Vincentmrl's King Harkinian Instructions

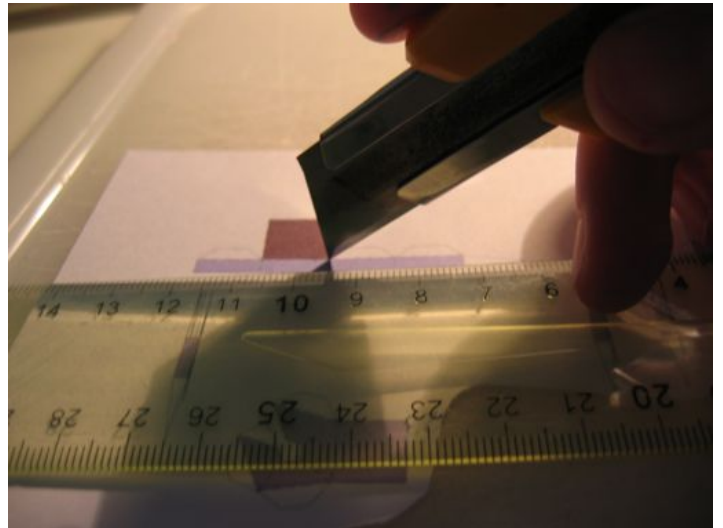

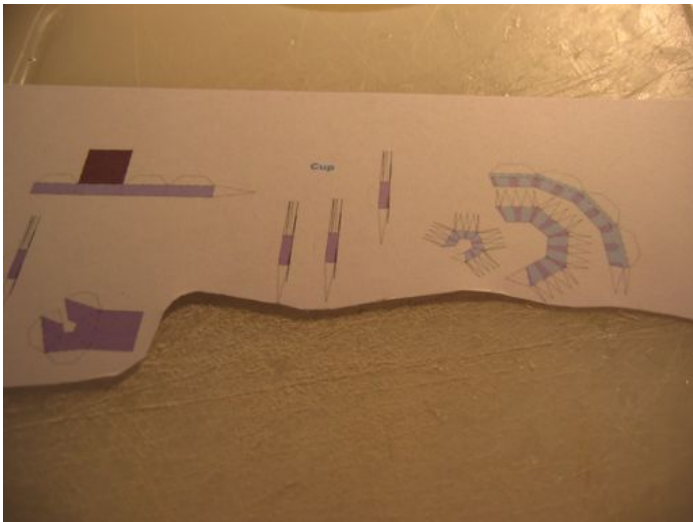

Here's all you need Before Starting Building The Model.

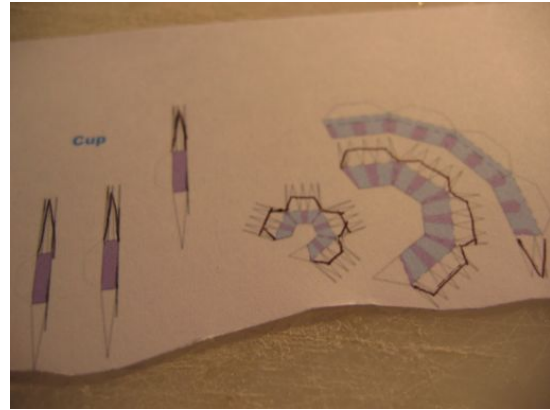

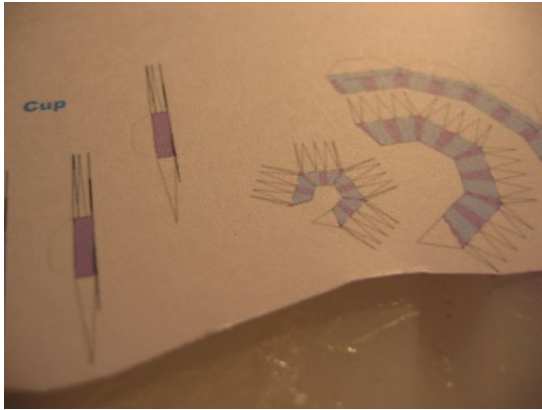

In order from left to right they are:

- Glue
- Scoring Tool (Knife or Empty Ballpoint Pen)
- Scissors
- Ruler

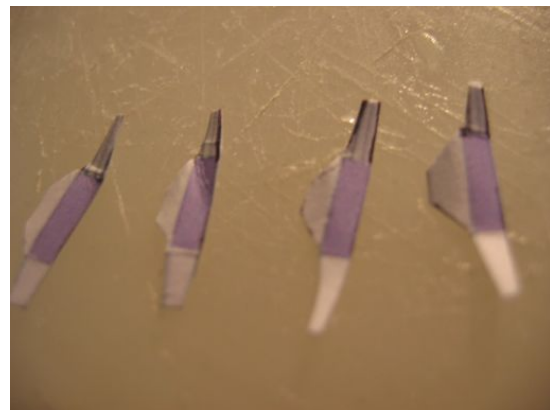

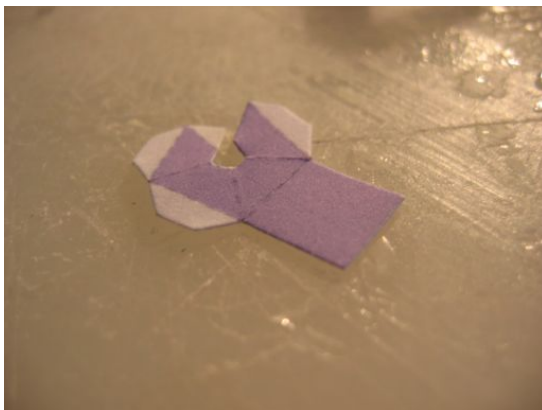

Start By Locating Cup's Pieces And Dividing Them From Rest Of The Page Then Score The Folds

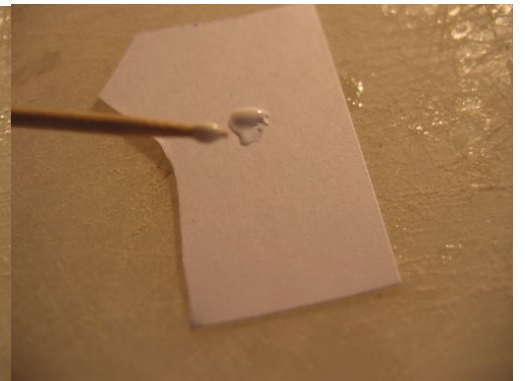

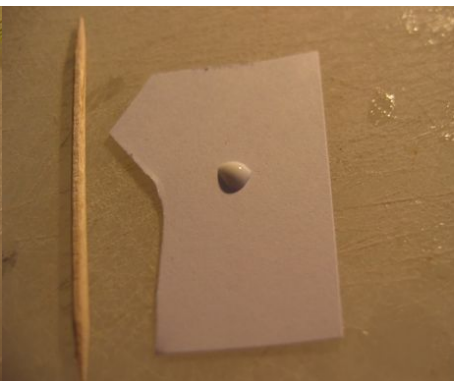

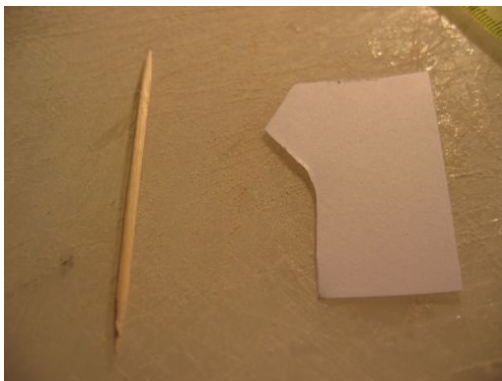

As You See, The Tabs Are A Lot Of Little Spikes, You Can Just Draw Over Them Like In The Picture, This Is Common In A Lot Models, Now You Know What To Do

