## Tangram - assembly instructions

- read the instructions entirely before assembly. Get to know the different parts of the model. Dry-fit every part prior to glueing it into shape.

- scoringlines have been drawn on the outside of every piece of the model (they are the dotted lines), thus keeping the visible surface of the model 'clean'. Also note that all gluetabs have textures on them too, thus eliminating the risk of 'white edges' after glueing pieces in place. ALWAYS SCORE EVERY PIECE PRIOR TO CUTTING IT OUT.

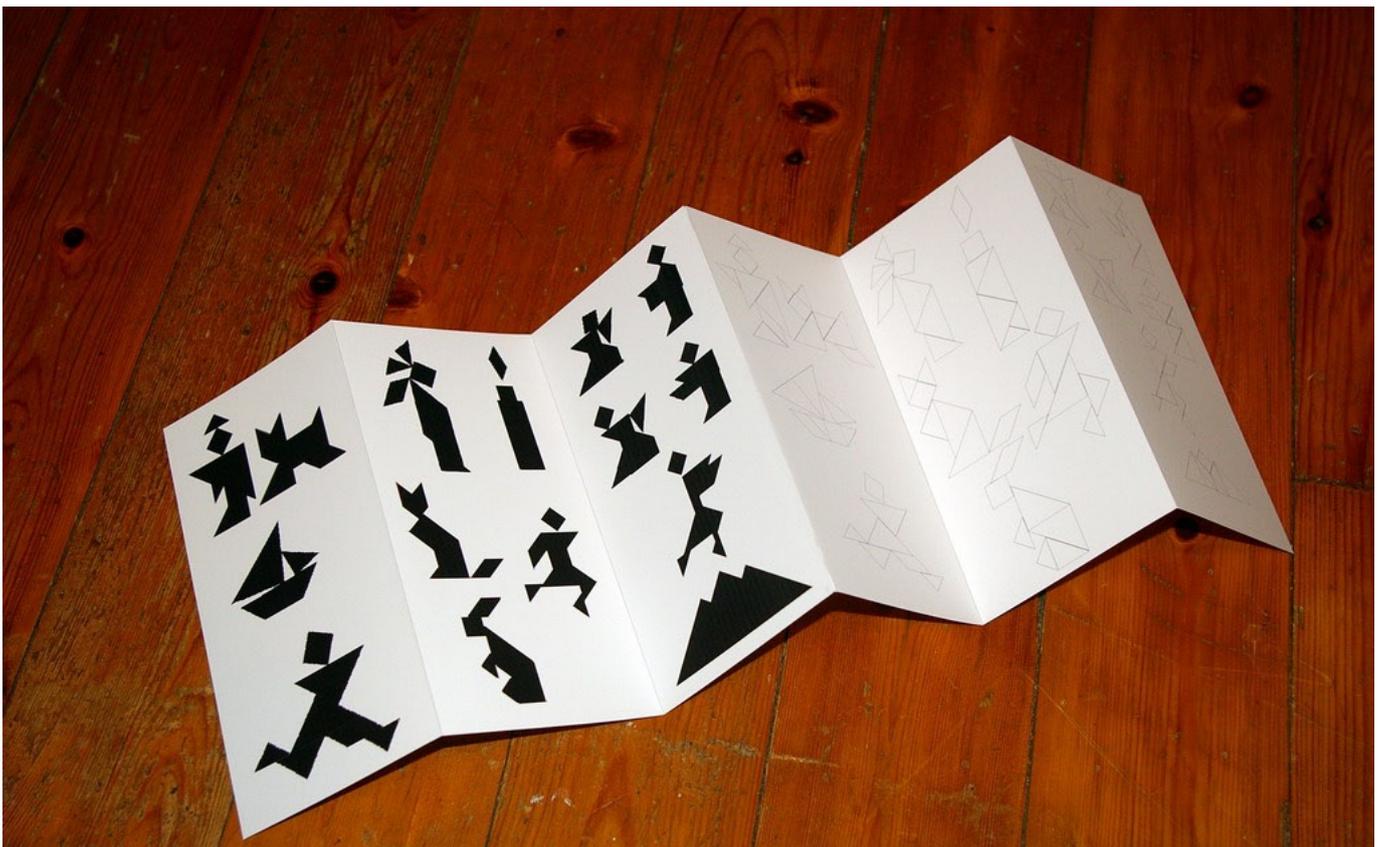

--- assembly instructions ---

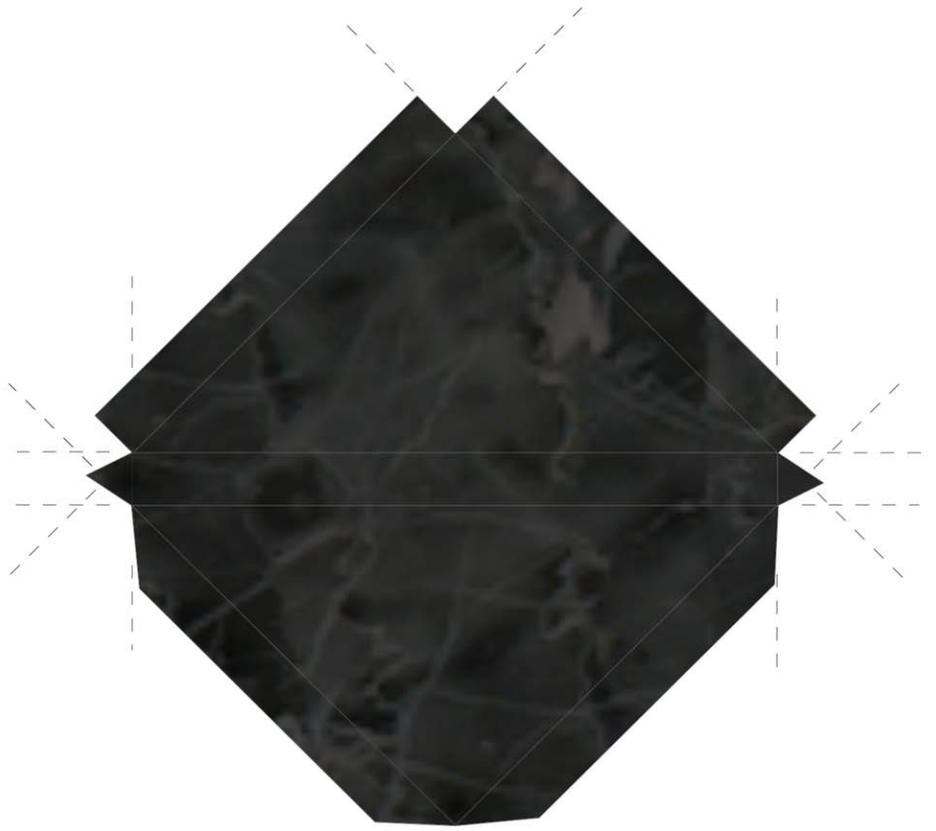

1. Print all six sheets on 160-180 grams A4 paper (or equivalent).
2. Score, cut and fold the seven pieces. They fold together like little, shallow boxes.
3. OPTIONAL: before glueing the pieces, you may consider coloring the white paper edges with a black markerpen.
4. Score, cut, fold and glue the four sides of the giftbox. Make sure that these parts do not wry or distort during assembly. Glue them to the bottom of the giftbox - all gluestrips facing down.
5. Score, cut, fold and glue the 'sleeve' of the box. Slide it over the box, it should fit easily.
6. Assemble the little booklet with examples. Make a folder with six pages. Fold it so that all 'solutions' are on the backside of the booklet. See image below.

