

Togekiss

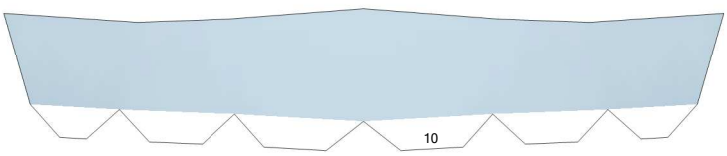

By Brandon

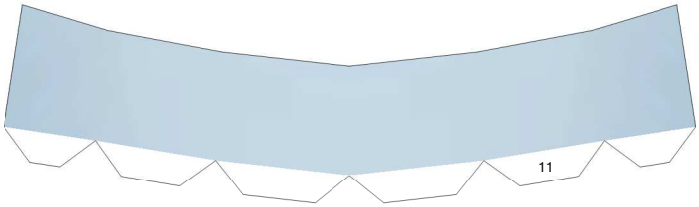

Build by LuIS

PaPerPokés
www.pokemonpapercraft.net

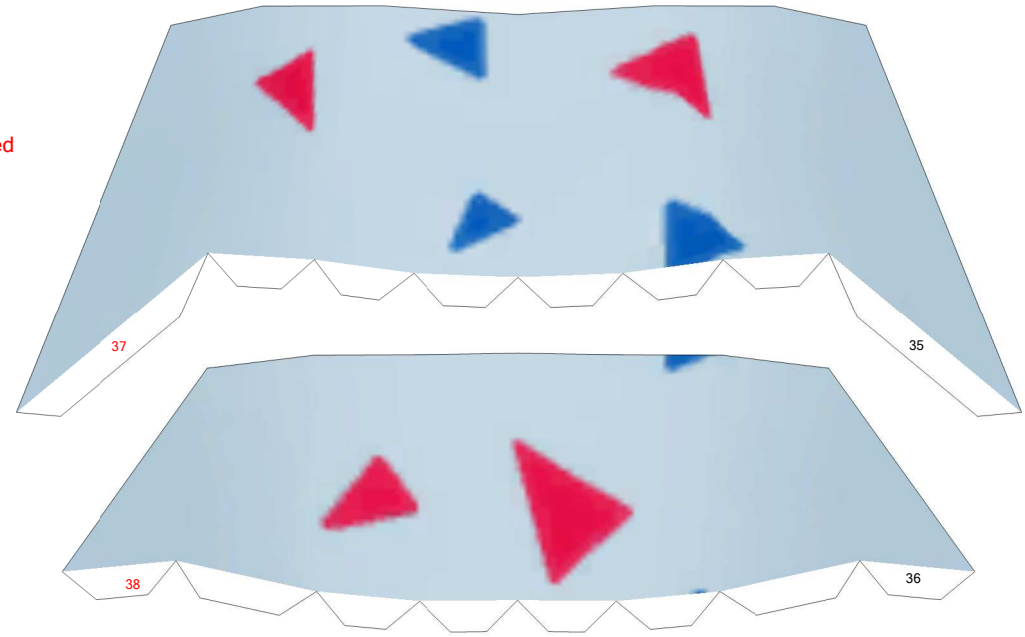

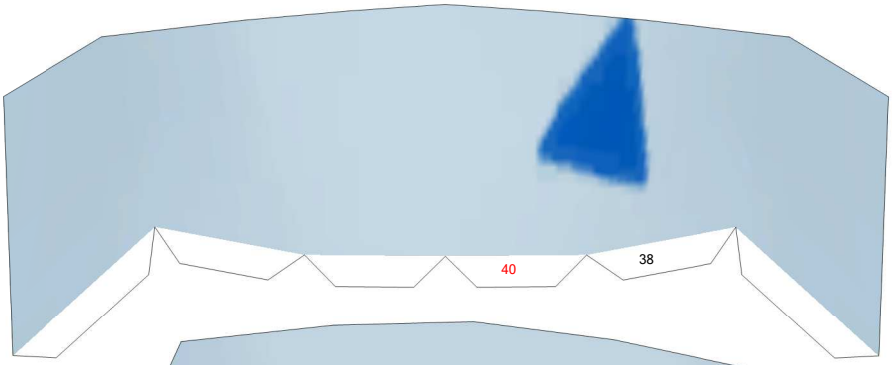

If you plan on building the model with the LOWER wings, follow the black numbers.
If you wanna build the one with the UPPER wings, follow the red numbers.