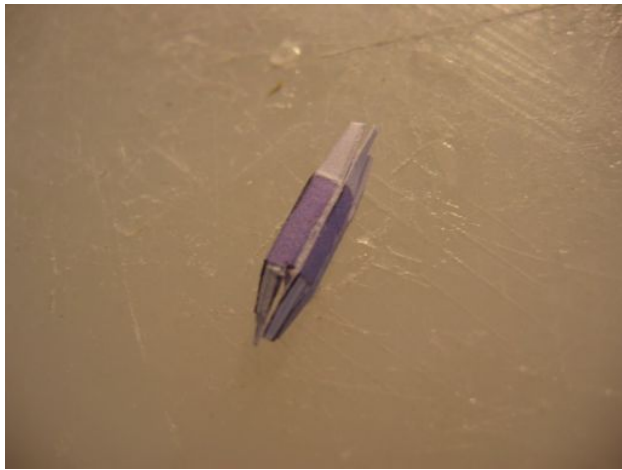

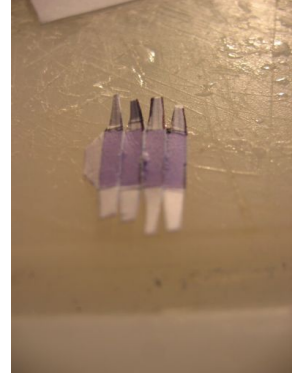

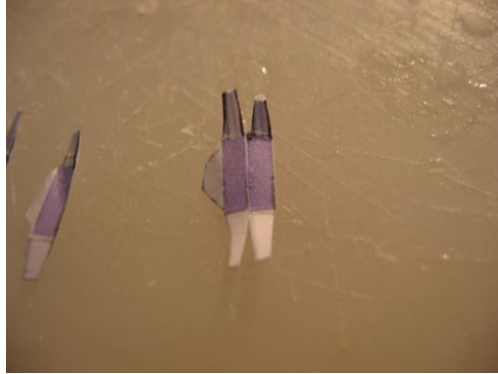

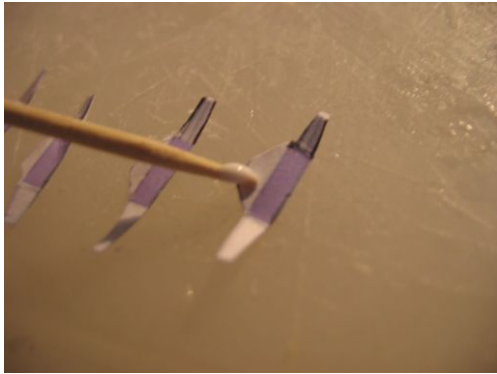

Now Cut These Pieces

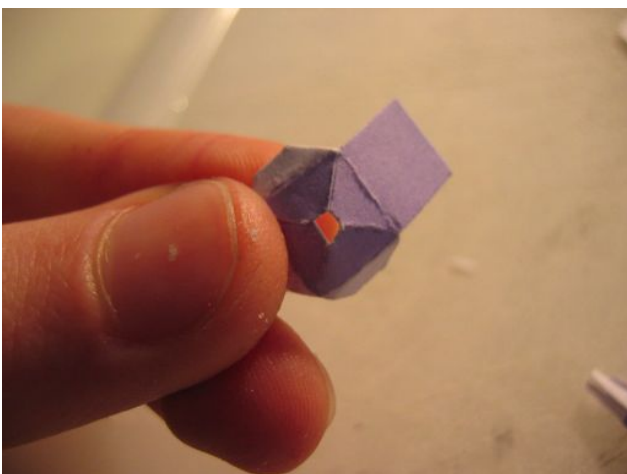

Go Get a Toothpick And Use a Scrap Piece Of Paper, Put Some Glue On It And Pass The Toothpick Over It

Pass Glue Over The Tab Like In The Image And Glue Togheter, Repeat Until You Glued All The Pieces

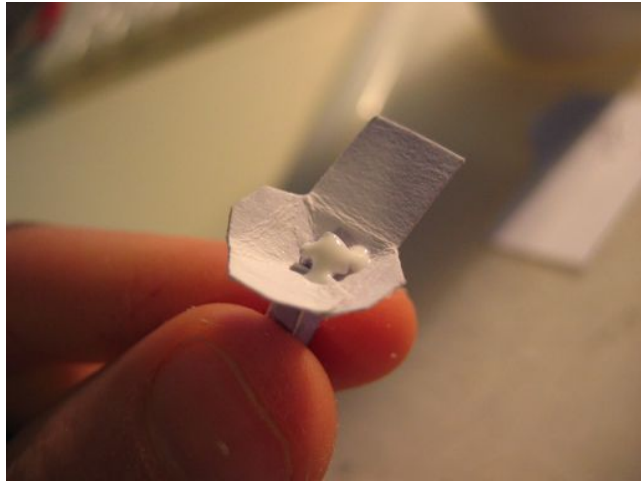

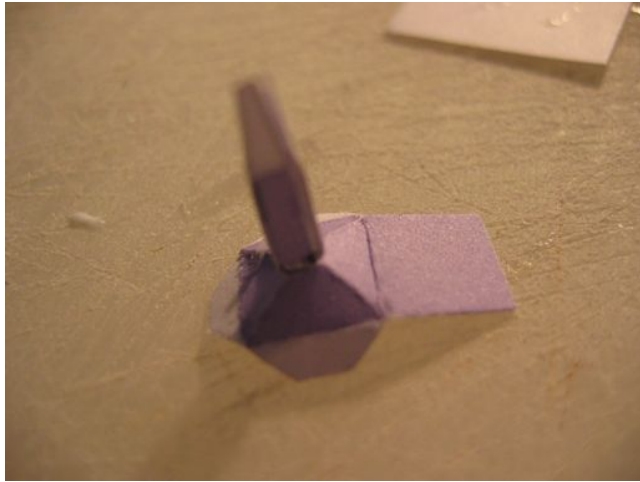

Now Put Some Glue On The Last Tab And Close

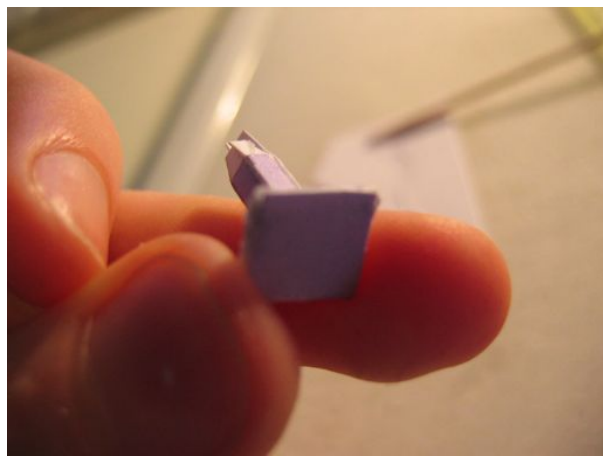

Put Some Glue On This Piece's Tab And Close It Like In The Picture

Now Put The Long Piece In This, If It Doesn't Fit Cut All The Tabs, Spill Some Glue And Let It Dry. If You Can't Open The Tabs Just Put Glue Over Them Like In Second Picture.

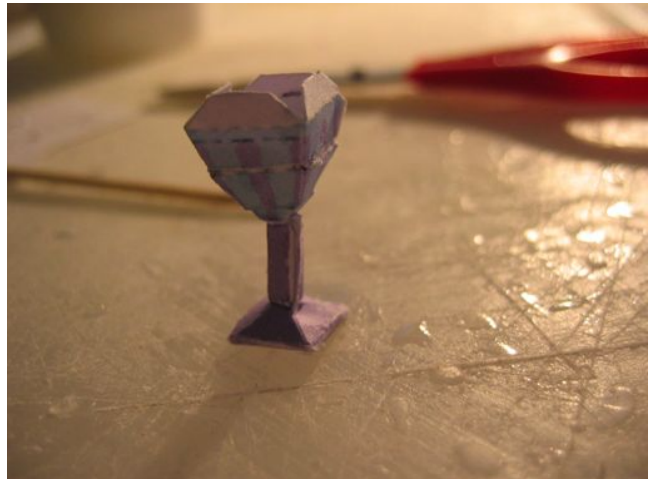

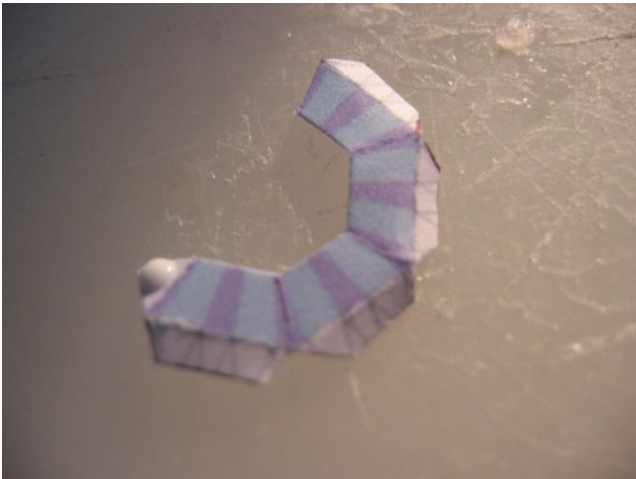

Put Glue On The Remaining Tabs And Close

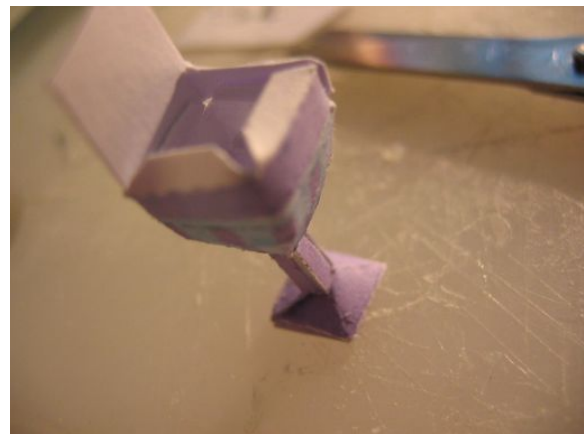

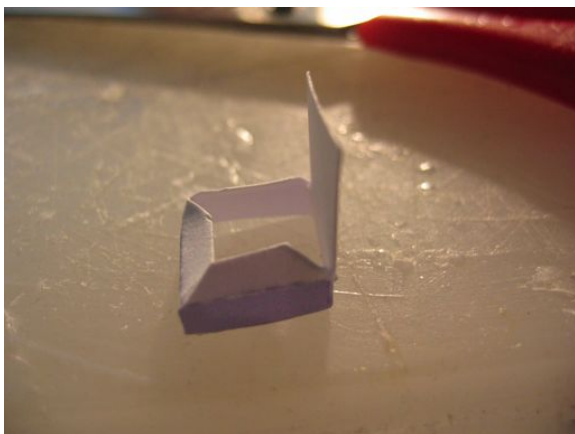

Now Cut This Little Bit And Do Same As Before

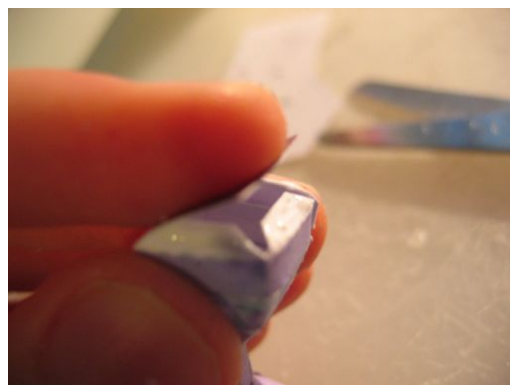

Now Cut This Piece And Glue It, Then Put Glue On The Smaller Piece, Then Put Its Tabs Into This

