

Dedenne

By POdragon

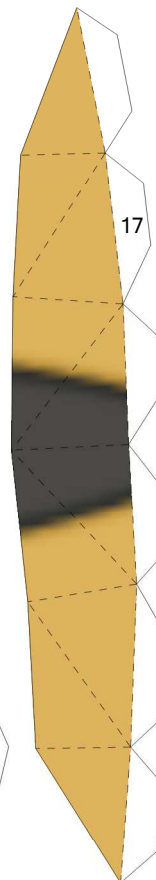

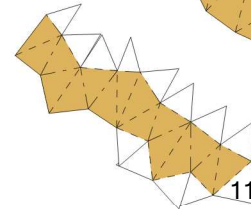

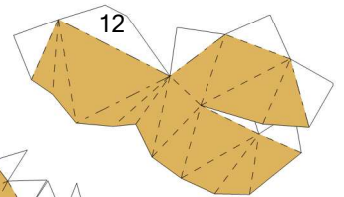

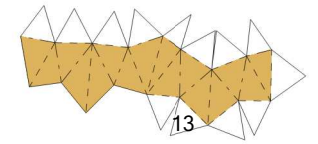

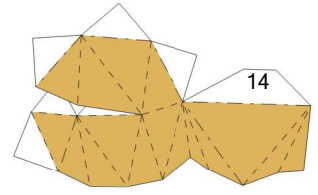

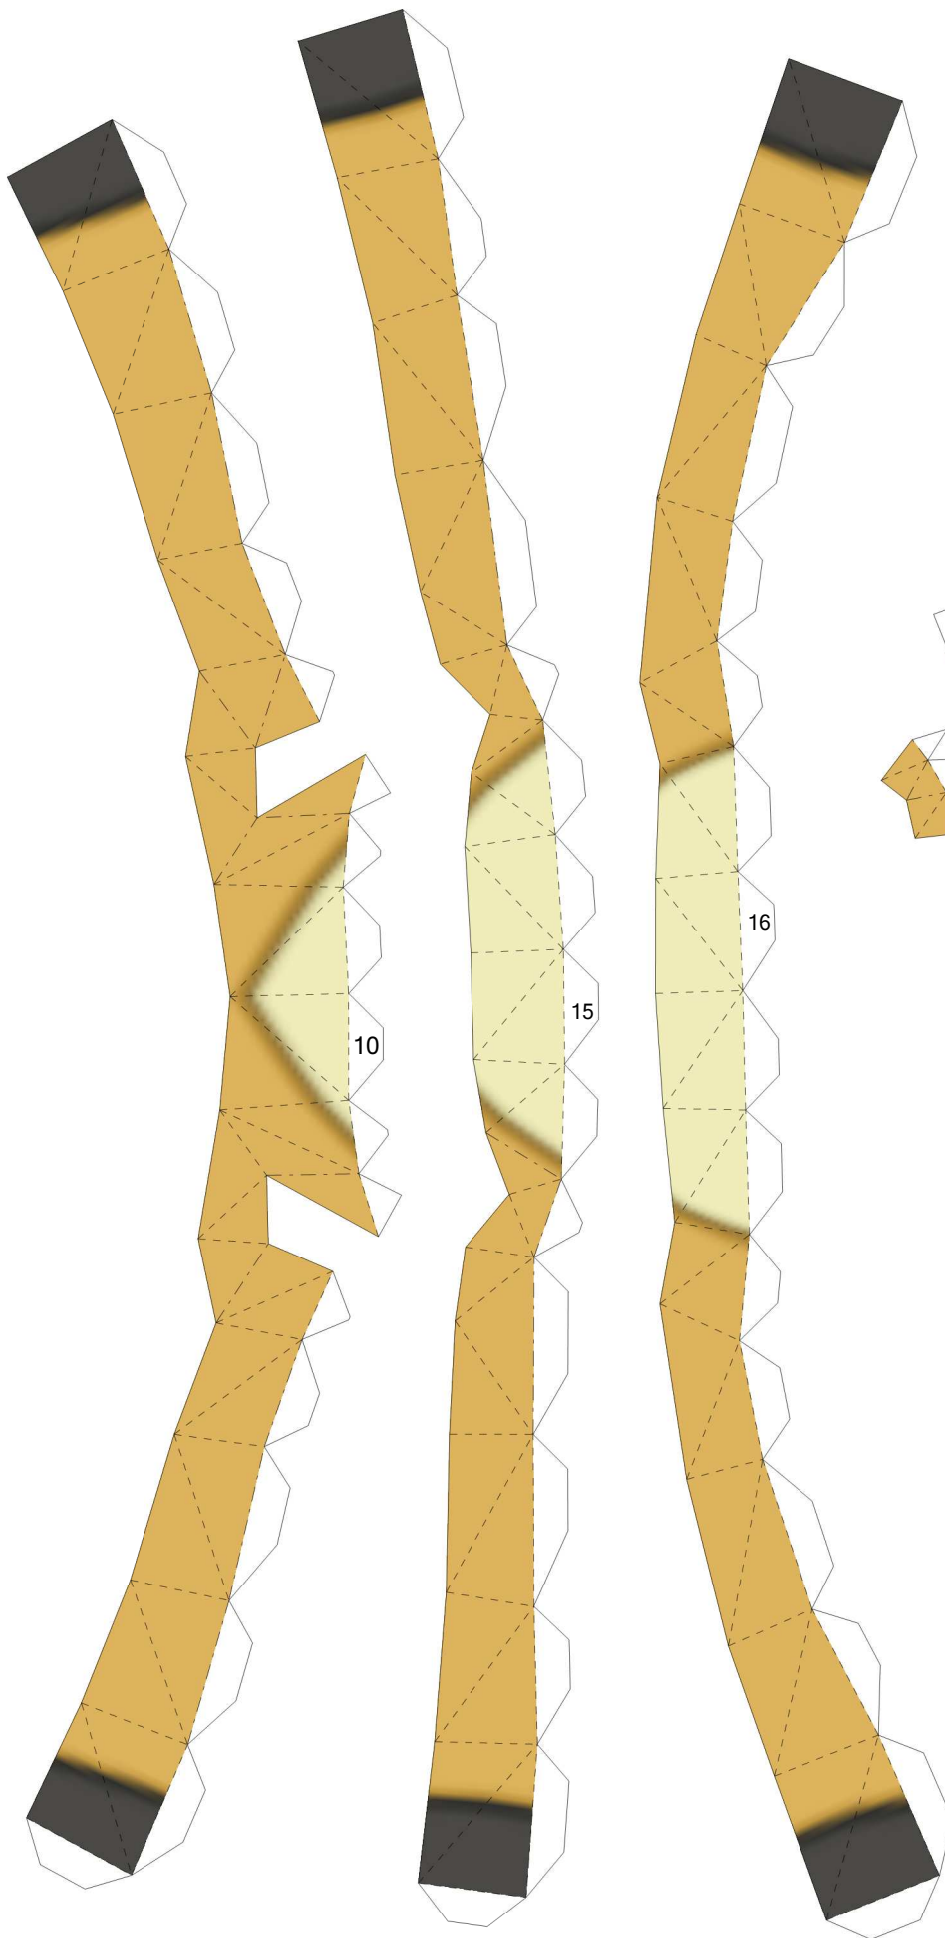

Build by LuIS

PaPerPoKëS
www.pokemonpapercraft.net

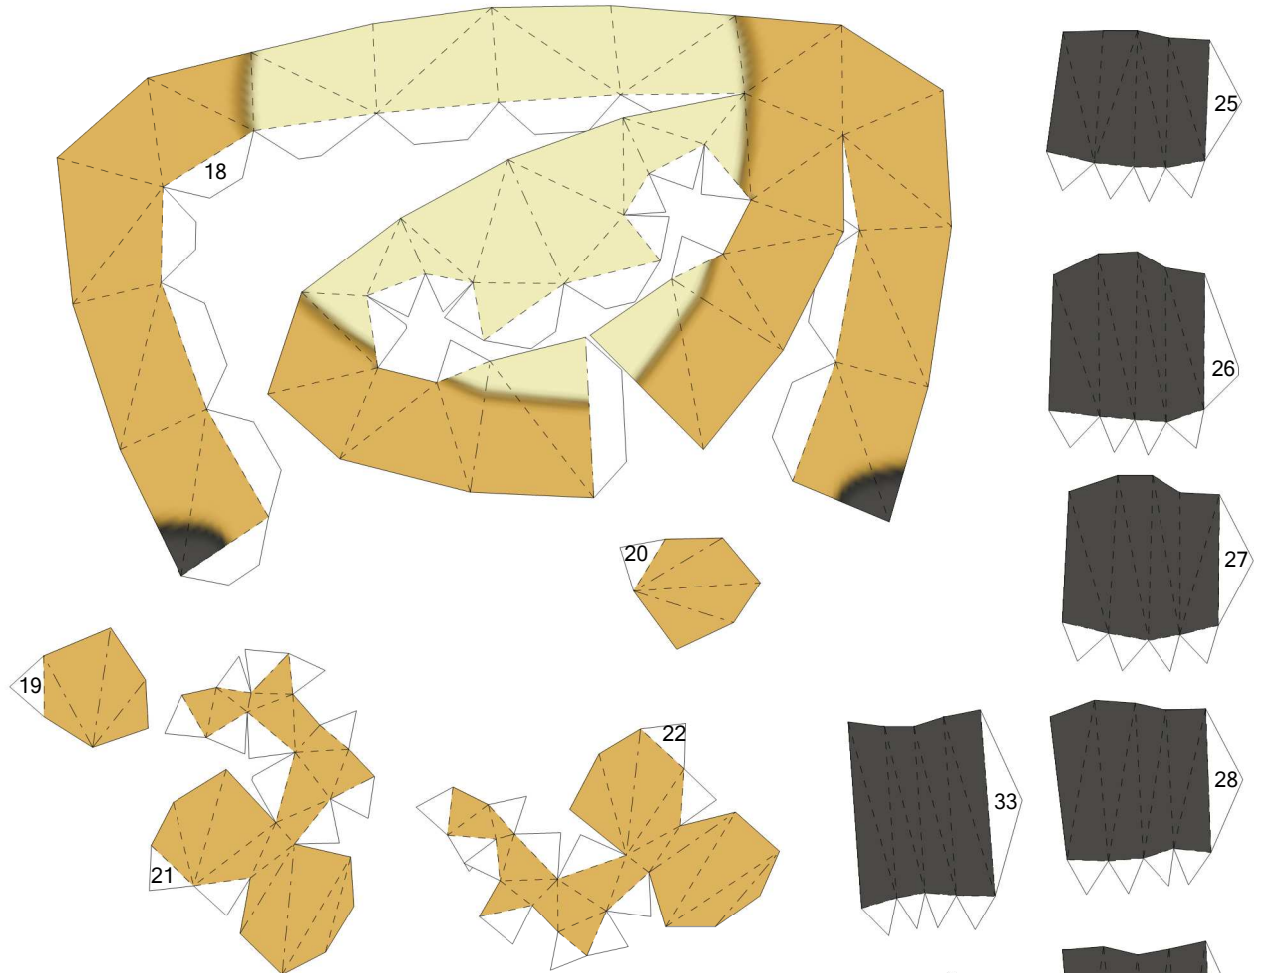

Start the ears
