

INSTRUCTIONS

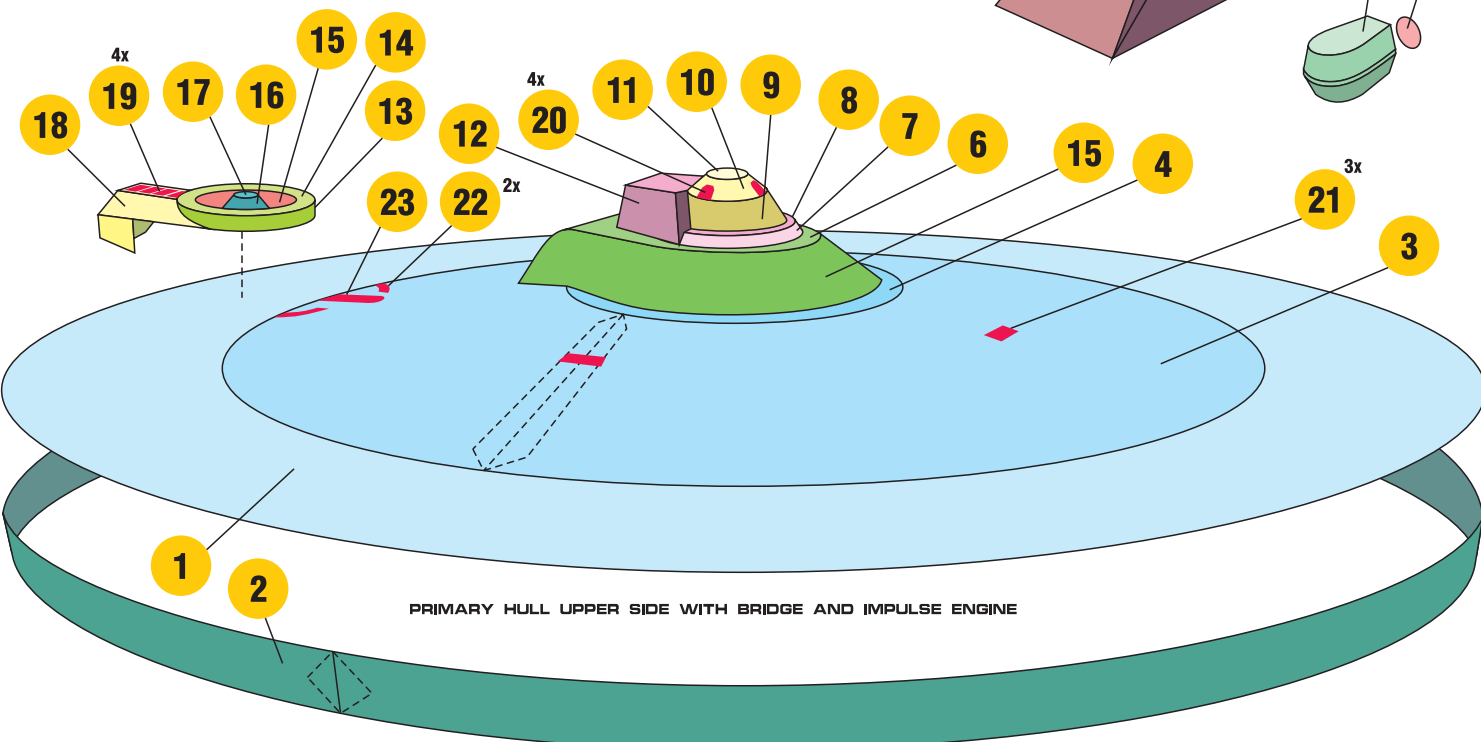

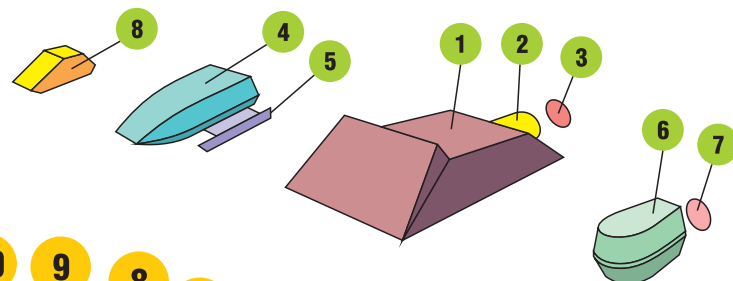

SECONDARY HULL
WITH NECK, PHOTON TORPEDO LAUNCHER,
NACELLE PYLONS, DEFLECTOR AND SHUTTLE BAY

TIPS: Don't forget! This model is designed for skilled modelers and gives you the option for various customizations!

TIPS: Use thick cardboard/foam etc. as a support in primary hull saucer to minimize the risk of deformation during the glue drying!

The nacelle pylons need another support. Recommended is wood sticks, cardboard strips or wire. Most important is the right angle of the pylons!

PRIMARY HULL UPPER SIDE WITH BRIDGE AND IMPULSE ENGINE