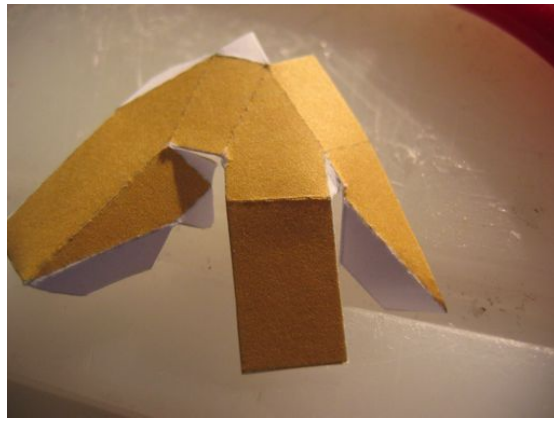

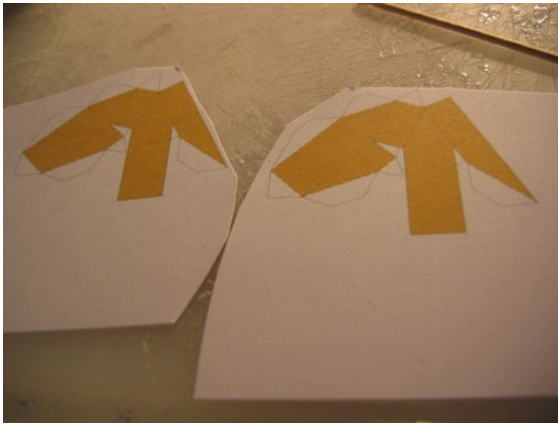

Now Cut The Last Piece And Glue The Tab Like In The Picture And Insert It Like Before

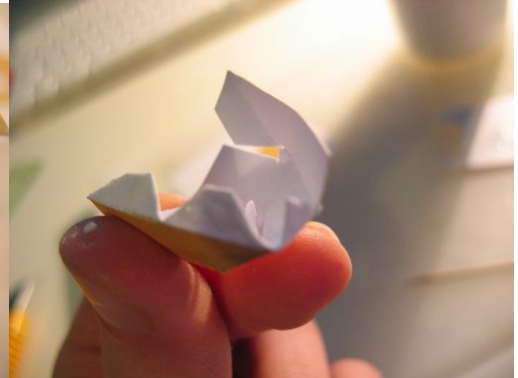

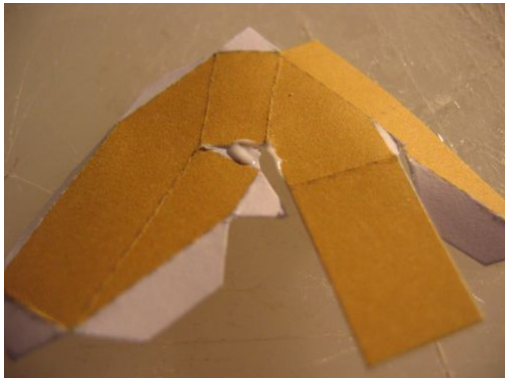

Put Glue On The Remaining Tabs And Close

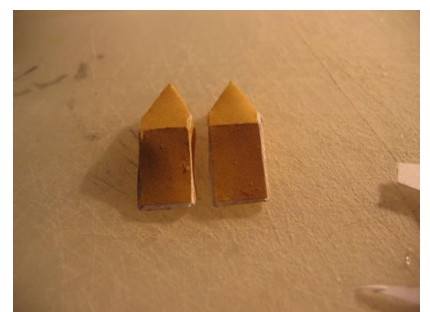

Now Cut The Shoes/Feet, Under The Body's Pieces And After Scoring, Fold Everything

