

Shadow Lugia

By LuIS

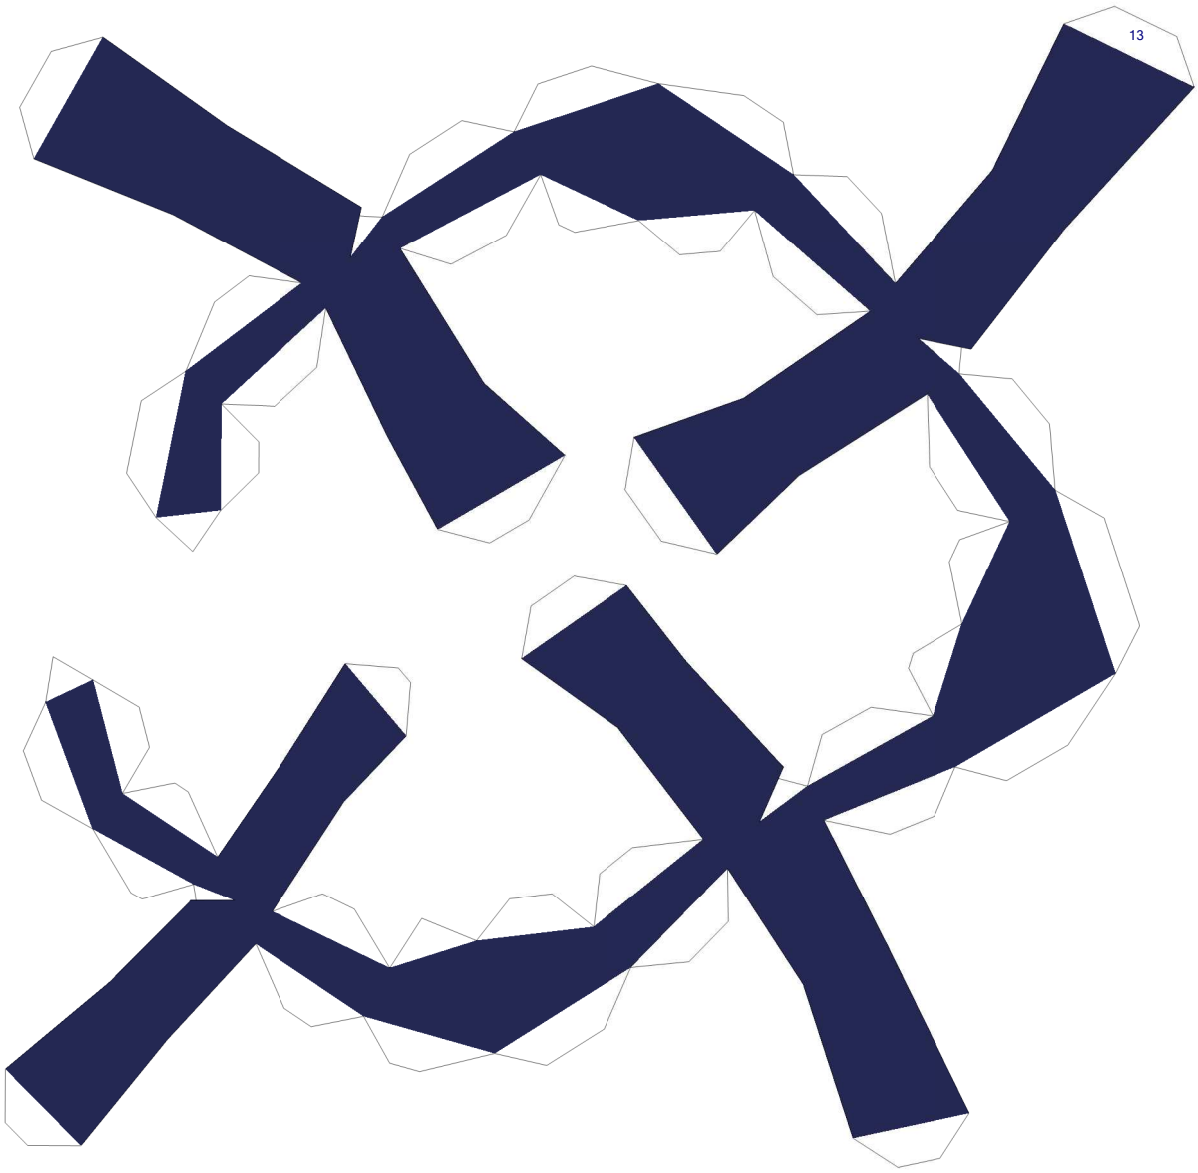

PaPerPokés
www.pokemonpapercraft.net

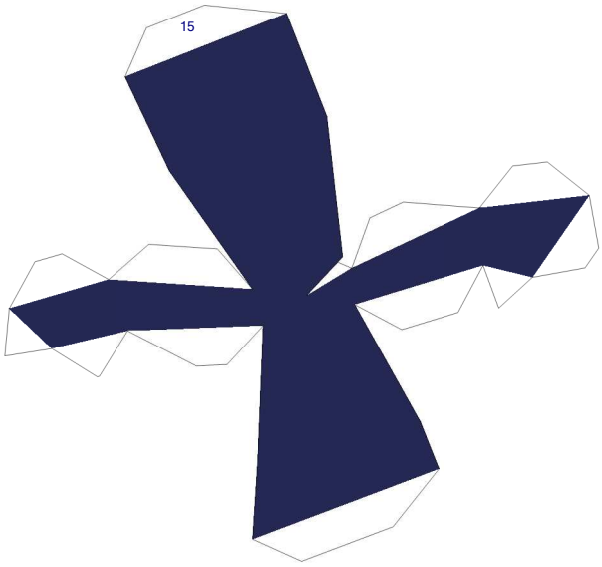

Start the model at the mouth. Build it until you get to the top. Glue one tab of piece 6 at a time. Glue the teeth to the mouth before building it. Be carefull, they are small. Glue the eyes after the head is built.

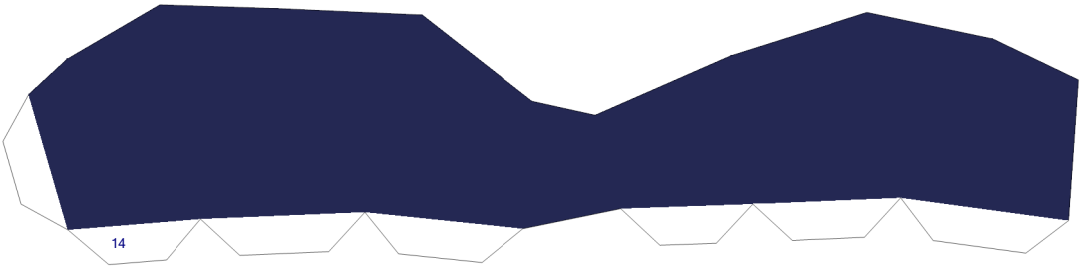

Whwn building the eyes, build the regular one and glue the 2d parts on top of it. Shape them at will. It's not necessary to fold them.

