BSG CYLON RAIDER
instruction manual

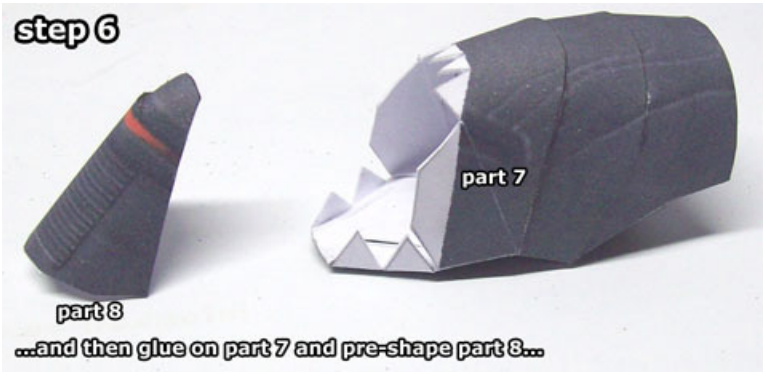

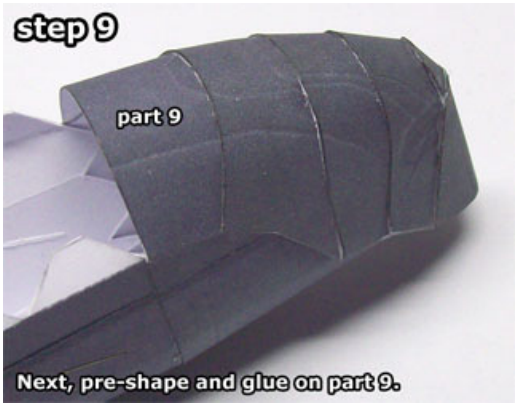

step 4
part 6
part 5
Cut out and assemble parts 5 and 6, and don't forget the two slots on part 6.
Give the front a little curve too.

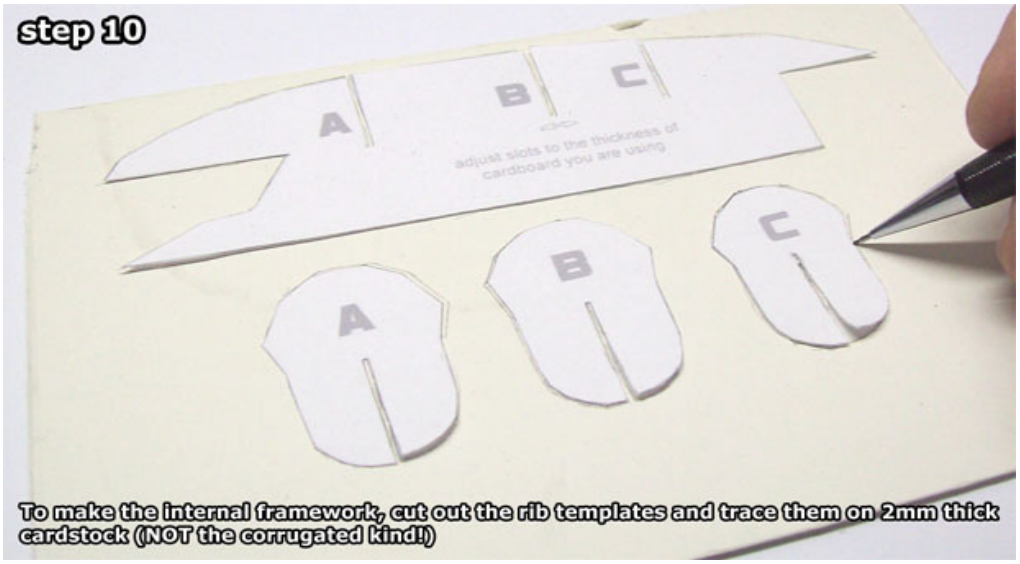

step 5
part 6
part 5
Glue parts 5 and 6 together...

step 6
part 7
part 8
...and then glue on part 7 and pre-shape part 8...

