

# MJOLNIR

## THOR'S HAMMER

### 1:2 SCALE

#### GENERAL INSTRUCTIONS:

1. Print the template on cardstock.
2. Cut on the solid lines (except for the lines inside the handle piece which outline the leather straps).
3. Make a mountain fold on the dashed lines. Before folding, trace lightly along the folds with a ruler and an empty pen or dull exacto type knife for cleaner, more angular folds.
4. Glue sparingly at the white flaps.
5. Assemble as indicated by the letters.

#### SPECIAL INSTRUCTIONS:

1. For best results, gently roll the handle piece around a cylindrical object before gluing to itself (a broom handle works well)
2. The strap piece is glued to itself twice. Fold as indicated by the mountain fold line, glue and then trim away any white paper left showing. Loop the strap and glue the letter "N's" together.
3. After rolling and gluing the handle, attach strap flap "A" to the inside face of the handle where indicated before gluing the cap on the end of the handle.
4. The cut out in the hammer head may need to be enlarged to accommodate the handle depending on how accurately the model is constructed.
