Avianca Airlines Airbus A320

162

Avianca S.A. (acronym in Spanish for Aerovias del Continente Americano S.A., "Airways of the American Continent") is a Colombian airline. It has been the flag carrier of Colombia since 5 December 1919, when it was initially registered under the name SCADTA. It is headquartered in Bogotá, D.C. with its main hub at El Dorado International Airport. Avianca is the flagship of a group of eight Latin American airlines, whose operations are combined to function as one airline using a codesharing system. Avianca is the largest airline in Colombia and second largest in Latin America, after LATAM of Chile. Avianca and its subsidiaries have the most extensive network of destinations in Latin America. Prior to the merger with TACA in 2010, it was wholly owned by Synergy Group S.A., a South American holding company established by Germán Efromovich and specialising in air transport. It is listed on the Colombia Stock Exchange.

The Airbus A320 family is a series of narrow-body airliners developed and produced by Airbus. The A320 was launched in March 1984, first flew on 22 February 1987, and was introduced in April 1988 by Air France. The first member of the family was followed by the stretched A321 (first delivered in January 1994), the shorter A319 (April 1996), and the even shorter A318 (July 2003).

The A320 series has two variants, the A320-100 and A320-200. Only 21 A320-100s were produced. These aircraft, the first to be manufactured, were delivered to Air Inter – later acquired by Air France – and British Airways as a result of an order from British Caledonian made prior to its acquisition. The primary differences from the -100 were the -200's wingtip fences and increased fuel capacity, providing increased range.

Scale: 1:100
Length: (375mm)
Width: (358mm)
Parts: 316 (12 pages)

This model has been designed in 2 styles.
On the ground (with wheels)
In Flight style (without wheels)
Is nesessary assemble the stand for the "in flight style*

*This model is Designed for Papercraft and is different in several ways from the Real Life Plane.
*Build the model by carefully watching the Assembly Instructions Video.
*Make sure you have the correct printer settings before printing.
It is recommended to use Adobe Acrobat Reader to print models at 100% scale option.