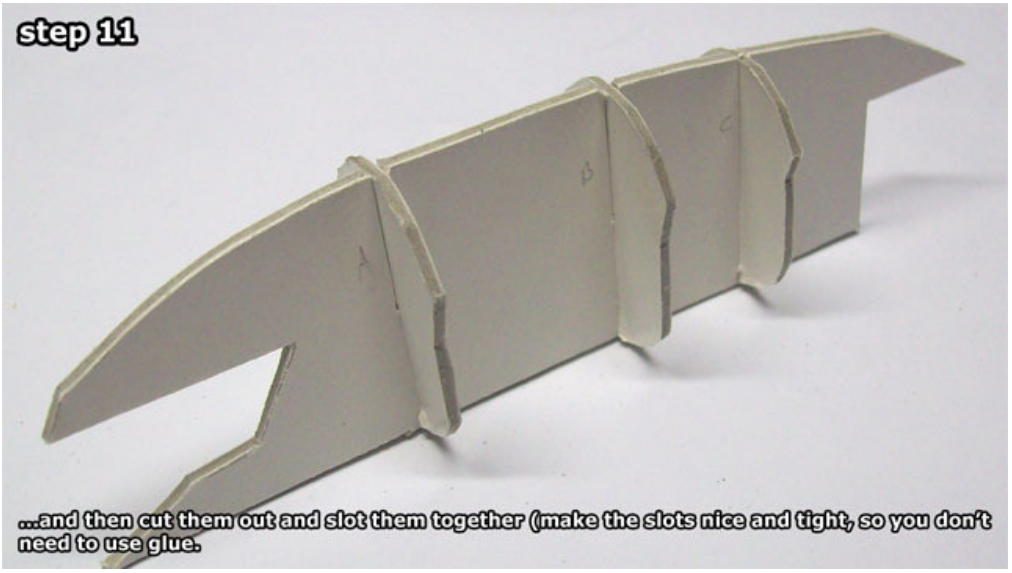

step 7
part 8
...so you can glue that one on as well.

step 8
Now glue these parts to the rest of the hull. Push the two bigger glueing tabs on part 4 that you didn't fold into the two slots on part 6.

step 9
part 9
Next, pre-shape and glue on part 9.

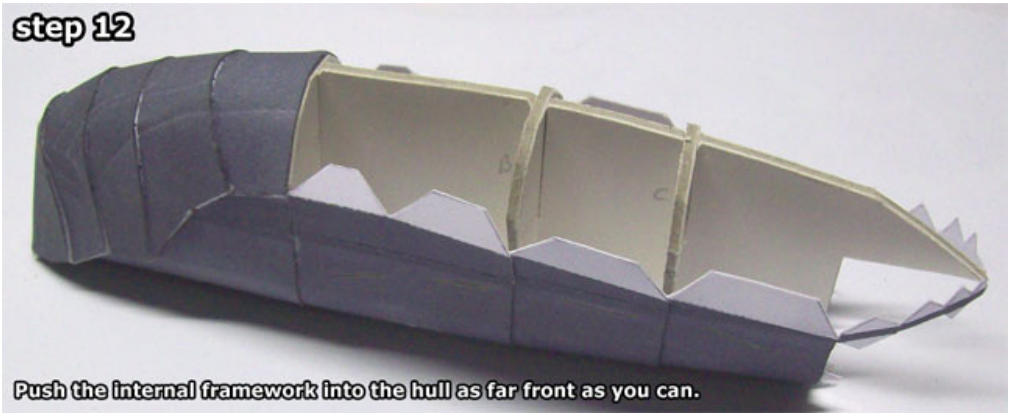

step 10
A
B
C
adjust slots to the thickness of cardboard you are using
A
B
C
To make the internal framework, cut out the rib templates and trace them on 2mm thick cardstock (NOT the corrugated kind!)

step 11

...and then cut them out and slot them together (make the slots nice and tight, so you don't need to use glue.

step 12

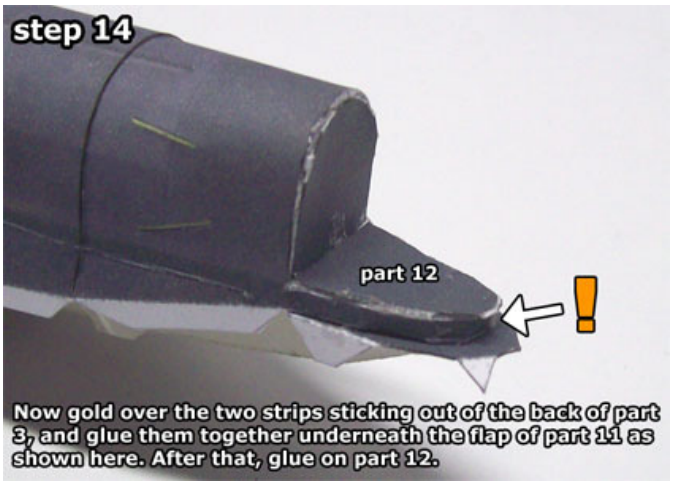

Push the internal framework into the hull as far front as you can.