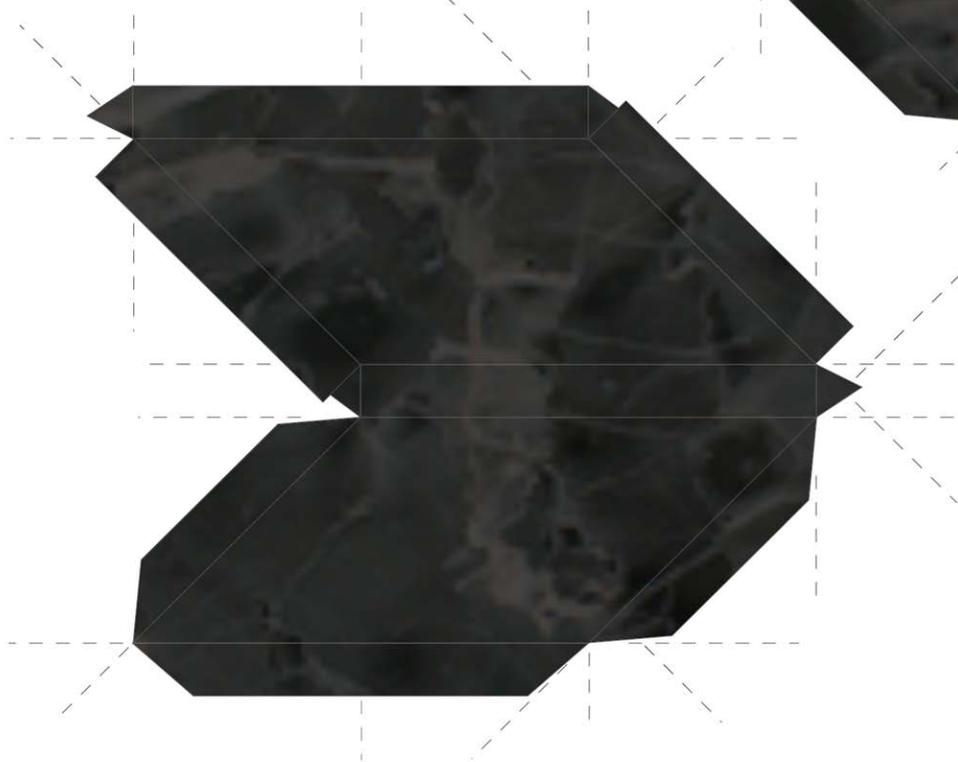

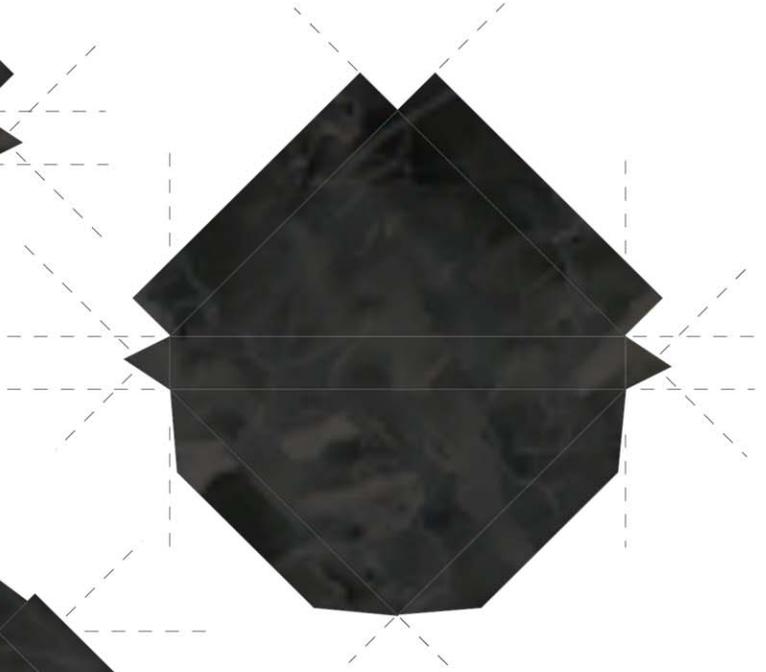