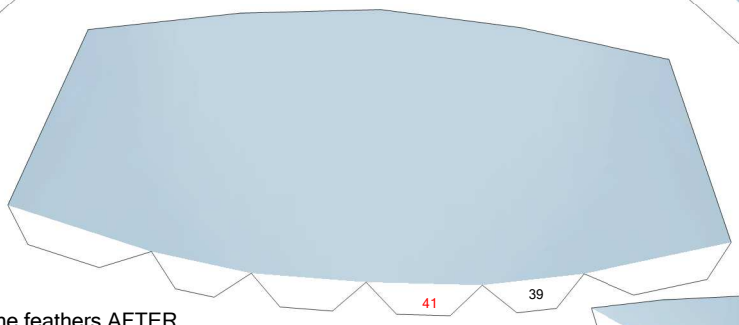

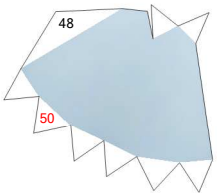

Fold the lines in red

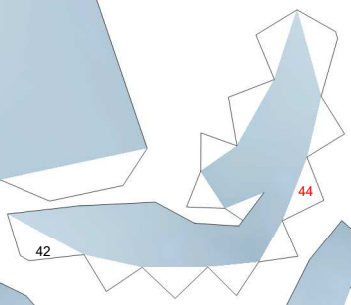

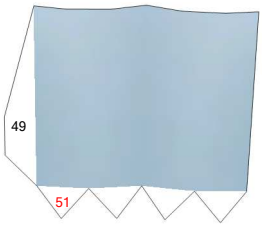

The model stands on it's own, just glue the feet as shown on the pic. I suggest doing it BEFORE closing it, so if it doesn't stand, you can put some weight inside.

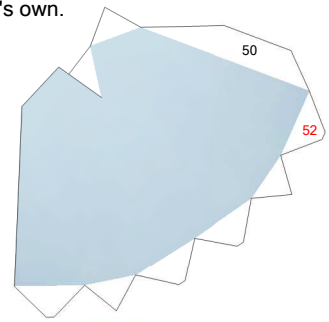

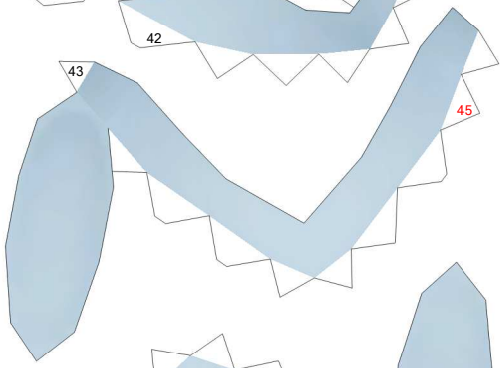

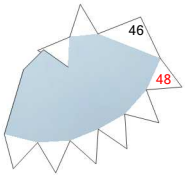

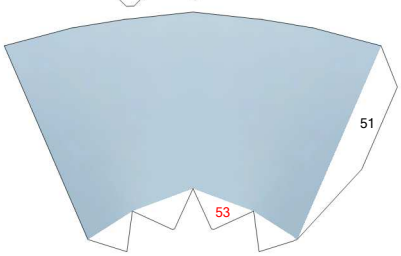

Glue the feathers AFTER the model is closed and standing on it's own.

