BOEING 727-200

Lacsa "Zurqui" Boeing 727-200

054

Avianca Costa Rica, formerly known as LACSA (Spanish: Lineas Aéreas Costarricenses S.A.), minority owned by the Synergy Group, is the national airline of Costa Rica and is based in San José. It operates international scheduled services to over 35 destinations in Central, North and South America.
The airline previously used the TACA/LACSA moniker when it was a subsidiary of Grupo TACA. Since May 2013, following Avianca's purchase of Grupo TACA, Avianca Costa Rica became one of seven nationally branded airlines (Avianca Ecuador, Avianca Honduras, etc.) operated by Avianca Holdings group of Latin American airlines.

The Boeing 727 is an American narrow-body airliner produced by Boeing Commercial Airplanes. After the heavy 707 quad-jet was introduced in 1958, Boeing addressed the demand for shorter flight lengths from smaller airports. On December 5, 1960, the 727 was launched with 40 orders each from United Airlines and Eastern Air Lines. The first 727-100 rolled out November 27, 1962, first flew on February 9, 1963, and entered service with Eastern on February 1, 1964.

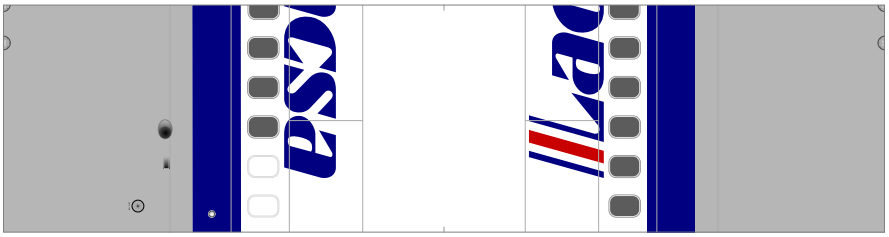

A stretched version of the 727-100, the -200 is 20 feet (6.1 m) longer (153 feet 2 inches;46.69 m) than the -100 (133 feet 2 inches;40.59 m). A 10-ft (3-m) fuselage section ("plug") was added in front of the wings and another 10-ft fuselage section was added behind them. The wing span and height remain the same on both the -100 and -200 (108 and 34 feet (33 and 10 m), respectively)

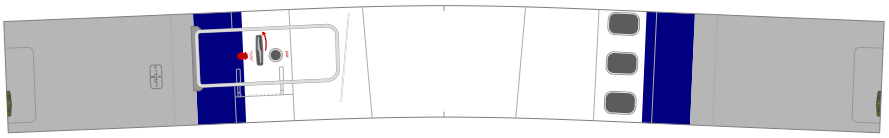

Scale: 1:100
Length: (467mm)
Width: (329mm)
Part 272 (13 pages)

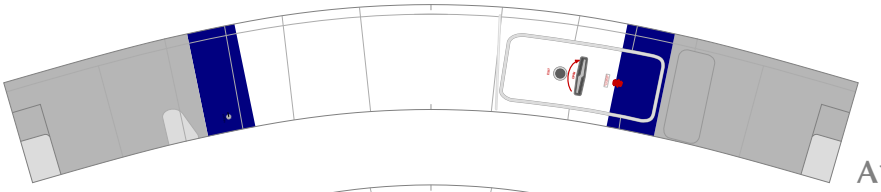

Attach the parts in order.
A1 - K6
You can choose to make either a grouded style (With Wheels) or an in-flight style (without wheels) aircraft.

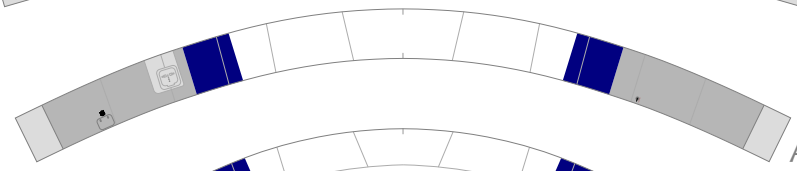

*This model is designed for papercraft and is different in several ways from the real plane
*Build the model by carefully reading the Assembly Instructions.
*The final size of the model may vary slightly depending on the configuration of your printer
