KINGDOM HEARTS

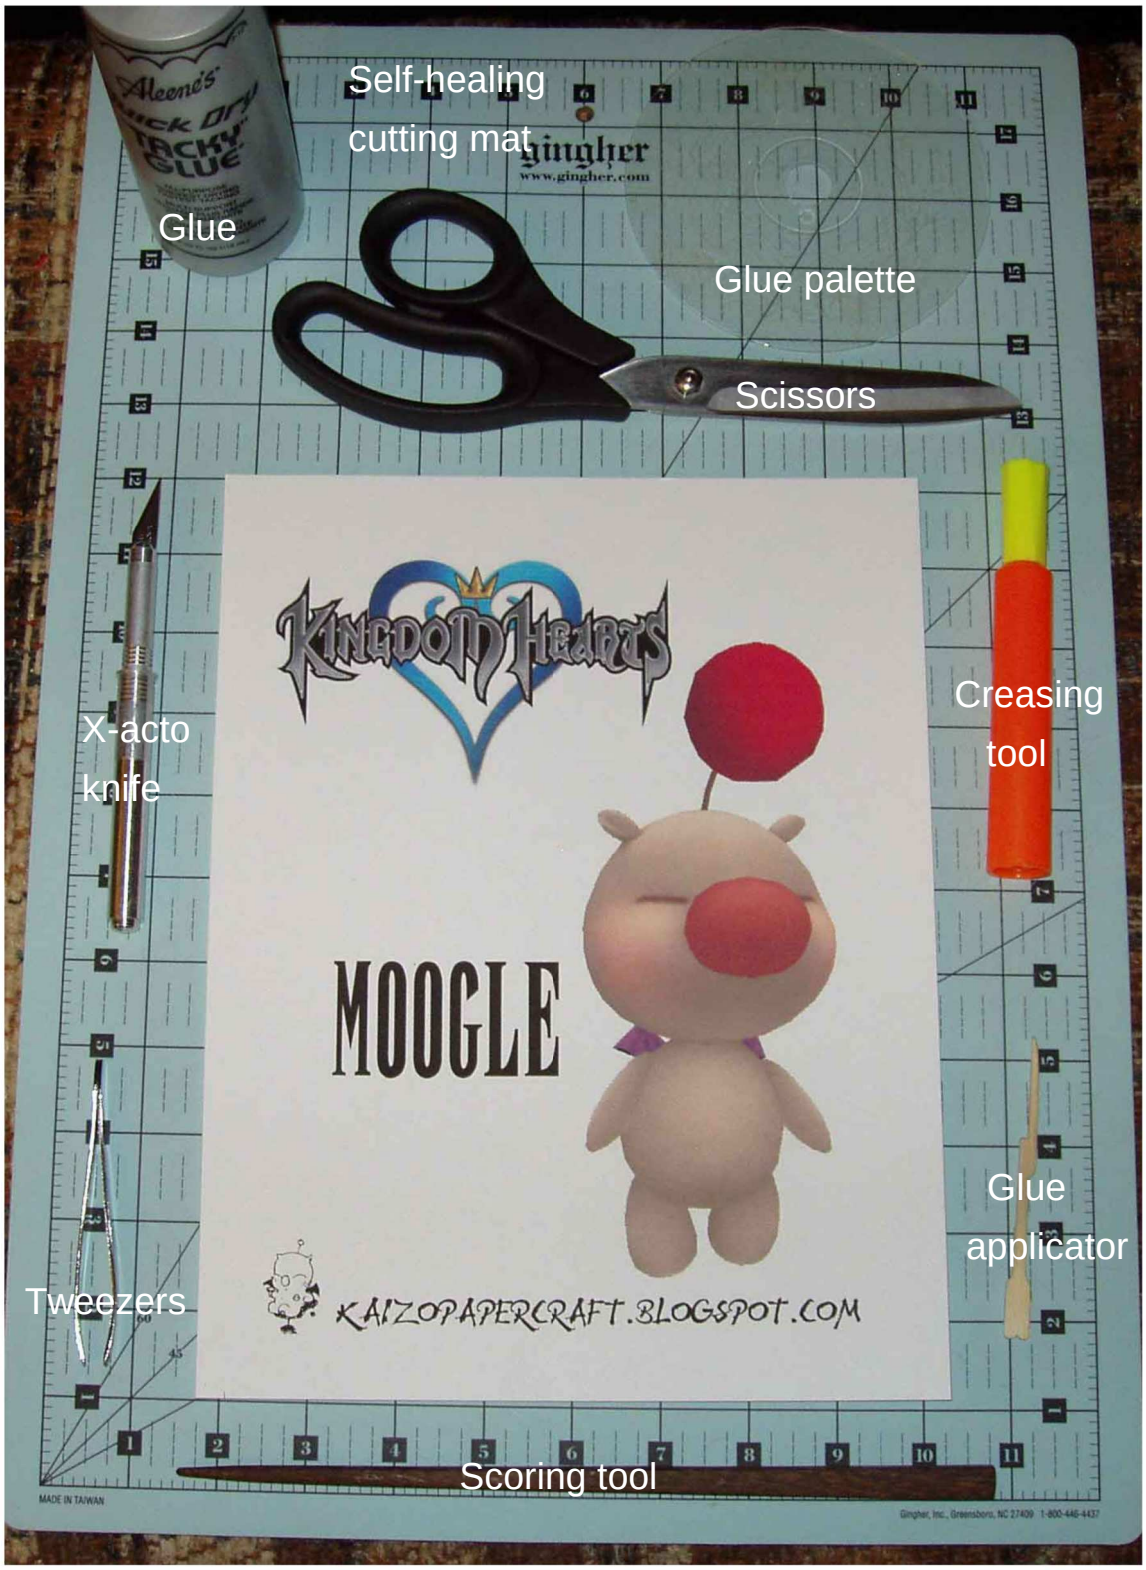

MOOGLE INSTRUCTIONS

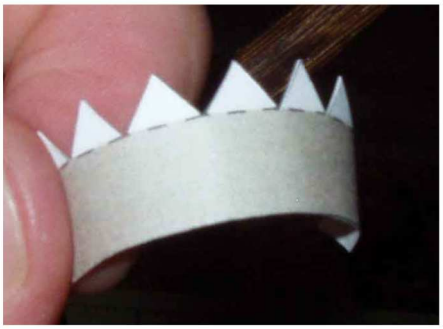

KAIZOPAPERCRAFT.BLOGSPOT.COM

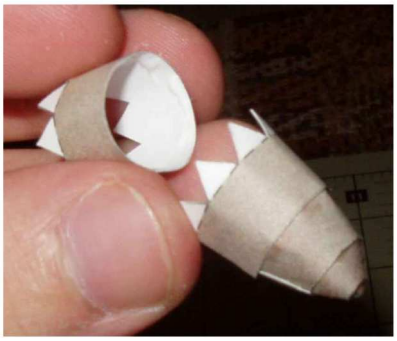

Preliminary - Tools to consider

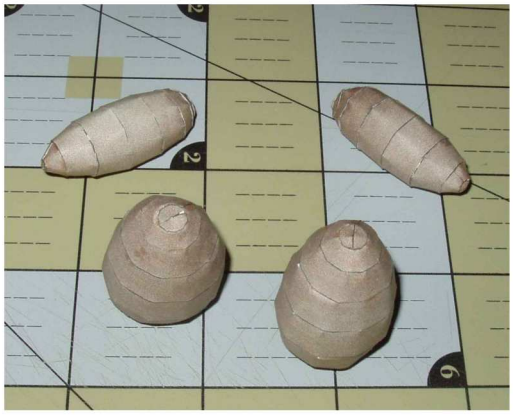

I get the mole-bat thing, but where does the pom-pom come from?