step 13

Cut out, fold and glue part 11 to the back of the hull...

step 14

Now gold over the two strips sticking out of the back of part 3, and glue them together underneath the flap of part 11 as shown here. After that, glue on part 12.

step 15

Pre-shape parts 13-16 and glue them together...

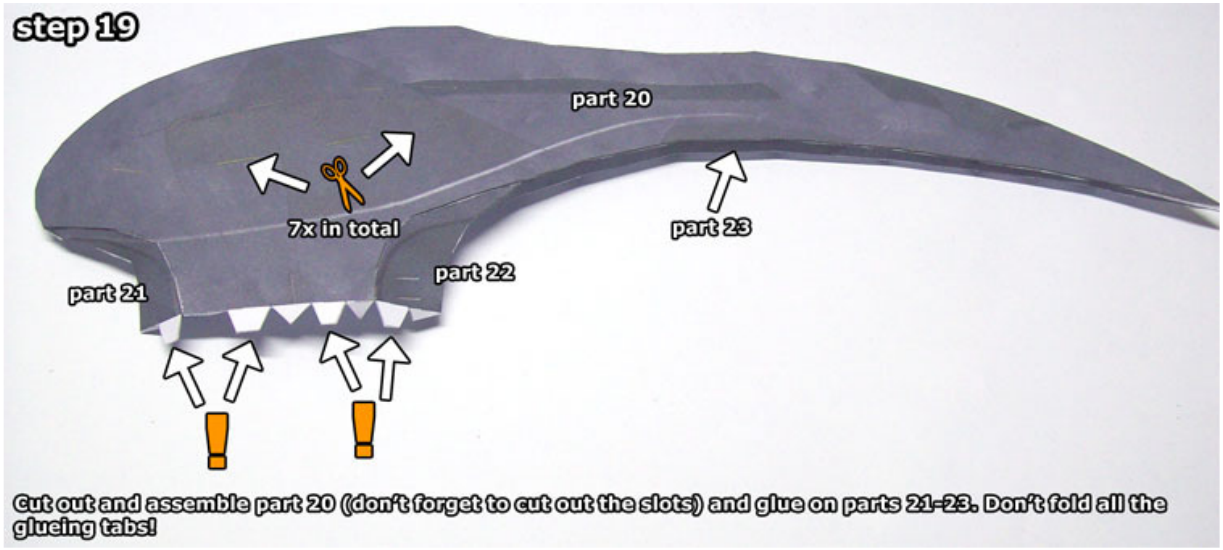

step 16

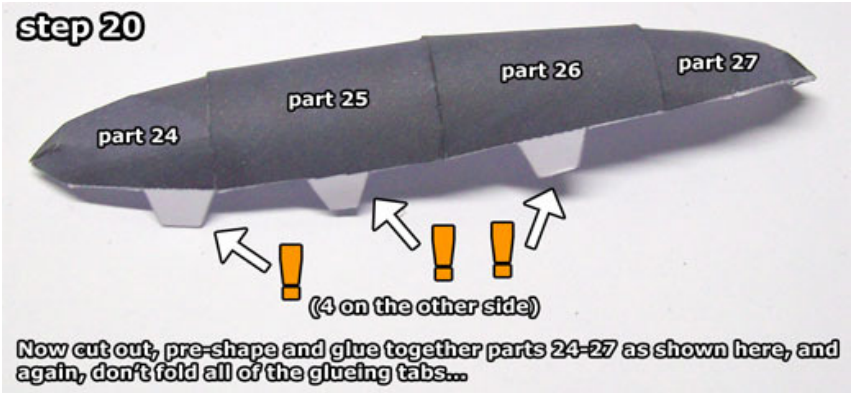

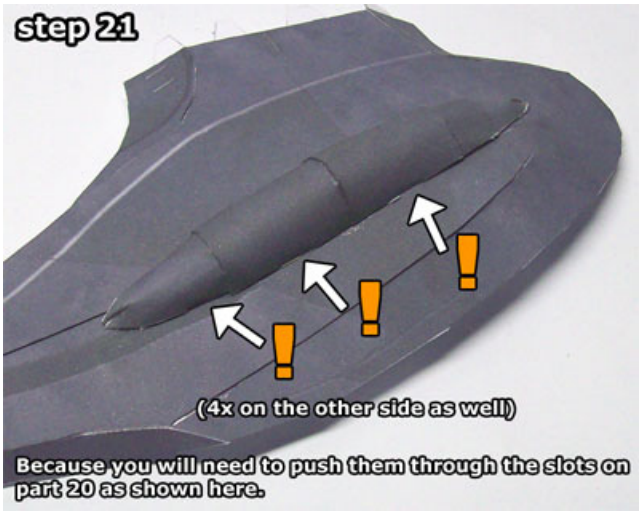

...and then glue them to the top of the hull. Take your time to do so.

step 17
part 17
part 18
part 19