Now Put Glue And Build Like The Following Pictures

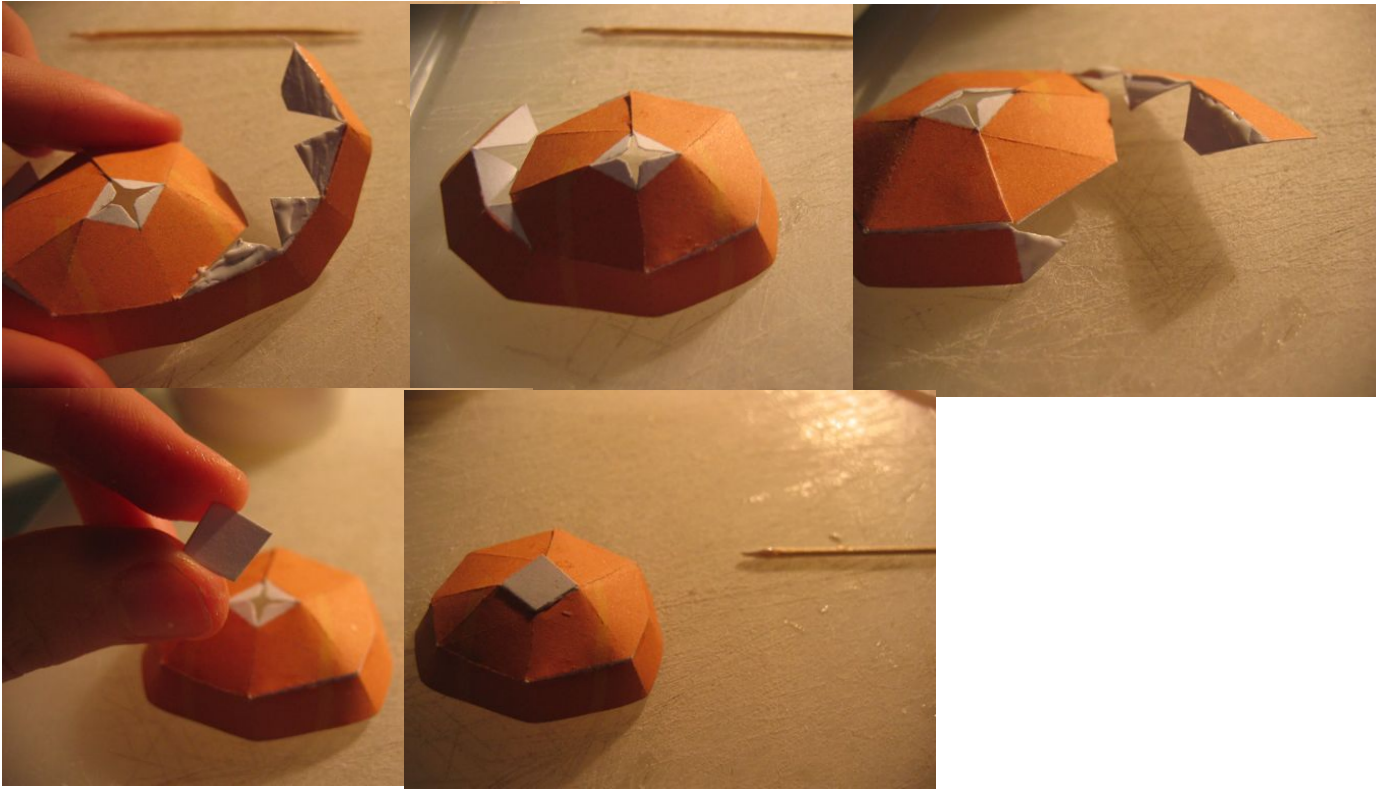

Repeat For The Other Shoe

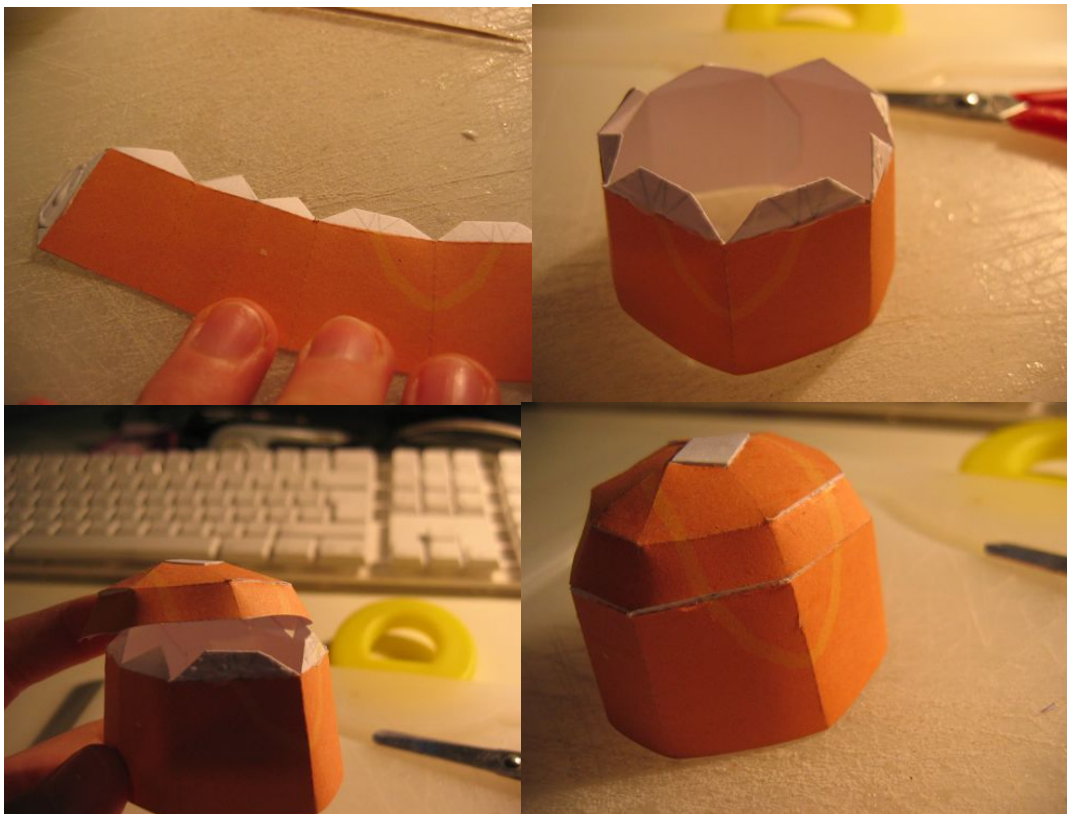

Cut The Remaining Pieces On Second Page And Glue The Top

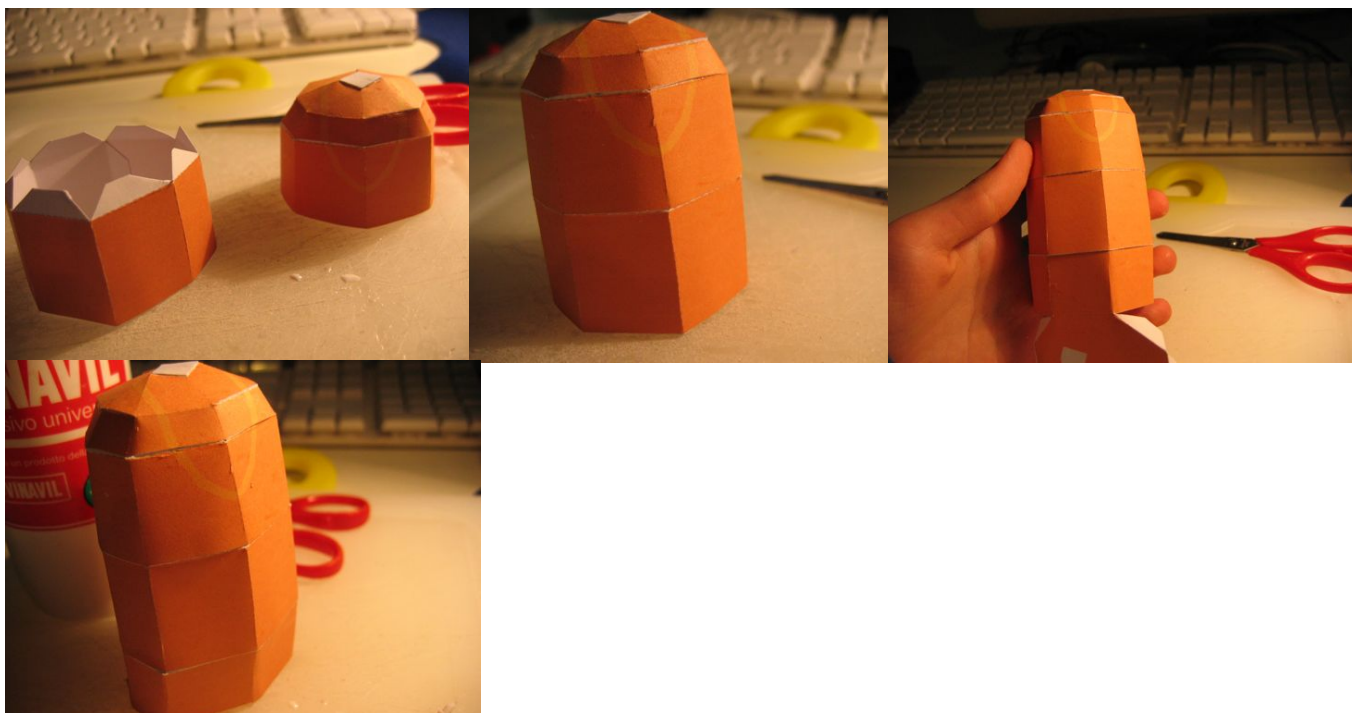

After You Glue Put Glue Over These 4 Tabs And Glue Then Put Glues On All The Remaining Tabs Except Top, Then Get The Grey Square And Glue It On Top Tabs

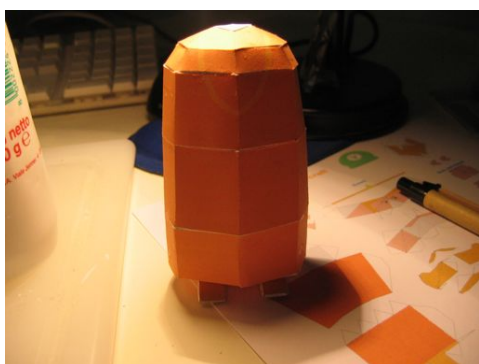

Now Get The Second Body Piece And Put Glue Like On Picture Then Close, Put Glue And Glue On First Body Piece

