

The Great Chicago Fire

Fold the columns on the dashed lines. Secure the column at the "glue here" points, and fold the tabs and secure them at the top of the columns.

Take the wall (pg 3), and place it between the gaps of the two columns. Secure with glue or tape.

Fold the roof over on the orange line. Alternate folding over and under on the dashed and solid lines to give the roof a zig-zag appearance. Secure the roof to the top of the columns.

Once this is done, put the columns into the base of the Diorama (roof facing "in"), and secure under the base.
