

Redeemed Riven's Runic Blade

from "League of Legends"

3D-model fan-made AND unfolded
by Eu Tyto Alba (towerdweller.com)
(eutytoalba.deviantart.com)

309 parts; 41 pages (Letter);
5ft 10in (1778mm) long from tip to pommel

* The green parts filling the cracks are only spacers for the sword shards.
I did this intending that the sword shards be attached to each other with segments of hard wire (such as coat hanger) to give the shards an appearance of actually floating, as they do in Riven's artwork.