at the inside
and close at
the bottom.
Glue to the
head as the
numbers get
to them.

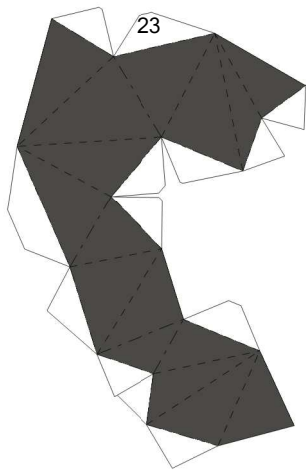

Start the arms at the hands, fold pieces 11 and 13.

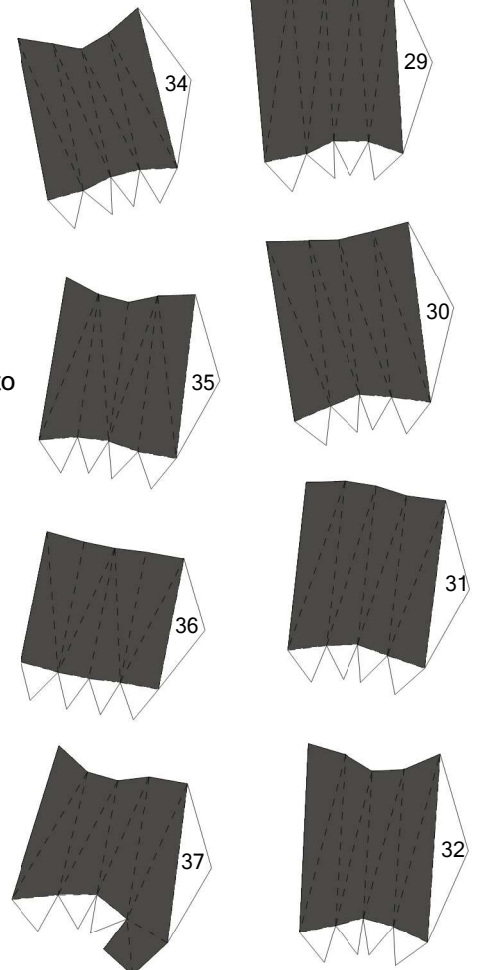

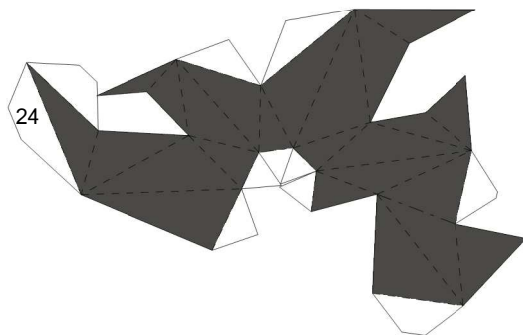

Close where the feet will glue (19-20)

Close the feet at the bottom.
Start at the toes.

The tip of the tail is hard, use the pdo for reference, fold all the lines and take your time. The rest of the tail is repetitive, but not as hard. Glue the tail after the body is built, but before closing, since you need to add some weight inside. After you make sure it stands, close and glue the feet.

Optional scarf. Glue piece 40
from the top and piece 39 from
the bottom of the scarf, as shown
in the pdo.