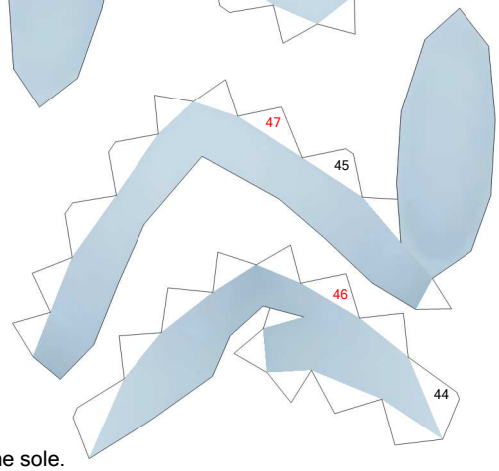

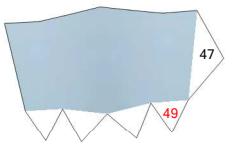

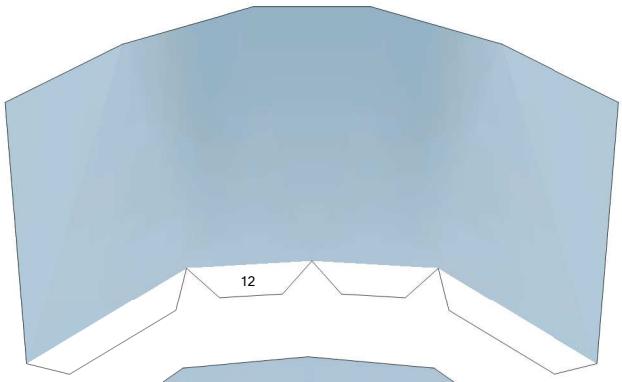

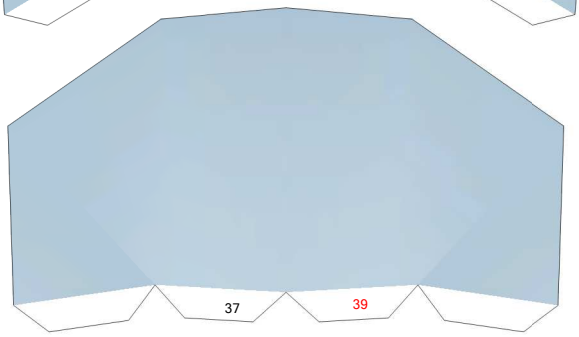

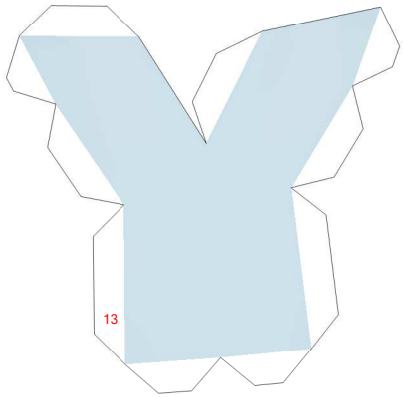

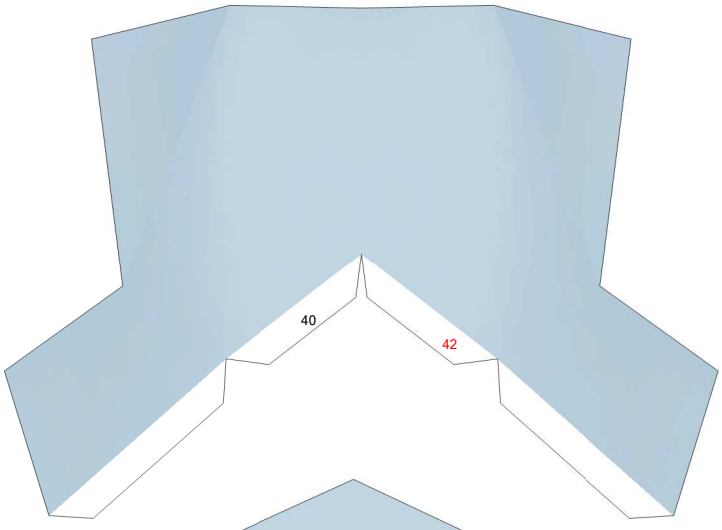

Close the feet at the sole.

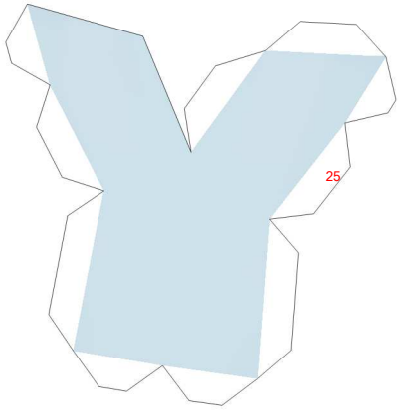

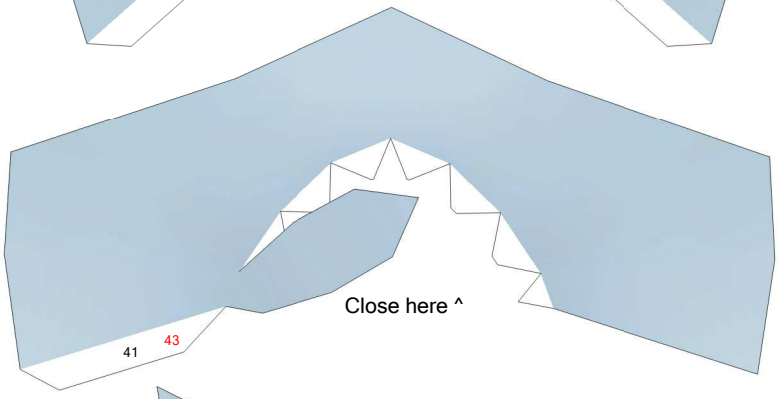

The pieces with the red numbers are used for the upper wings.