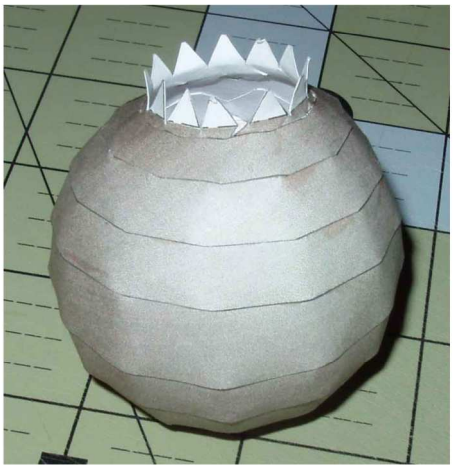

Remember to pre-shape your parts thorughout the build.

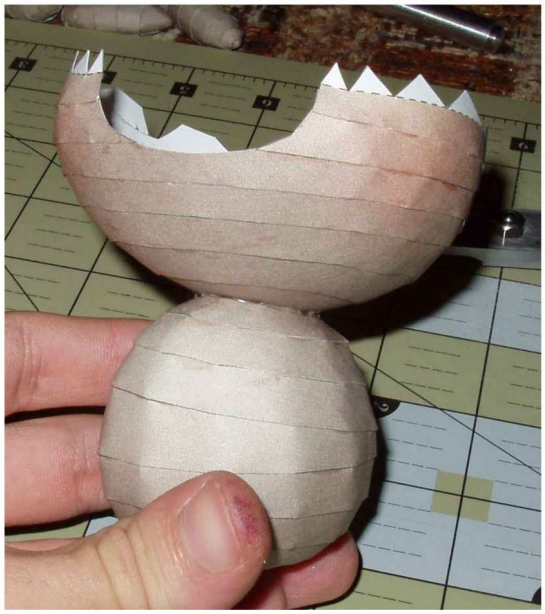

A good way to build the limbs quickly is to construct each ring separately, then stack the rings. Remember to apply glue to the inside of the upper ring, then insert the tabbed ring. This will minimize glue overflow.

