Gol Linhas Aéreas Inteligentes S.A ("Gol Intelligent Airlines S.A." also known as VRG Linhas Aéreas S/A) is a Brazilian low-cost airline based in Rio de Janeiro, Brazil. According to the National Civil Aviation Agency of Brazil (ANAC), between January and December 2019 Gol had 37.7% of the domestic and 3.8% of the international market shares in terms of passenger-kilometers flown, making it the largest domestic and third largest international airline in Brazil

Flight 1907 was a Boeing 737-8EH on a scheduled domestic passenger flight from Manaus, Brazil, to Rio de Janeiro. On the afternoon of 29 September 2006, it collided in mid-air with an Embraer Legacy 600 business jet over the Brazilian state of Mato Grosso. The Boeing 737 broke up in mid-air and crashed into an area of dense jungle, killing all 154 passengers and crew on board. Despite sustaining serious damage to its left wing and tail, the Embraer Legacy jet landed safely with its seven occupants uninjured.

The Boeing 737 Next Generation, commonly abbreviated as 737NG, or 737 Next Gen, is a narrow-body aircraft powered by two jet engines and produced by Boeing Commercial Airplanes. Launched in 1993 as the third generation derivative of the Boeing 737, it has been produced since 1997 and is an upgrade of the 737 Classic (−300/-400/-500) series.

It has CFM International CFM56-7 series engines, a glass cockpit, and upgraded and redesigned interior configurations. The series includes four variants, the −600/-700/-800/-900, seating between 108 and 215 passengers. The 737NG's primary competition is the Airbus A320 family.
