DISSIDIA FINAL FANTASY.

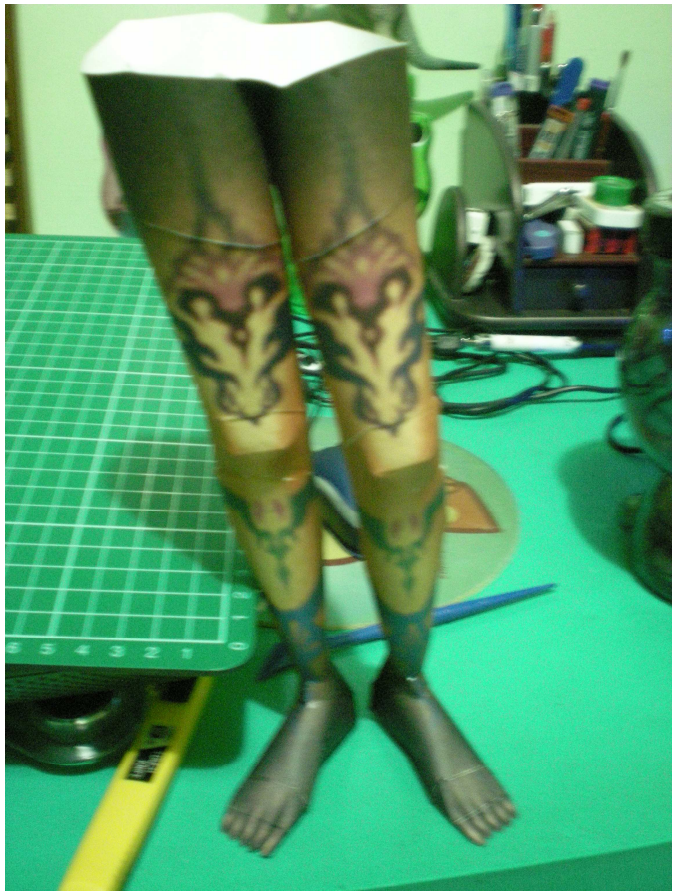

Ultimecia

Start building her legs first.

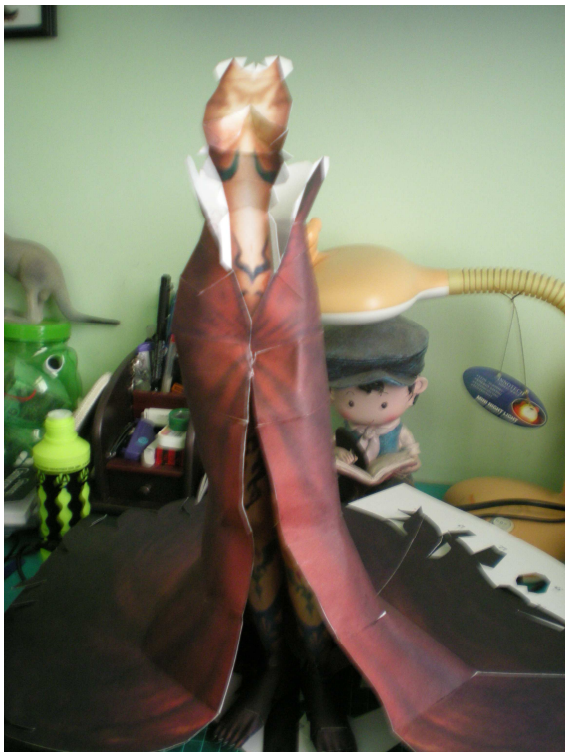

Then, combine both of her legs.

Then start building her skirt,outer part first, then the inner part. Glue them together.

Glue her skirt to her the top part of her legs. Then, continue up her waist.

After that, start building the fur around her waistline. Double-side and trim when necessary. Glue the backs of tabs with similar symbols/letters together.

Now, build her fingers.

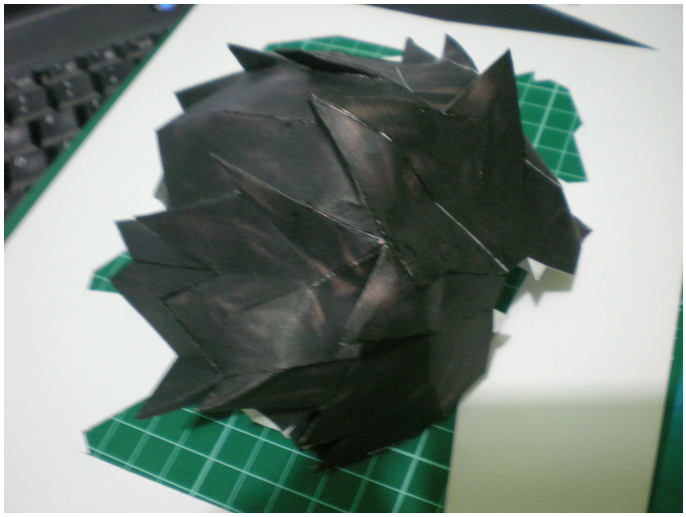

Continue with her hand and arms, then glue them to the dress.

Glue the fur too, then construct the huge fur collar.

Then, build her wings and glue them to the fur collar.

Glue the collar and wings to her dress. It isn't easy, but use lots of glue and squeeze her shoulders and they will fit in.

Now make her face, starting from the neck until the forehead. Glue it to her body.

Now, construct her long white hair and attach to her head.

Make her horns too.

Close the model by attaching the horns to her head.

Add the necklace, earrings and headdress and you have completed Ultimecia!

Now, you have your very own time-manipulating sorceress from the future who hates a certain emo SeeD.
