

**U.S.S. DEFIANT  
NX-74205**

Thank you for choosing yet another Ninjatoes' paper model from <http://members.lycos.nl/ninjatoes/index.html>.  
this time it's the U.S.S. Defiant from "Star Trek Deep Space Nine".  
Built originally to answer the Borg threat, this tough little ship is the Federation's first true warship. This also made it ideal to fight off the Jem' Hadar at DS9, as Captain Benjamin Sisko pointed out....;o)

Scale of this model is approximately 1/500, when printed "fit to page" (which should be about 187%). Have fun building, and don't forget to tell me what you think of it at [ninjatoes@lycos.nl](mailto:ninjatoes@lycos.nl)!

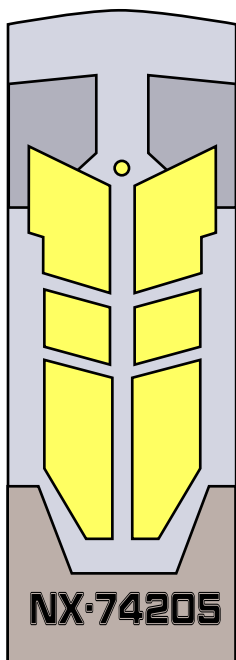

greetz ninjatoes

I felt Ninjatoes did such a fine job designing this model, that it deserved to have a graphic treatment worthy of the engineering that went into it. Enjoy!

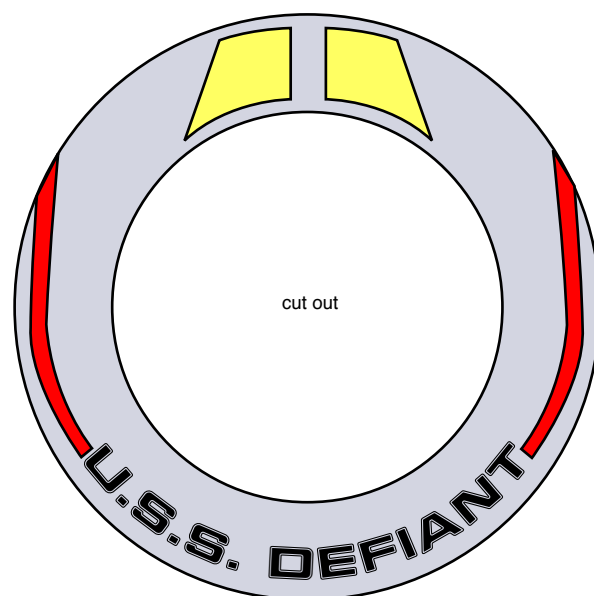

Bill Perry

P.S. Be sure to download the assembly directions, it will save you time.