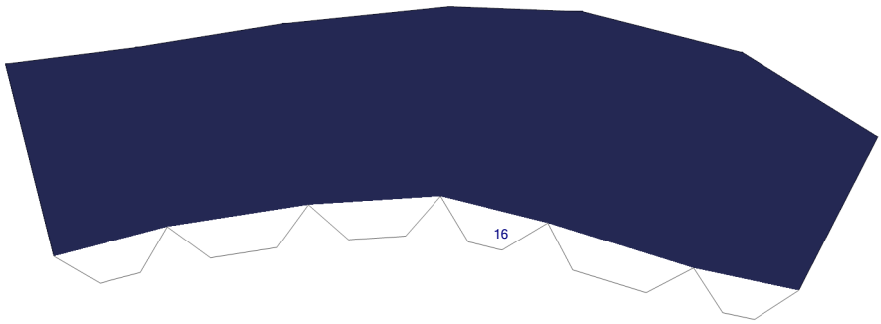

29
42
21
20

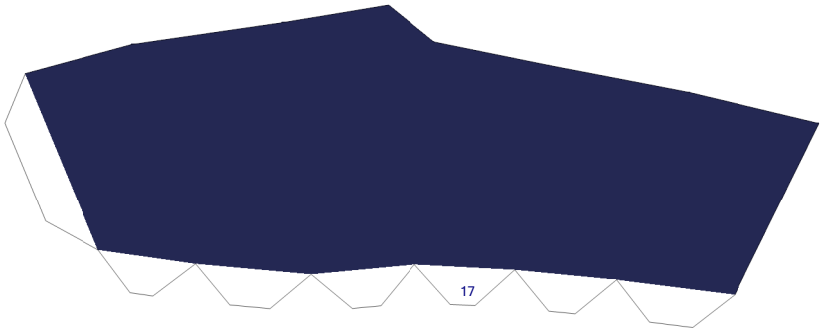

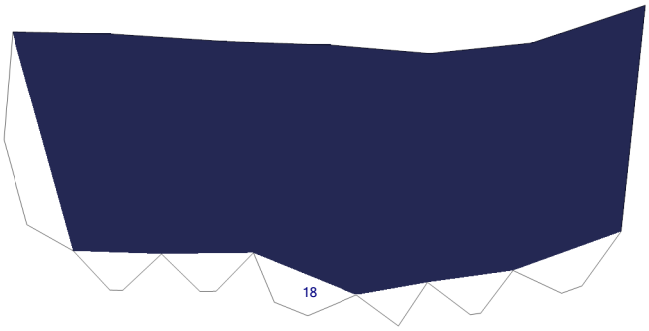

Start the arms at the fingers.
Join pieces 15 and 24 to
pieces 16 and 25 respectivelly
before joining them to the
fingers. Join both of the arms
and pieces 20 and 21 before
gluing it to the part already built.

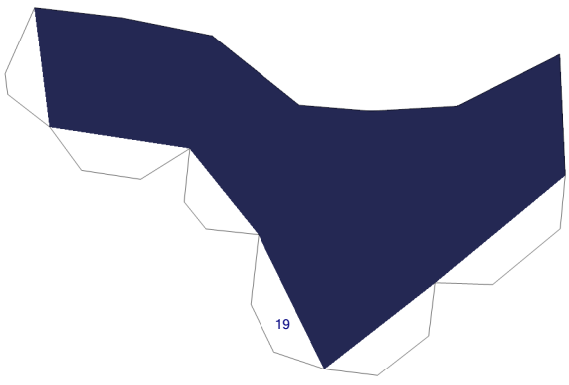

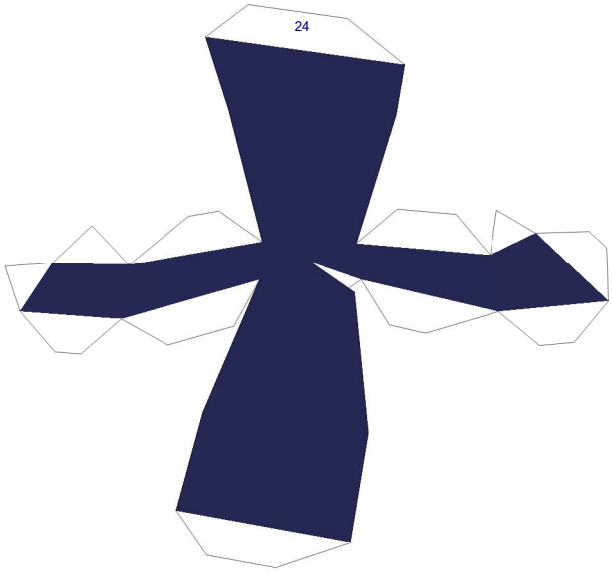

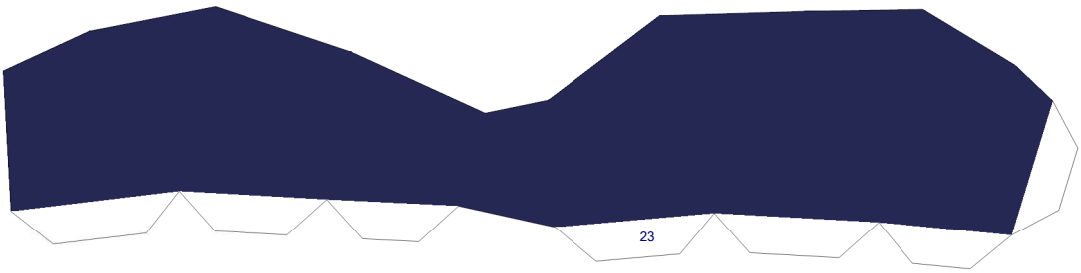

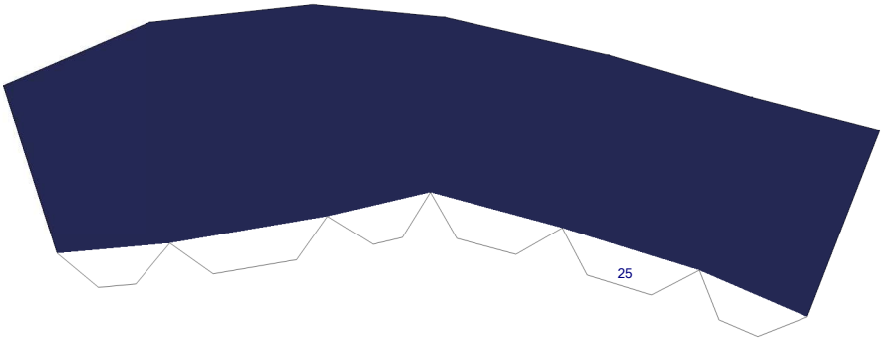

Reinforce the connection
of the arms and the body
and the legs and the body.
Use some scrap paper and
glue it on the connections.
Don't use a lot of glue and do
this while you can apply presure
from inside.