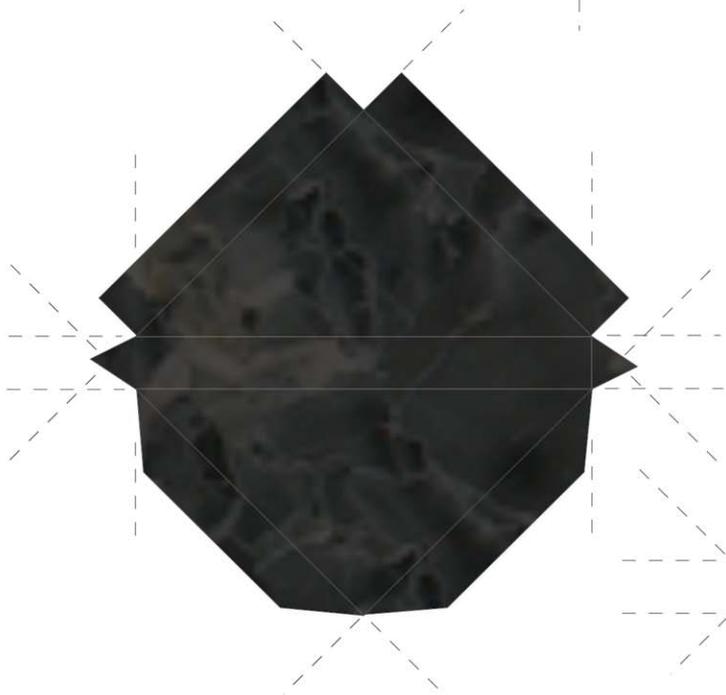

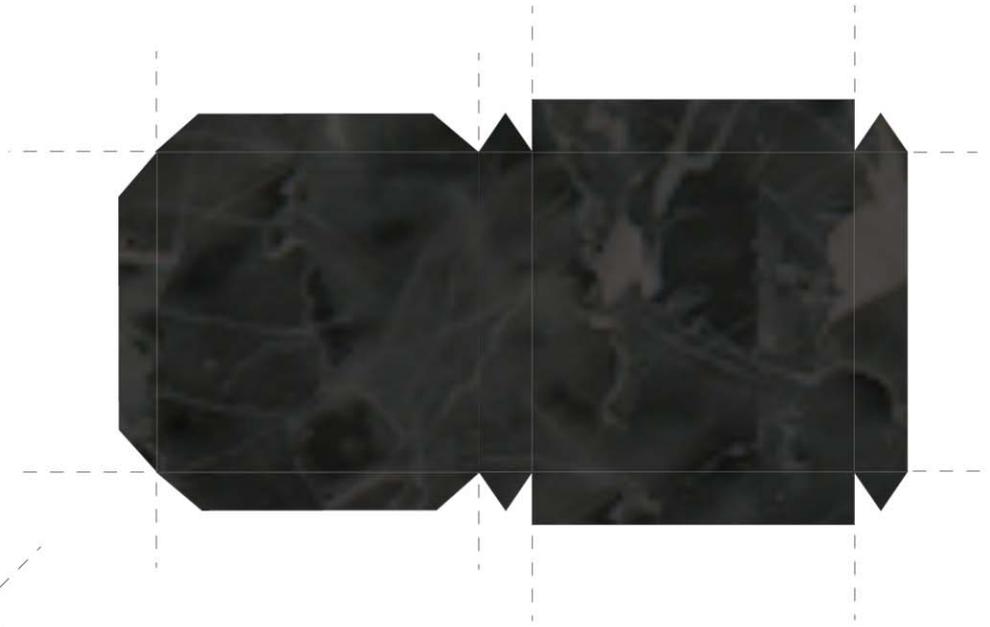

Have fun playing Tangram!

