Dash-dotted lines (— · — · —) need to be folded up (this is called a valley fold).

Dashed lines (---) need to be folded down (this is called a mountain fold).

Laytoes' Challenges

No.002 30/30 Picarats Hint Coins: 3

With the Professor out of town, Luke has to do his own laundry. He is visiting a laundrette for the first time, but he has used too much soap in his washing machine!

Now it has overflowed, and the floor of the laundrette has become all slippery with soap...

No.002 30/30 Picarats Hint Coins: 3

Although Luke can carefully turn around on the spot, with every step he tries to take, he slides out of control in that direction until he is stopped by a wall or washing machine.

This means he can't reach the exit anymore! If only the laundrette would have had one extra washing machine...

No.002 30/30 Picarats Hint Coins: 3

Where should you place the extra washing machine so that Luke can reach the exit?

Give your answer as a coordinate, e.g. A-1.
