Start the ears at the top and build them down.

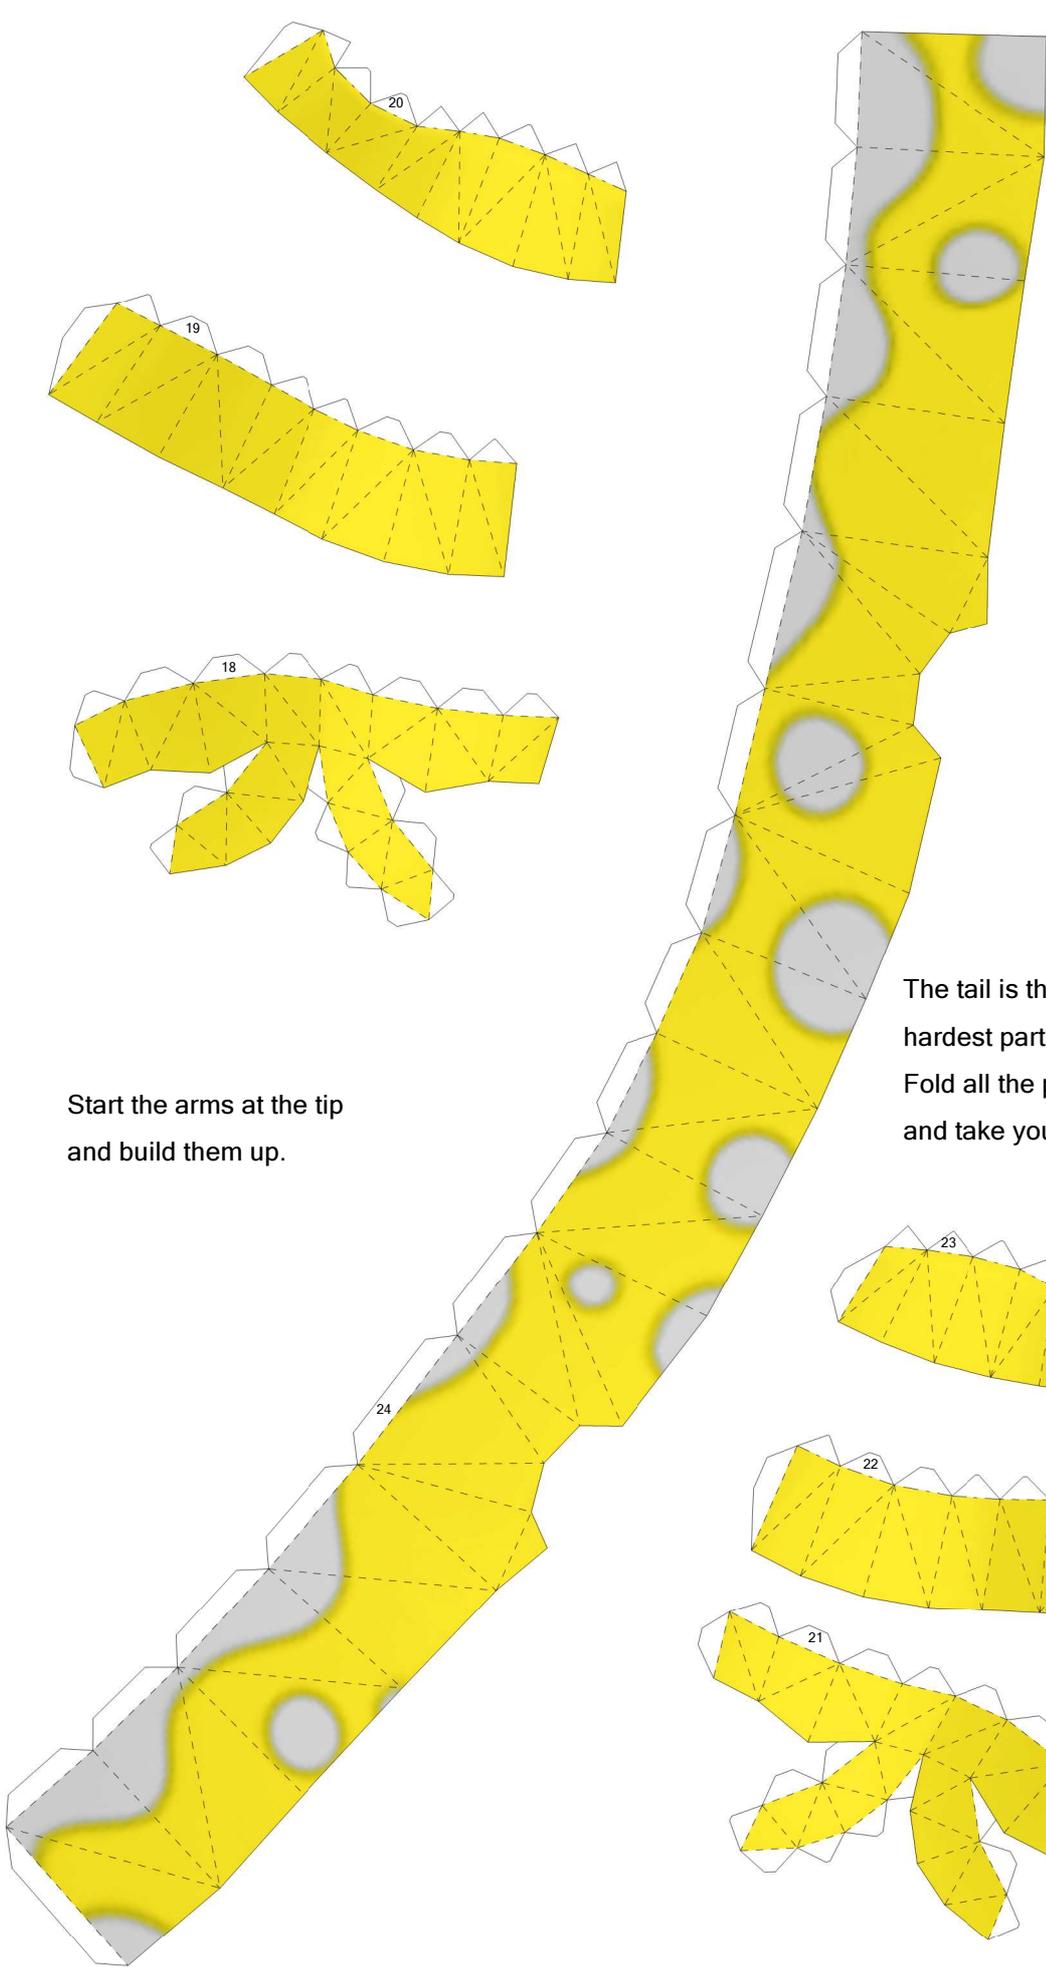

The last thing you'll do is glue the tail ball to the body. Do it AFTER the set of pieces 28-33 is already glued to the body.

Bowtie and fez are optional.

