hey there
thank you for downloading my Echo Echo Papercraft model =)

this model is relative easy
so you shouldn't have any big problems here

start with the legs and combine them with the pieces
at page 10

build the arms and head
combine them with the pieces from pages 6 and 9
i prefere to build the torso part from 31a-f and so on
seprerated
later you have still the chance to combine it with the head

for the two thin "wire" pieces
cut a diamond form holes into the piece from page 8
(this backpack thing)
later it is still possible but a little bit harder

also two into the headphones (or whatever it should be ^^)
before you close the torso with the piece from page 7
you can add them and glue them into the torso
then also the head will be much more stable

i hope you enjoy this model
and if you have any question
feel free to ask me at my deviantart profile
destro2k.deviantart.com
or my new facebook page
www.facebook.com/Destro2ksCraftingbox

and as always
the most important thing here
THIS MODEL IS FREE AND SHOULD IT BE
SO LET IT BE! =)