Cut out and assemble parts 17 and 19 (part 19 with the coloured side in).

step 18
part 17
part 18
part 19
Glue them together, and then to the back of the hull.

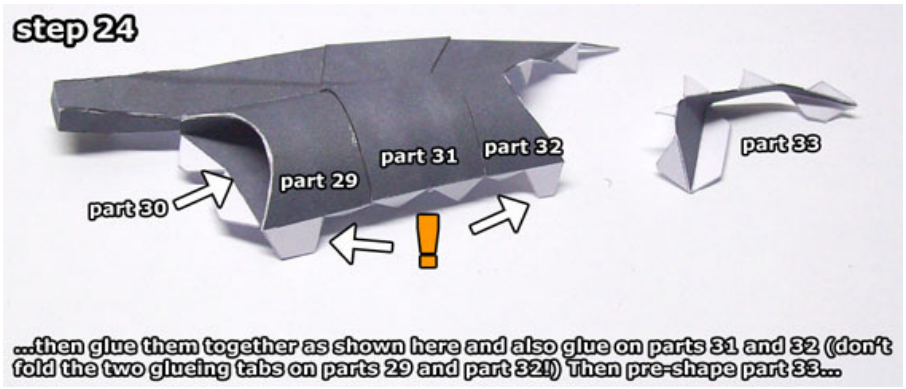

step 19
part 20
7x in total
part 23
part 22
part 21
Cut out and assemble part 20 (don't forget to cut out the slots) and glue on parts 21-23. Don't fold all the glueing tabs!

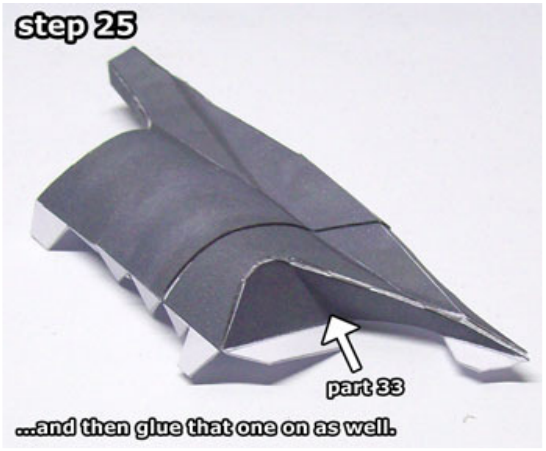

step 20
part 26
part 27
part 25
part 24
(4 on the other side)
Now cut out, pre-shape and glue together parts 24-27 as shown here, and again, don't fold all of the glueing tabs...