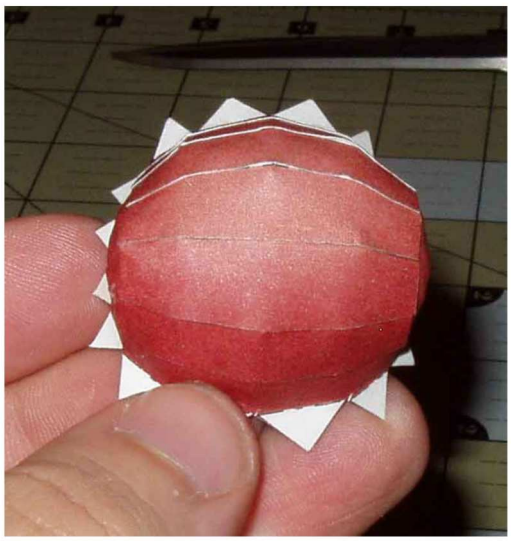

Construct parts 1-10, 11-20, 21-30, and 31-40

Construct parts 41-51

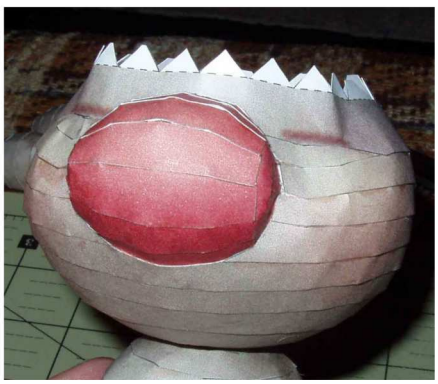

Attach parts 52-60

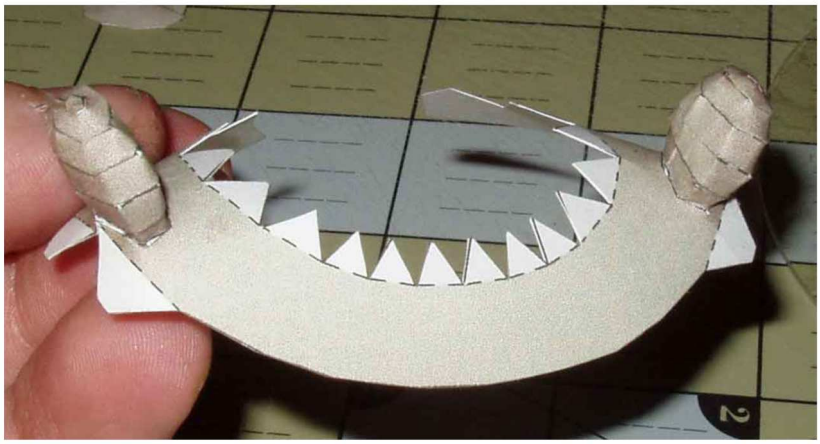

Construct parts 61-73

Attach to the body

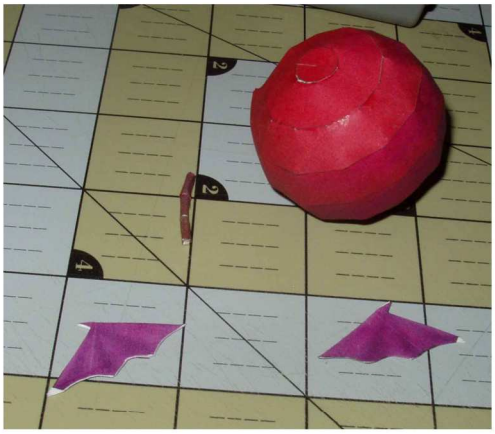

Attach parts 74-77

Construct parts 79-84 and 85-90, attach to part 91, then attach parts 78-94 to the body.

Construct parts 95-104 and 105-107, then fold parts 108 and 109 in half to form two double-sided wings. Trim the excess black.

Punch X-shaped holes where all the limbs will connect, small slits where the wings will connect, and small circular holes where the stem connects to the head and pom. Apply glue to all the holes. Insert the limbs however you please (posable), the wings into the back, and the pom-pom to the head.