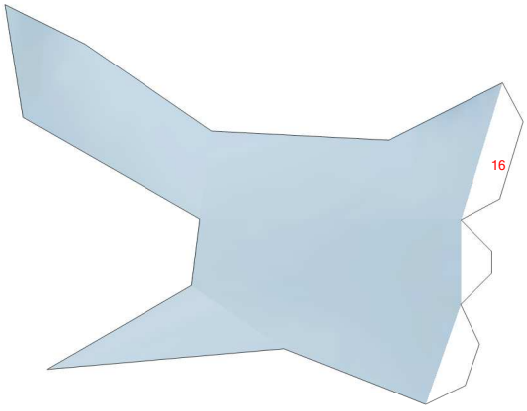

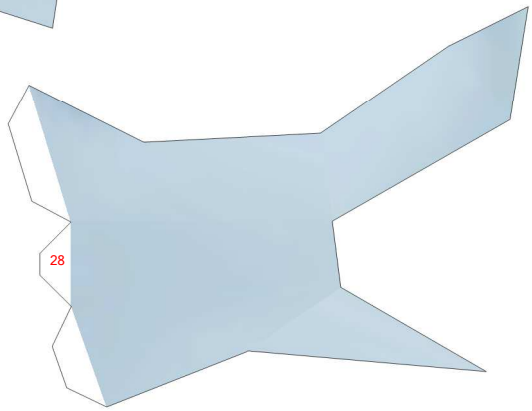

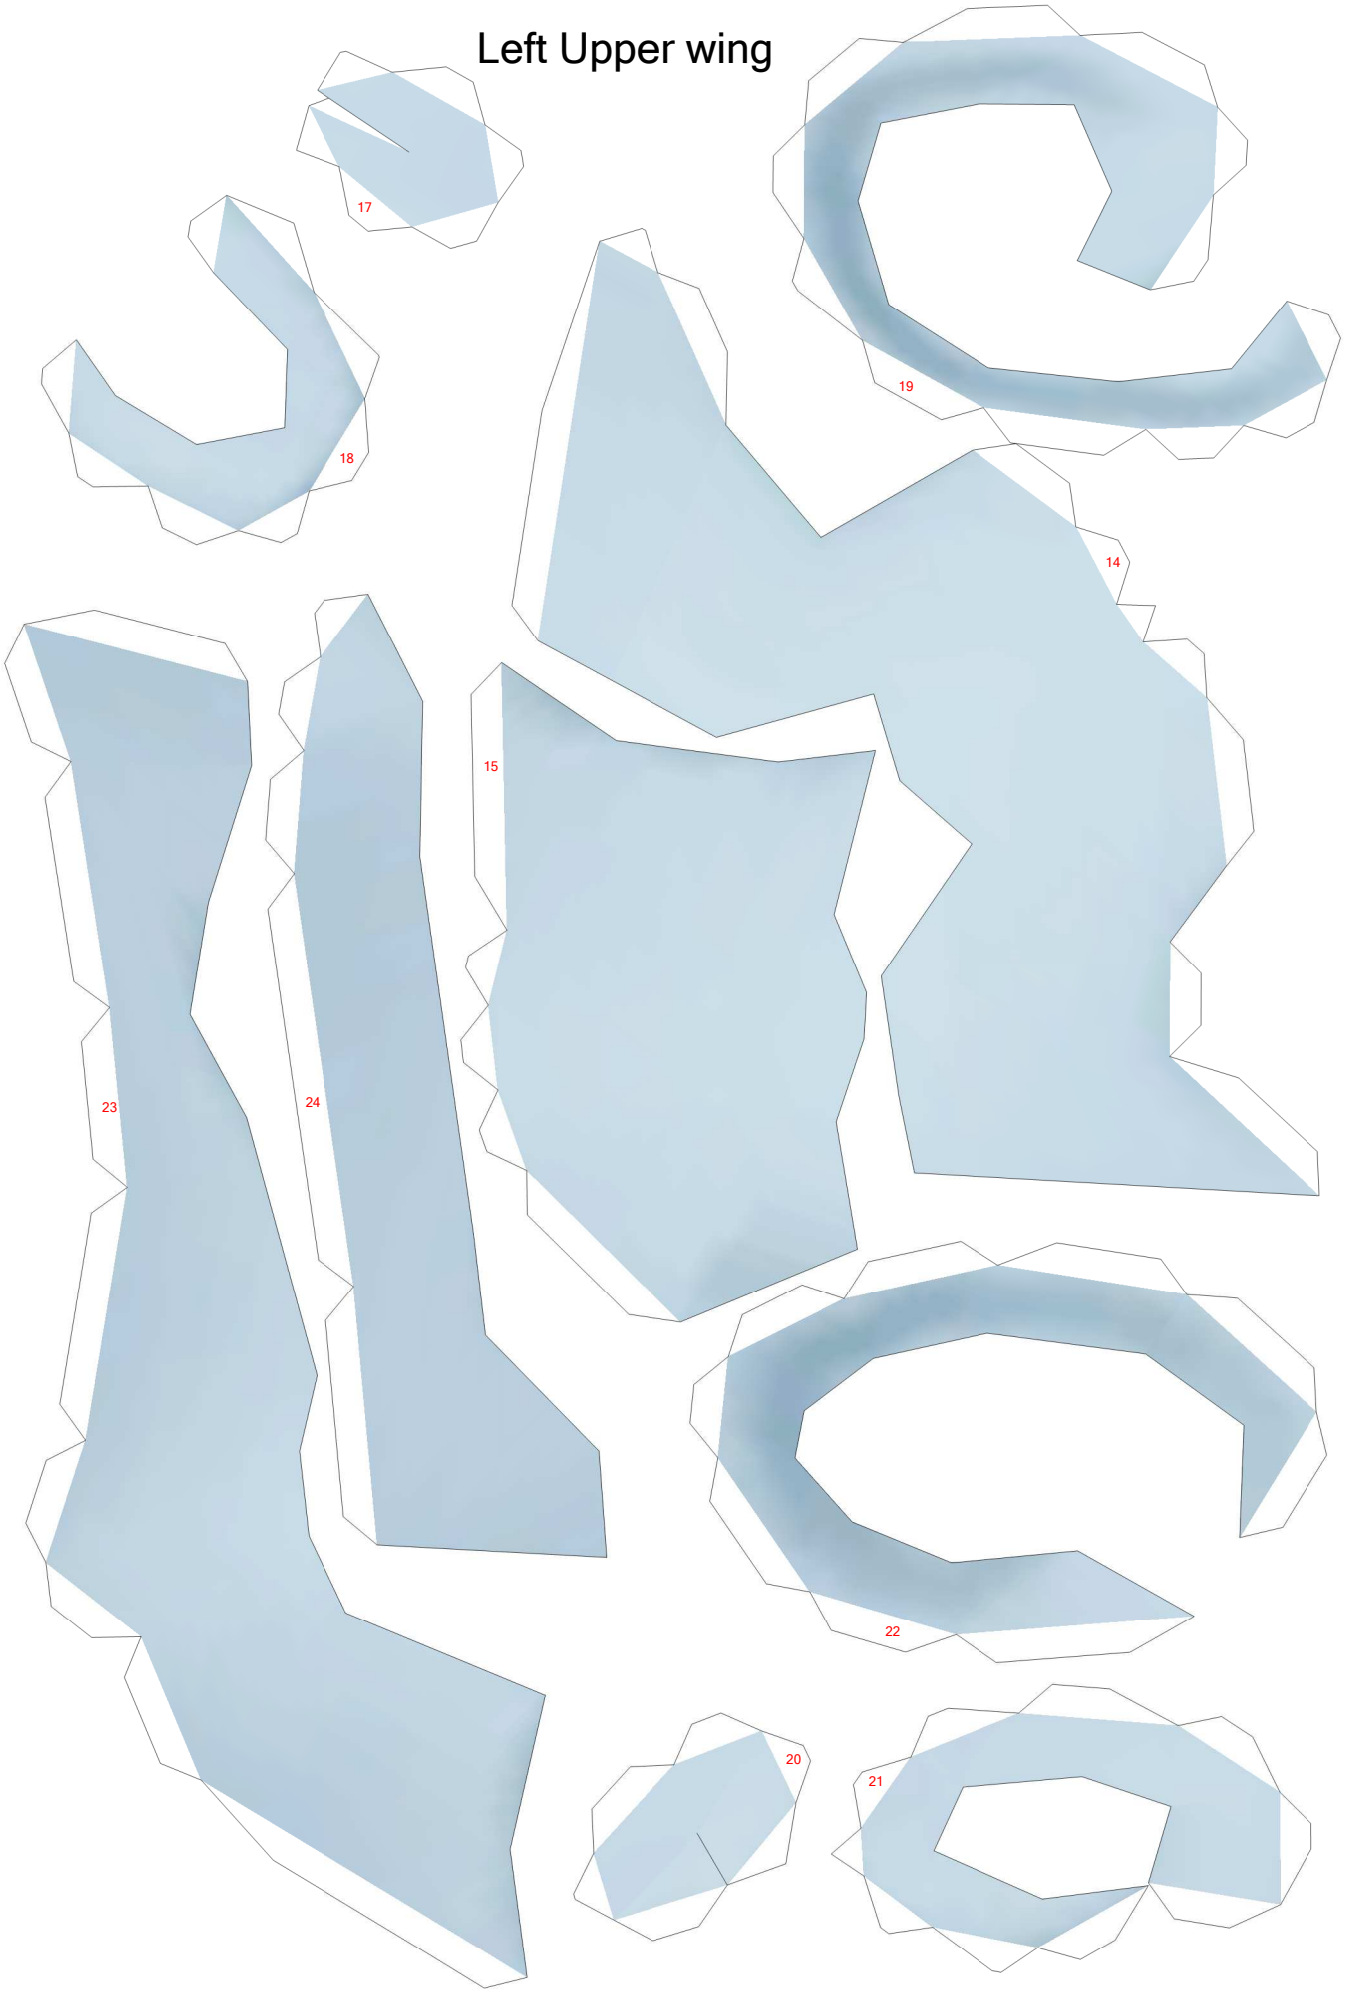

Close here ^

Glue the wings to the two first chest pieces and glue the whole set to the built part.

