

M:TRON SPACE ASTRONAUT

PAPERCRAFT MODEL BY NINJATOES

THE POWER OF MAGNETS

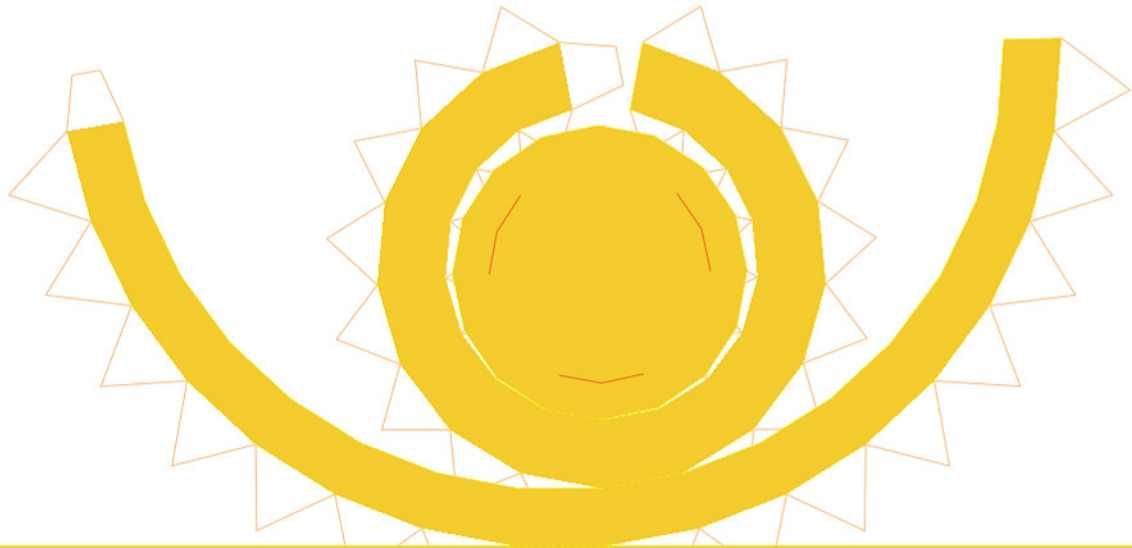

PAPERCRAFT M:TRON ASTRONAUT

LEGO Space had always been a popular subtheme, and in 1991, the LEGO universe got even cooler with the introduction of the *M:TRON* faction.

Somehow the red, black and white colour scheme with the fluorescent visors and cockpits just fit, and the magnetic attachments made *M:TRON* an instant classic.

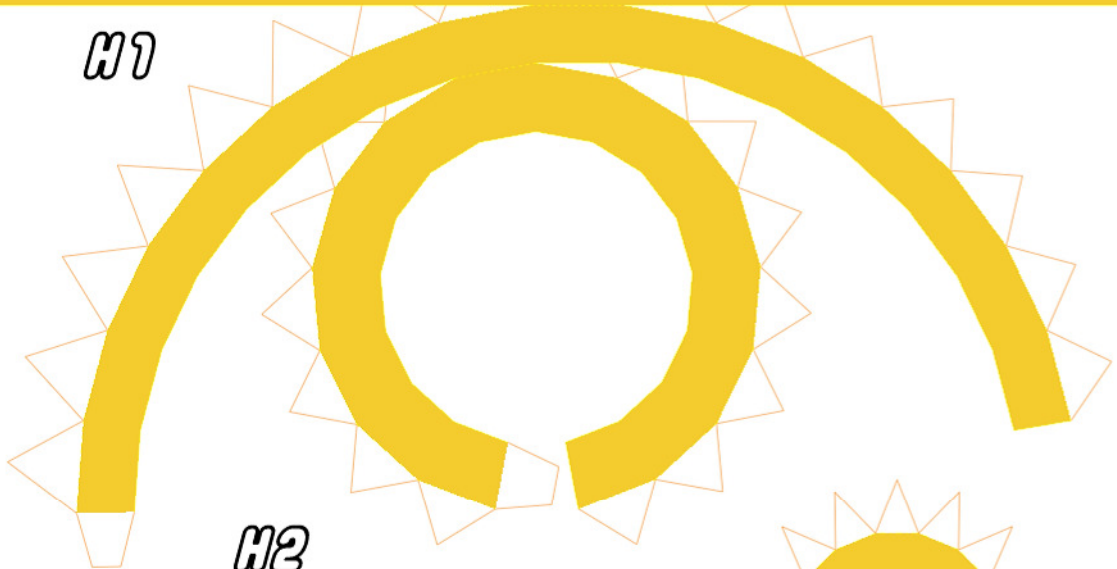

And let's not forget the fact that the "Mega Core Magnetizer" was one of the coolest sets ever... :o)

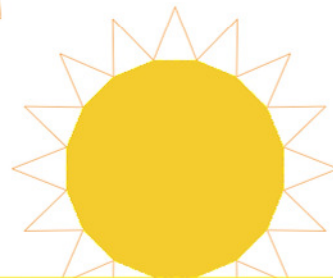

H1

using thicker paper
(160-200 gsm) is
really recommended
because of the wear
and tear of the joints!