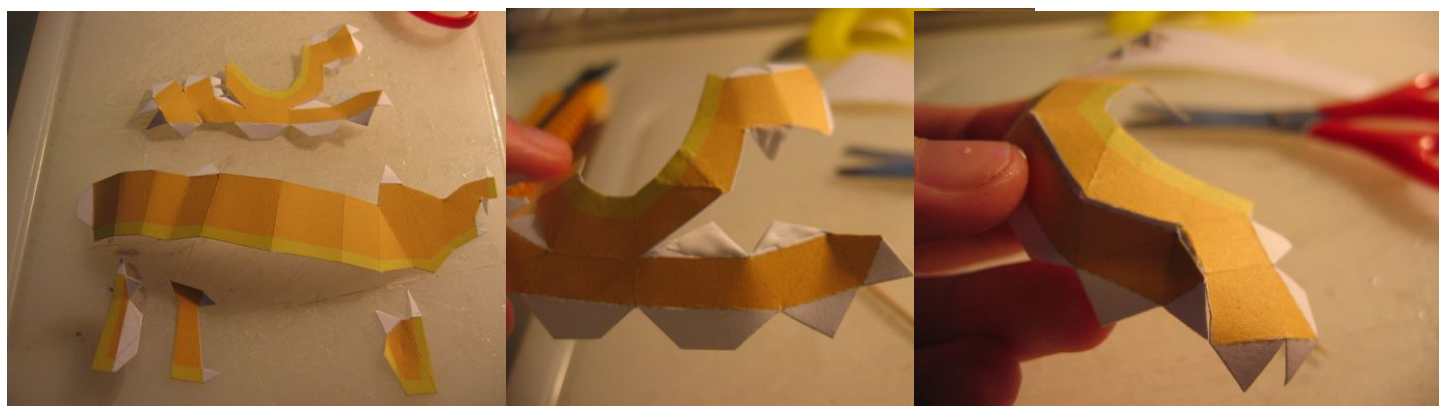

Build The Other Piece And Glue Like Before, Do Same For The Last, Then Close

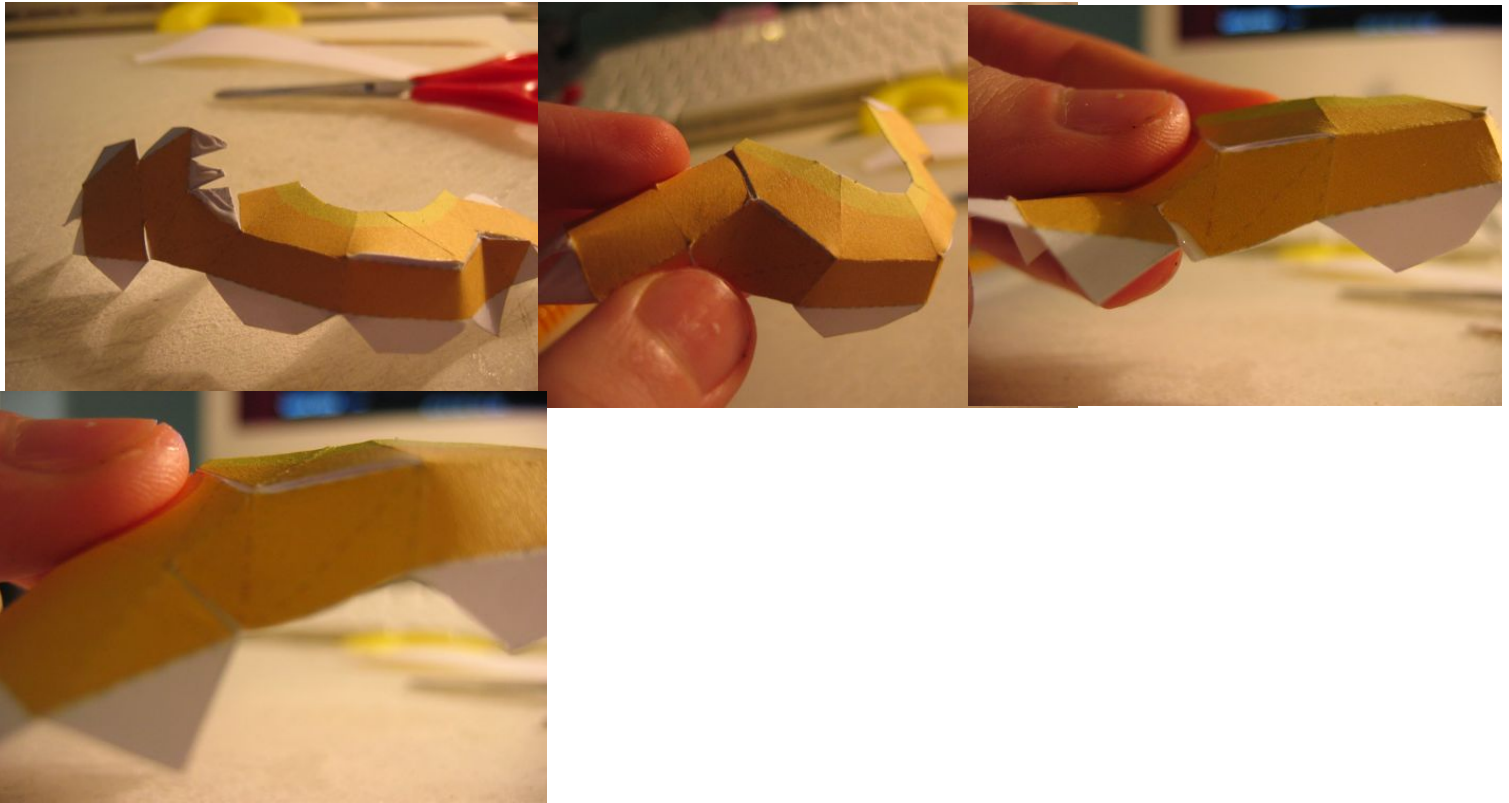

Now Glue Shoes On The Grey Parts On The Bottom Of The Body

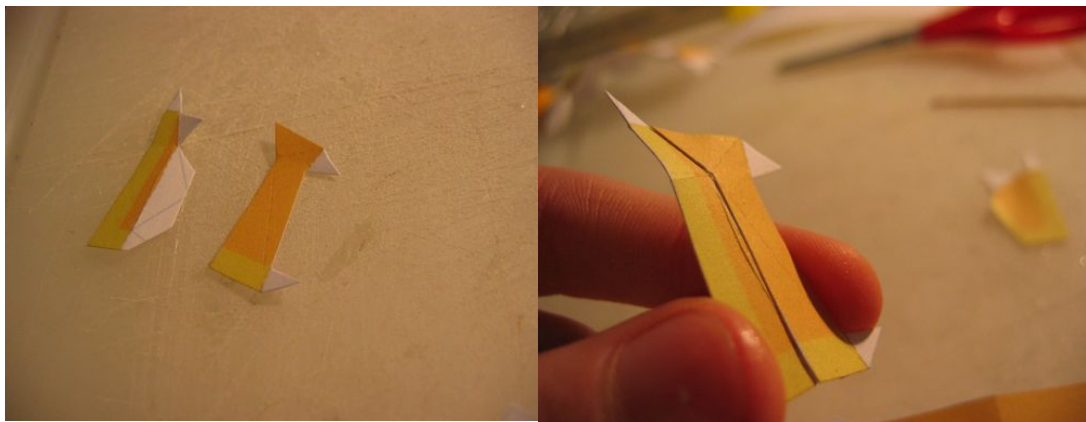

Cut All Tunic Pieces Now And Glue Like In Pictures

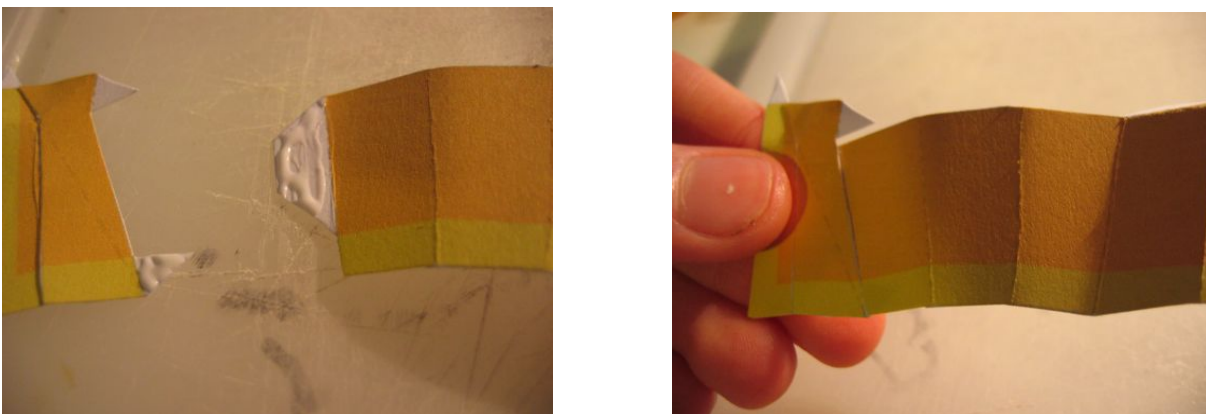

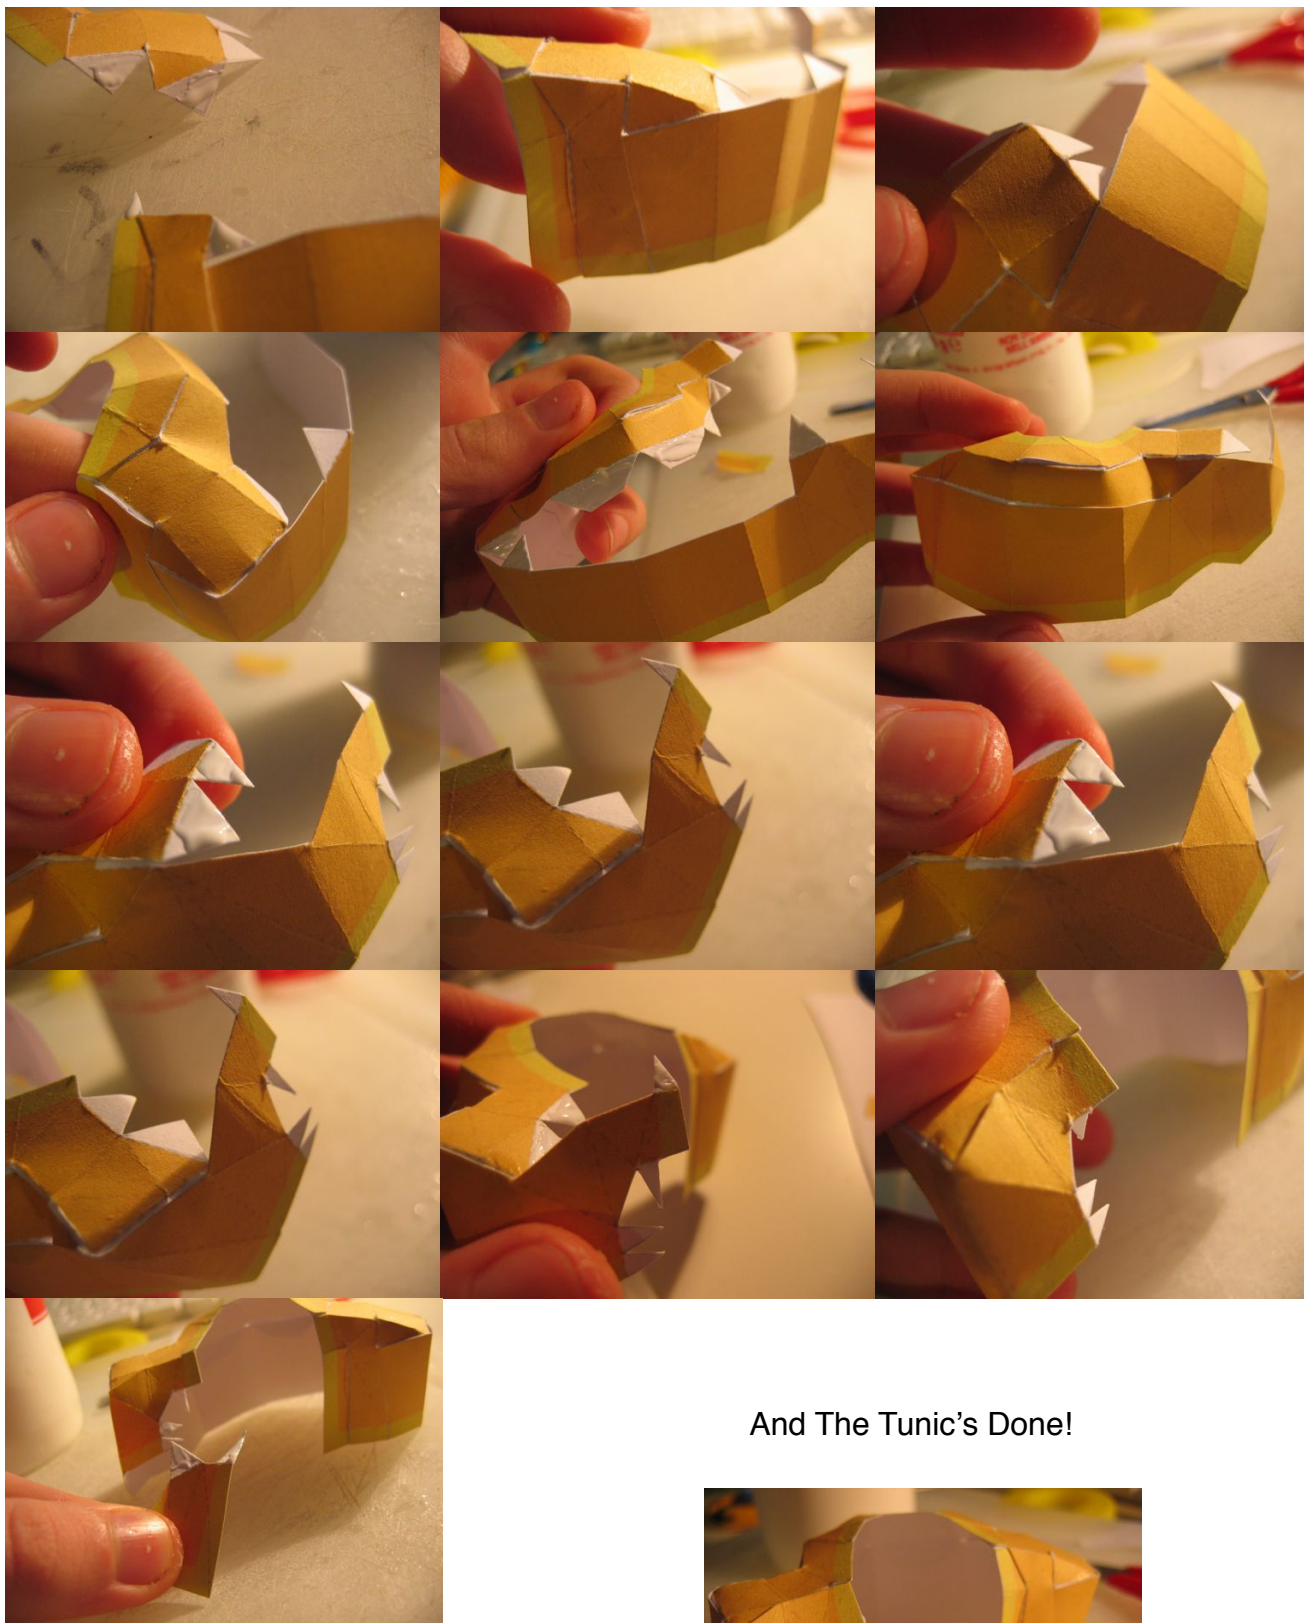

Now Cut These Tiny Bits And Glue

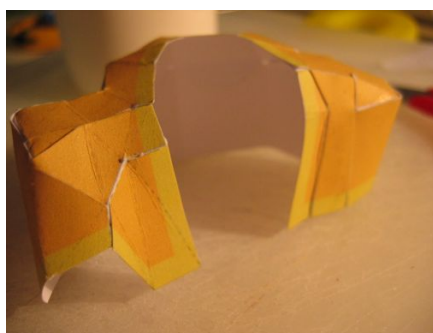

Get The Long Tunic Part And Glue These On It

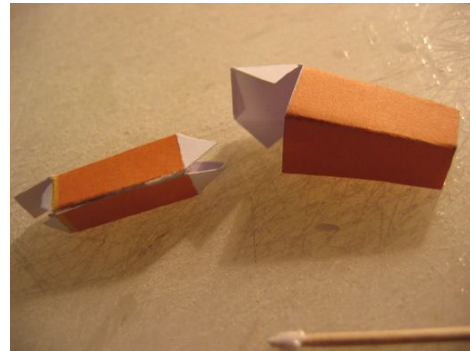

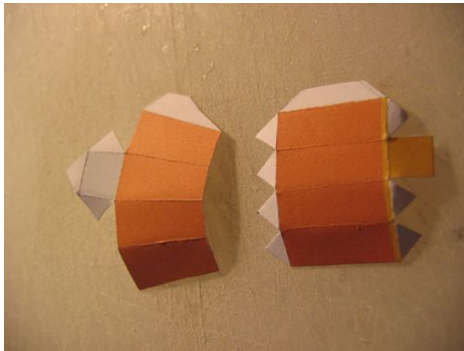