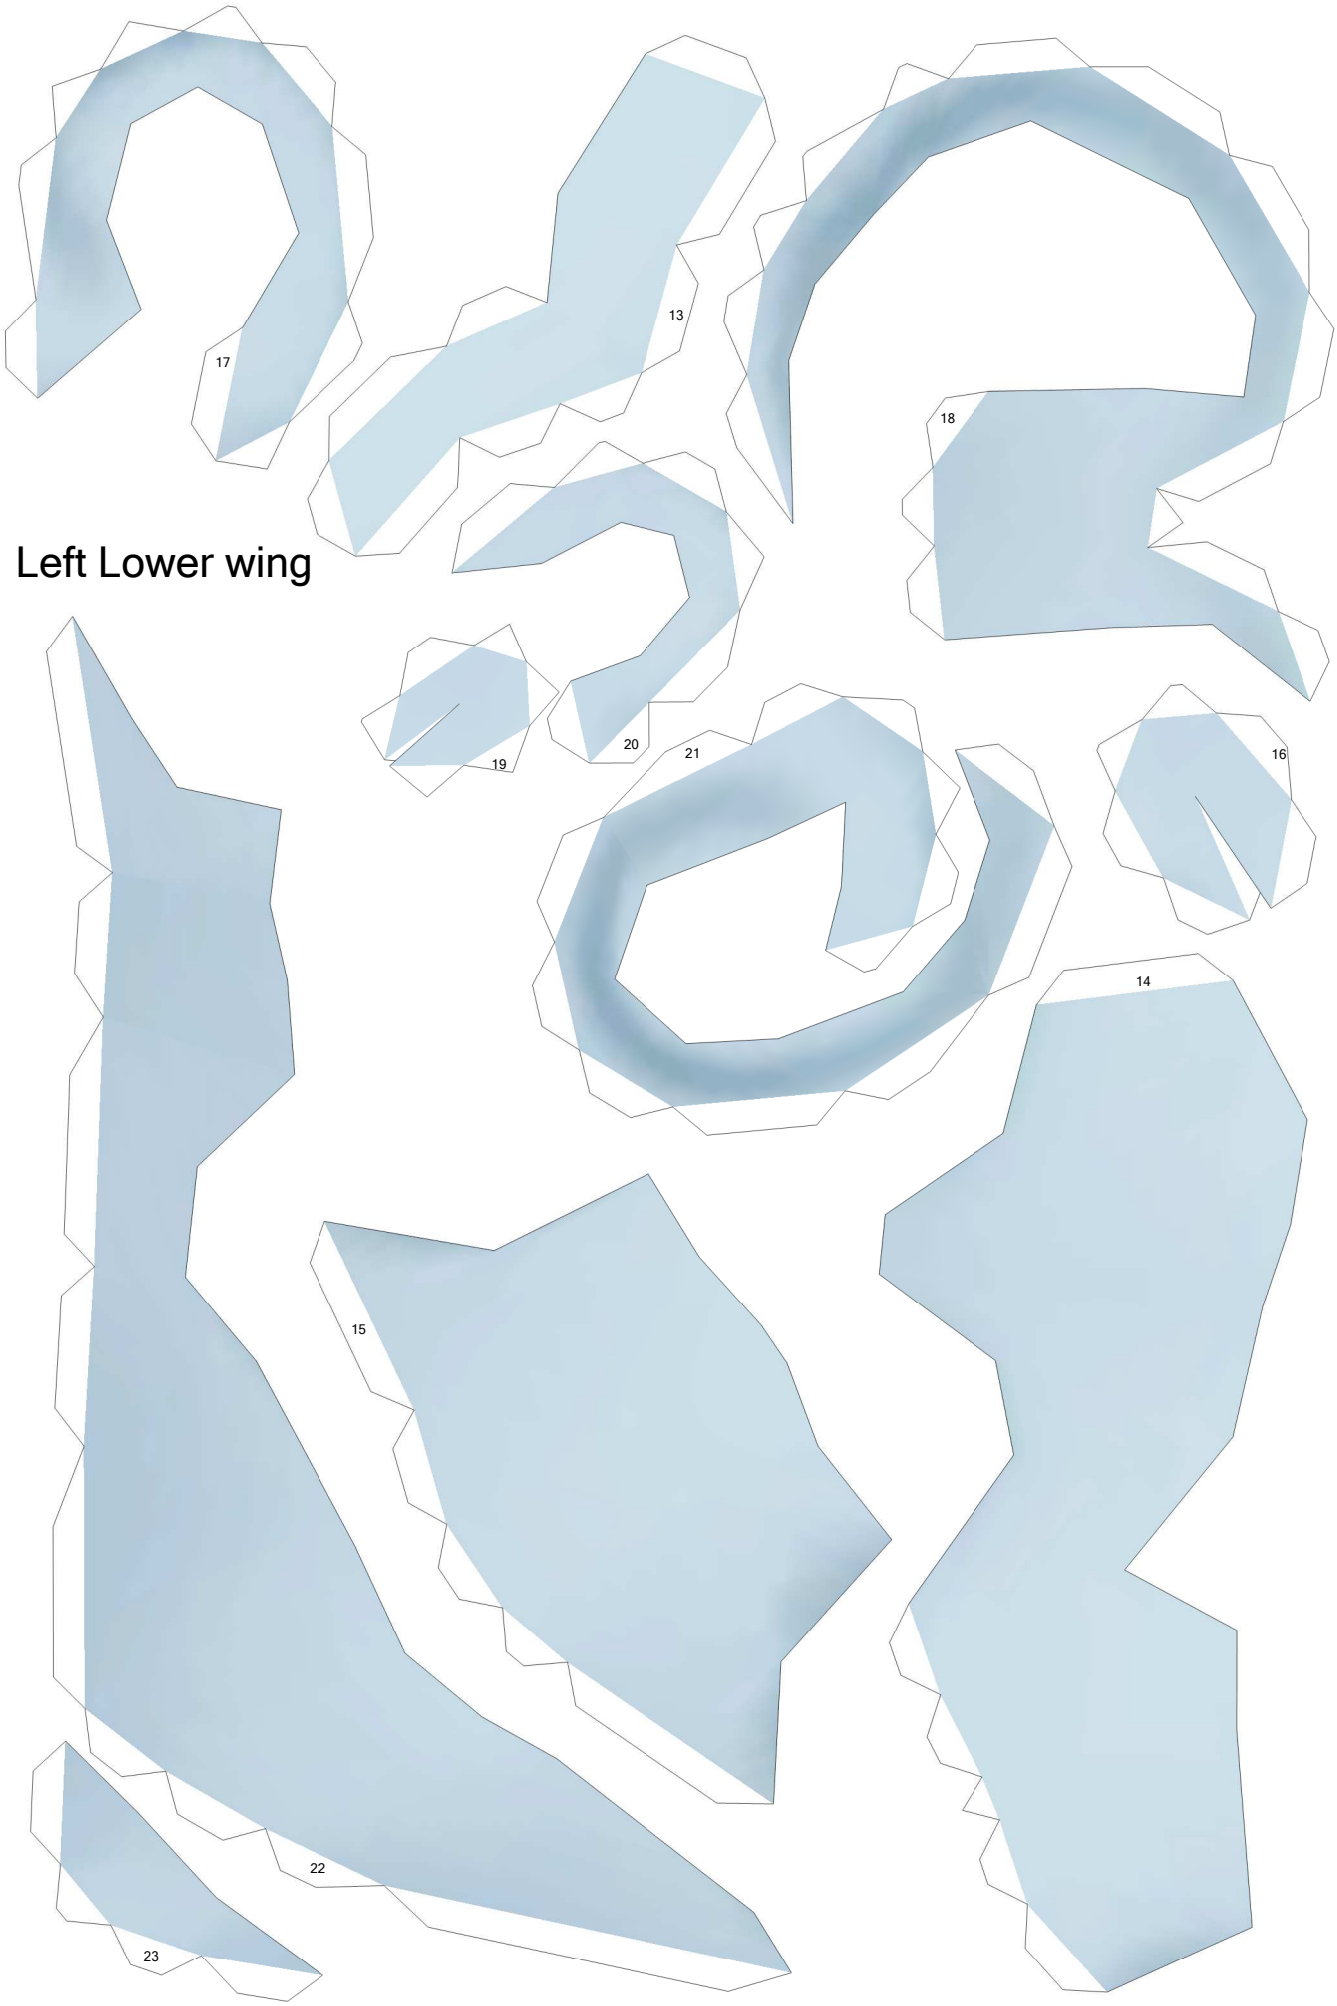

Left Upper