# SEAWISE GIANT

## Paper Model Kit

1:1000
SCALE

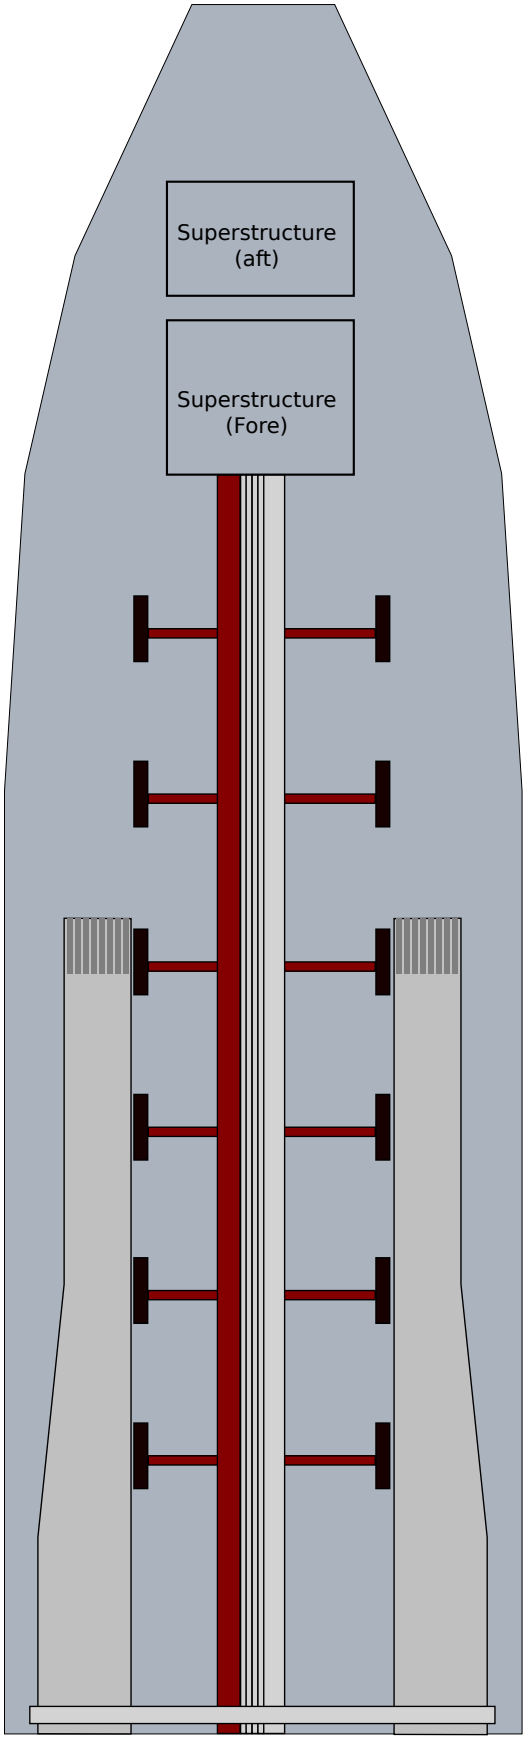

The Seawise Giant was an ULCC tanker vessel most famous for being the largest moving object ever made by mankind. Constructed by Sumitomo Heavy Industries, Seawise Giant was launched in 1979. With a length of 458.45 meters, Seawise Giant was fourteen meters longer than the Empire State Building is high. During the Iran-Iraq war, Seawise Giant was struck by Iraqi Exocets while crossing the Strait of Hormuz. She subsequently caught fire, sank, and was declared a total loss. After the war, she was refloated and rechristened as Happy Giant. Her longest tenure was with Loki Stream, AS as "Jahre Viking", where she was featured on Jeremy Clarkson's Extreme Machines, a forerunner of the famous Top Gear franchise. In 2004, Jahre Viking was repurposed as an FSO unit under the name Knock Nevis. She was taken out of service in 2009, and made her final voyage to the Alang shipbreaking yard in Gujarat.