Now Get The Top Part And The One Where You Just Glued The Bits And Follow The Pictures

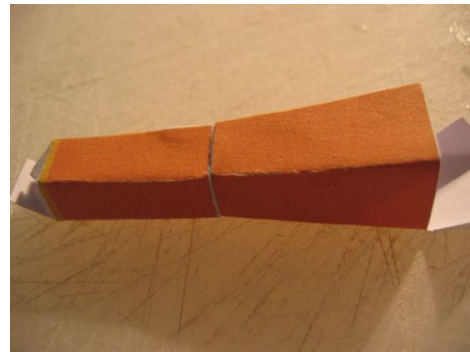

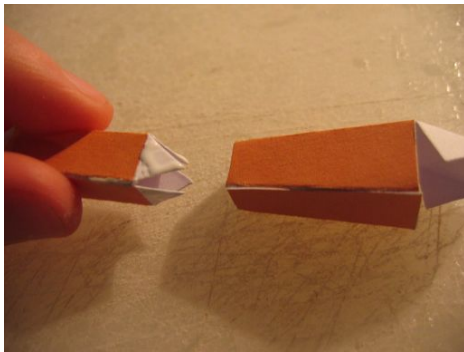

And The Tunic's Done!

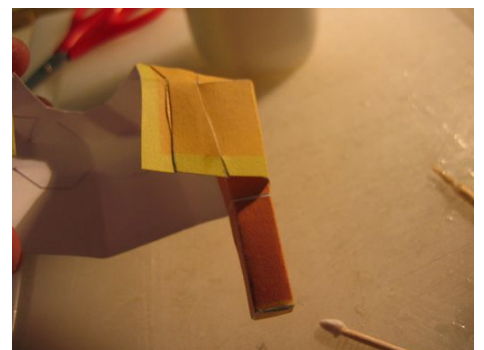

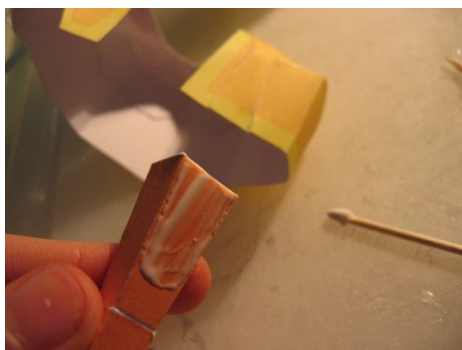

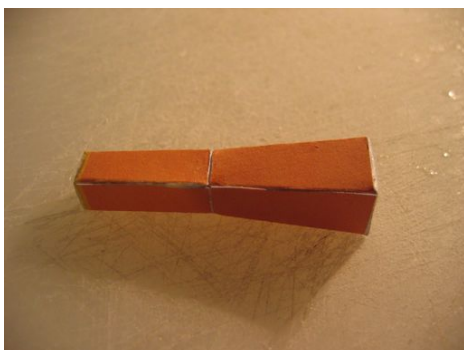

Now Cut The Arm On The Left, Then Glue The Endings So They'll Look Like The 2nd Picture

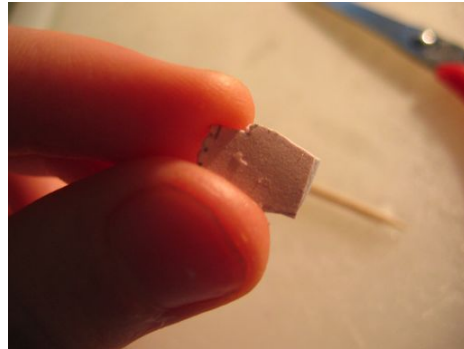

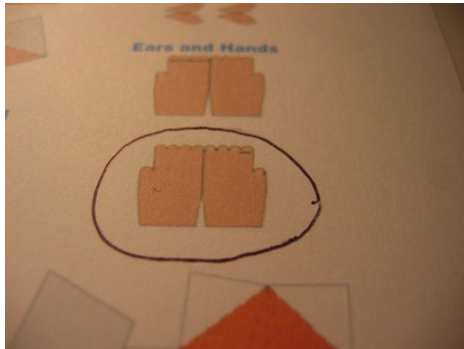

Glue The 2 Pieces Togheter Then Close The Endings

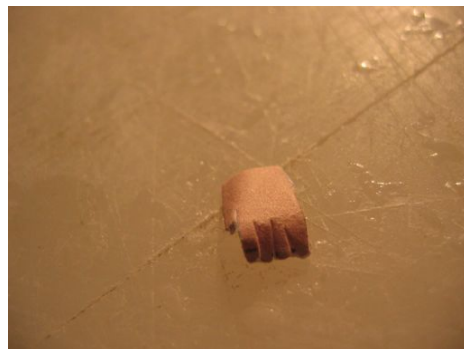

It Should Look Like In The First Image, Now Glue It On The Tunic By Applying Some Glue On The Side