wing

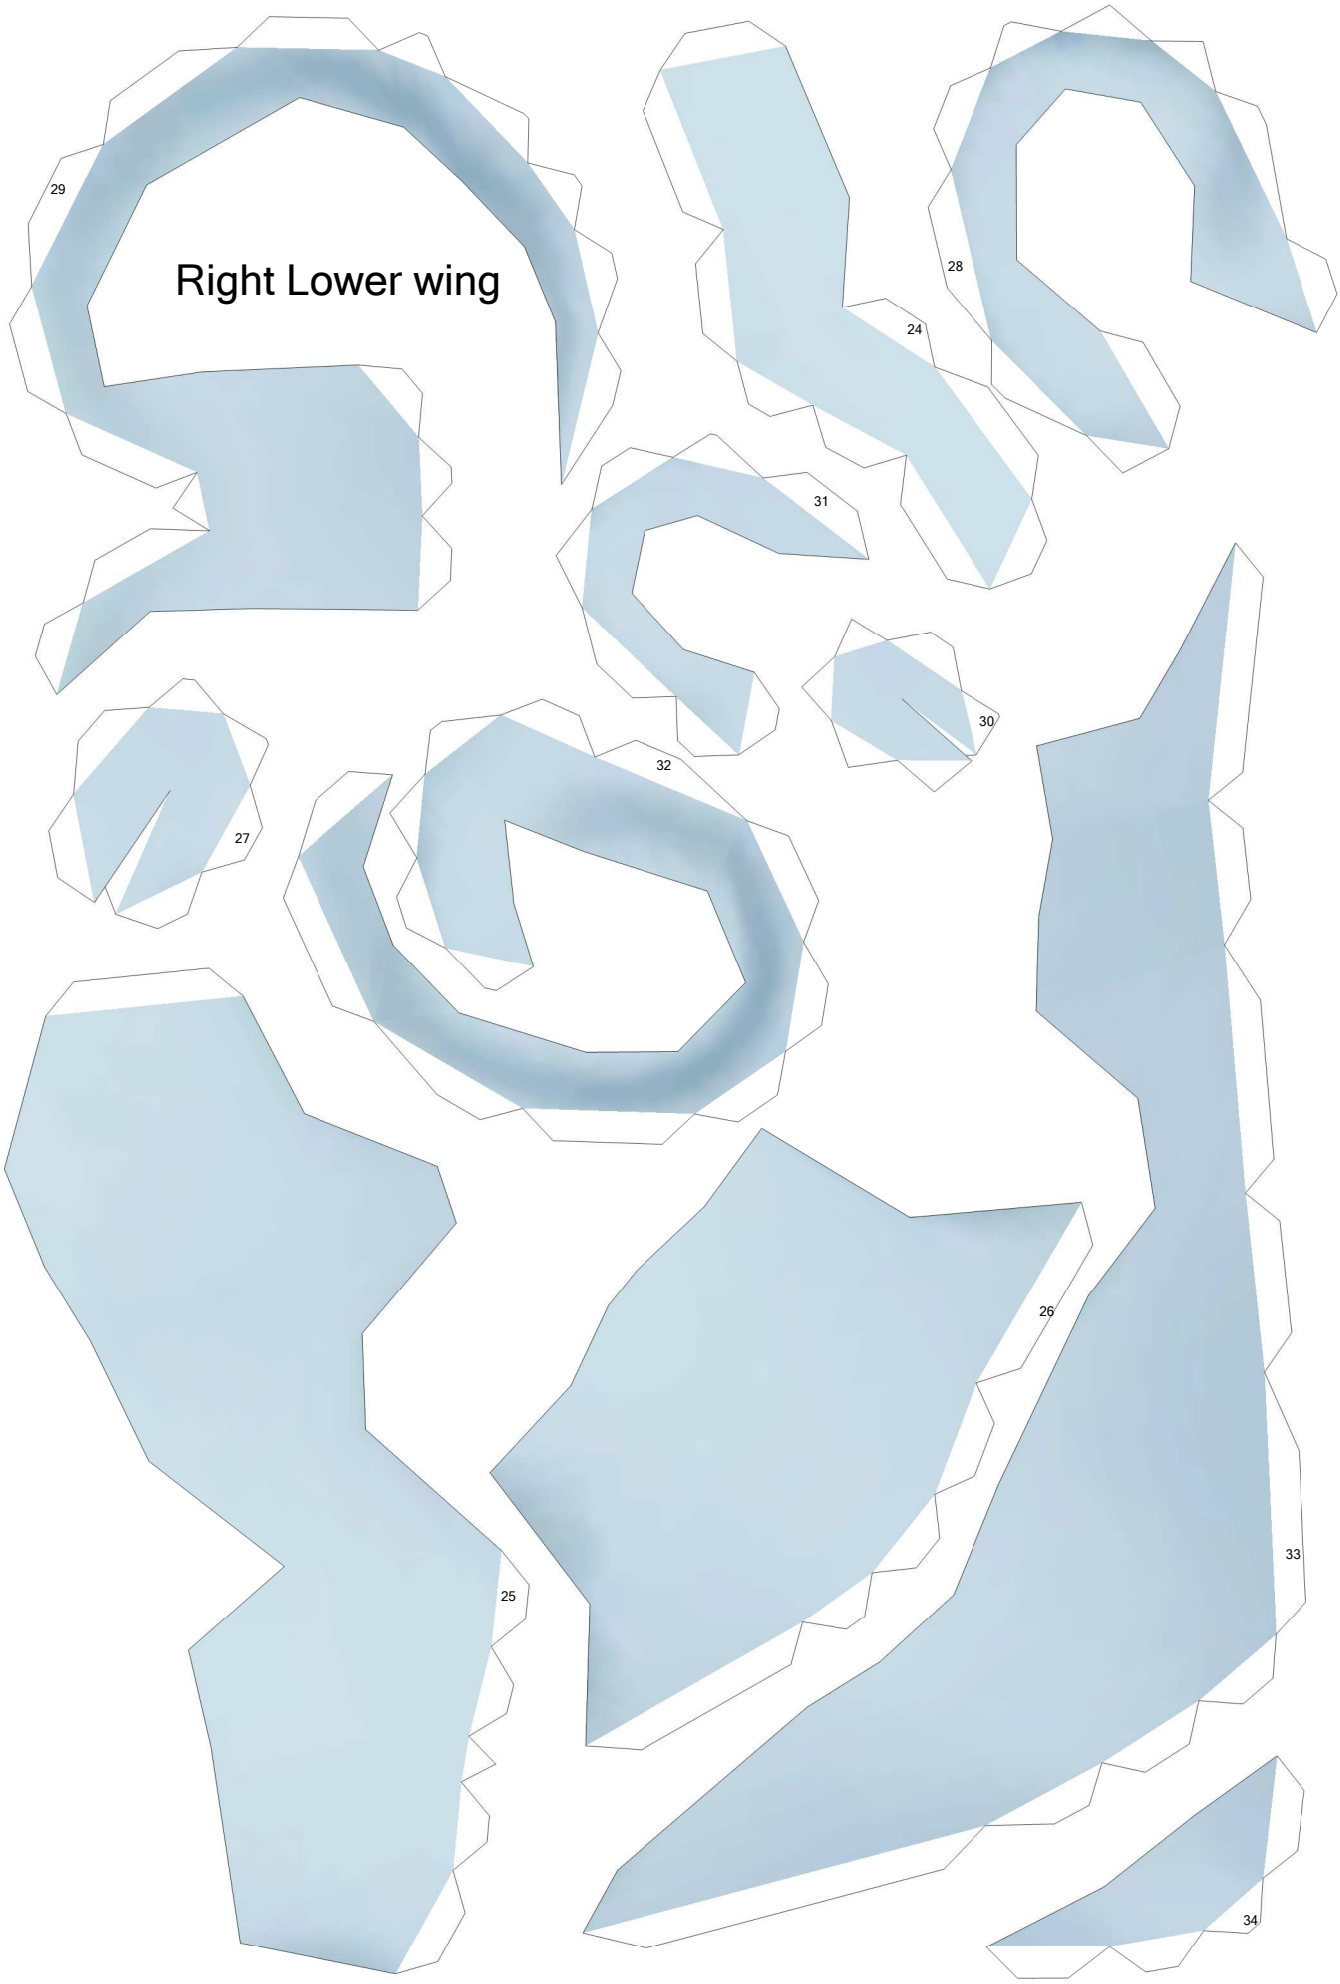

Right Upper wing

Left Lower wing

Right Lower wing