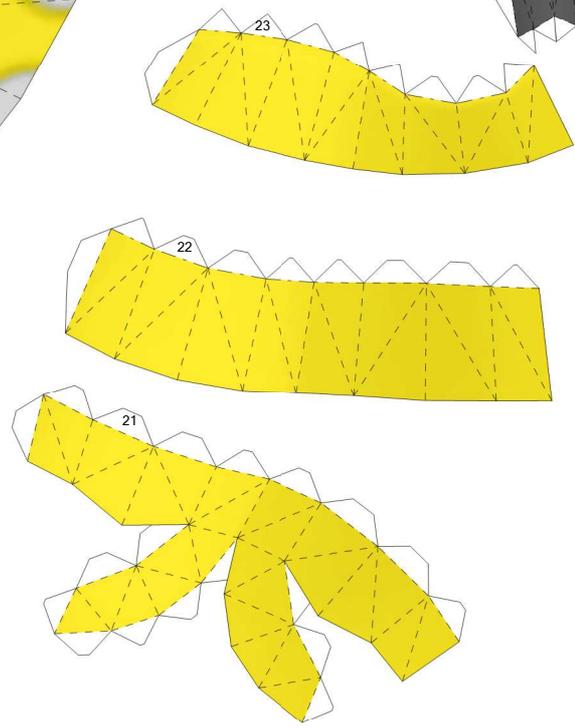

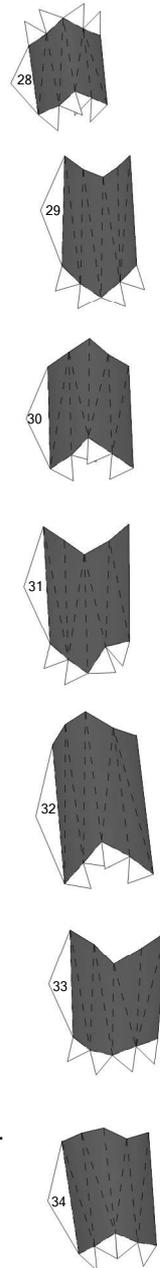

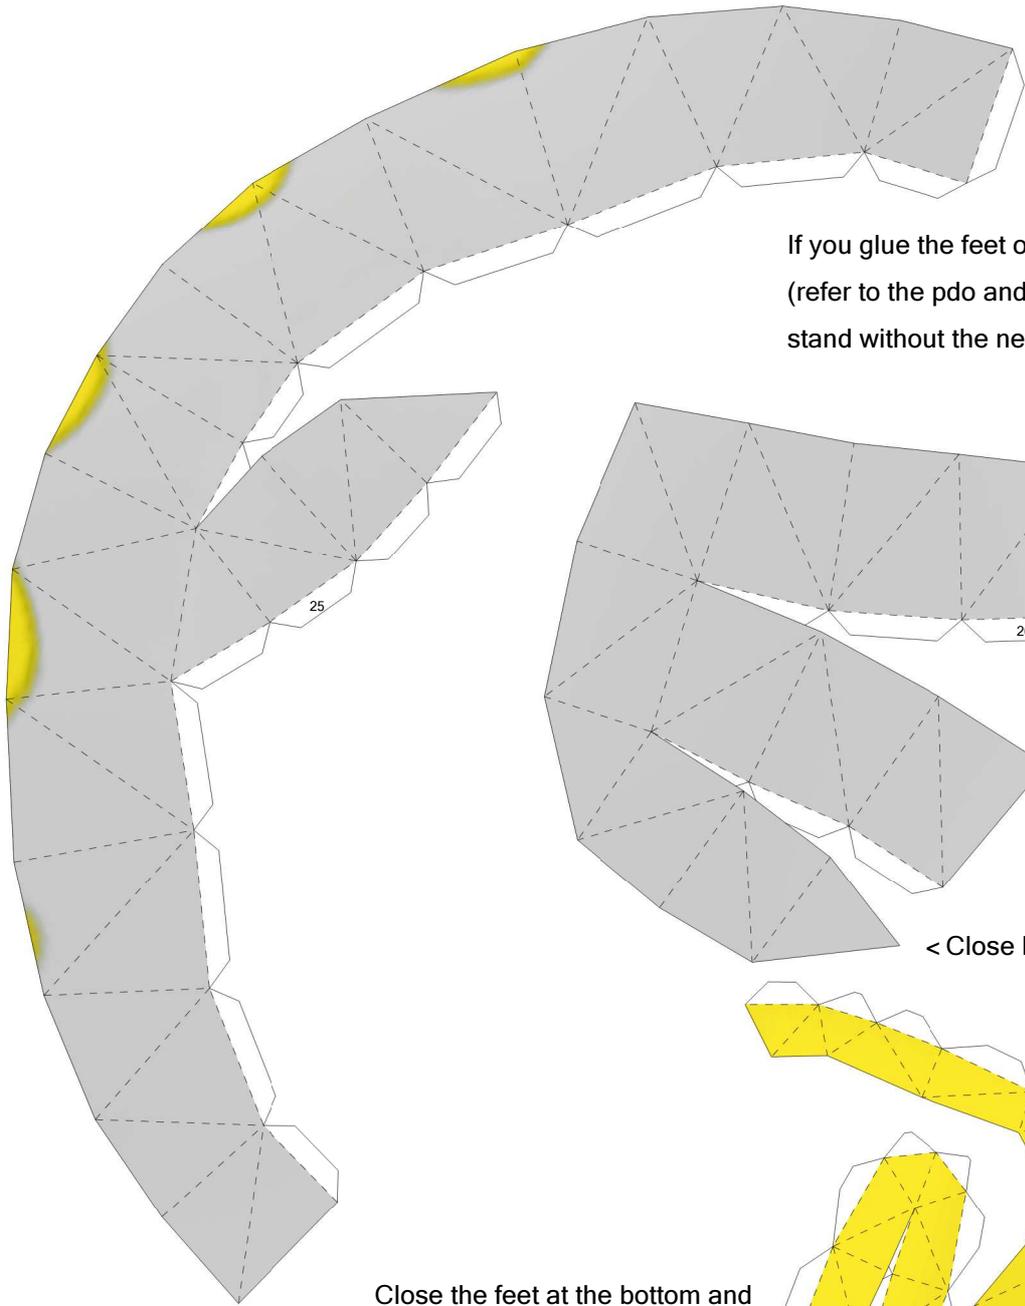

It's suggested to use a pencil to round the pieces.

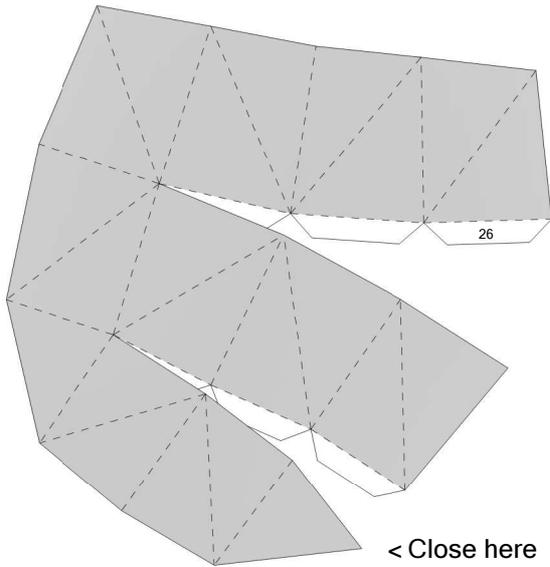

Start the arms at the tip  
and build them up.

The tail is the  
hardest part.  
Fold all the pieces  
and take your time.

If you glue the feet on the correct place (refer to the pdo and the picture) it should stand without the need of weight inside.

Close the feet at the bottom and glue the body to them BEFORE gluing the tail to the body.
