Face.....

It's easy just build pieces 177-193, take care with the eyes and nose.

Hair.....the living spiky hell

2. It's difficult but not impossible, follow the number sequence, attaching first the front parts then the back and at least the top, just have petience to build spike...spike...spike and more spikes.

Weapon.....

3. Really easy to build just follow the pdo and some pieces will need to be cutted in the tip to fit with the large pieces.
