

This paper model is made by Ninjatoes (don't worry, that's not my real name... ;o). It's based on Star Trek Deep Space Nine's Type-10 Shuttlecraft the 'Chaffee'. It's not an exact replica (I only wish I had the tools to make one of those, but the best I have is MS Paint....), but I think it looks okay.

It's fairly easy to build, I have marked \*everything\*, so I really think you should be able to build this one without instructions. ;o)

If you have any comments, you can e-mail me at [ninjatoes@lycos.nl](mailto:ninjatoes@lycos.nl).

greetz Ninjatoes