Start the legs at the toes and work up. The connections here MUST be reinfoced.

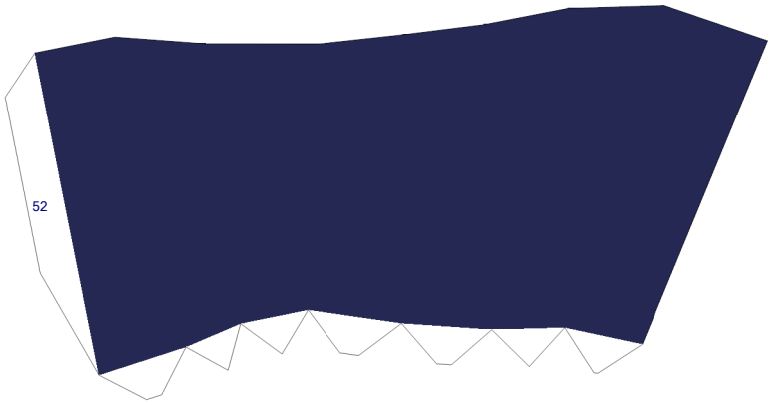

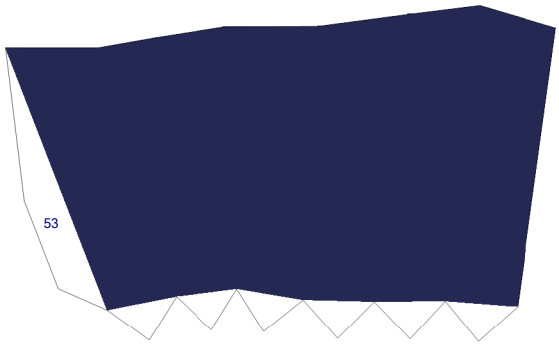

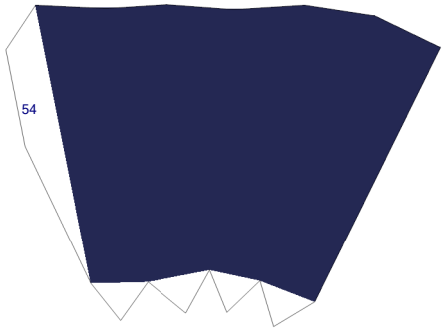

8/11 (row2 col3)

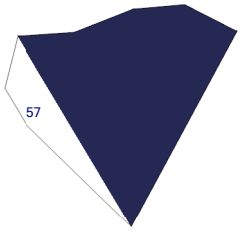

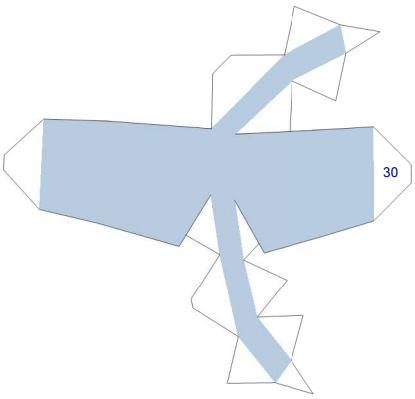

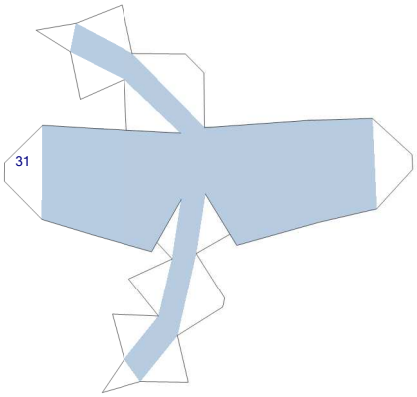

Close at the tip
of the tail, but
before closing
glue the tail details.

Glue the details as you go.

Following the order and indicated

by numbers. Use the pdo as a reference.