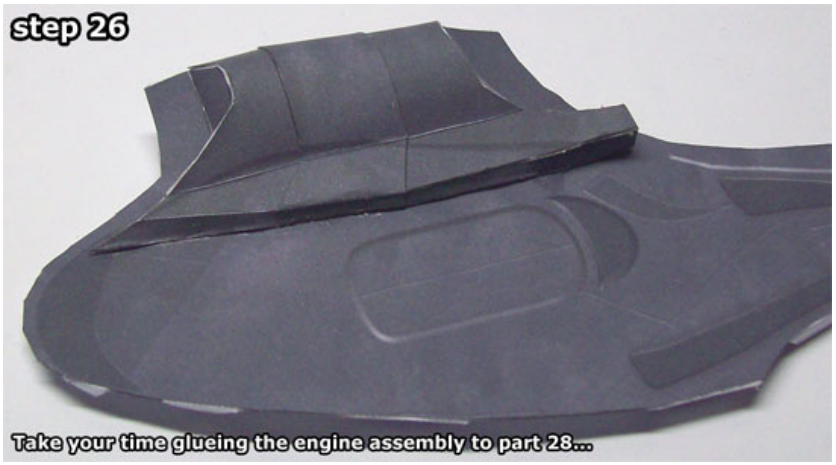

step 21
(4x on the other side as well)
Because you will need to push them through the slots on part 20 as shown here.

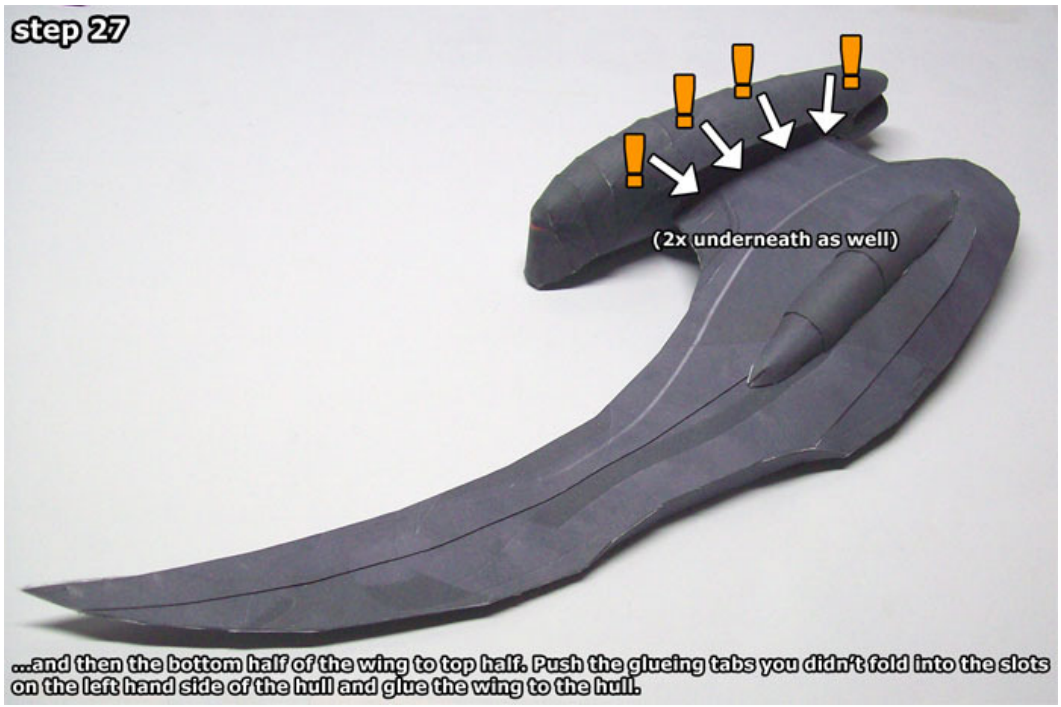

step 22
Now cut out part 28 and fold all the glueing tabs, but it's probably easier not to glue it to the top half of the wing just yet.

step 23
part 29
part 30
First cut out, pre-shape and assemble parts 29 and 30 (part 30 with the coloured side in again as you can see here)...

step 24
part 30
part 29
part 31
part 32
part 33
...then glue them together as shown here and also glue on parts 31 and 32 (don't fold the two glueing tabs on parts 29 and part 32!) Then pre-shape part 33...

step 25
part 33
...and then glue that one on as well.

step 26
Take your time glueing the engine assembly to part 28...

step 27
(2x underneath as well)
...and then the bottom half of the wing to top half. Push the glueing tabs you didn't fold into the slots on the left hand side of the hull and glue the wing to the hull.

