DISASTER
dioramas!

Welcome to the latest in the Disaster Dioramas series: The Great Chicago Fire. This one should also be one of the easier dioramas to put together, but hopefully just as fun. Let's begin!

Fold base the dotted lines - first (a) and then (b). Stick the tab-y part between the folds. Use a knife to cut the solid line on the base. That slot will be for the back of the diorama (pg 2). Cut the "X"s in the boxes on the right side of the base. They will be used to hold the barn pieces.