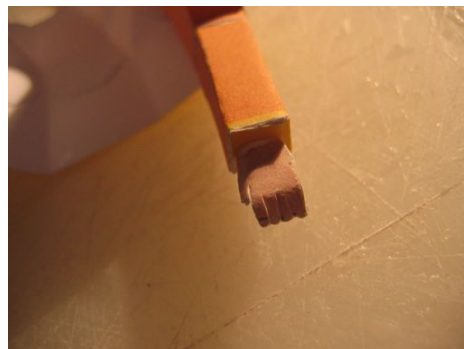

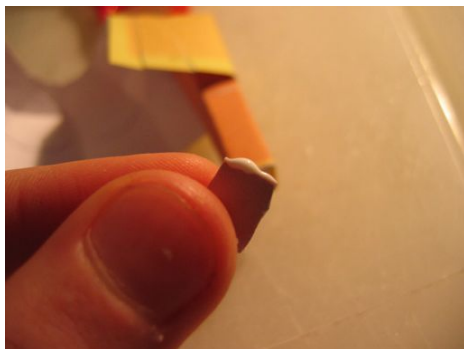

Now Cut The Lines In The Black Circle And Close The Model With Some Glue

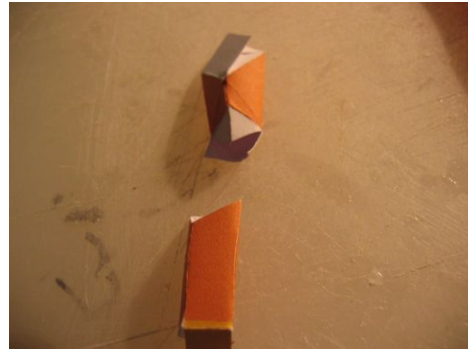

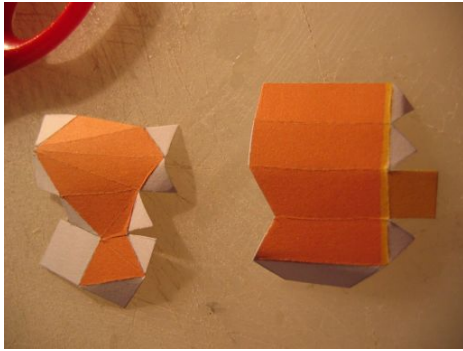

Now Cut The Fingers And Curve The Hand A Bit

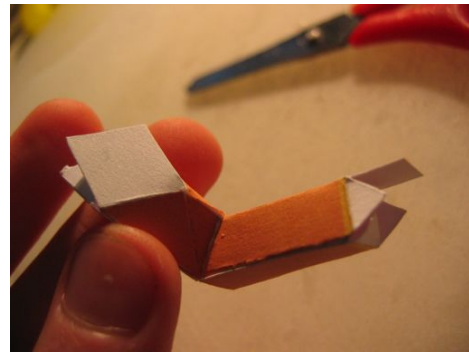

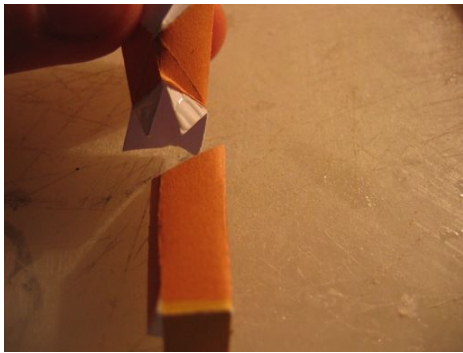

Put A Strip Of Glue On The Hand And Glue On The Arm

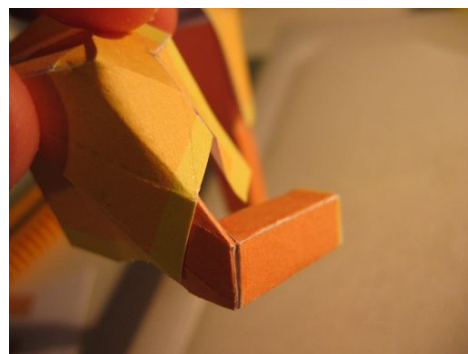

Now Cut The Other Arm And Glue The Sides Like Before

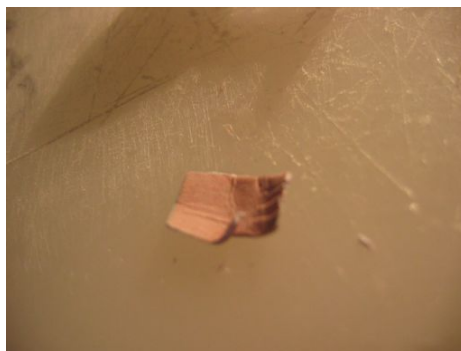

Glue Together The Pieces Then Close The Endings

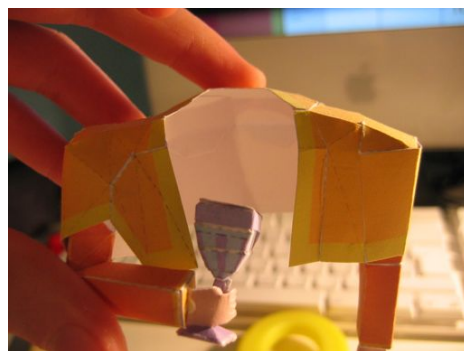

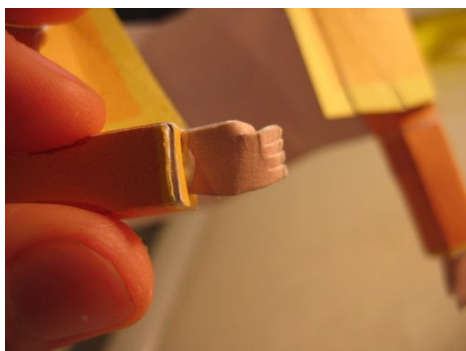

Now Put Some Glue On The Arm Like In The Picture And Glue On The Tunic

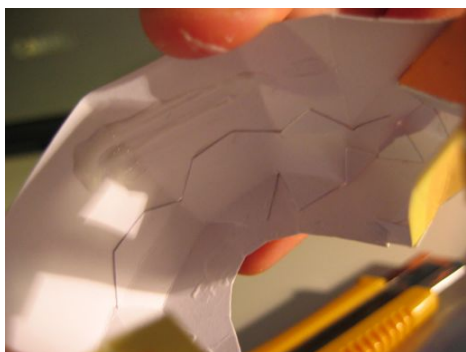

Cut The Remaining Hand, Cut The Fingers And Curve

Now You Can Glue The Hand On The Arm And On The Cup, No Precise Order Required, Let It Dry Carefully

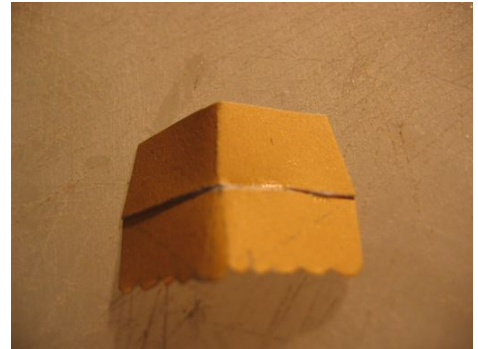

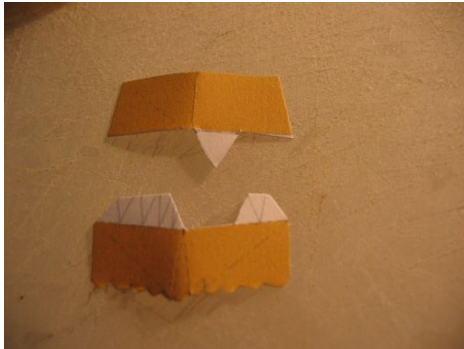

Now It's Time To Glue The Tunic On The Body, Put Some Glue On The Tunic And Glue On The Body, If You Want You Can Put Some Glue On The Back Of The Cup And Glue It On The Body

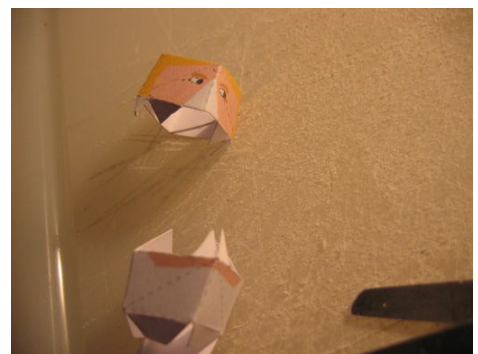

Now You Just Need The Head!