step 28

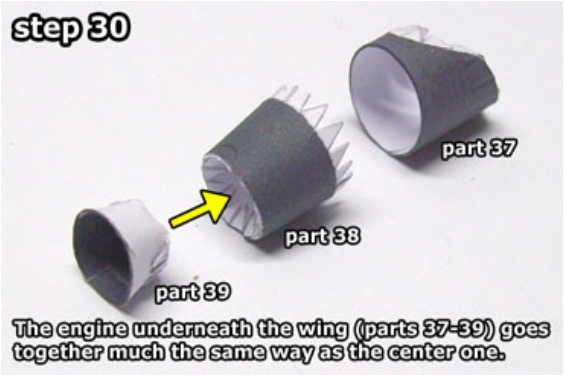

Pre-shape and glue together parts 34-36...

step 29

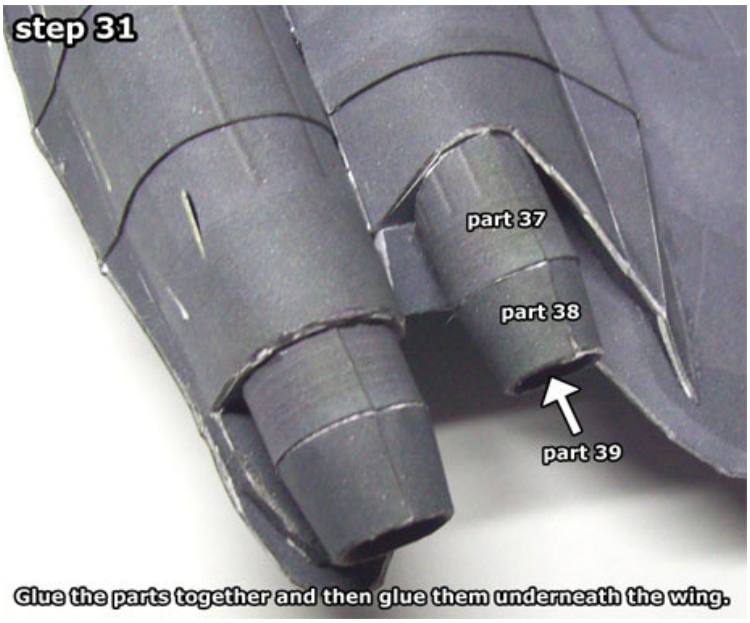

...and then glue them to the side of the wing.

step 30

The engine underneath the wing (parts 37-39) goes together much the same way as the center one.

step 31

Glue the parts together and then glue them underneath the wing.

step 32

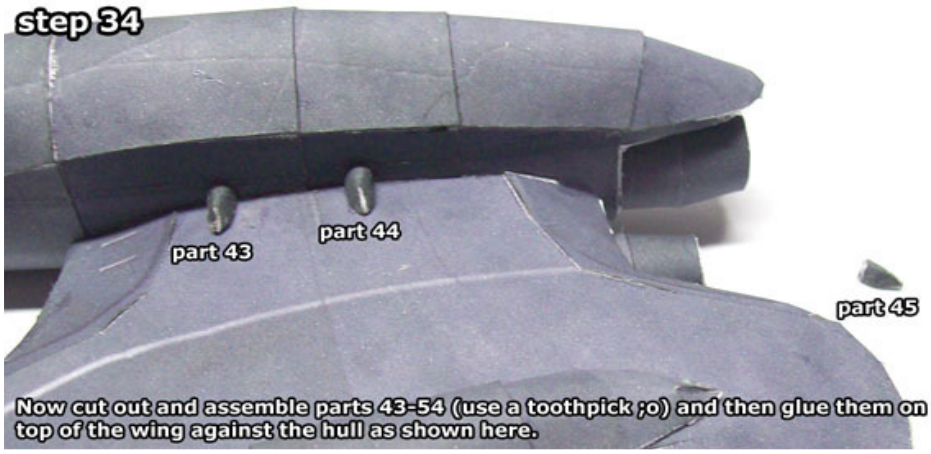

Cut out and assemble parts 40-42 (pre-shape them around a toothpick)...

step 33

...and then glue them to the front of part 29 as shown here.

step 34
part 43
part 44
part 45
Now cut out and assemble parts 43-54 (use a toothpick ;o) and then glue them on top of the wing against the hull as shown here.

step 35
And the best part is, you get to do it all again for parts 46-71 for the other wing! ;o)

step 36
CYLON RAIDER
If you want to make the stand, cut out part 72 and glue it together like this...

step 37
...and then simply place your Cylon Raider on top of it! I hope you had fun building!
