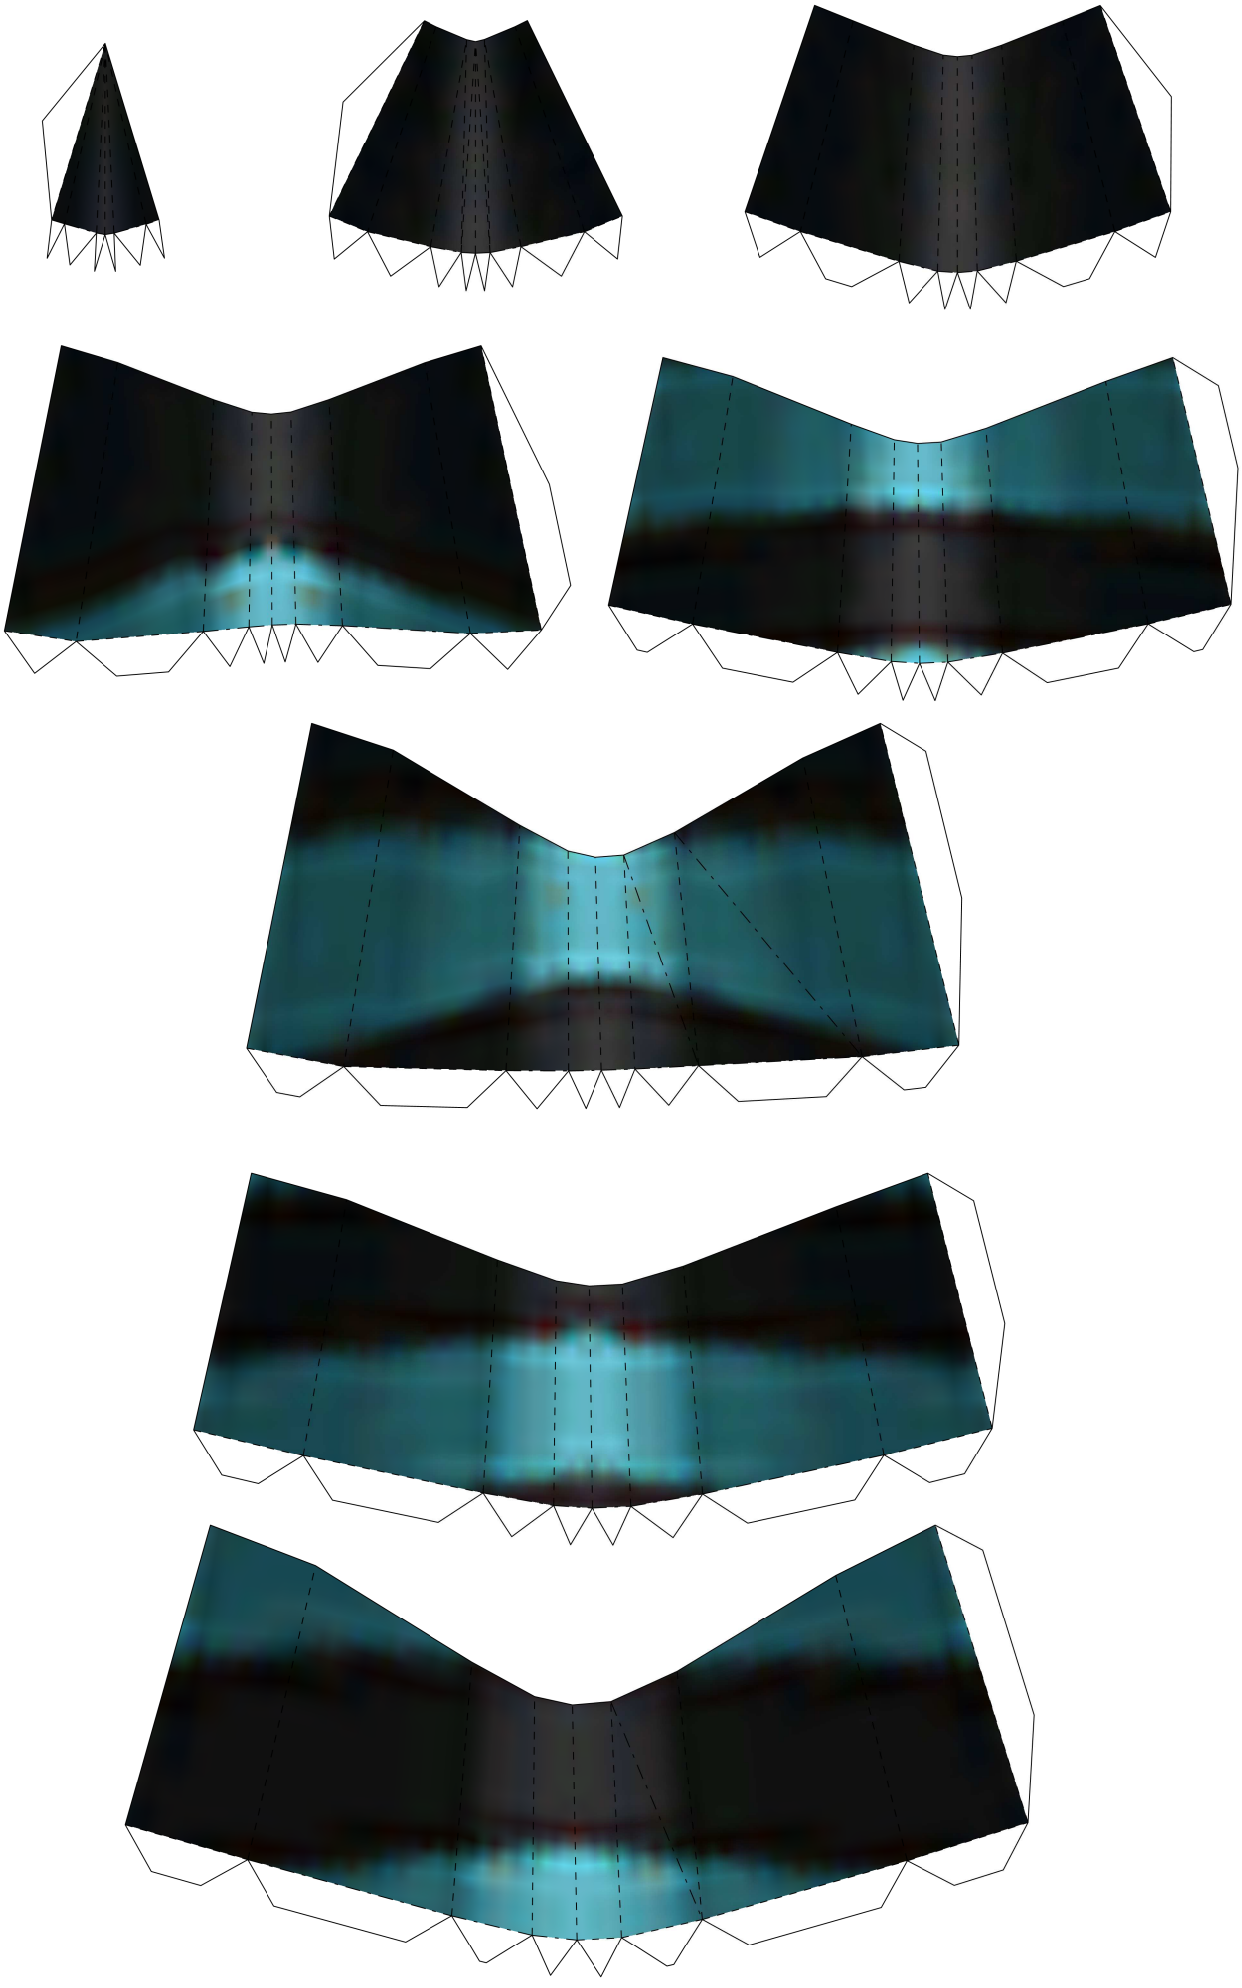


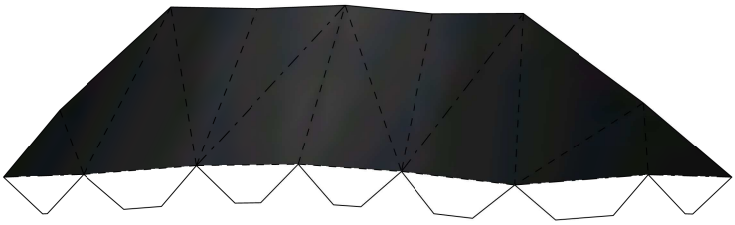
chest

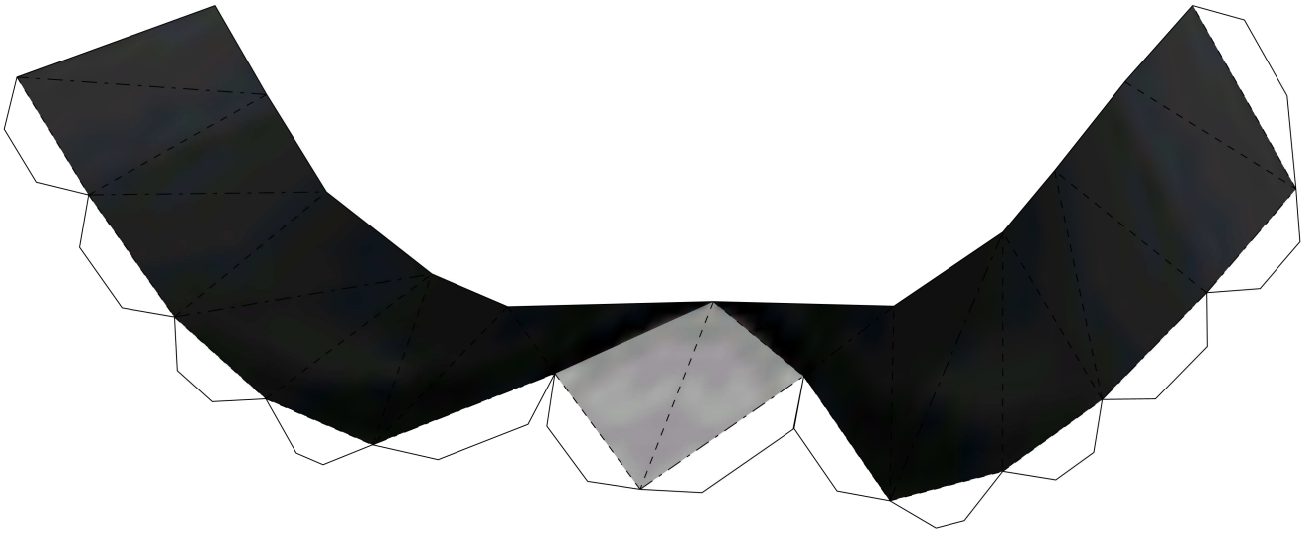


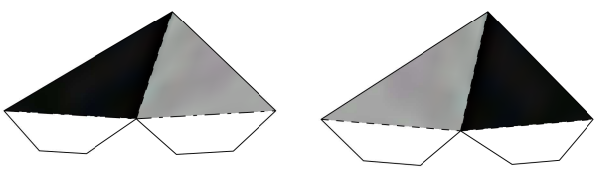












hey there =)
thank you for downloading my Ben10 - XLR8 Papercraft

this model is very hard and i'm sorry that for :*)
but it's not impossible
just follow the number count
and read the instructions at the building process gallery closely
at my deviantart profile destro2k.deviantart.com
also build the limbs first and build further to the torso
and you should have no problems

in contrast to the face
were you actually don't need any scores or foldings
the rest of the models has a lot of valley folds
to receive the shape of the model
so the smooth building method is probably very hard here

the big ring pieces for the head have two numbers
these pieces are "dynamic"
PLEASE read the instructions in my gallery very close

the white version also contains a few red colored lines
which show you the hard folding lines

model received from Odnamra22
Odnamra22.deviantart.com
a really big thanks to you <3

realized by me Destro2k
http://destro2k.deviantart.com

if you have any problems ore questions
pls let me know at devianatart.com =)

and the most important thing

this model is free
and should it be
so let it be