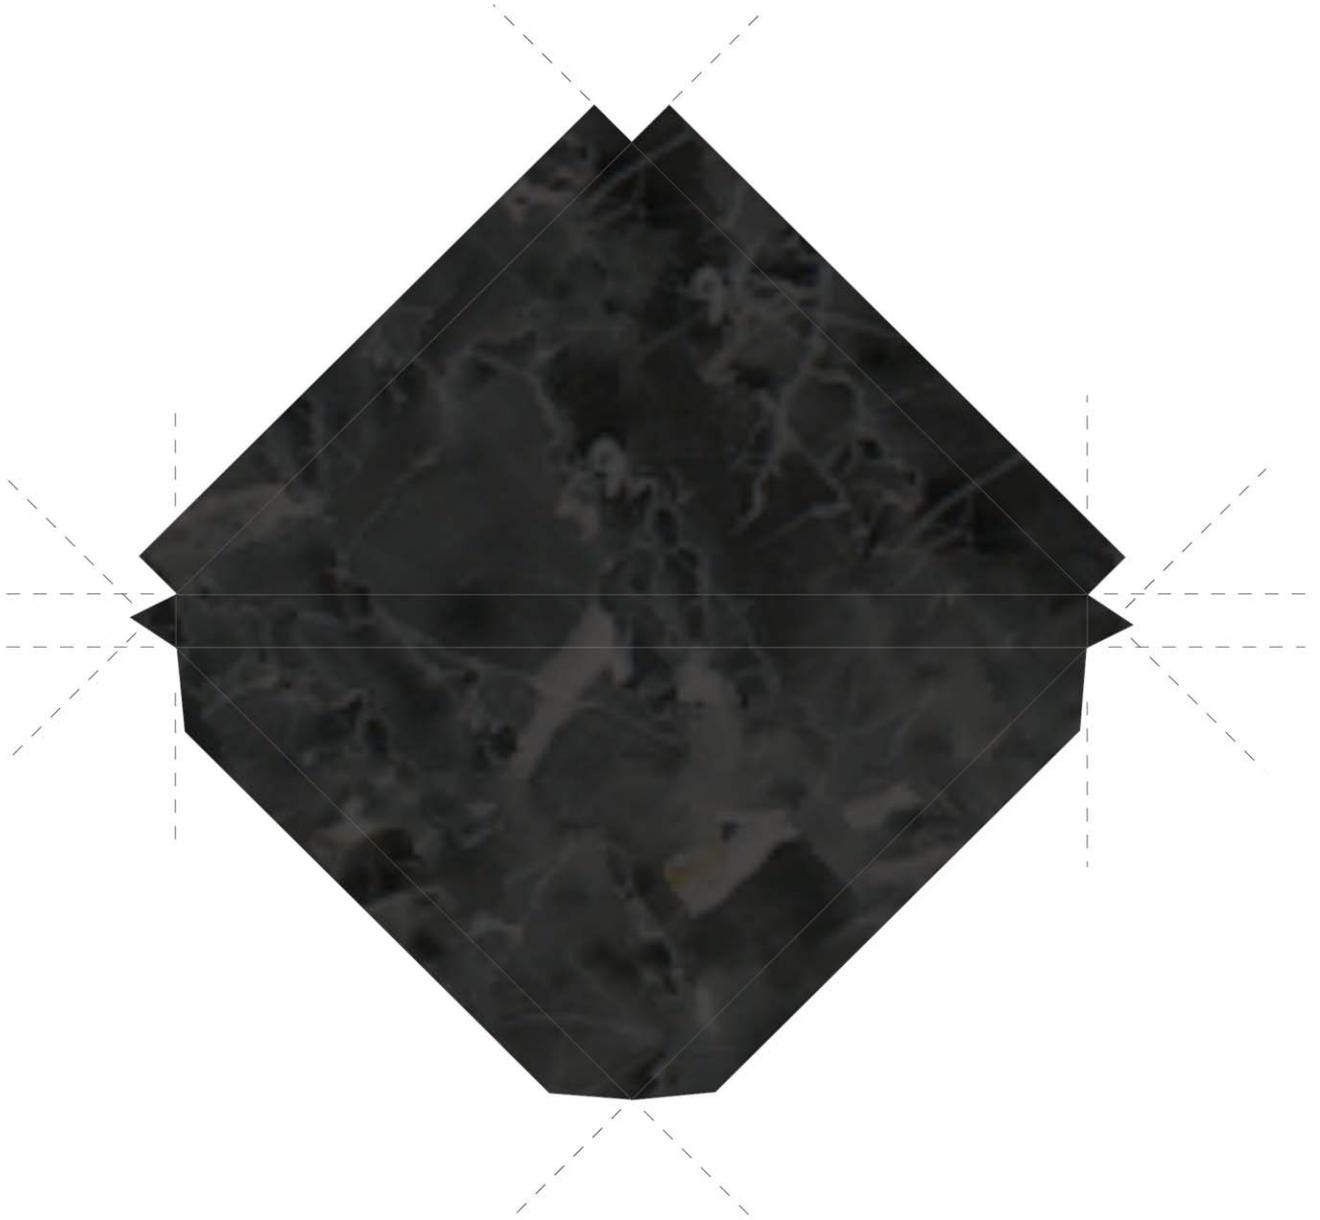

Warm regards