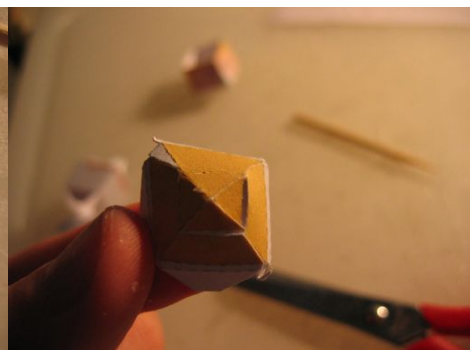

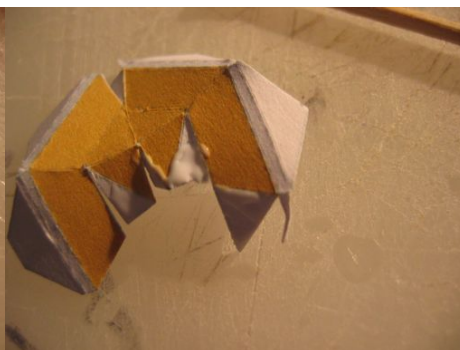

Cut The Hair And Glue The 2 Pieces Togheter

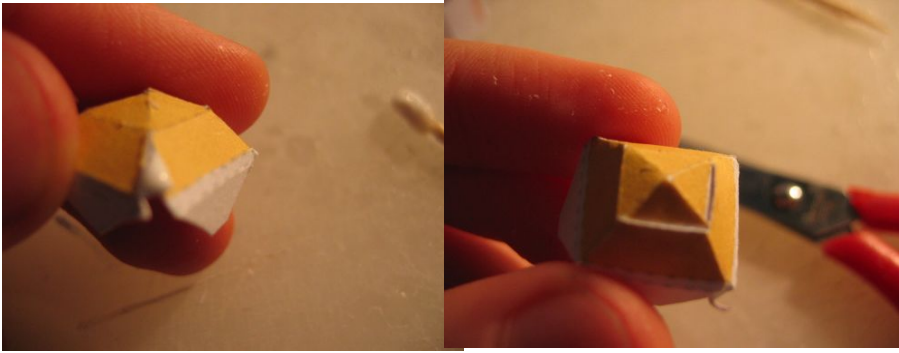

Now Cut The First 2 Head Pieces And Glue Them Like In The Pictures

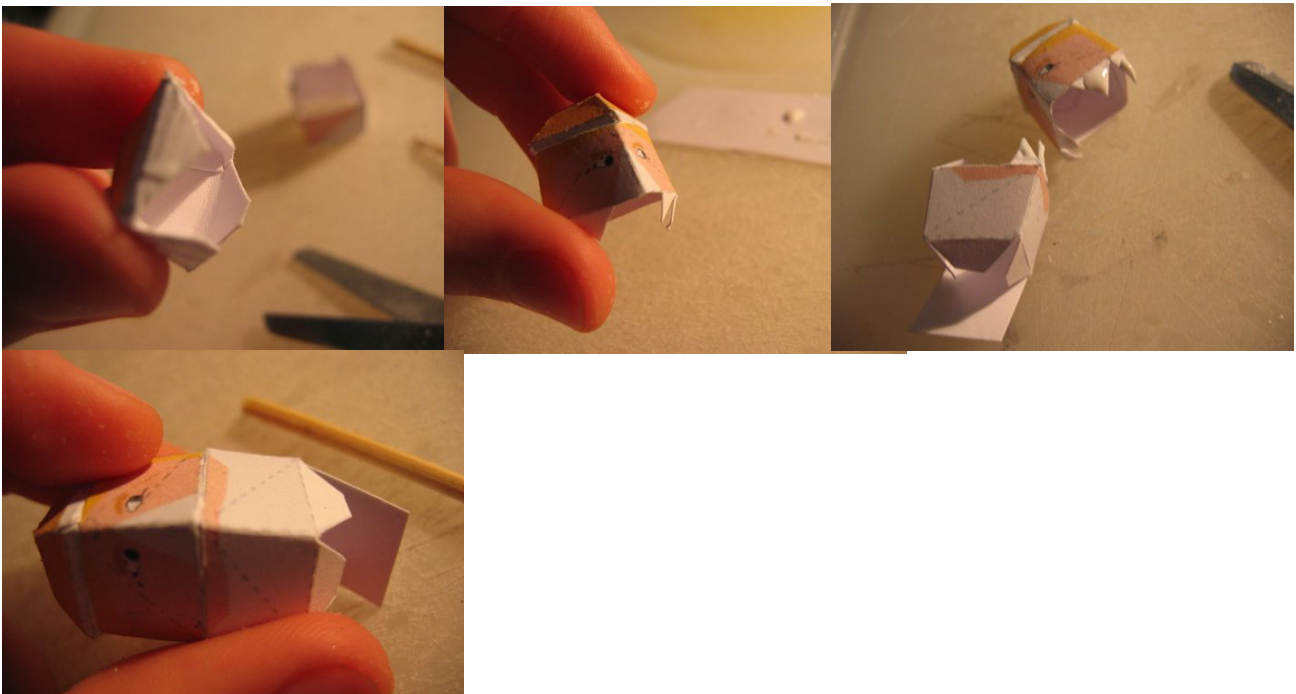

Cut The Remaining Head Piece And Follow The Pictures To Glue It Correctly

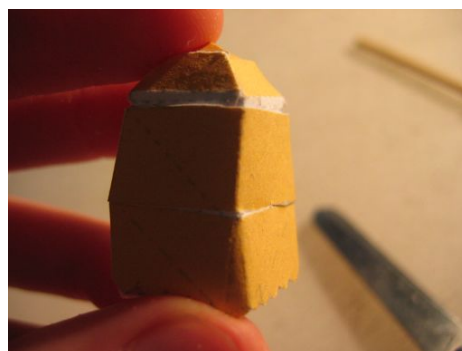

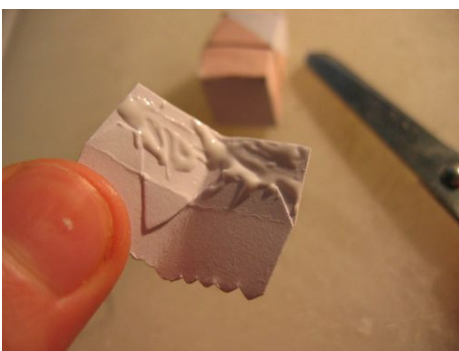

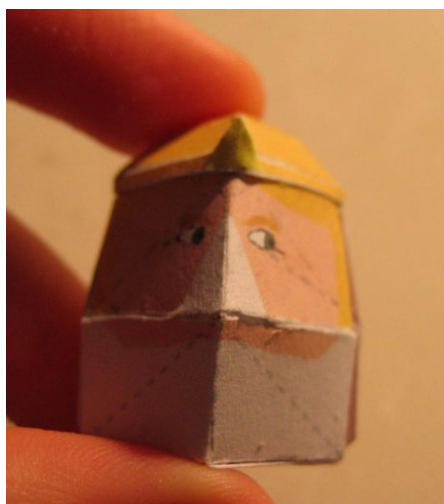

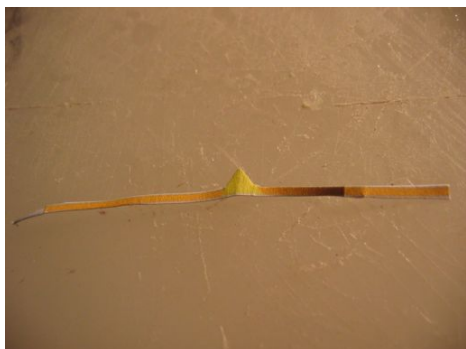

Now Put Glue On Its Remaining Tabs And Glue On The Top Face Piece, Put Glue On The 2 Face Pieces And Glue Them Togheter, Then Glue The Bottom

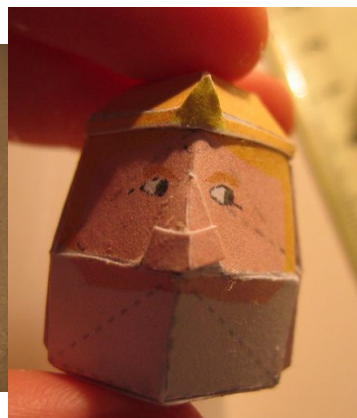

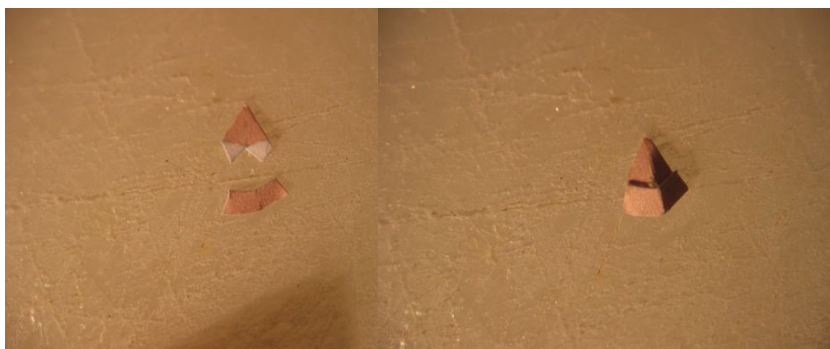

Get The Hair You Previously Built And Glue It On The Head's Back

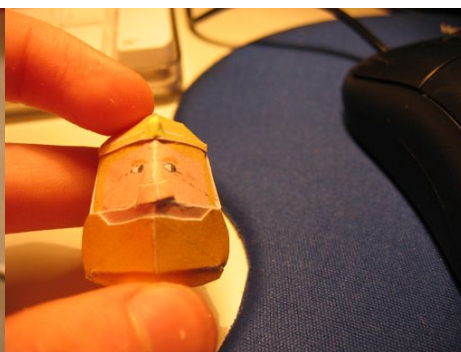

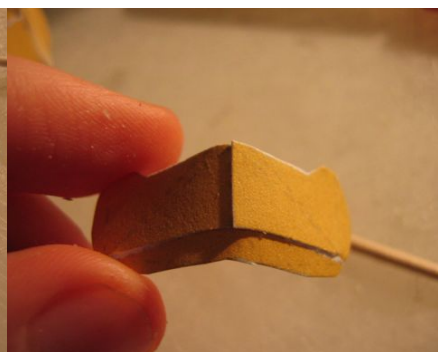

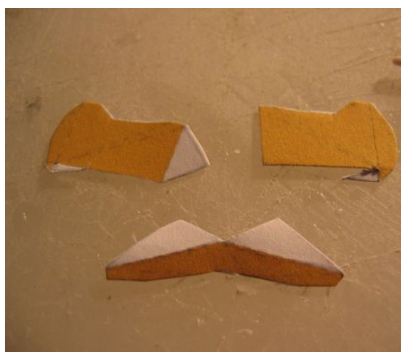

Cut The Crown And Glue It On The Grey Line Between The Head And The Face

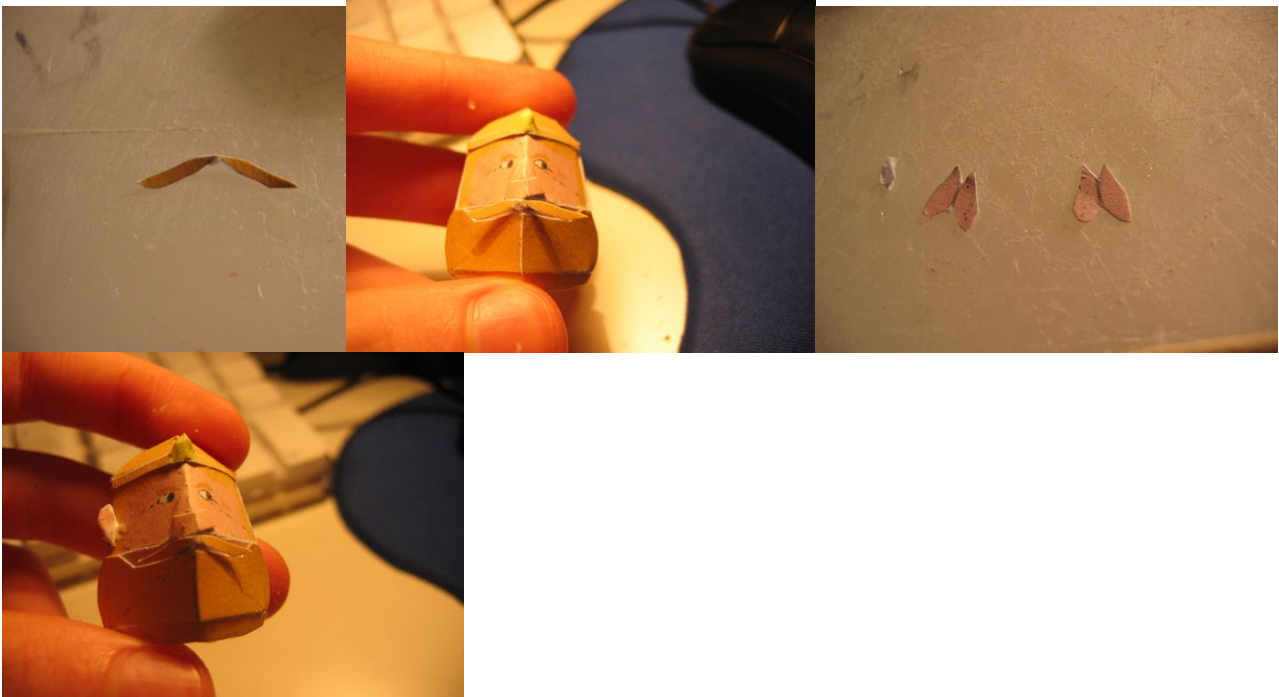

Cut The Nose And Cut Out The Micro Parts With Tabs, Sorry For This Error But I Thought That The Model Was Going To Be Bigger, Glue The Pieces Then Glue Them On The Head

You're Almost There! Cut The Beard's Pieces And Glue Them Together, Then Glue Them On The Grey Beard Part Of The Head

Cut The Mustache And Put A Bit Of Glue In The Center, Glue On Head, Cut The Ears, Glue Them And Glue On Head

Put A Bit Of Glue On The Head's Bottom And Glue How You Like

Now You're Done!
