

WARRIOR OF LIGHT (CLASSIC RED)

dissidiaffaaron.blogspot.com

LEGS & BODY

1. First, construct parts 1-10 for the leg. Repeat with parts 11-19 for the other leg. Add some weight to the legs to balance him.
2. Combine both legs together with parts 20-21.
3. Construct the tassets with parts 23-35 and set it aside. Remember to trim and double-side it.
4. Glue parts 36-37 and attach the tassets to the legs.
5. Construct parts 38-47 for the pocket and glue it to the side of the tassets.
6. The, construct parts 48-65 for the armour, and glue it to the legs. You may need to trim part 37 a little to fit the armour.

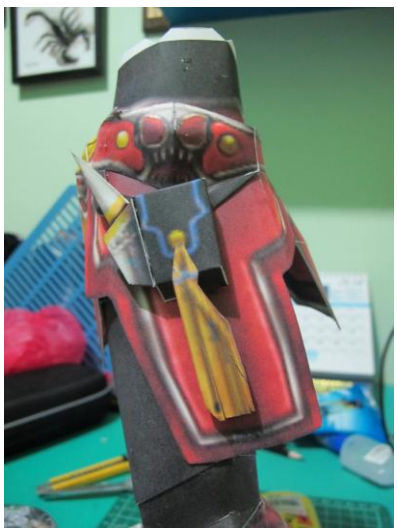

ARMS

1. First, construct parts 66-72 for the hand.
2. Then, construct parts 73-80 for the forearm. Don't worry about squeezing part 73 for it to fit.
3. Construct parts 81-87 for the rest of the arm. Combine both parts of the arm. Don't worry about trimming and squeezing the parts.
4. Glue the arm to the main body.
5. Repeat with parts 88-109 for the other arm. Attach it to the body.
6. Construct parts 110-113 for the shoulder pads, and close the body with part 114.

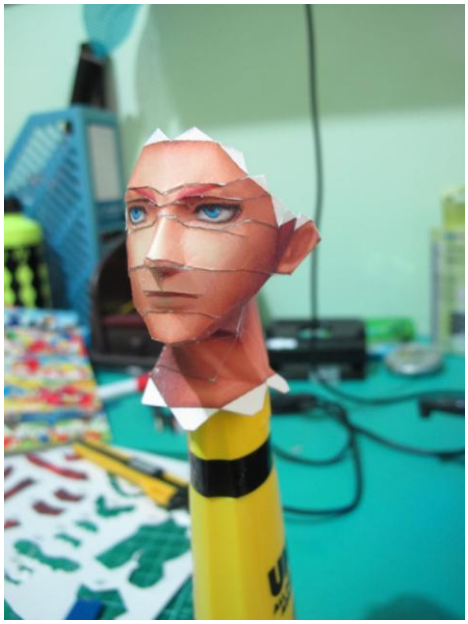

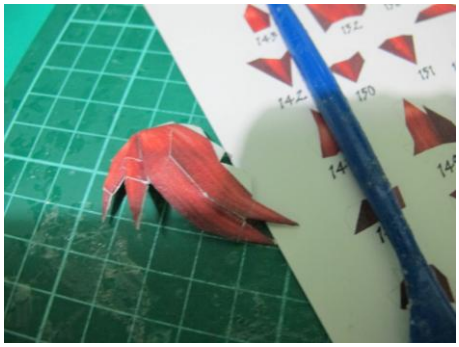

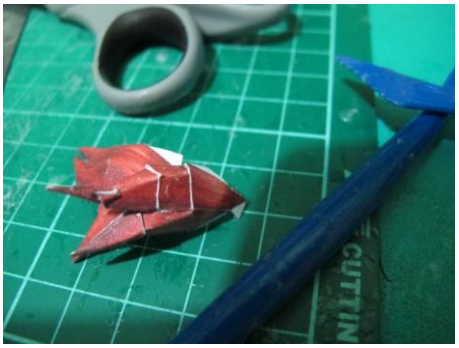

HEAD

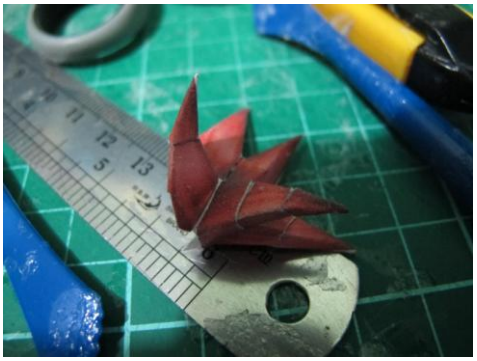

1. Construct parts 115-131 for the neck and face.
2. Then, construct parts 132-141 for the left tuft of hair and attach it to the face.
3. Construct parts 142-152 for the right tuft of hair and attach to the face too.
4. Construct parts 153-161 for the top hair and glue it to the face.
5. Continue with parts 162-169 for the hair.
6. Construct parts 170-175, trim and attach to the hair.
7. Then, construct parts 176-183 for the spikes of hair.
8. Close the head with parts 184-191. Attach the head to the body.

SWORD & SHIELD

1. The sword is very straight-forward. Just construct parts 192-204.
2. Then, double-side and trim parts 205 and 206 and attach them to the sword.
3. For the shield, just construct parts 207-210.
4. Then glue part 211 to the shield for the handle.
5. Finally, glue the sword and shield to the hands.

Our radiant, shining, disgustingly good red-headed hero is finally complete!
