Print out extra pages for more rocks and cliffs

Glue small coins or weights inside the base of the rocks or cliffs before gluing it together, to add weight and stability to the model.

Assemble your rocks and cliffs to form a scene, and add foliage.

When placing the rocks and cliffs on the floor scenery, use your imagination and try out different combinations. For example you can form a group of hills, or a narrow passage between cliffs, or a place to hide people or animals.

Have fun and experiment!
